PAUL C. BLANK, G. M. 2-c

SERVES ON PACIFIC—Paul C. Blank, son of Mr. and Mrs. John Blank of Klemme, is a Gunner's Mate 2-c on the U. S. S. Van Valkenburgh. He enlisted Sept. 22, 1941, and in January, 1942, was sent to Treasurer Island from where he went to sea until the spring of 1944. He was sent to a rest camp at Norfolk, Va., then spent 40 days at home on furlough. He is again back on the Pacific.

BILL GROSSHUESCH MEETS BASKETBALL STARS

Fort Benning, Ga.

Dear Jergie:

Want to inform you of my change in address which I'll put on back.

Just finished E. C. C. and now accepted for E. R. R. C., which is a hard course.

I play on the 1st string basketball team and we have won most of our games so far. Mel Baer, one of the nation's leading scorers last year, also plays and he's been averaging over 21 points per game. I pal around with him all the time for he's also in E. R. R. C. too. I've been playing guard and have run across some sharp ball players Hamilton of U. of Michigan; Vance of Illinois Whiz Kids; Tico of Kentucky; Kelly of Notre Dame; Gabbernelle of Georgetown. Most of these fellows were All-Americans and you sure can tell it if you ever run up against them on the court.

I enjoyed my Christmas very much, but it wasn't like home. I want to thank all the friends who sent me Christmas packages and cards. Everyone was appreciated.

Looks like the Shamrocks are going places. The State Tournament ought to be their goal.

Best of wishes for the coming New Year.

Your friend, Bill.

Pvt. Calvin W. Grosshuesch,
24 Co. 1st STR. ERRC 2o
Fort Benning, Gorgia.

HANCOCK CO. ASSESSORS WILL GO TO SCHOOL JAN. 8

The annual school of instruction for Hancock County assessors will be held at the courthouse in Garner on Monday, January 8th beginning at 10:30 a. m.

Assessors from all over Hancock county will receive instruction on the 1945 real estate and personal property assessment. A representative from the State Tax Commission at Des Moines is expected to be present.

Hancock county has 16 township and 8 corporation assessors.

Orville Bridges is the corporation assessor for Klemme.

Mrs. R. W. Elder Hostess To WSCS Presidents

Mrs. R. W. Elder entertained the past presidents and the present president of the W. S. C. S. of the Klemme Methodist Church at her home Thursday afternoon. The afternoon was spent in visiting and gifts were exchanged. Mrs. Elder served a nice lunch to the ladies.

Mrs. H. E. Harvey was a guest.

LEDGES DEER HERD HAS INCREASED 50 PER CENT

The recently completed deer census on land in and adjacent to the Ledges State Park near Boone revealed 147 native white-tailed deer in the area, an increase of 49 deer over a year ago. Because of extensive crop damage caused by the deer herd, estimated at 500 animals in 1942, special legislation was enacted in the 50th General Assembly to allow the State Conservation Commission to take control measures. During the winter of 1943, 110 deer were shot and live-trapped by state employees in the campaign to reduce and disperse the herd. The deer census made early this spring revealed a total of 98 deer in the area. Property damage in and near the park has been greatly reduced, and control measures are not expected to be necessary during the winter. However, with a 50 percent annual increase indicated by the census, game technicians believe that herd reduction will again be necessary within a few years.

Christmas Seals Sale $37 Total At Goodell

Mrs. Francis Finn, chairman of the Christmas Seal Sales at Goodell reports a total sale of $37 for the seals.

CONSERVATION COMMISSION SAYS "LOTS OF RABBITS"

Cottontail rabbits, the number one game animal in the United States and Iowa, were called numerous throughout the state and abundant in many localities by F. T. Schwob, State Conservation Director. "Cottontails have been on the increase since 1939, when there was a low in the 'rabbit cycle,' and this year are nearing a peak population. Tularemia or rabbit fever has declined during this period, and only one case of the disease has been reported to date this year, compared to more than 168 in 1939."

The daily bag limit on rabbits is 10, and there is no possession limit. Anyone wishing to keep rabbits in cold storage may possess an unlimited number without storage permits until March 10. After that date free storage permits may be secured by writing the State Conservation Commission. Rabbits are the only game in Iowa that may be legally sold, and large numbers are finding their way into local butcher shops and restaurants for the first time in several years. Rabbit hunts and feeds sponsored by sportsmen's groups, civic organizations, and other clubs are becoming increasingly common. The season on cottontails closes March 1st.

The following directors were elected: Mrs. W. G. Williams, Fred C. Missal, Mrs. N. E. Brear, Mrs. E. J. Steil, Mrs. E. H. Phillips, Mrs. C. E. Barnes and Dr. C. V. Hamilton.

HANCOCK COUNTY OVER QUOTA IN 'E' BOND SALES

Hancock County has gone over its "E" Bond quota in the Sixth War Loan Drive, according to Mr. Clark Armstrong of Britt, County War Finance chairman. Hancock county ranks 10th in the State in "E" bond sales.

MR. AND MRS. ALBERT ETCHEN OBSERVE 25TH ANNIVERSARY

Large Number Of Relatives Had Surprise Dinner For Them

Sunday, December 31st, 1944, was the 25th, or Silver Wedding, Anniversary of Mr. and Mrs. Albert Etchen who reside on their farm southwest of Klemme.

Their daughters, Darlene and Eloise, planned and successfully carried out, a surprise dinner in their honor Sunday noon.

Those present were Rev. and Mrs. Calvin Grosshuesch; Mr. and Mrs. Carl Swanson and family; Mr. and Mrs. Reuben Greiman and family of Des Moines; Mr. and Mrs. Henry Klinge, and Nellie Rae; Mr. and Mrs. W. F Greiman and Robert; Mr. and Mrs. Herbert Greiman and Junior: Mr. and Mrs. Aaron Greiman and family of Garner.

The assembled guests presented Mr and Mrs. Etchen with a purse of silver in remembrance of the happy occasion.

Their son, Winton, who is serving in the armed forces, could not be present. However, he sent his greetings along with the sum of twenty-five dollars for the occasion. Miss Eloise provided the beautiful silver and white cake for the dinner.

COWS AT AUG. LAU SALE SOLD FOR AVERAGE OF $140

There was a large crowd at the Aug. Lau sale last Wednesday and bidding was lively.

Mr. Lau's herd of Brown Swiss registered and grade cattle, fifteen in number, sold for an average of $140.

Mr. and Mrs. Lau will move to Klemme February 1st, and Mr. Lau will devote his time to selling hybrid seed corn.

A REMINDER FROM PAUL HENDERSON, EX. DIRECTOR

Just a reminder that all reports of War Harvest Certificate winners must reach the State Farm Bureau office not later than January 10 if they are to be considered for county and state prizes. Corn or beans harvested this fall or winter before January 1, 1945, will be counted in the contest.

Anyone who combined 100 or more acres of soybeans for other farmers or picked 150 or more acres of corn for others is entitled to receive a War Harvest Certificate from the Iowa Farm Bureau.

Make your report to Paul Henderson, Hancock County Extension Director before January 8, 1945.

Liberty Couple Celebrated Their Golden Anniversary

S. SGT. ALVIN R. BLANK

UNIT MAKES RECORD— S. Sgt. Alvin R. Blank, son of Mr. and Mrs. John Blank of Klemme, is a member of the 352nd fighter group, a high scoring P-51 outfit, 8th Air Force, which shot down 38 nazi planes over Germany Nov. 2 to establish a new group record for enemy craft destroyed in a single day.

ALLEN BARZ ADVANCED TO RANK OF CORPORAL

Allen Barz, son of Mrs. Clara Barz of Klemme on Christmas Day was advanced from Private to Corporal. Cpl. Barz is now engaged in a specialized course in radio in high altitude bombing.

His address now is:

Cpl. Allen K. Barz, 37685307,
B. M. C. No. 3, Sec. K.,
Boca Raton Field, Florida.

Old Friends Surprised Schneiders Sunday Afternoon

Old friends and neighbors staged a surprise party on Mr. and Mrs Elmer Schneider, who recently moved to the Fred Becker farm east of Klemme.

The following self invited guests arrived at the Schneider home at about 2:30 o'clock:

Mr. and Mrs. George Ruka, Mr and Mrs. Harry Carpenter, Mrs Mary Dominy, Josephine and Howard, Mr. and Mrs. O. Sandberg and Edith, Mr. and Mrs. Amos Hanson and Roger and Bobbie Jenison, Mrs. John Ahrenkeil, Olive and Warner Butts and Mrs. Alva Newgaard and children, all of Goodell and vicinity; Mr. and Mrs. Earl Ruka, and Mr. and Mrs. Matt Smith and Ruth of Klemme.

All enjoyed a good time visiting and later enjoyed a nice lunch.

Mr. and Mrs. Schneider were presented with a nice blanket.

SO FAR IN DRIVE 147 NEW FARM BUREAU MEMBERS

With 3 townships not reporting at the Farm Bureau check-up held last Wednesday and several more townships only partly reporting, it looks like a bang-up campaign. There have been 147 new members reported for 1945 so far, as follows: Bingham, 5; Madison, 7; Ellington, 16; Concord, 11; Garfield, 7; Britt, 7; Orthel, 21; Boone, 4, Erin, 6; Liberty, 13; Ell, 13; Avery 11; Amsterdam, 19; Magor, 7.

Total to date, 960 paid members for 1945.

Watch Night Party Held At The Methodist Church Sunday Eve

There was a large crowd present at the Methodist Church Sunday evening for the Annual Watch Party and New Year's Eve service.

The Misses Novella Bredbenner and Thelma Chambers were in charge of games and entertainment after which lunch was served. Rev. Harvey then conducted a half hour New Year's Eve service.

Australia was the first nation to make relations between capital and labor a matter for special courts of arbitration.

WADES SURPRISED ON GOLDEN WEDDING DAY

Were Married Dec. 24, 1894 At Vandalia, Illinois

Mr. and Mrs Henry Wade of northwest of Klemme were surprised Sunday by friends and neighbors who came to help them celebrate their Golden Wedding anniversary.

The guests brought well filled baskets of food and a pot-luck dinner, served cafeteria, was enjoyed by all. Two decorated cakes formed the center-piece, one cake being topped with a minature bride and groom and was baked by Mrs John Knoedler, and the other by Pearl Wade.

In the afternoon a short program was given by Pearl Wade and Doris Spitler. The first number was a mock wedding and the characters were as follows: Bride, Pearl Wade Groom, Tenus Dirks, Best Man, Marvin Wade S 1-c U S. N., and Bridesmaid, Doris Spitler. The comical minister was Jim Wade.

The wedding party was dressed in an old fashioned way. The bride wore a print dress and lace curtain veil and carried 3 paper roses. The bridesmaid was attired in a pink dress with lace curtain veil, and straw hat trimed with flowers. The groom proudly wore a large red silk bow tie, with his hair parted in the middle and had a mustache. The best man wore his Navy uniform, but also had a mustache. The minister wore glasses spectacles which he cleaned by drawing a cloth through them. He slowly stammered through the ceremony which was read from a Montgomery Ward catalog.

Two accordion solos were played by Doris Spitler, and a duet "What A Friend We Have In Jesus" was played by Pearl Wade and Doris Spitler. A humorous story was read by Pearl Wade on the life of her grandparents.

The story follows:

"John Henry Wade moved to the state of Illinois at the age of 12 years, from Canada with his parents, Mr. and Mrs. Francis Wade.

"Miss Minerva Cordelia Cox came to Illinois with her parents, Mr. and Mrs Thomas Cox from Kentucky when she was 9 years old. When 19 she was united in marriage with Henry Wade on the 25, in Vandalia, Illinois, December 24, 1894. They belonged to the Church of Christ near Clinton. After living in that vicinity 2 years they moved to a farm near Orrick, Mo., by means of a covered wagon. Three years later they moved to a farm near Clinton, Iowa. 27 years ago they, with their son James Wade, settled in their present home near Klemme.

"They have one son, James, 3 grand children, Russell and Marvin Wade who are serving in the U. S Navy, and Pearl, who lives with Mr. and Mrs. Wade."

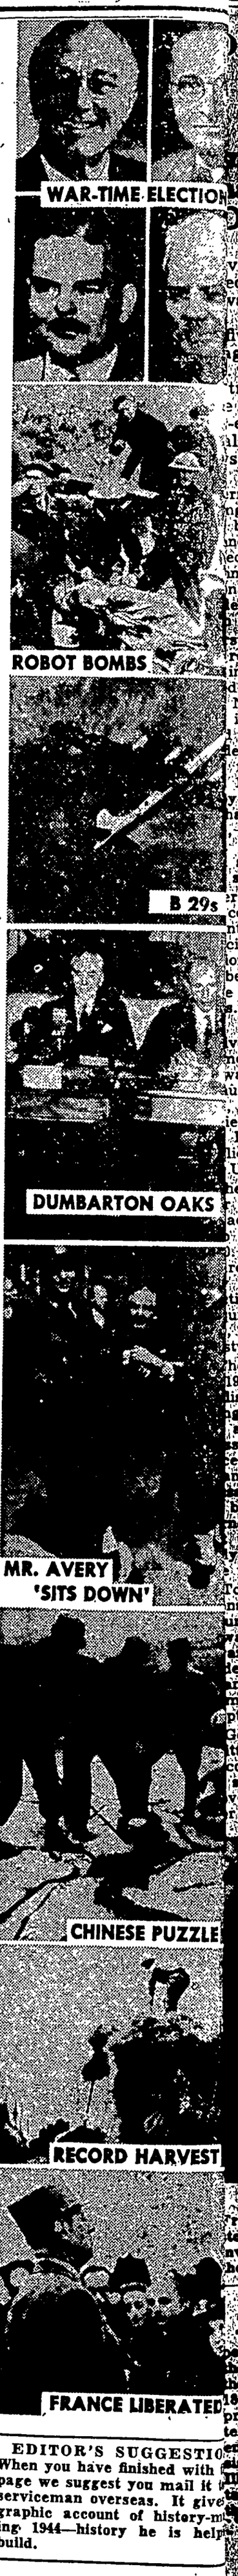
A gift of money was presented to Mr. and Mrs. Wade.

Those present were their grandson, Marvin Wade S 1-c, who surprised them the day before upon his arrival after being overseas 19 months; James Wade, Mason City; Mr. and Mrs. John Knoedler Janice and Janetta, Britt; Mr. and Mrs. Allan Ewing, Miller; Mr and Mrs Asa Legge and Dick; Mrs. William Legge and son, Dick; Mr. and Mrs. Howard Spitler and Doris; Mr. and Mrs. Harm Dirks and family; Mr. and Mrs. Robt. Marshall; Mr. and Mrs. Hauko Barkema; Mr and Mrs. Henry Dirks and Tenus; Mr. and Mrs. Elmer Traeger.

Many cards were received from friends away, and a gift of candy was sent from Mr. and Mrs. Earl Cortlett of Castalia.

The wavelengths of radiant energy are so short that a special unit, the Angstrom, has been established to measure them. An Angstrom is one-two hundred and fifty millionth part of an inch.

The YEAR In REVIEW



Chronology of 1944

THE WAR

January

1—Russians move to within 27 miles of Polish border.

16—Army ends censorship of soldiers' reading matter.
23—U. S. department of justice files anti-trust suit in Lincoln, Neb., against 47 western railroads.
25—Secretary of State Hull and John F. Dulles, representing Dewey, discuss foreign policy.
Senate passes reconversion bill to take care of government surplus sales.
29—Republican campaign opens with radio speeches by Governors Warren of California, Green of Illinois, and Baldwin of Connecticut.
30—Navy reports the construction of 65,000 ships of all types since September 1, 1939.

September

6—Army announces demobilization plans. More than a million men will be discharged when Germany is defeated.
Seventeen processed foods are removed from ration list.
11—Roosevelt meets Churchill in Quebec for military discussions.
15—Nineteen coal mines are seized on the President's orders.
21—Congress recesses until November 14.
28—Ration controls removed from all farm machinery except corn pickers.
30—Birth rate for 1943 increased, census bureau says.

October

5—Strike of Detroit maintenance workers, affecting 33 war plants and 50,000 workers, ends.
6—Super-powered X-ray announced that will photograph through a foot of steel.
7—Peace conference at Dumbarton Oaks, N. H., ends sessions. A general framework for peace and security agreed upon, it is announced.
18—War Production board announces that it has permitted 1,110 manufacturers to resume civilian production.
23—De Gaulle recognized as head of French Provisional government by the U. S. and other United Nations.
25—U. S. and other United Nations resume diplomatic relations with Italy.

November

6—Dept. of Agriculture announces a decline in farm population in last four years amounting to 4,748,000.
7—Nationwide elections held. President Roosevelt reelected by majority of 3,000,000 votes, or 53 per cent of popular vote, winning 36 states and 432 electoral votes. Twenty Democrats and 13 Republicans gain senate seats. Democrats elect 242 representatives, and Republicans 185. Eighteen Republican and 13 Democratic governors elected
14—Congress meets Supplementary appropriations main business.
18—Special committee on wartime living costs reports to President that rise is 29 per cent over January 1, 1941, level.
20—Sixth War loan drive opens
27—Strike on two electric railroads serving Chicago area ends after 17 days
Edward Stettinius appointed secretary of state to succeed Cordell Hull.
30—Assistant attorney-general Norman Littell dismissed by President.

December

1—Strikes in Detroit and Chicago delay production of B-29 bombers.
2—Government halts reconversion plans in 125 cities until munition production meets schedule.
Rear-Adm. Husband Kimmel and Maj. Gen. Walter Short, Pearl Harbor commanders, will not be court-martialed, war and navy boards rule.
4—Draft of agreement of International Civil Aviation conference is completed, and ready for signatures of delegates.
7—Sedition trial of 26 defendants ends in mistrial.
Prison revolt of 25 Atlanta convicts ended.
10—"Work or fight" order issued by War Mobilization Director Byrnes, threatening men in age 26-37 bracket with induction who are not in war jobs.
11—Nobel prizes awarded to five Americans.
13—War prisoners at Fort Sheridan, Ill., go on sit-down strike; 1,300 put on bread and water.
14—Production quotas on machine guns reduced to release workers for more critical items.

SPORTS

January

1—Southern California U. wins annual Rose Bowl game, defeating Washington U. 29-0.
8—Jug McSpaden wins the Los Angeles Open golf tournament with a score of 278.
17—Byron Nelson wins San Francisco Open golf tournament with 275.

February

12—New manager of Boston Braves, Bob Coleman, named to succeed Casey Stengel.
25—Joe Baksi outpointed Tony Mauriello in ten-round heavyweight battle.
28—Sammy Byrd wins the New Orleans Golf tournament with 285.

March

3—Bob Montgomery regains the lightweight title, as recognized in New York, by outpointing Beau Jack.
11—U. of Michigan wins the Big Ten indoor track and field meet at Chicago.
18—Gilbert Dodds bettered his own indoor mile mark in Chicago, with a time of 4:06.4.
18—Alan Ford establishes a new world record for the 100-yard free style swim at 49.7 seconds.
28—U. of Utah captures the N.C.A.A. basketball title by defeating Dartmouth, 42-40, in New York.

April

13—Montreal Canadiens defeat the Chicago Blackhawks for the fourth successive time in the Stanley cup professional ice hockey championship playoff.
18—Major league baseball season opens.

May

5—Charlie Grimm becomes new manager of Chicago Cubs.
6—Pensive wins the Kentucky Derby, Broadcloth was second, and Stir Up third.
13—The Preakness race was won by Pensive.
27—U. of Michigan wins western conference outdoor championship track meet.

June

10—U. of Illinois wins the National Collegiate Athletic association track and field championships.
18—Francisco Segura of Ecuador wins the national clay court tennis title.
24—Mrs. Mildred ("Babe") Didrikson Zaharias defeats Miss Dorothy Germaine to win the Women's Western Open golf championship.
25—A new world record for the two-mile run set by Gunder Hagg in Sweden. His time was 8:46.4.

July

11—National league team wins the All-Star game, 7-1, in Pittsburgh.
17—Willie Pep outpoints Manuel Ortiz, world bantamweight champion, in a 10-round non-title fight in Boston.
30—Miss Ann Curtis improves the woman's 880-yard free style swimming record with a mark of 11:08.6.

August

7—Joe Baksi defeats Lee Savold in 10-round heavyweight fight.
8—Yankee Maid wins the Hambletonian harness race.
12—Miss Dorothy Germaine retains Women's Western Amateur golf title.
20—Bob Hamilton wins the Professional Golfers' association title.
25—Trapshooting championship goes to Leslie Jepsen for breaking 97 targets out of 100.
28—Byron Nelson wins the All-American golf championship.
30—Chicago Bears professional football club defeats the College All Stars, 24-21.

September

6—Ike Williams outpoints Sammy Angott, former lightweight champion.
10—Baltimore captures the International league pennant.
20—Nashville wins the Southern league playoff, defeating Memphis.
21—St. Louis Cardinals clinch National league pennant.
29—Willie Pep retains world featherweight boxing title by defeating Chalky White.

October

1—St. Louis Browns win American league pennant.
3—San Francisco takes Pacific league series, four games to two.
9—ST. LOUIS CARDINALS WIN WORLD SERIES, FOUR GAMES TO TWO.
10—Most valuable baseball players, chosen by Sporting News, are Martin Marion, Cardinal shortstop, and Bobby Doerr, second baseman of Boston American league club.
11—Little world series of International league won by Baltimore.
14—Francisco Segura wins Pan-American tennis title for third straight time.

November

10—Jimmy Daniels defeats Sammy Angott, former lightweight boxing champion.
11—Army football team defeats Notre Dame, 59 to 0.
26—College football champions: Ivy league, Yale, Big Ten, Ohio State; Big Six, Oklahoma; Southwest, Texas Christian; Southern, Duke; Pacific coast, Southern California
27—Hal Newhouser, Detroit Tigers pitcher, named most valuable player in American league.
U. of Tennessee chosen for Rose Bowl game with S. California, Jan. 1.
Other bowl opponents: Orange Bowl, Miami, Georgia Tech, vs. Tulsa; Sugar Bowl, New Orleans, Alabama vs. Duke; Cotton Bowl, Dallas, Texas Christian vs. Oklahoma A. and M.
Paul Krumske, Chicago, is new national individual match game champion, in bowling.

December

2—Army defeats Navy, 23-7. Notre Dame beats Great Lakes by 28-7. Georgia Tech wrecks Georgia 44-0 to win Southeastern title.
13—Major baseball club owners vote to bar football games in ball parks until the baseball season is over.
14—Welker Cochran wins world three cushion billiard championship.
15—Big League baseball owners divided on successor to K. M Landis as commissioner, and on other questions.

DISASTERS

January

7—Thirty seamen drown when a navy patrol vessel sinks in collision off Cape May, N. J.
A freight train strikes army bus at Kingman, Ariz., killing 25 aviation cadets.
13—Twelve persons were killed and 40 injured when a passenger train crashed into the rear of a standing train near Novice, Texas.

February

11—Crash of an airliner into the Mississippi river carries 21 passengers and three crewmen to death near Memphis, Tenn.

March

12—Collision of the Liberty Ship J. Pinkney Henderson and a tanker cost many lives.
13—An accidental explosion of a surface mine killed ten soldiers in training maneuvers at Camp Robinson, Ark.
20—A bus plunging through a guard rail of a bridge over the Passaic river in New Jersey drowns 19 persons.
25—An explosion in a coal mine near Shinniston, W. Va., kills 16 miners.

April

6—A blast in the naval ordnance depot in Hastings, Neb., kills eight workers.
7—Thirty-nine merchant marine crewmen and 23 naval gunners drown when a Liberty ship struck a reef offshore and broke up on the English coast.
9—Fire following a collision causes the deaths of 29 crewmen and 16 naval gunners on a tanker traveling in a convoy.
11—A tornado cutting through Arkansas takes lives of 34 persons.
25—An American Liberator bombing plane crashes in downtown Montreal, Canada, causing the deaths of 14 persons.
27—Fifteen workmen die of suffocation while repairing naval ship in Portsmouth, Va.
28—A navy transport plane crashes 15 miles east of Flagstaff, Ariz., killing 22 persons.

May

16—Ten members of a naval blimp crew died when the airship hit a hangar in its takeoff at Lakehurst, N. J.

June

25—One hundred and forty-six were killed and 1,000 injured by a tornado that swept over parts of Pennsylvania, West Virginia and Maryland.

July

6—A fire in the main tent of the Ringling Bros. circus in Hartford, Conn., causes deaths of 167 persons, mostly women and children. Two hundred others were injured.
Sixty-six miners trapped in a burning coal mine near Bellaire, Ohio, had to be abandoned to their fate, when the entrance was sealed to check the fire.
7—Wreck of a troop train near Jellico, Tenn., killed 31 soldiers and 2 civilians, and injured 100 others.
11—An army bomber crashing into a trailer camp in South Portland, Maine, took the lives of 16 persons.
17—Explosion of two munition ships at Navy loading pier in Port Chicago, Calif., results in 319 deaths among naval and merchant marine personnel, and property damage of $7,000,000.
26—An army hospital plane was reported lost at sea between Iceland and Newfoundland with 26 aboard.

August

4—Twenty-eight persons, including 24 army pilots and 4 mechanics are killed in crash of transport plane near Atkinson, Neb.
5—Train wreck near Stockton, Ga., kills 45 and injures 30.
9—Crash of airliner at Antilla, Cuba, brings death to 17.
13—Fire sweeps Palisades, N. J., amusement park, killing 3 and injuring 100. In another fire at Coney Island, Brooklyn, N. Y., 35 persons were injured.

September

14—Hurricane sweeping over Atlantic coast from South Carolina to Canada causes 40 deaths and property damage of $100,000,000.
17—Navy reports sinking of a destroyer and two coast guard cutters in the hurricane, with "heavy loss of life."
28—Eight persons are killed in collision of freight and passenger trains near Missouri Valley, Iowa.
29—Collision of two trains near Terre Haute, Ind., kills 29 and injures 65. Most of the dead were soldiers.

October

20—Fire in Cleveland, Ohio, following explosion of liquid gas storage plant causes 121 deaths and 200 injuries.

November

4—Air-liner crash near Hanford, Calif., takes lives of 24 passengers.
8—Nine die and 75 are injured in train wreck when limited leaves track 50 miles northeast of Sacramento, Calif.
14—Army transport plane hits mountain west of Harmon field, Newfoundland, killing nine and injuring nine U. S. army personnel.
27—Army plane crashes near Madison, Wis., bringing death to three air corps men.

December

1—Airliner crashes near Burbank, Calif., with 23 passengers. Seven killed.
Freight car loaded with bombs explodes in Tolar, N. M., wrecking buildings and starting fires.
14—Three small children burned to death in Chicago, a fourth seriously injured.

DEATHS

January

6—Ida M. Tarbell, 86, writer, famous for exposing trusts, in Bridgeport, Conn.
20—Walter Hackett, 67, playwright, in New York.
29—William Allen White, 75, famous editor of Emporia (Kan.) Gazette, died in Emporia.

February

25—Rear Adm. Charles C. Hartigan, 62, naval attache, winner of Congressional medal, in Palo Alto.
29—Rep. Thomas H. Cullen, 76, member of house from Brooklyn, N. Y., since 1919, died in Washington, D. C.

March

1—Thomas E. Campbell, 66, former governor of Arizona, died in Phoenix.
7—Rev. Dr. Thomas Nicholson, 82, Methodist bishop and former president of the Anti-Saloon league, in Mount Vernon, Iowa.
15—Joseph B. Eastman, 61, director of Office of Defense Transportation, died in Washington, D. C.
19—William H. Thompson, former mayor of Chicago, Ill., died at 74 in Chicago.

April

24—Mrs. Sarah Jane Swanson, 113, said to be the oldest American-born resident of the United States, died in Chicago.
25—Coe I. Crawford, 86, former governor and senator of South Dakota, in Yankton, S. D.
William D. Stephens, 84, former governor of California, died in Los Angeles.
28—Secretary of Navy Frank Knox, who has held that cabinet post since 1940, died in Washington, D. C., at age of 70. He was a newspaper publisher in private life.

May

7—Vice Adm. William Rodgers, 84, commander of U. S. Adriatic fleet in World War I, died in Bethesda, Md.
8—Brig. Gen. Donald A. Davison, chief of provisional engineering command, Mediterranean area. Death reported from India.
12—Brig. Gen. Henry D. Styer, 81, commander of Allied troops in Siberia in World War I, died in Coronado, Calif.
16—George Ade, famous humorist, died at 78 in Kentland, Ind.

June

1—Gen. O. R. Gellette, 99, Confederate brigadier general, in Shreveport, La.
6—Col. Josef Beck, prime minister of Poland during German invasion in 1939, died at 49 near Bucharest, Romania.
25—Louisa E. G. Thorp, 80, internationally known artist and art teacher, in Los Angeles.

July

9—Martin D. Morrison, 82, former congressman from Indiana, died in Abingdon, Va.
12—Mrs. Betty Compton Knappen, 37, former musical comedy actress, in New York.
17—Alan Dinehart, 54, film and stage actor who has appeared in more than 100 pictures, died in Hollywood, Calif.
20—Mildred Harris, 41, movie actress and first wife of Charles Chaplin, died in Los Angeles.
27—Lieut. Gen. Leslie McNair killed in France.
30—Manuel Quezon, president of the Philippines, died at Saranac Lake, N. Y. He was 65.

August

5—Rear Adm. Don Pardee Moon, 50, committed suicide in Washington while suffering from "combat fatigue."
Effie Cherry, 65, last of the Cherry Sisters of vaudeville fame, in Cedar Rapids, Iowa.

September

1—Isabel Irving, 73, whose stage career covered 50 years, at Nantucket, Mass.
2—George W. Norris, former senator from Nebraska, died at 83 in McCook, Neb. He served 40 years in congress, including five terms in the senate.
8—James A. Reed, former senator from Missouri, at 82 in Fairview, Mich.

October

4—Alfred E. Smith, four times governor of New York and Democratic candidate for President in 1928, in New York city at 70.
8—Wendell L. Willkie, 52, Republican presidential candidate in 1940, and utility executive, in New York city.
19—Rep. Hampton R. Fulmer, 69, who represented a So. Carolina district for 12 consecutive terms, in Washington, D. C.
22—Richard Bennett, 72, famous actor, in Los Angeles.

November

8—Miss Christiana Bond, 100, author, artist and lecturer, in Baltimore.
9—Jane Grey, 56, well-known actress, in New York city.
12—Edgar S. Kelley, 87, composer of classical music, in New York city.
16—Boake Carter, correspondent and radio news commentator, 46, in Hollywood, Calif.
17—Sen. Ellison D. Smith, who represented So. Carolina in upper chamber for 35 years (longest consecutive period in history) at 86, in Lynchburg, S. C.
25—Judge Kenesaw M. Landis, commissioner of professional baseball for 24 years, at 78, in Chicago.

December

1—Albert B. Fall, secretary of interior in Harding administration; at 83, in El Paso, Texas.
3—Dr. David Kinley, 83, president of U. of Illinois, 1920 to 1930, in Champaign, Ill.
Federal Judge Arthur J. Tuttle, 76, in Detroit, Mich. Most outstanding case was treason trial of Max Stephan.
7—Maj. John Griffith, commissioner of intercollegiate athletics of Western conference, at 67, in Chicago.
14—Lupe Velez, 34, movie actress, kills self in Hollywood, Calif.

Governments of Many Nations Changed As Liberating Armies Advanced in 1944

Common People Get Chance to Establish Democratic States

Governmental changes that held world importance with war news marked the year 1944. Iceland became a republic; five Soviet Socialist republics again took their places in the U. S. S. R.; four Nazi-shackled countries were liberated; and the Axis satellites deserted. A year-end bulletin from the National Geographic society reviews these momentous events.

On June 17 Iceland became a modern republic. On that day the Althing—an 11-centuries-old legislative body sometimes called the "grandmother of Parliaments"—elected the nation's former regent, Sveinn Bjornsson, president. In a national election held in May the people had voted to dissolve their union with Denmark.

First settled in 874 and organized as a republic 56 years later, Iceland remained independent until 1263 when it united with Norway. Both Iceland and Norway came under Danish rule in 1381. Norway was separated from Denmark by cession to Sweden in 1814, and the two countries formed a union which lasted until 1905 when the union was ended by mutual agreement. Icelanders had long agitated for independence, but it was not realized until 1918. Iceland was then recognized as a separate kingdom with unlimited sovereignty.

Germany tried in prewar years to gain control of this strategic North Atlantic island by establishing commercial routes. British forces were stationed on the island shortly after the beginning of World War II. They were replaced in 1941 by American troops.

Re-enter U.S.S.R.

Five other republics, 1,500 miles farther to the east, resumed their prewar status. Estonia, Latvia and Lithuania, freed from Nazi occupation, again became a part of the Soviet Union as Estonian, Latvian, and Lithuanian Soviet Socialist Republics. All three had first entered the Soviet Union in 1940.

The Karelo-Finnish Republic, far to the north, was the fourth to be added to the Soviet family. It also had first entered the Union in 1940. Its border city of Viipuri guards the western approach to the city of Leningrad. Russia's new Arctic port of Pecheng (Petsamo), acquired from Finland in September, extended Russian boundaries southward to Norway.

The fifth state restored to Russia in 1944 is the Moldavian Soviet Socialist Republic, a slice of territory lying between the Ukrainian Republic and Romania. Once known as Bessarabia, this area has experienced a round of governmental changes. Before World War I it was Russian ground; from 1918 to 1940 it belonged to Romania. It was turned back to Russia in 1940 and set up as a republic of the Union, only to be reoccupied by Romania the next year.

To four German dominated nations — France, Belgium, Luxemburg, and Greece—freedom came toward the close of the year. France, whose liberation was heralded by Allied landings on the Normandy coast, June 6, was almost completely free by the middle of September.

General Charles de Gaulle's Committee of National Liberation was recognized on October 23 by the U. S. state department as the de facto government of France. On September 21 President Roosevelt appointed Jefferson Caffery, former United States ambassador to Brazil, as ambassador to the French government now established in Paris. On Armistice day France was formally invited to become a full-fledged member of the European advisory commission meeting in London.

The president of the newly established Icelandic republic, Sveinn Bjornsson, addresses the nation by radio on June 17, 1944, the day the island dissolved its union with Denmark.

Belgium's Regent.

Belgium, whose national liberation released its own governing agencies, immediately took steps to restore its prewar standing. In the absence of King Leopold III, held in Germany, 41 - year - old Prince Charles, brother of the king, became "Regent of the Realm," to act until the king returns.

Crown Prince Umberto was named Prince Lieutenant General of the Realm of Italy by his father, King Victor Emanuel, who abdicated when Allied troops entered the capital in June, 1944.

In September, the tiny Duchy of Luxembourg, neighbor of France, Belgium and Germany, celebrated its freedom from four years of Nazi tyranny.

Allied fighting men landing in Greece in October helped Greek patriots to oust the Germans. Internal political problems had divided the people into factions, some opposing the return of the monarchy. The cabinet decided to inform King George II, in London, that resumption of his powers was conditioned on popular will.

Late in the year, Netherlanders saw the beginning of the Allied attempt to smash the western anchor of the German defense system, prelude to liberation. From the southwest Pacific came more good news—for the first time in more than four years the nation's flag flew over Hollandia in Netherlands New Guinea.

Axis-satellites Finland, Romania and Bulgaria broke their ties with the Nazi government, and moved toward agreements with the Allied powers.

Shifts in Italy

King Victor Emanuel III stepped aside in favor of his 39-year-old son, Umberto, designated "Prince Lieutenant General of the Realm." Premier Ivanoe Bonomi and his Italian cabinet contributed a novelty when they took office in June. They did not take the customary oath to the crown; instead they pledged themselves to fulfill their duties according to the constitution. The United States resumed diplomatic relations with Italy in October when Alexander G. Kirk was named ambassador. On November 10 the presidency of the Allied Commission for Italy was transferred from military to civilian direction.

The fledgling republic of Syria, liberated from the Vichy-French in 1941, added to its territory the independent mountain-kingdom of Jebel Druz. Its people, dwellers in southern Syria, voted to yield their administrative and financial independence, and merge the management of their affairs with the government of Syria. President Roosevelt appointed George Wadsworth minister to the republics of Syria and Lebanon.

Closer bonds between the United States and its African protege Liberia were assured by the December, 1943, treaty, the provisions of which were made public on October 30, 1944. The treaty stipulates that all naval, military and air installations will be supervised by the U. S.

Significant changes took place in 1944 in the New world. Argentina abolished all political parties and instituted strict censorship of the press. The tiny Atlantic island of Bermuda modernized some of its ancient laws. For the first time in the three centuries of its history women were given the same voting privileges as men.

Philippines to Be Free.

Events in the Pacific area were highlighted by the return to the Philippines of President Sergio Osmena and his cabinet with the invasion forces of Gen. Douglas MacArthur. The presence of the official was only suggestive of the resumption of authority on home soil, for it was understood that island affairs will continue to be administered from Washington.

The future status of the Philippines was defined in two resolutions adopted by the U. S. congress, and signed by President Roosevelt on June 30. These resolutions grant independence to the islands as soon as the Japs are ejected, and provide for defense by the construction of United States military and naval bases.

Gen. Charles De Gaulle, head of the provisional government of France, reviews the 1944 Armistice day parade in Paris, flanked by Winston Churchill and Anthony Eden of Great Britain. France was formally invited to become a member of the European Advisory committee by the British statesmen.

Record-Breaking Dams Are Constructed During the Year

The Kentucky dam, on the Tennessee river near Paducah, became the 21st dam in operation under the Tennessee Valley authority. Its 184-mile reservoir, longest in TVA, provides 4½ million acre-feet of water storage space, which would be enough to absorb two feet of Mississippi river flood crest at Cairo, Illinois. Nearing completion is Fontana, largest and highest dam in the eastern United States, on the little Tennessee river in North Carolina. It is the only other TVA dam now under construction.

Biggest rolled-fill earthen dam in the world is the Denison (Texas) dam on the Red river, completed early in the year by army engineers. Its 127,000-acre lake backs 80 miles up the Red river to Gainesville, Texas, and 60 miles up the Washita river to Ravia, Okla. To save Oklahoma's Cumberland oil field, the Washita was detoured by construction of 4½ miles of dikes.

California's vast power and irrigation program moved forward as the last concrete was poured on Shasta, second highest dam in the world (560 feet). Water from the Friant dam in the San Joaquin valley began on June 4 to pour through the new Madera canal.

Army engineers completed the concrete Norfork dam on the North Fork river in Arkansas, to supply power and control floods in northern Arkansas and southern Missouri.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

THE CHILDHOOD OF JESUS

LESSON TEXT—Matthew 2:13-23.
GOLDEN TEXT—Behold, I am with thee, and will keep thee in all places whither thou goest.—Genesis 28:15.

Matthew is the Gospel of the King and His kingdom. It stresses the fulfillment of prophecy in the coming of Christ, the King. After His rejection, it tells us of the Church, "the kingdom in mystery," and of the death of Christ for our sins, His resurrection for our justification, and His glorious coming again.

This then is an important book which we study for the next three months. Teacher and student alike should be enthusiastic and expectant.

The genealogy of the King, and the story of His coming to earth as the babe of Bethlehem (both important matters), are covered in chapter 1. In our lesson we find Him as a little child. Observe how man received Him, and how God cared for Him. Without assigning definite verses to our points we note that:

I. Men Received or Rejected Jesus.

It has always been so. Men, then as now, were either for Him or against Him. The world or today is far different from that of the first century, but the difference is all on the outside. Almost breath-taking have been the developments of modern science, but these have not changed the heart of man. He still fears and hates and fights and sins.

His attitude toward Christ is unchanged. There are still only two classes of people in the world—those who have received Christ and are saved, and those who have rejected Him and are lost.

1. Men Are Against Christ.

How do men show their rejection of God's Son? Just as they did at His birth, by:

a. Fear. Herod was afraid lest the coming of this One should result in the loss of his ill-gotten gains. His anger and fear made all Jerusalem afraid.

b. Indifference. When the Wise Men asked where Christ was to be born, the priests and scribes knew exactly where to find the facts in the Holy Scriptures, but having done so, they relapsed into utter indifference. They had no interest in the fulfillment of the prophecy.

c. Hatred. Herod poured out the violence of his heart by killing the first-born. He was the first of many who have raged against the Christ in futile anger.

d. Sorrow. The tears of the mothers of Jerusalem but foreshadowed the weeping and wailing which characterizes Christ-rejection both in time and eternity.

2. Men Are For Christ.

Thanks be to God, there were those in that day who were for Christ and, like those who follow Him today, they showed:

a. Spirituality. Men have marveled that the Magi knew of the birth of Christ. They must have studied the prophecies of the Word and been responsive to the teaching and moving of the Holy Spirit. Can we say as much for ourselves?

b. Interest. Not content to know and to marvel, they shamed the priests of Israel by their persistent interest in this great thing which had come to pass.

c. Love. They brought themselves in worship and they brought rich gifts from their treasures. You can give without loving, but you cannot love without giving.

d. Action. They came. They persisted until they found the Christ. Then they listened to God and protected His Son by not returning to Herod.

II. God Protected and Prepared Jesus.

The ruin which sin had brought into the world could only be met by redemption which Christ had come to bring. Some men had already shown their hatred for Jesus and their rejection of Him. But God still ruled, and for the sake of those who received Him (and would receive Him in all the centuries since), He kept the Child Jesus from harm. We find Him:

1. Protecting Jesus. Men may hate and seek to destroy God's Son. Satan may inspire them with ingenuity and cunning. But see how the Eternal One spoke to Joseph in dreams, how He prepared a place of refuge in Egypt and ultimately in Nazareth, where the boy Jesus might increase in wisdom and stature and favor with God and man.

2. Preparing Jesus. God knew of the days of public ministry which were ahead, and above all, of that day when on Golgotha's hill Christ was, in His own body, to prepare salvation for you and for me. God is never taken by surprise. He moves forward to the completion of His plan with the stately tread of eternity.

He took Jesus to Egypt. He brought Him again to Nazareth. In it all He was preparing His Son for the days of ministry which were ahead. All this was in fulfillment of prophecy (see vv. 15, 17). God's Word is always sure.

SEWING CIRCLE NEEDLEWORK

Easily Crocheted Bed Socks Amusing and Practical Dishcloth

Warm Bedsocks

TO KEEP you nice and warm these cold nights—a pair of easily crocheted bedsocks that are all in one piece with no difficult heel to crochet—and fit any size foot! They're pretty in soft pastels with white toe and trimming.

* * *

To obtain complete instructions for the Two-Color Bedsocks (Pattern No. 5807) send 16 cents in coins, your name, address and the pattern number.

Gay Dishcloth

USE red and white crochet thread for this practical and lovely dishcloth that looks like a small dancer's frock. It's 10 inches in all and has "shoulderstraps" to hang by your sink. They make gay and unusual gifts.

3. What mythological couple grew old together so gracefully that they turned into two tall trees growing side by side?
4. What common insect lives but a day?
5. The Wandering Jew is alleged to have been compelled to live until the second coming of Christ. What is his name?
6. How many New York governors have become Presidents of the United States?

The Answers

1. Adventurers and convicts.
2. In Colorado.
3. Baucis and Philemon.
4. The mayfly.
5. Ahasuerus.
6. Four — Martin Van Buren, Grover Cleveland, Theodore Roosevelt and Franklin D. Roosevelt.

Ancestors Do Not Add Up As Rapidly as Supposed

The number of our lineal ancestors does not double with each past generation as commonly believed. After the third or fourth generation, the actual number is progressively smaller than the possible number, owing to the intermarriage of kin.

For example, in the past ten generations, or 300 years, the possible number of one's ancestors is 1,024, but the actual number is only 300 to 400.

EDITORIAL COMMENT

SCHOOL PROBLEMS NEED ATTENTION

The welfare of the children of Iowa is at stake in the revision of Iowa school laws That is the opinion of Miss Jesse M. Parker, superintendent of public instruction. The entire staff of the state department, said Miss Parker in a prepared statement, has advocated major revisions in the Iowa school code for several years and will continue to support them.

Among the problems needing particular attention, according to Miss Parker, are provisions for better-trained teachers, equality of educational opportunity, district reorganization, state aid teacher security and leadership in state and county administration by people especially trained in the public school field

Miss Parker was chairman of the school code commission whose report was made to the 1943 legislature in the form of a bill for the modification of Iowa school laws. The complete text of her statement released today is as follows:

"The Department of Public Instruction without exception is in favor of legislation which will help to secure better trained teachers in service; that will build up and strengthen the office of the county superintendent of schools, enabling the office to render more efficient service to the children and the people of the county, that will tend to equalize educational opportunity throughout the entire state, that will provide for district reorganization when approved by the people affected that will relieve the property tax burden, now the main source of school revenue, that will provide ample state aid for this purpose; that will promote teacher security in every legitimate manner; that will remove the conflicts, incongruities and inconsistencies that naturally follow the building of a school code by any process of amendment over a term of years, that will provide for educational leadership through the offices of both the state superintendent for the county and county superintendent for each county that will leave such leadership in the hands of those who are trained in the public school field in order that public school problems may be dealt with from the public school point of view.

"This program has been advocated by this department and its entire staff for several years past. It is now and will continue to be so advocated by the Department and we earnestly solicit the wholehearted support and cooperation of each and all who have the best interests of the public schools and the children of the state under consideration."

Adopts Family

A young deer about the size of a small calf has been mingling with a herd of cattle on the M A. Wirsig farm near Donnellson When first noticed the deer did not seem on friendly terms with the cattle but now Vernon Wirsig, son of the farmer says the cattle seem to have become fond of the newcomer to the herd.

Balky As A Mule

Jesse Richards had car trouble while going up a hill in Hamburg. He switched batteries but got stuck in the mud. He went for aid, leaving the car on the road. When he returned the car was gone, but he found it later bottom side up in a corn ditch. It had evidently gotten started on its own—going in opposite direction.

Hancock County Board Proceedings

1ST ADJOURNED NOVEMBER MEETING

Garner, Iowa, November 20, 1944

The Hancock County, Iowa, Board of Supervisors met in session on above date with F J Schoun and Penn Eckels present. Absent was John Chambers.

The minutes of the last meeting were read and approved as read.

On motion and second the bond of Donald Butz, Constable in Garfield Township is approved.

On motion and second the report of Ray Hunsley, Weed Commissioner, is approved.

This being the 20th day of November, A. D., 1944, a date heretofore set for a hearing on the vacation of a highway petitioned for by Mary E Hildebrand, et al., south of section 33, Twin Lake Township in Hancock County, Iowa, and North of section 4 in Belmond Township, Wright County, Iowa the hour for said hearing having arrived, said hearing was held as scheduled. No objections oral or written are on file and it is deemed for the best interests of all concerned that said vacation be effected as prayed in the petition of Mary E. Hildebrand et al.

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, that the petition of Mary E. Hildebrand et al for the vacation of a highway referred to in the Preamble hereof be and the same is hereby granted as prayed and henceforth said highway is hereby ordered closed to tarffic and vacated as directed by law

In the matter of a contract of Sale of Town Property entered into by and between Hancock County Iowa by its Board of Supervisors and Irwin W Reichert whereby Hancock County Iowa agrees to convey to said Irwin W Reichert lots 4 and 5 in Block 4 Maple Hill Addition to the Town of Britt, Iowa, in consideration of the sum of Nine Hundred ($900 00) said payment to be made in monthly installments

WHEREAS Peter Frandson, has offered to purchase said contract of sale and has offered the full amount of the purchase price for said contract and has requested an assignment of said contract and

WHEREAS it is deemed for the best interests of the taxpayers of Hancock County Iowa that said contract be assigned

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa that the contract referred to in the Preamble hereof be and the same is hereby assigned to Peter Frandson upon payment of $860 00 amount still due on said contract, and the Chairman F J Schoun and County Auditor Fred C Missal are hereby authorized to execute said assignment in behalf of Hancock County Iowa

On motion and second the Board adjourned to December 4, A D., 1944, at 9 o'clock A M

F. J. SCHOUN, Chairman
ATTEST: FRED C MISSAL,
County Auditor.

2ND ADJOURNED NOVEMBER MEETING

Garner, Iowa, December 4, 1944

The Hancock County, Iowa, Board of Supervisors met in session on above date with F J Schoun, Penn Eckels and John Chambers present

The minutes of the last meeting were read and approved as read

On motion and second the Homestead Tax Credit applications numbering from 1 to 2163 inclusive are approved

On motion of Eckels and seconded by Chambers the petition for certain drainage improvement by R. N Reuber is laid over for future consideration.

On motion and second the report on the water supply at the Hancock County Home is approved as reported by the State Hygienic Laboratory

Supervisor Schoun is appointed a committee to investigate and cause repairs to be made in D D No. 76 Main.

On motion and second the following bonds are approved: Leslie M Brower, Sheriff; Henry C Meyer, County Attorney, H L Ollenburg, Township Clerk, and C E. Proctor Justice of the Peace.

Wm Henschen is appointed Engineer to investigate and report on the feasibility and necessity of a drainage improvement petitioned for by John P. Christians in Ell Township

Charlie F Merten is appointed Engineer to investigate and report to this Board on the feasibility and necessity and probable cost of a proposed drainage improvement petitioned for by Abe Mezvinsky et al in sections 25 and 26 in Orthel Township, Hancock County Iowa.

WHEREAS there are outstanding warrants issued for cleanout of D D. No. 9 and Lateral No. 6 of D D No. 9, Hancock County Iowa, petitioned for by John P Christians et al filed on June 2, A D., 1944 and WHEREAS a hearing was held on said proposed cleanout as by law directed and it is deemed for the best interests of the taxpayers of District No. 9 and lateral No. 6 of D D No 9 Hancock County, Iowa that a levy be made at this time to defray expenses of said cleanout and contingencies incident thereto,

WHEREAS the estimated cost of said cleanout and contingencies is $12,200 on the Main and $1200 on lateral No. 6 of said ditch

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County Iowa acting for and in behalf of D D No 9 Main and Lateral No. 6 of D. D No 9 Hancock County, Iowa, that there is and is hereby levied the sum of $12 200 on the main and $1200 on lateral No. 6 of said ditch

BE IT FURTHER RESOLVED that the taxes hereinbefore levied be and the same are hereby ordered spread against all the taxable parcels highways and railroads in said district in accordance with the benefits of Drainage District No. 9 Hancock County Iowa, and laterals thereof which are extended to be collected with the taxes of 1944 payable in 1945, all as by law provided

The foregoing resolution was offered and read by Supervisor John Chambers who moved its adoption was seconded by Supervisor Penn Eckels whereupon the Chairman placed the motion of its adoption and upon roll call the vote thereon is F J A. Chambers Penn Eckels and F J Schoun, Aye. Nays none.

Whereupon the Chairman F J Schoun declared the resolution duly adopted.

This being the 4th day of December, A D 1944 a date heretofore fixed by the Board of a continuation of the hearing on the establishment of D D No. 138, petitioned for by Donald Hamilton, et al, the report of the commission to appraise damages appointed on November 6, A. D., 1944, which report was filed on November 21, A. D., 1944, was considered as were claims for damages on file and the Board of Supervisors with all members present deem it expedient that the hearing on the proposed establishment of D D No. 138 as recommended in the report of Engineer Wm. Henschen and on the claims for damages be adjourned to December 18, A D., 1944, at 1.30 P M

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa that further hearing on the petition of Donald Hamilton et al for the establishment of D D No. 138 the report of the Engineer as amended and the claims for damages shall be had at 1 30 P M on the 18th day of December A D., 1944 at the Courthouse in Garner Iowa

The foregoing resolution was offered and read by Supervisor Penn Eckels who moved its adoption seconded by Supervisor John Chambers whereupon the Chairman placed the motion of its adoption and on roll call the vote thereon is F J Schoun, Penn Eckels and John Chambers, aye Nays none. Whereupon the Chairman declared the resolution duly adopted

BE IT RESOLVED that the claims hereinafter set out be allowed in amounts designated thereon and the County Auditor be and he is hereby authorized to draw warrants on the several funds of Hancock County, Iowa, in payment of such claims in amounts set opposite each claim.

BOARD PROCEEDINGS

3rd Adjourned November Meeting

Garner, Iowa, Dec 18, 1944

The Hancock County, Iowa, Board of Supervisors met in session on above date with F J. Schoun, John Chambers and Penn Eckels present

The minutes of the last meeting were read and approved as read.

On motion and second the following bonds are approved: Dolores Lenz, Deputy Treasurer, Myrtle A White, Deputy Auditor, Irene Dores Holck, Deputy Clerk; Frank Hisel, Constable; William Henschen, Drainage Engineer on D. D. No. 15 and on D. D. No. 138; Veletta Jurenson, Deputy Treasurer; Fern Beck Katter, County Recorder; Elmer Haas, Clerk of the District Court, Roy L. McMillin, Treasurer Walter W. Worwod, Assessor

In the matter of Drainage District No 76 Hancock County, Iowa,

Whereas a petition on file for repair in said district which will overdraw the account of said district and warrants issued in payment of such repair will be outstanding and

WHEREAS it is deemed for the best interest of the taxpayers in D No. 76 that a levy be made at this time for the repair completed

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, that a levy of 1% of the original assessment be and the same is hereby ordered levied against all lands tracts, parcels highways and railroads in the district

BE IT FURTHER RESOLVED that said levy be extended in accordance with the original classification said district and when so extended to be collected with the 1944 taxes payable in 1945. All as directed by law.

The foregoing resolution was offered and read by Supervisor John Chambers, who moved its adoption seconded by Supervisor Eckels whereupon the Chairman placed the motion of its adoption and upon roll call the vote thereon is F J Schoun, Penn Eckels and John Chambers, aye Nays none.

In the matter of Drainage District No 7, section 5, Hancock County Iowa.

WHEREAS certain repairs are ordered which will exhaust the present funds of the district and it seemed for the best interests of the taxpayers in said district that a levy be made at this time to pay for maintenance needed in said district

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa acting for and in behalf of Drainage District No. 7, section 5, that there be and is hereby levied the sum of $260 00 against the main of said district and the County Auditor be and is hereby ordered to extend said levy against all lands, tracts, parcels highways and railroads in said district

BE IT FURTHER RESOLVED that said levy be extended in accordance with the reclassification of said district and when so extended to be collected with the tax of 1944 payable in 1945. All as by law provided

The foregoing resolution was offered and read by Supervisor Eckels who moved its adoption was seconded by Supervisor John Chambers whereupon the chairman placed the motion of its adoption and upon roll call the vote thereon is F. J Schoun Penn Eckels and John Chambers, aye Nays none.

WHEREAS, County Engineer Charles F. Merten, has to report that Harry Rehm has completed his contract for the grading of certain Hancock County roads to his entire satisfaction and

WHEREAS There is due on said contract the sum of $309.76 as a final estimate

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa that the report of the Engineer be and is approved and the County Auditor be and he is hereby directed to draw a warrant on the Construction Fund of Hancock County, Iowa, in the sum of $309.76 as a final payment on said contract. All as provided for by law.

In the matter of the petition of John H. Lauen et al for the establishment of a drainage district in sections 22, 23, 26 and 27, all in Township 94, Range 23, which petition was filed on August 3, A. D., 1944.

WHEREAS, Wm. Henschen was appointed Engineer on August 3, A. D. 1944 as commanded in section 7432, Code of Iowa, 1939, and laws amendatory thereto, to make a survey, investigation and report on the feasibility of the establishment of the said proposed drainage district, and said Engineer did file his report on December 12, A. D., 1944, which report states that he has surveyed the lands of the petitioners and the lands in the water shed of the proposed district and in his opinion the proposed establishment as prayed in the petition will be conducive to public health and welfare and will be of greater benefit than the cost thereof and recommends that said district be established.

BE IT THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, acting for and in behalf of the proposed drainage district petitioned for by John H Lauen, that the report of the Engineer be approved as a tentative plan and said report and plan shall come on for further hearing at the Courthouse in Garner, Iowa at 10:30 a.m on the 19th day of February, A. D 1945.

The County Auditor be and he is hereby directed to cause notice of hearing on said petition and the report of the Engineer to be published in the Klemme Times, a newspaper of general circulation published at Klemme, Iowa, advising all owners, occupants and lienholders and encumbrancers of record in the proposed district of the pendency and the prayer of the petition, the favorable report of the Engineer thereon the approval by the Hancock County board of Supervisors as a tentative plan, that same may be amended before final action thereon and that all claims for damages and all objections to such proposed establishment shall be in writing and must be filed with the County Auditor at or before the time set for hearing thereon.

The foregoing resolution was offered and read by Supervisor Eckels who moved its adoption was seconded by Supervisor Penn Eckels whereupon the Chairman, F J Schoun placed the motion for adoption and upon roll call the vote thereon is F J. Schoun, Penn Eckels and John Chambers, aye. Nays, none Whereupon the chairman declared the resolution duly adopted.

This being the 18th day of December, A. D., 1944, a date heretofore fixed for the continuation of a hearing on claims for damages, the report of the Engineer, and the establishment of D. D. No. 138, a subdistrict of lateral No. 4 of D. D No. 2 and 2, Hancock County, Iowa, petitioned for by Donald Hamilton, et al, the hour for said letting having arrived, the Board of Supervisors being fully advised said hearing was held as scheduled

WHEREAS additional time is necessary to complete agreement with the M. & St L. Railway relative to right of way in said drainage district

BE IT THEREFORE RESOLVED by the Board of Supervisors of Hancock County Iowa, acting for and in behalf of proposed D D No 138 and lateral thereof petitioned for by Donald Hamilton et al that the hearing on said proposed establishment, the report of the Engineer as amended, and the claims for damages be and the same is hereby continued to December 30th, a 1:30 p m

On motion and second the Board adjourned to December 20 A D 1944, at 10 o'clock A M

BOARD PROCEEDINGS

4th Adjourned November Meeting

Garner, Iowa, Dec. 20, 1944

The Hancock County, Iowa, Board of Supervisors met in session on above date with John Chambers Penn Eckels and F. J. Schoun present.

The minutes of the last meeting were read and approved as read.

On motion and second the following bonds are approved: Helen Patrick, Deputy Recorder; Frank J Schoun, Supervisor; Fred C. Missal, County Auditor; and Elmer A. Katter, Deputy Sheriff.

On motion and second December 28th is hereby fixed as a date for inventory at the Hancock County Home.

Be it resolved that the report of the County Superintendent Charles S. Whitney on County Uniform text book depositories filed December 20 A. D., 1944, is approved and the County Auditor is hereby directed to draw warrants on the general fund of Hancock County in the sum of $3454.73 to pay cost of text books purchased as itemized in the report of the County Superintendent.

On motion and second Charles E. Merten is appointed Engineer to investigate into the feasibility and necessity of the drainage district petitioned for by John Goll et al, in sections 14 and 15 in Liberty Township.

In the matter of a damage claim filed by the M. & St. L. Railway against proposed drainage district No. 138

WHEREAS the M. & St. L. Railway Co. has requested that Drainage District No. 138 construct certain culverts across the right of way of the M. & St. L. Railroad and said company propose to release all claim filed for damage due to the proposed construction of D. D. No. 138, a sub district of lateral No. 4 of D. D. No 1 and 2 Hancock County, Iowa, and

WHEREAS it is deemed for the best interests of the taxpayers in said proposed district that the district construct the necessary culverts

BE IT THEREFORE RESOLVED by the Board of Supervisors acting for and in behalf of D. D. No. 138 a sub-district of lateral No. 4 Drainage District No. 1 and 2, Hancock County Iowa, that a contract be entered into whereby D. D. No. 138 will construct necessary culverts as approved by Engineer Wm. Henschen and the Chief Engineer for the M. & St. L. Railway.

Chairman F. J Schoun is hereby ordered and authorized to execute said contract in behalf of Hancock County, Iowa,

The foregoing resolution was offered and read by Supervisor Eckels who moved its adoption, was seconded by Supervisor Chambers, whereupon the chairman placed the motion of its adoption and upon roll call the vote thereon is F. J Schoun, Penn Eckels and John Chambers, ayes Nays, none.

On motion and second the Board adjourned to December 30 at 9 o'clock A. M.

F J SCHOUN Chairman

ATTEST: FRED C. MISSAL,
County Auditor.

The nation's air express service celebrated its 17th year of operation by handling 31,000,000 pounds of cargo, much of which formed a vital contribution to the war effort.

Sherwood, Manager Klemme, Iowa

Pvt. Wm. Zabilka Tells Of Tour Through London

26 November 1944,
England.

Dear Jergies:

Since I promised you an article of my tour of London, I've got my notes before me There are a lot of grammatical errors, but I'll leave them to you to change around. First of all, you may be interested that I met "Barney" Onerheim in Bournemouth and spent my first couple of days with him, so we had a nice reunion. I received a nice ovation when entering London, yes, it was the sirens, what a beautiful tone!

I took my tour of London in a taxi which is sponsored by the American Red Cross. It took about 2½ hours and cost only 10 shillings, which was well worth it.

We started from our Columbia Red Cross and went to the Marble Arch, as told to us, only the King passed through, but in my own mind if I know G. I.'s I'll venture they have gone through it.

We rode down Park Lane and Hyde Park past 145 Picadilly where the King used to live but we only saw the remains as it was bombed. We went on past St James Park to Buckingham Palace The building very large and probably a nice looking place in peace-time but the stones were very dingy looking. Of course, they had their 7' - 8' gate around the whole inclosure, including the Palace Gardens. The right arch-way, which is adjacent to the Palace building, was bombed, but the left arch-way was intact. One way they can tell if the King is in residence there for 24 hours, the flag is up, but if he isn't, it comes down The flag was up alright, but I didn't get the opportunity to see him. Across the street is a large memorial of Queen Victoria which was built in 1910.

We went on a block away and there were the Regimental Barracks where the King's guards are trained. At the time I was there, they were having inspection and a little bit of drill. Of what I gather from the drill, they do a lot of hitting their feet to the ground and it seems to me a very rigid training program. Now I followed these men back to the Palace for the Changing of the Guards As I looked into the yard which is between the gate and the Palace, I saw the Old Guard which consisted of approximately 30 men with 3 men marching before them until the New Guard comes. The New Guard came into this yard with the aid of a band, they marched slowly like a wedding march, to within 10 paces of the Old Guard. They are then given orders for saluting and then at ease with their rifles, the New Guard first, then the Old Guard giving the same orders The Guards are then marched off to their various sentinal posts or boxes as they are called The sergeant in charge reads the orders to the new and old sentinal which in turn does fancy stepping Now as I peered over the shoulder of the reader of these orders, this was as much as I could see Top, Buckingham Palace, 2nd line-Orders for the Sentry No. 2, 3rd line- March to North Center Gate to Forecate Of course during peace-time these Guards are dressed in their bright red uniforms, but now they are in their regular Army uniforms

After these ceremonies we went beyond the Regimental Barracks past the Chapel which was hit by a buzz bomb Our trip took us to Westminister Abbey which really is a beautiful building of Gothic architecture All the stained glass windows were taken out for preservation until after the war This structure is of arches with no girders as support. In the center-back as one enters the front door, is their large plaque on the floor of the British Unknown Soldier.

Now as I looked to my left, I saw the Poets Corner where there was a bust of John Milton, put there in 1737 Going forward, in the northeast room, is known as the Henry VII Chapel The main part of the Abbey is not very large, but when coming to the front of this main room, I could see the coronation chair with the stone of destiny Beyond this main room was the choir, looking toward the high altar The decorative wood behind these seats were hand carved Farther up I saw an iron gate with a "No Admittance" sign, so I called one of the men in charge gave him a nominal fee and went on through This was behind the high altar and all that I could see was sand bags protecting the different structures such as the tomb of Mary Queen of Scotts, and the Shrine of Edward the Confessor The ceiling of this room was hand-carved, beautiful cut-outs of flowers which have a significant meaning He showed me the room where they are planning to dedicate for all the flyers who died in the Battle of Britain. As I came out, I saw how beautiful the stone marble was on the high altar. It was magnificent

Coming out of the Abbey, I looked to the right and back, and could see Big Ben as it was just striking 1100 This magnificent clock was built in 1854 with a heighth of 316 feet. The hour hand is 9 feet in length, the minute hand is 14 feet in length and the bells weigh 13½ tons. It is hard to realize those figures as they are, but they are true facts.

Adjacent to Big Ben are the Houses of Parliment; started in 1820 and finished in 1840. We were not allowed in there, but upon a special pass, one is allowed in with a special guide.

Our little tour took us to No. 10 Downing Street, which is guarded day and night. As you know, this is the home of the Prime Minister. One may think it elaborate, but on the outside it was very dingy in appearance, as a result of a bomb exploding a few feet away. As we motored along past the Foreign Office and the War Office, which is only a couple of blocks from No. 10 Downing, one could see the 145 foot monument of Lord Nelson, one of England's foremost naval officers.

We then motored around what they call the Victoria Embankment which goes along the Thames River. There is something that may be of interest to you and that is, there is a difference in London and the city of London. We now entered the city of London which contains all business establishments with no residential districts whatsoever. Along this Victoria Embankment we could see a monument of Cleopatra and one of the Seven Wonders of the World yes there were two Sphynx on each side of the monument.

About three blocks farther, we saw the Lever House which is the place of business where English soap is made, and across the street we find the Gladforized Bridge Touring on we passed the London Times office, Englands main newspaper which has a larger circulation than the New York Times. We saw the Billings Gate Fish Market where in 1666 the Plague of London started The Germans in this war tried to bomb it and start another plague, but were unsuccessful.

We went across the famous London Bridge which was built in 1844, and then back over the Tower Bridge, (a draw bridge) After coming across the bridge we could see the famous Tower of London built in 1076 by William the Conqueror. As we went through an arch-way, we came to a tower called "Byward Tower." The reason for the name is simple, as during those times, as well as today, one needed to know the password or by-word to get through the arch-way below this tower. Going on a little farther, we could see down about 10 feet some water being held back. Now during ancient times, there was a canal from this place to the Thames River, only 100 feet away.

When they let the Thames come through this canal it would spread around the castle, making it difficult for anyone trying to escape Now another reason this canal was built was to let the kings, dukes, etc. to come up the Thames River by boat and into the castle through this canal instead of parading up through the streets of London. We turned around and went through another arch-way which is part of the inner wall There is a gate that drops down through this arch-way and was operated by two men, in their dug-out places in the wall, operating this 2½ ton gate After coming through, we turned right and climbed up the steps to what they call the "Bloody Tower," and rightfully named, as in this tower several people had been killed by some means or other. The staircase is very narrow and was just enough room to squeeze through, so you can imagine how difficult it was for the knights with all their armour to climb these stone steps

We then came down via another fairway and went about 50 feet to the center of the courtyard. This spot, as described to us, is where three queens and two dukes were beheaded, Queene Anne being one of them. This must have been a nice place, everybody being murdered in some way or other. We then went to the main building and saw the old armour as well as different types of pistols, scabbards, etc Next to this room is what they call their Chapel of St Johns After the war they are planning to confer a degree or medal on some of the well known generals as Eisenhower, Patton, Field Marshall Montgomery, etc. We came out of the building into the courtyard and out the gate via another route This castle consisted of an iron fence, moat, outer wall, and the inner wall, so you can see it was impossible for one to escape if imprisoned there. These walls are 95 feet thick at the base and 11 feet thick on top.

Across the street from the Tower of London we saw the famous Tiger Tavern which was built in Queen Elizabeth's time. On up this street we could see the Royal Mint where all English coins are made Also along this street is the Port of London Building, which controls all shipping in the Thames River Going farther on we could see the where two of our Adams and Wm. where two ofo ur Adams and Wm. Penn were married.

The tour took us past the Bank of America Bank of New York and Bank of England to the bombed out part of London during the blitz of 1940-1941. It was told to me that there were fires here for 3 weeks straight and they couldn't get any water, as the Thames River was so low Since this part was strictly offices, there were very few people killed The only structures standing were a few walls that were unscathed by fire. In a way, it was nice to get rid of these buildings as they now can build a new and a better London

Our tour brought us back into the city to St. Paul's Cathedral, which was started in 1675 and finished 35 years later. As one enters the main west doors, to the left, you have two chapels, one called the Kitchner Chapel, in honor of Lord Kitchner who drowned in the "Hampshire" in 1916 The other chapel was the first part of the Cathredal opened in 1710, known as the St. Dunstans Chapel

Now as we walk to the right, we see the Chapel of the Order of St. Michael and St. George which has gold laden bars before it. Proceeding by the Center Aisle, to the left are memorials by Alfred Stevens to the Duke of Wellington, which are now bricked up for safety As we approach the front of the main room, to our right is the entrance to the Galleries. These stairs, 365 in all, lead to the Whispering Gallery and the Stone Gallery. The Whispering Gallery is 100 feet from the floor and we were told to go around the ledge directly opposite of the door we came in, putting our ear next to the wall we could hear the guide on the other side, whispering next to his wall. The accustics is so great that we could hear distinctly every word he said Going on up to the Stone Gallery, we could see the city of London, the Thames, a very beautiful sight on a clear day

We came on down to the main floor directly beneath the dome which is 365 feet to the top The outer part of the dome is of wood with a casing of lead and is kept in place by oak beams supported by a cone of brick This outer dome carries the weight of the Cross and Lantern (700-800 tons) on to the 8 great piers which encircling the dome area pass down into the crypt to 4½ feet below the crypt floor The weight of the whole structure is 60 000 - 70,000 tons of which half of this weight falls on the piers These 8 piers had to be restored in 1912 and 1930 at a cost of L300 000 ($1,200,000) It is these which have enabled the Cathedral to stand up against the bombing

The paintings around the dome are the work of Sir James Thornbill and represent scenes from the life of St Paul. Looking eastward (back of the church) you can see the choir, which suffered the first war damage, October, 1940, when a bomb struck its east side, tore a great hole in the roof and brought down masses of masonry on to the Sanctuary beneath. There was no other serious damage to the Choir, from which most of the priceless woodwork has since been removed as a protective measure Another bomb went 45 feet below the main floor and was carried out successfully by men risking their lives, to save the Cathedral The center of the dome is also the center of the city of London

We then walked down some stairs to the Crypt. Starting at the back of the Church to the right we came to the grave of Sir Christopher Wren, the great architect and builder of this great Cathedral Near him lie many of the most famous English painters, such as Reynolds, Turner, Millais, and Hunt (painter of "The Light of the World") In the eastern part of the Crypt, which is now in use for Cathedral services, are the memorials or graves of distinguished musicians, painters, sculptors, and architects Moving westward through iron gates you find the tombs of Wellington and Nelson The upper part of Nelson's tomb is a fine piece of Italian work, which originally belonged to Cardinal Wolsey and to King Heny VII and was brought to the Cathedral from Windsor on the death of Nelson.

In the adjacent bays are graves or memorials of Great Britain's great sailors such as Jellicoe and Beaty, also their flag that was flown in the Battle of Jutland. A few yards beyond to the right is an interesting model of Old St. Paul which followed (1087) the Saxon Cathedral (founded at the beginning of the 7th century) and itself replaced in 1675-1710 by the present building Otherwise, on this site is an unbroken Christian history of 13½ centuries This model gives an admirable idea of a great mediaeval Cathedral and its surroundings Fire has always been a danger in the city and this building was entirely destroyed in the Great Fire of London in 1666.

Passing between the monuments of George Williams, founder of the Y M C A. on the right, and on the left, W Carlile, the founder of the Church Army, you reach the Funeral Car of the Duke of Wellington This car or carriage was constructed of guns taken from his burial at Whitehall Also this car was built in 1852 in 18 hours and weighs a total of 18 tons. The wheels cannot be turned sideways so the street from Whitehall to the Cathedral is in a straight line. The total seating capacity in the main room is 5,000 seats with only 2,500 seats there at the time I visited the Cathedral.

We then came out the front door and we could see the memorial of Queen Victoria Into the taxi we got and toured along the Public Revenue Office, past the Law Courts Building to the original old book shop of Charles Dickens built in 1567 I just peered through the door and could see an old clock and of course, all Dickens' books Then came back to our Columbia Red Cross, after an interesting tour of London.

After checking my notes as to where we had gone, I noticed that we did not visit the Westminister Cathedral so I quickly went out the door and headed for this Cathedral It has been opened to the public for only 41 years, so you can see that it is rather a new building The style is of the early Christian Byzantine and very unique in its structure.

To give you the size of the Cathedral its extreme length is 360 feet and a width of 156 feet 12,500 000 bricks were used for the entire structure, which has an area of 54,000 square feet

As we came into the main room we are standing between two great columns of Norwegian red granite which supports the organ gallery The first object that attracted our attention was the high altar, while from the center of the great arch hangs the sign of redemption, in a richly decorated setting, with a figure of the suffering Christ emblem of the united humiliation and glory of the Cross Each receding dome and bay of the nave is deeper in mysterious shadow until you reach the one which forms the sacred environment of the high altar Half-way up the great piers there is a horizontal line or red brick This line represents the heighth to which the lining of marble work will be carried, and above this line the walls are a blaze of colored mosaic, blue, green, red and gold. In the circles of the domes there are figures representing the mysteries of religion.

As we proceed further up the church, we see the charming vistas of side chapels and transepts Each of these chapels have their own name, which I don't think will be very interesting to your readers unless they know every detail of the history of England Most of these chapels are made of highly polished marble and stones from all over the world

So brought my tour of Westminister Cathedral and the tour of London to an end My main purpose for writing this tour of London is to give you folks back home some what of an idea of London today and it's historical places Perhaps you are educated a bit more by reading this article, perhaps not, but I do hope you thoroughly enjoy its contents.

Merry Christmas to all of you and may this New Year bring us Victory.

Sincerely, B.H.

Who Has It?

Information as to the location of the first Iowa flag a 29-star flag symbolizing the birth of Iowa as the 29th state and first free state west of the Mississippi river is hereby requested by Cora M. Williams curator, State Department of History and Archives, Statehouse, Des Moines, Iowa The flag is wanted for deposit in the national gallery of flags in the Fort Henry national monument and shrine, right where the famous Star Spangled Banner was found still waving, Baltimore, Md.

Distinguished Visitor

A friendly and extremely sociable white pelican was found recently in a ditch in Grove township, Adair county, by Lee Lydon, former The bird is assumed to have been grounded in a storm while on its way south It consented to pose for a picture with Mr. Lydon for the Adair County Press.

Bull-Headed

The oft-quoted bull in the china shop had nothing on the South Amana bull that recently broke away from his handlers while changing places of abode. He ran up onto the basement door of the Henry Baumgartner residence and crashed through into the basement It took eight men with considerable tackle to extricate the animal from his strange surroundings.

South Africa as a whole is an elevated region, more than 40 per cent of its area being more than 4,000 feet above sea-level.

The Klemme Cooperative Grain Company will hold their

Annual Meeting

January 12, 1945

at the Klemme Community Hall, beginning at 2:00 o'clock P. M., at which time there will be an election of officers, and dividend checks for the period from May 1, 1940 to April 30, 1941 will be handed out, and other business which may properly come before this meeting will be taken care of. Please be there.

Yours truly,
GLEN BRIDGES, Mgr.

SAM STEWART, of Clarion will be the speaker.

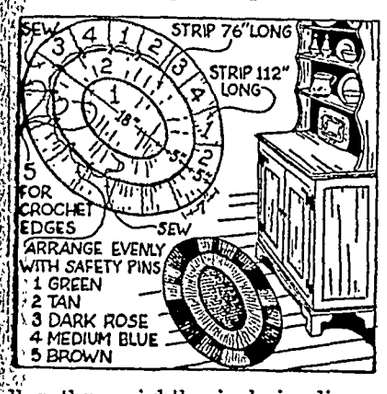
Blended Colors in Knitted Rag Rug

IF YOU want to make a really effective rug from odds and ends of fabric—and do it quickly, this knitted rug is the answer. You cut or tear the material in strips about three-quarters of an inch wide, turn in the raw edges and then knit straight strips with nee-



dles three-eighths inch in diameter. These are sewn around a center oval.

The colors are important of course and it is essential that the knitted strips be eased in with evenly distributed fullness. The trick is in pinning them in place first as shown in the diagram. If you do not have the colors indicated, remember that it is always worth while to dye the rags so that they blend harmoniously.

* * *

NOTE—This rug is from BOOK 4 which also gives the complete knitting directions for the center oval and the strips. Directions for more than 32 things to make for your homes and for gifts and bazaars are included in this book. Copies are 15 cents each. Send your order to:

WHO WOW WMAQ

SNAPPY FACTS ABOUT RUBBER

Commercial motor vehicles in the U. S., based on gasoline allotments, are expected to run 56 billion miles a year. Reduced to truck tire wear, that represents a tremendous number of tires.

The rubber used in gas masks is now 100 per cent synthetic.

Never use a tube in a tire larger, or smaller, than that for which it was designed by the manufacturer. Premature failure will result if you do. To return full mileage, synthetic tubes must be lubricated with vegetable oil soap solution when mounted on rims.

Chowder Comes to the Dinner Table!
(See Recipes Below)

Soup Suggestions

There's a lively interest in soup these days, and rightly so, for a soup that's rich enough can take the place of a meat dish at a meal and still satisfy even appetites made keenest by blustery winter weather.

Soups are good for filling in that gap before the main dish is brought to the table to satisfy the hungry. If they are substantial enough, that is, if they are creamed soups, or the thicker type of vegetable and meat combinations, no main dish is required. And, if there are any dieting members in the family, there are enough of the lighter types of soups which not only satisfy, but are low in caloric value.

First, there are the substantial lentil soups which have much nourishment:

Bean Soup.

1½ pounds pork shoulder or ham
2 tablespoons onion, chopped
1 pound navy beans
1 teaspoon salt
½ teaspoon white pepper

Soak the beans in water overnight. In the morning, parboil them. Cover the meat with water, then add beans, onions, salt and pepper. Cook 2½ to 3 hours. Serve with dumplings, if desired.

Yellow Split Pea Soup.

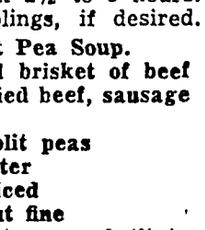
3 pounds smoked brisket of beef or scraps of dried beef, sausage or ham bone
2 cups yellow split peas
3 quarts cold water
¼ cup celery, diced
1 small onion, cut fine
2 tablespoons butter or substitute
1 teaspoon sugar
2 teaspoons salt
¼ teaspoon white pepper
2 tablespoons flour

Pick over and wash peas. Soak them in cold water overnight, then drain and place in a saucepot with meat. Add cold water and let simmer gently for about 4 hours. Add celery during last part of cooking. Remove meat when tender. Skim fat off the top of the soup. Heat 2 tablespoons of butter in frying pan, add the onions and brown. Blend in flour and gradually add soup, stirring constantly. Season to taste and serve with smoked meat, adding croutons.

Clam Chowder.

1 quart clams
4 cups potatoes diced
2 inch square fat, salt pork
1 onion, diced
1 teaspoon salt
⅛ teaspoon pepper
4 teaspoons butter
4 cups milk
8 soda crackers, rolled

Pick over clams, drain and cut pork in small pieces. Fry out in skillet. Add onion and fry 5 minutes. Add potatoes, clam liquid and enough water to cover. Cook until nearly tender, then add butter, milk and seasoning. When potatoes are done and milk is very hot, add clams and cook for 3 minutes.



Lynn Says:

Soups for Meals: If there is any water left after vegetables are cooked, this should be saved and used for soup stock. A few extra vegetables may be added to give stronger flavor.

When milk is added to soups, it's richness and nutritive value is increased.

Serve big helpings of salad when soup is the main dish and have a really nutritious meal.

Soups may be garnished with toasted croutons, whipped cream or egg white or sprinklings of grated cheese, paprika, and parsley.

Lynn Chambers' Point-Saving Menu

*Vegetable Chowder
Buttered Rye Toast
Jellied Grapefruit Salad
Fudge Pudding
Beverage

*Recipe given.

***Vegetable Chowder.**
(Serves 6)

¼ cup butter
3 medium onions, peeled and chopped
2 slices green pepper, chopped fine
2¼ cups green beans
3 medium carrots, scraped and sliced thin
5 medium potatoes, peeled and cubed
3 cups boiling water
4 cups milk
3 teaspoons salt
Black pepper to suit taste
6 ounces (⅓ cup) grated American cheese
Seasoning salt

Melt butter in soup kettle. Add onions and green pepper and simmer 2 to 3 minutes in boiling water. Wash beans and slice thin. Prepare carrots and potatoes. Add beans and boiling water to butter and onion mixture, and cook uncovered for 15 minutes, or until all vegetables are tender. By this time most of the water will have evaporated. Add milk to the chowder, stirring carefully; heat just to boiling. Add salt, pepper and grated cheese. Remove immediately from fire and stir until cheese is melted. Serve piping hot with a sprinkling of seasoning salt on each serving.

Unusual soups are good to have in any cook's repertoire should you want to do something different for the company or family occasionally.

Chicken Meringue Soup.
(Serves 6)

1 quart chicken stock
1 carrot, sliced
3 onion slices
1 sprig parsley
2 tablespoons quick-cooking tapioca
2 cups hot milk
2 beaten egg yolks
⅓ cup cream
½ teaspoon salt
2 egg whites

Heat chicken stock and vegetables for 15 minutes; strain and add tapioca; place over hot water and cook until tapioca is transparent. Add milk, then egg yolks combined with cream. Cook stirring constantly until thickened. Add salt to egg whites and beat until stiff. Serve soup in individual dishes topped with egg white sprinkled with paprika or chopped parsley.

Liver-Ball Soup.
(Serves 6 to 8)

2 pounds beef brisket
2 teaspoons salt
¼ teaspoon pepper
1 bay leaf
1 cup coarsely chopped celery
1½ cups canned tomatoes
1 cup sliced carrots

Cover meat with cold water and add seasonings. Simmer 1 hour. Add vegetables and simmer 1½ hours. Force vegetables through colander and add to meat stock. Reheat and add liver balls. Simmer 15 minutes.

Liver balls: Combine ½ pound calves' liver, ¾ cup dry bread crumbs, ¼ cup finely chopped parsley, ⅛ teaspoon celery seed, ¼ teaspoon salt, dash of pepper, 2 tablespoons flour, 1 beaten egg and ½ teaspoon onion juice; mix well and chill thoroughly. Form into 1-inch balls.

Get the most from your meat! Get your meat roasting chart from Miss Lynn Chambers by writing to her in care of Western Newspaper Union, 210 South Desplaines Street, Chicago 6, Ill. Please send a stamped, self-addressed envelope for your reply.

History Made on New Year's Day

Not only does New Year's day mark the beginning of a new year, but of a new hope to many people in many lands. During time of war, it has always meant the period of prayer for the safety of country and loved ones.

Many events of lasting importance have occurred in history on this day, including:

38 B. C. The era of the Caesars began.
1349 A. D. Edward III, king of England, defeated the French before Cainis with great slaughter.
1735 Paul Revere was born.
1757 Calcutta, India, captured by the British.
1776 First Union flag of 13 stripes unfurled by George Washington.
1792 Kentucky entered the Union.
1801 Union of Ireland with Britain.
1814 American dragoons attacked the British who had seized Buffalo, N. Y.
1815 General Jackson repelled British when they attacked New Orleans.
1825 Great Britain acknowledged independence of South American republics.
1863 Emancipation of Negro slaves went into effect by proclamation of President Abraham Lincoln.
1907 Pure food law put into effect.
1913 Parcel post system inaugurated.
1919 New Year's day declared a legal holiday throughout the country except in Massachusetts and Washington, D. C.
1920 U. S. census gave population of 105,710,620.
1923 Canadian National Defense act went into effect.
1926 Mexican railroads returned to private ownership.
1929 Ecuador's eight-hour and child labor laws went into effect.
1933 Soviet Union's first five-year plan ended.
1934 U. S. bank deposit insurance law went into effect.
1935 Ration card system abolished in Soviet Union.
1936 U. S. unemployment insurance law went into effect.
1938 Thomas E. Dewey sworn in as district attorney of New York city.
1939 Insurgents shell Madrid. Ex-Premier Wang Ching-Wei expelled.
1940 Russian planes bombed Jyvaskyla, Finland. England called to colors men from 19 to 28 years old.
1941 English and German planes made reconnaissance trips.
1942 Japanese submarines shell Hawaii.
1943 U. S. planes bomb Japanese positions in Aleutians.
1944 Lieut. Gen. A. A. Vandegrift becomes head of U. S. marines. Russia observes Christmas. Pacific agreement reported by President Roosevelt.

Facts and Fancies About New Year's

The little British colony on Hanson island, in the Chathams, 414 miles southeast of Wellington, New Zealand, will be the first to greet 1945. It is just east of the international date line, from which all time is reckoned.

* * *

The famous Scotch bun is made entirely of egg and chopped fruit enclosed in a crust for New Year's holidays.

* * *

When Julius Caesar created January instead of March the first month, he set the present New Year's day.

* * *

The English New Year celebration was changed from December 25 by William the Conqueror because he was crowned on January 1.

* * *

The person who first visits a family on New Year's day, carrying a box filled with cake, the Scotch tradition holds, will be lucky during the year.

* * *

The Hindu year begins with the new moon immediately preceding the vernal equinox in March.

* * *

People in Siam celebrate New Year's on April 1.

* * *

The earth will revolve about the sun in 365.2422 days to complete the year of 1945.

* * *

A glimpse into the future was believed possible by the early Scots who turned to their Bibles on New Year's day. The sacred book was opened at random, and the entire chapter read. The message was believed to describe the happiness or misery in store for the coming year.

SEWING CIRCLE PATTERNS

Neat and Wearable House Frock Tailored Brother and Sister Sets

House Frock

WONDERFULLY simple to fit—easy to wear and launder—this button-front house frock will make you look crisp and neat for home-front tasks.

* * *

Pattern No. 1977 comes in sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36 requires 4¼ yards of 35 or 39-inch material; 3½ yards rickrack to trim.

For this pattern send 25 cents in coins, your name, address, size desired and pattern number.

For Tots

BROTHER and sister set the little folks will want to wear often. Sister's pert pleated skirt and brother's trousers both have suspenders! Either boy or girl can wear the neatly tailored blouse, with long or short sleeves.

* * *

Pattern No. 1259 comes in sizes 2, 3, 4, 5 and 6 years. Size 3, blouse, short sleeves, requires 1¼ yards of 35 or 39-inch material; skirt, 1⅛ yards; pants, 1 yard.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Household Hints

It is easier to wash a large amount of slightly soiled clothes than a few very dirty ones.

—•—

When washing walls, start at the bottom, instead of at the top; then if you spill any of the cleaning fluid on the wall it will not spot, as otherwise.

—•—

Baking soda is one of the best-known agents for cleaning glassware.

—•—

When shaking a small throw rug, hold by the sides. If held by the ends, the weight of the rug pulls the threads apart.

—•—

Clean your brick hearth by first scrubbing with a stiff brush and hot soapy water. Rinse clean and wipe dry. Let stand a day and then coat with boiled linseed oil.

—•—

Glue a bright piece of linoleum over the old worn top of a card table.

—•—

If heavy furniture must be moved and there is no second person to help, this is a satisfactory way to do it. There is little lifting, and there will be no scratches on the floor. Lift furniture onto an old rag rug or sack. Then pull it over to where you want it to be.

—•—

A steam bath will usually bring velvet back to its original texture.

—•—

Coffee grounds make a good sweeping compound for use in the basement.

—•—

When boiling cauliflower, place in a kettle with head downward. Scum rising to the top of kettle will not then settle on flowers and discolor them.

To Relieve Bad Cough, Mix This Recipe, at Home

Big Saving. No Cooking. So Easy.

You'll be surprised how quickly and easily you can relieve coughs due to colds, when you try this splendid recipe. It gives you about four times as much cough medicine for your money, and you'll find it truly wonderful.

Make a syrup by stirring 2 cups of granulated sugar and one cup of water a few moments, until dissolved. No cooking needed—it's no trouble at all. (Or you can use corn syrup or liquid honey, instead of sugar syrup.) Then put 2½ ounces of Pinex (obtained from any druggist) into a pint bottle. Add your syrup and you have a full pint of medicine that will amaze you by its quick action. It never spoils, and tastes fine.

This simple mixture takes right hold of a cough. For real results, you've never seen anything better. It loosens the phlegm, soothes the irritated membranes, and eases the soreness.

Pinex is a special compound of proven ingredients, in concentrated form, well-known for its prompt action in coughs and bronchial irritations. Money refunded if it doesn't please you in every way.

Saved Home

"Fluffy" mewed and yowled loud enough one night to waken the Rev. Chas. A. Hyde who got up to learn the cause of the confusion. Rev. Hyde found the house filled with smoke and the ceiling raftres in the basement over the furnace almost ready to burst into flames. The Peterson fire deparmtent made the nine-mile trip to the Hyde farm home and extinguished the fire. "Fluffy" now holds a very high place of honor in the Hyde family circle.

An electronic mercury-vapor detector that can detect one part of mercury in 200,000,000 parts of air protects many industrial employes from exposure to mercury poisoning. Vaporization of a single calomel pill will touch off the detector.

Art Wellemeyer left Tuesday for Minneapolis to buy merchandise for his store.

The W. S. C S. meets Thursday at the Methodist Church for installation of officers and pot luck lunch.

Mr. and Mrs. Emil Boier visited New Year's day with Mrs. Augusta Riemer at the Ben Riemer home.

Miss Anna Gibbs was a dinner guest on New Years Day at the Sumner Trumbell home.

Mr. and Mrs. Will Riemer of Garner visited at the Ben Riemer home in Liberty, Saturday.

H D. Ramsay and family were entertained to dinner on New Year's day at the home of C. A. Larsen and family.

Mr . and Mrs. Lloyd Sherwood and children spent Sunday and New Year's day visiting with relatives and friends at Mason City.

Miss Joan Leschensky of Waukon came Sunday and spent New Year's day at the Rev. Calvin Grosshuesch home.

The Ladies Aid Society of the Klemme Evangelical and Reformed church met Wednesday afternoon.

Rev. and Mrs. H. E. Harvey and children, Elwod and LaNelle were supper guests at the R. W. Elder home Thursday evening.

Mrs. Naska Bock entertained to dinner on New Year's Day, Mitchel Bock and family; Edwin Bock and family of Garner; and Lyle Burr and family of Mitchellville.

Mr. and Mrs. Earl Ruka, accompanied by Mrs. Ruka's mother, Mrs. Cena Neilsen of Goodell, were supper guests Sunday evening at the Harold Neilsen home at Belmond.

Miss Gertrude Grosshuesch, Cadet Nurse, returned to Marshalltown Friday after spending a few days visiting with her parents, Rev and Mrs. Calvin Grosshuesch and

Mr. and Mrs. Bernard P ingnitz drove to Mason City Tuesday Mr Pringnitz has been ill with stomach ulcers for three weeks and had a check-up at the hospital

Mrs. J. N. Day was at Garner Monday and Tuesday helping care for Alex Ross who is ill. A registered nurse is now taking care of him.

Mrs. Lyle Burr and children of Mitchellville came Friday and visited until New Year's Day with Mrs. Naska Bock, mother of Mrs. Burr.

Miss Marlyn Ritterhaus of Menno, South Dakota, came on New Year's eve and remained until Tuesday for a visit at the Rev. Calvin Grosshuesch home. Miss Ritterhaus was returning to college.

Mr. and Mrs. C H Conklin of Goodell, received word from their son, Dale, who has been serving in the south Pacific, that he is now in San Diego, Cal., and will be home soon on a furlough.

Mr. and Mrs. Lyle Liebendorfer of Forest City and Mr. and Mrs. Joe Liebendorfer and son, Dick, of Hampton were pre-New Year day dinner guests at the R. A. Jorgenson home, Sunday.

Mr. and Mrs. Fred Gates of Clear Lake had as their dinner guests on New Year's day Roy Schaefer and family; Ben Ridder and family; and Ben Riemer and family, all of this community.

Supt. A. L. Kingery and County Supt. Chas. Whitney of Garner refereed a basketball game at Forest City Friday evening between Forest City and Cedar Falls. Cedar Falls won 37-32.

Mrs. Earl Schaeffer, who spent the holidays visiting with her parents, Rev. and Mrs. Wilson at Storm Lake, spent Tuesday visiting in Klemme. She was on her way to Forest City.

Dinner guests at the Elmer Arnold home on New Year's Day were Dr. and Mrs. Arnold Tice of Rochester, Minn.; Mrs. C. B. Tice and Mrs. George Tice of Mason City. Dr. Arnold Tice leaves Wednesday for Philadelphia where he will be on the staff of the Navy hospital.

Pvt. Howard Boller is enjoying a furlough which he is spending at the parental Harve Boller home in Goodell. Pvt. Boller is being transferred from Camp Hood, Texas, to Fort Meade, Md.

The Methodist Choir enjoyed an old fashioned taffy pull after choir rehearsal Friday evening at the J. A. Chambers home. And from the sample that came this way, we can say John knows how to make real taffy.

Mrs. Clifford Adair returned home Sunday morning from Rochester, Minn., where she had been with her mother who underwent an operation. Mrs. Adairs two sisters came to be with their mother at the hospital.

The Lloyd Sherwood family of Mason City moved into the Lenz house in the south part of town Friday. This is the house recently vacated by the Tom Roths family. Mr. Sherwood is the new manager of the Northern Lumber Co.

Mrs. Clara Smith, Klemme seventh and eighth grade teacher spent her holiday vacation visiting with her mother, Mrs. Louis Johnson in the home of the latter's daughter, Mrs. J. Hagan in New Richland, Minn.

New Year's Day dinner guests at the home of Mrs. Lena Schroeder were Raymond Barz and family; Mrs. Esther Barz and family; Mrs Clara Barz and Avis; Mrs. Evert Barz and family; Mrs. Mary Waterman, and Eldon Hagen.

Mr. and Mrs. E. J. Schneider have received word from their son, Staff Sgt. Bob Schneider stating that he had a rough trip over the Pacific and was sea-sick. He is now in New Guinea serving in the medical corps of the army.

Hulda Wiles of Mason City was visiting with Klemme friends for a short time Saturday. She was on way to Boone for a week end visit with her sister and from there was going to Arkansas to care for her neice who was seriously ill.

Mrs. Lyle Wilcox is assisting at the First National Bank every day and Miss Avis Barz works there on week ends. Miss Barz attends Hamilton's School at Mason City. Mrs Loeffler (Phyllis Swanson,) will continue working there until March 1st

Mrs Herman Paul was taken to the Mercy hospital Thursday evening after a small chicken bone had lodged in her throat. Saturday morning she underwent an operation on her throat and at this writing is making a good recovery. She expects to return home this week Friday.

Mr and Mrs. Francis Pearson moved Friday into the Roy Bachman tenant house at Goodell vacated by the Derush Hughes family who moved to Dows. Francis was recently given an honorable discharge from the U. S. Army and will farm with his father, Carl Pearson who lives south and east of Klemme.

"Your Birthstone"—in the first of a series of unusual paintings, Willy Pogany, eminent artist, portrays January's maid, wearing the gems she prizes most. See the front color page of the American Weekly, the magazine distributed with next week's Sunday Chicago Herald-American. 1tp

Mr and Mrs. Lloyd Paris of Armstrong came Friday and visited until Saturday afternoon at the A. L. Kingery home. Mrs. Paris is Mrs. Kingery's sister. Mr. and Mrs. Paris are farmers and own an airplane and had intended to fly here but the heavy snow prevented them from flying. Both Mr. and Mrs. Paris pilot their light plane.

Mrs. Art Kudje Was Hostess To The U-Delt-Em Bridge Club

Mrs. Art Kudje entertained the ladies of the U-Delt-Em bridge club at her home Thursday afternoon. High score was won by Mrs. C. G. Waterman, and Mrs. P. M. Wilson and Mrs. R. A. Jorgenson tied for second and third Both ladies had a score of 5050, which was again unusual.

COUPLES ISSUED LICENSES TO WED BY CLERK RAW

Clerk of the District Court, Elmer Raw issued marriage licenses recently to Paul H. Heath, 26, of East Dubuque, Ill., and Miss Mildred Greenfield, 22, of Woden; George William Willert, and Mrs. Marie Louise Willey, both of Des Moines; Frank L. Johnson, and Miss Mabel M. Spieker, both of Britt.

BASKETBALL SCHEDULE

Jan. 8. Britt, there.
Jan. 11. Thornton, there.
Jan. 15. Ventura, here.
Feb. 2. Kanawha, there.
Feb. 8. Hayfield, here.
Feb. 16. Garner, there.
Feb. 19. Britt, here.
Feb. 23. Swaledale, here.

Can You Believe It?

Last summer, a sow on the Lawrence Amos farm near Griswold was buried under a pile of straw. Seventy days later, when Mr. Amos was cutting away straw he was much surprised to see the sow trying to make her way to the feed lots. Mr. Amos assisted her and gave her extra care. The animal gained strength and a few days later farrowed nine pigs, all living at the last report.

TO MY FRIENDS AND RELATIVES

Just to thank you all for your nice visits you made me, and the pretty flowers you brought while I was ill; and for the pretty Christmas cards and valuable presents. Thank you all and wish you all a Happy, Happy New Year. —Mrs. Dora Greimann.

SHAMROCKS "HIT THE ROAD" NEXT WEEK

The Klemme high school Shamrocks will play to away games their schedule next week. On Tuesday evening, January 8th they go to Britt, and on Thursday evening, January 11 they go to Thornton.

The next home game will be January 15th when the fast Ventura team comes here.

THERE IS ONLY . . .
ONLY ONE WAY
TO BECOME CONVINCED—

We might tell you over and over about the better quality and finer taste of our food but at last there would be only one way we could convince you—and that is to come in and eat a few of our delicious meals and lunches—then and then only would you know positively that you do get finer foods, more delicious prepared than you find a log of places.

GETS AWARD

SGT. ASA R. ARNOLD GETS PURPLE HEART AWARD

Sgt. Asa R. Arnold, son of Mr. and Mrs. Fred A. Arnold of Klemme, was recently given the Purple Heart Award for wounds received in France shortly after "D" Day.

Sgt. Arnold was hospitalized in England and after recovering from his injuries returned to the Western Front where he has been since about the 1st of October.

Sgt. Arnold sent the Purple Heart Medal to his wife and baby daughter who are living at Dysart, Iowa, for the duration.

A few days ago relatives of Sgt. Arnold received letters from him which were written on German stationery, taken from captured nazis.

Lt. "TOKY" AHRENKEIL HIGH POINT MAN ON AAF TEAM

Taalkeus "Toky" Ahrenkeil, son of Mrs A. Ahrenkeil of Klemme, formerly of Goodell, is leading the Army Air Force basketball team at Victorville, California. So far this season "Toky" has already chalked up 66 of the 192 points scored by his team in four games.

"Toky" was a star player and hot shot on the Goodell high school team for four years. After graduating in 1936 he went to Drake University, Des Moines and won a place on the team the first year.

He was captain of the Drake University team in his last year. He was high point scorer for his team and placed fourth highest in the Missouri Valley Conference.

Lt. Ahrenkeil attended Officer Candidate School at Miami Beach, Florida, and received his commission in 1942. He has been at Victorville 2 years. His present assignment is assistant physical training officer.

Pvt. Elmer Buckley Stationed At Camp In Texas

Pvt. Elmer V. Buckley, son of Mr. and Mrs. Ray Buckley of near Klemme, who entered the service in December, is located in Texas. Here's his address:

Pvt. Elmer V. Buckley 37780873
Co. D., 146 Btn. I R T C,
South Camp Hood, Texas.

Former Klemme Youth Still In Navy Hospital

Larry Van Syoc, son of Mrs. Roy Smock of Waterloo, formerly of Klemme, has been confined to a Navy hospital for several months. His address is:

Larry R. Van Syoc, A S
U. S. N. Hosp. Unit, 3, Ward 432,
Corona, California.

Hancock County Coop. Oil Co. Will Hold Annual Meeting

The annual meeting of the Hancock County Coop. Oil Association will be held at the Avery theatre in Garner at 1:00 o'clock, Monday, January 15th, for the purpose of electing four directors and one to fill vacancy. Dividend checks will be distributed and free movies will be shown after the business session.

CELEBRATED

KLEMME COUPLE SURPRISED ON 44TH ANNIVERSARY

Mr and Mrs Alex Early carried out a family surprise gathering on Mr. and Mrs. John Larson, Klemme, in honor the their 44th wedding anniversary, which was Dec. 28th.

Mrs. Early, eldest daughter of the Larsons, invited her parents to dinner, together with her brother Ralph Larson and family of near Goodell; another brother, Harry Larson and wife of Belmond, and sister, Mrs. Wm. Luideman, husband and son of Ackley.

In the afternoon Mr. and Mrs. Larson's other children and their families arrived to complete the surprise party and family gathering at the Early home. In this group were Mr. and Mrs. Elmer Larson and sons, Mr. and Mrs. Jim Larson and daughters of Klemme, Mr. and Mrs. Waulter Lauden and daughters, Mr. and Mrs. Alvin Haupt and daughter, and Mr. and Mrs. Herman Meintz and son, all of the Goodell community.

They all enjoyed a lunch after which the oldest daughter, Mrs. Early and the youngest daughter, Mrs. Luideman, in behalf of all the group, presented their parents with a beautiful floor lamp in memory of the happy occasion.

HANCOCK COUNTY OVER THE TOP IN BOND SALES

Last Report Iowa Held Tenth Place In Iowa Bond Sales

H. C. Armstrong, of Britt, Hancock county chairman of War Bond sales, reports Hancock County has exceeded its quota and stands in tenth place in the state.

Hancock County's quota was fixed at $795,000.00. Individuals in the county purchased $790,0096.00, and all others $167,721.00 for a total of $957,306.00.

Hancock countians are still buying bonds to swell the above figure.

FORMER KLEMME BAND MAN SEES ACTION IN GERMANY

T-5 Bernard Onerheim, who before being called into the service was bandmaster and director of music in the Klemme schools, has seen action on the Western Front, according to a letter received the other day by Supt. A. L. Kingery.

"Barney" stated that he had discarded his horn for a rifle and bayonet and the noise he made was'nt music to the nazis! Our former band director also said he needed over-shoes and so hunted up a dead soldier and took a pair off of him. It wasn't a pleasant thing to do, but "Barney" said he was cold and the dead soldier didn't need overshoes any more.

WILL FARM

PFC. FRANCIS PEARSON

Pfc. Francis Pearson, son of Mr. and Mrs. Carl Pearson of near Klemme, who has been stationed at the Bushnell General Hospital at Brigham City, Utah, has received an honorable discharge from the army. He and his wife, the former Miss Betty Lass, have returned from Utah and are now living in Goodell. Mr. and Mrs. Pearson will begin farming in the spring, having rented Mrs. Lewis Neuberger's farm northeast of Klemme.

DANGEROUS

BOYS, BE CAREFUL WITH THOSE RIFLES!

Somebody was mighty careless in handling a .22 calibre rifle in the north part of town abuot a week ago Saturday.

Luckily, the Martin Karsjens family was not at home, or someone may have been fatally injured when a bullet from a .22 calibre rifle crashed through a window in the Karsjens home. The leaden pellet was later found on the floor and had gone through a glass in an outside storm-window, through the regular window pane, and then through the wooden slat on the lower part of the window shade.

From a check-up, it was found that the rifle had been fired from a point on the street north of the house.

Another resident in the north part of town said a bullet whistled near his head while he was out of doors.

This is a case of both poor judgment and carelessness. Be careful how, when and where you handle firearms.

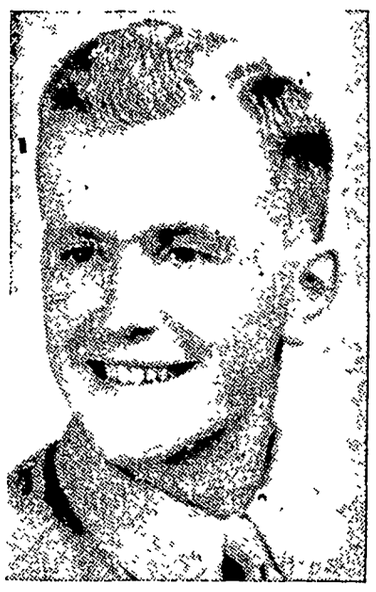
Authorities are investigating the case. Parents, better check up on your boy if he has been shooting a rifle lately.

Pethicks Moved To Farm Near Thornton Last Week

Cecil Pethick and family who resided on the C. A. Larsen farm northwest of Klemme, last week moved to the B. O. Christiance farm about 4 miles northwest of Thornton.

Frank Hejna and family from north of Britt, moved onto the Larsen farm vacated by the Pethicks.

PROMOTED



CPL. ALLAN BARZ

Allan Barz, son of Mrs. Clara Barz of Klemme, is a graduate of the Klemme High School was a star basketball player. He was recently advanced to the rank of Corporal at Boco Raton Field, Florida, where he is now specializing in radio for high altitude bombing. He entered the army March 10, 1944.

HAYFIELD CAGERS LEAD IN SEVEN EAGLES LOOP

Hayfield—Harold H. Brown, secretary of the Seven Eagles Conference, reports the following games to date. Only five schols are competing this year. Hayfield was last year's conference champion.

Hayfield	5	0	1.000
Klemme	3	1	.750
Woden	2	1	.667
Kanawha	1	3	.250
Goodell	0	6	.000

SHAMROCKS LOST TO BRITT IN NON-CONFERENCE TILT

The Klemme Shamrocks lost to the Britt Eagles in a non-conference game at Britt Monday evening 25-31. Ed. Buntenbach paced the Shamrocks with 11 points, while Gordon Johnson lead the Britt team with 12 points.

The Little Shamrocks kept up their 100 per cent winning streak by bombarding the Britt seconds 16 to 9. The Little Shamrocks are undefeated this season.

Save kitchen fats and oils.

New Year Sees More Men Leaving For The Service

IN HOSPITAL

SGT. KERMIT K. KOERNER

Sgt. Kermit K Koerner, son of Mr. and Mrs. Albert Koerner of Klemme, who has been serving in Italy, has been in the hospital several weeks with yellow jaundice. He states it will be several weeks before he will be able to return to duty. Sgt. Koerner entered the service Feb. 6, 1942, and went overseas in Jan., 1943, landing in Africa He is a mechanic in the Air Forces.

METHODISTS HEAR CLEAR LAKE WOMAN TALK

At a joint meeting of the Boards of Education of the Klemme and Liberty Methodist Churches last Sunday afternoon, Mrs. W. H. Hubbard of Clear Lake spoke in "The Crusade for Christ in Our Church School" She said the important thing for teachers to do is to: 1st, Create an Atmosphere or Climate, and we all do. The Church has a climate, and we create it.

2nd, We should examine our Teaching to see wherein we need to improve.

3rd, Survey our field to find possibilities.

4th, Get and use the best lesson materials that help the pupils act out in every day experiences what they are taught.

There was a good attendance, including the two superintenderts. Miss Doris Pringnitz of Liberty, and John A Chambers of Klemme Rev. W. M. Hubbard accompanied his wife and entered into the discussion.

Mrs. Hubbard is a member of the General Board of Religious Education of the Methodist Church, and had just returned from a meeting at Nashville, Tenn.

Tobias Knight, colonial secretary of North Carolina, was tried for complicity in the maraudings of Blackbeard the pirate, but was absolved by the provincial council.

MORE MEN INDUCTED INTO THE ARMED SERVICES

The following boys reported at the Legion Hall to report for induction into the armed forces on January 8, 1945, at Fort Snelling, Minnesota:

From Britt:
Raymond B. Hobbs; Calvin L Perkins: Merrill G. Lechelt; James H. Benner.

From Forest City:
Harold M Peterson; Robert L. Larson

From Corwith:
Richard D. Hankins.

From Wesley:
Francis C. Becker; Eugene K. Swanson.

From Garner:
Edward E. Christensen; James E. Utt; Reul J. Pruyn.

From Kanawha:
Raymond H. Dirksen; Elmer E. Kalvig.

From Goodell:
Arthur L. Chalstrom.

HANCOCK COUNTY BOYS LEFT FOR PHYSICAL EXAMS

The following Hancock county boys reported at the Legion Hall at Britt to report at Ft. Snelling, Minn., for their pre-physical examinations, January 8, 1945:

Garner:
Charlie L. Noble, Charles R Engstler, Marvin R. Woiwood, Warren W. Thada, Milo D Hamilton, John J. Liska, Elwyn J. Ridder, Arvil L. Stille, Raymond Schroeder.

Corwith:
Robert M Skelley.

Goodell:
Eldon L. Fjetland, Wilson T. L. Andrey, Robert R McNutt, Arnold O Ostendorf.

Forest City:
John D Rasmussen.

Kanawha:
Rene P. Schaller.

Woden:
Jacob DeWard.

Wesley:
Edward J. Richter, Wayne A. Moser.

Britt:
Maynard H Swyter, Pete K. Wewerke, Charles D Gordon, Allan O Schreiber.

Ventura:
Earl W. Roenfanz, Ronald W. Brager.

Garner Couple Observed Silver Wedding Anniversary Sunday

Mr and Mrs Earl Quintus, of near Garner, celebrated their Silver Wedding Anniversary Sunday when a large number of relatives and friends held a dinner in their honor at the C. D. of A Hall.

Before her marriage Mrs Quintus was Miss Ruby Radloff, daughter of Mr and Mrs Fred Radloff. Mrs Mary Waterman of Klemme attended the celebration

BROTHERS SERVE OVERSEAS—S. Sgt. Kenneth Boller and Cpl. Wesley Boller, sons of Mr. and Mrs. Anton Boller of Goodell, who starred on basketball teams back home some years ago, are now starring for Uncle Sam in his fight against the enemy. Sgt. Boller, who has been in service 3 years, is now somewhere in France. Cpl. Boller is with a medical division in England.

WEEKLY NEWS ANALYSIS

German Drive Reminder of Last Desperate Fling in World War I; Farmers Harvest Banner Crops

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

Attired in civilian clothes, and with some of their number carrying mace-like antitank projectiles, Heinrich Himmler's home guard parades in Berlin.

WESTERN FRONT:
History Repeats

To many, the mighty German counter - offensive Field Marshal Von Rundstedt launched against Allied armies on the western front was reminiscent of General Ludendorff's last desperate throw of the dice in 1918 in an effort to improve Germany's position for the negotiation of a peace.

Then, Ludendorff's drive failed; this time, resolute U. S. troops moved in to stem Von Rundstedt's attack, with decisive Allied countermeasures expected to not only blunt the enemy's thrust but also sap the most formidable part of his force and reduce his war potential for next spring.

There was one difference between Ludendorff's suicidal gamble in 1918 and Von Rundstedt's of this war, however, and that lay in Heinrich Himmler's success in holding the German home front together to supply the wehrmacht with men and materials for the big drive. In 1918, on the other hand, Ludendorff was faced with a crumbling home front, once rising to a bawling rage in those months because a tottering government failed to provide sufficient troops and supplies.

As the Germans' desperate drive developed, it followed the pattern of other major Nazi attacks of World War II, with powerful armored spearheads punching through forward defenses and then speeding onward to let the trailing infantry deal with opposing elements surrounded to the rear.

It was thus that the Germans wiped out the Poles; broke France, and marched a third of the way across Russia. This time, however, the enemy faced a stronger, better equipped, more resolute foe, and as his attack developed, U. S. reserves thrown into the battle moved to dam the surge.

In launching the offensive, Von Rundstedt followed the 1940 invasion pathways, pointing spearheads across Belgium and Luxembourg. In choosing this battleground below Aachen, the Nazi field marshal concentrated the bulk of his forces against the First army, which had thrown the Germans onto the edge of the Rhineland plain.

In the early fighting, the Nazi thrust against Monschau was appreciably contained by the Yanks, but the spearhead farther south probed as deeply as 22 miles to the important road juncture of Stavelot in Belgium. Still another Nazi force pushed across the Belgium border and threw a pincer around St. Vith.

In Luxembourg to the south, the Germans drove through the Ardennes forest beyond Echternach after meeting stiff U. S. resistance.

Once the German attack got underway, the battle turned into a slugging match, with the enemy pouring men into the initial breaches to exploit their breaks, while the Allies moved reserves to the front to check the drive.

Coincident with Von Rundstedt's smash to the north, Gen. George S. Patton's U. S. First army encountered stiffening Nazi resistance in the Saar, with the enemy following his favored pattern of throwing in short, sharp armored counter-attacks in an attempt to momentarily check the Yanks' push.

Meanwhile, it was announced that Himmler himself had taken over command of German resistance in the Colmar pocket in Alsace, throwing in strong detachments of his motley but fanatical home guard units.

PACIFIC:
Put on Heat

All through the scattered Philippine islands, the enemy came under increasing pressure of U. S. land and naval forces as the Americans speeded up their attack on this great archipelago guarding the Japs' vital inner imperial lines.

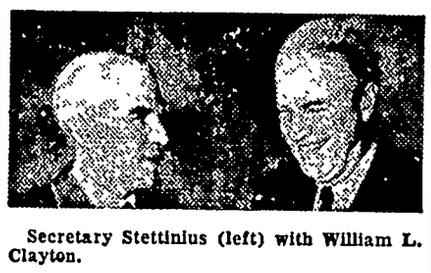
Latest threat to the enemy was the U. S. landing on Mindoro island, where the Yanks drove forward against negligible opposition to establish air bases from which land-based bombers could join carrier planes in hammering the main island of Luzon to the north, nerve-center for the whole Jap defense in the Philippines. Even as the doughboys plodded forward, carrier planes ripped at enemy shipping feeding island garrisons from the main staging point.

On Leyte, General MacArthur's triple-pronged offensive continued to squeeze the Japanese into an ever narrower corner on the island.

STATE DEPARTMENT:
O. K. New Setup

Amid fierce debate, in which charges were levelled that the recent reorganization of the state department put the House of Morgan in an influential position in the shaping of U. S. foreign policy, the senate confirmed President Roosevelt's appointments of William L. Clayton and Nelson Rockefeller as assistants to Secretary of State Stettinius.

With ardent New Dealers Pepper (Fla.) and Guffey (Pa.) leading the attack, it was charged that the new setup in the state department following Secretary Hull's resignation might indicate a reversal in a liber-



Secretary Stettinius (left) with William L. Clayton.

al U. S. foreign policy, to which Senator Connally (Texas) replied that President Roosevelt would chart the country's course regardless of the reorganization.

As the storm over the state department reorganization first mounted then subsided under presidential pressure, Mr. Roosevelt told newspapermen that the Atlantic Charter was not a formal document signed by this country and Britain, but merely a statement of principles to guide the Allies' war aims.

CROPS:
Banner Year

Surmounting weather and manpower problems, American farmers again answered the nation's call for high level production with a near record output of crops, 24 per cent above the 1923-'32 pre-drought average, the U. S. department of agriculture reported.

Pointing to near record acreage, the USDA said: " . . . Farmers planted only when they could and they kept on planting past the normal season as long as there seemed half a chance of success. . . . "

Production of grains, fruits, nuts and commercial vegetables were all above last year, with all-time top harvests of corn at 3,228,361,000 bushels and of wheat at 1,078,647,000 bushels. Output of dry beans and peas, oil seeds, tobacco and hay and forage crops has been seldom exceeded. Cotton was about average.

POSTWAR PLANNING:
Stability Sought

Looking forward to the day when the war will end and the cessation of wartime production will pose problems of providing adequate opportunity for a peacetime economy, senate and house committees busied themselves in developing a program for the prosperous employment of both labor and agriculture.

Most specific action taken was by a senate committee headed by Montana's Senator Murray, which submitted a proposal for an annual estimation of the amount of expenditure necessary for full employment and the probable outlays by private industry, with any differences to be made up by federal investment. Before the government would undertake any expenditures, however, every effort would be made to stimulate the flow of private capital.

While Senator Murray's committee presented the proposal, a house committee held hearings in Chicago, Ill., on means of bolstering postwar agriculture.

While advocating a reappraisal of farm credit needs, international agreements to dispose of surplus commodities and lowering of trade barriers, Edward A. O'Neal, president of the American Farm Bureau federation, also called for realistic marketings based on feed and labor costs to replace subsidies.

Movement of 2,000,000 persons from farms after the war to provide them with sufficient income and guard against overproduction was advocated by Chairman Oscar Heline of the Iowa Farmer Grain Dealers association. In agreeing, Prof. Noble Clark, chairman of the Land Grant Colleges' committee on postwar agricultural policies, urged a broadened educational program to equip rural youth for occupational opportunities.

WAR COSTS:
Pricing Policy

Aiming to cut government costs and at the same time impose greater efficiency on some firms with a resultant release of manpower and material, the war department announced the adoption of a new pricing program employing teams of experts that will comb over contracts before letting.

Expressing the belief that lower prices would lead to greater use of manpower and material, Col. Fred C. Foy, director of army service forces purchases, said: " . . . Whenever a contractor's selling prices are close to his costs, the contractor has an incentive to lower his costs to increase profit. . . . "

To firms establishing close pricing policies went the promise of consideration for a higher rate of return in reviewing contracts for excess profits and maintenance of work in case cutbacks, or reductions, are made in their line of war production.

AGRICULTURE:
New Crop

Thanks to a new oil extraction and harvesting process, the raising of sunflower seeds may develop into an important farm crop in the middle west, following successful experimentation in Illinois' Piat county.

Due to a new solvent process of bio-chemist Ezra Levin, oil now extracted from the sunflower seeds and the resulting mash no longer become rancid, while the construction of a new combine cuts the once high harvesting costs.

Planted in 40-inch rows and cultivated twice through the season, 1,600 pounds of seed were obtained from an acre, with a yield of oil at 14½ cents per pound reportedly higher than that obtained from a similar planting of soybeans. Not only is the oil good for salads and cooking, it was said, but seeds were found to have protein content of 53 per cent.

WAR SHIPPING:
Big Profits

With nine American steamship lines having made $26,847,000 in profits on $31,364,000 worth of business from April to September on lend-lease runs to the Middle East, the U. S. maritime commission started court action against seven of the operators to recover excess income.

Operating on rates that the commission itself set at the time when subs were scourging the seas and ships were needed to haul material to the British in the middle eastern and north African sectors, the companies averaged $300,000 profit per vessel, or 910 per cent of the book value of each.

Although two of the companies have refunded $300,000, the others have refused to make remittances, claiming that they merely charged prevalent rates, recognized by the British themselves.

TIRES

With increased military demands and manpower shortages limiting supply, no passenger tires will be available for "A" card holders or less essential "B" card applicants through the first three months of 1945, trade circles reported.

At the same time, it was said, the supply of heavy truck tires during this period will be the smallest for any quarter since 1941. Release of experienced workers from the army was proposed to help remedy the truck tire shortage.

People in the News . . .

Testifying that her husband refused to work as long as Mr. Roosevelt was president, Mrs. Catherine Ingrassia of Detroit, Mich., was granted a divorce.

* * *

Only a few days after purchasing his own plane, 24-year-old Howard Hoy of Urbana, Ill., was killed when it crashed in the barnyard of his own farm.

Delivery of a premature two pound baby boy to Mrs. James Snodgrass of Forest Park, Ill., came as a complete surprise to both husband and wife. "We had no idea we were going to be parents again, and I ought to know," said Mr. Snodgrass. "I've got two boys already, one seven and the other eight years old." The child was born after Mrs. Snodgrass' complaint of a back-ache.

Ernie Pyle's Slant on the War:

Taken to War Like Galley Slaves, GIs Stage Gala Show

American Soldiers Were Quick To Adjust Themselves to Algeria

By Ernie Pyle

(Editor's Note): This dispatch was written and first published when Pyle was with the GIs during the landing at Algiers. He is now on his way to cover the Pacific war zones.

IN ALGERIA.—I came to Africa by troop transport, in convoy. Our convoy carried an enormous number of troops, and we had a heavy escort, although no matter how much escort you have it never seems enough to please you.

It was a miserable English day when we sailed—cold, with a driving rain. Most of us just lay in our bunks, indifferent even to the traditional last glance at land.

The ship seemed terribly crowded, and some complained bitterly of the food, and didn't eat for days. The worst trouble was a lack of hot water. British standards of sanitation are so different from ours that the contrast is sometimes shocking. The water for washing dishes was only tepid, and there was no soap. As a result the dishes got greasy.

Ernie Pyle

In our cabin we had water only twice a day—7 to 9 in the morning, and 5:30 to 6:30 in the evening. It was unheated, so we shaved in cold water.

* * *

We correspondents knew where we were going. Some of the officers knew, and the rest could guess. But some of the soldiers thought we were going to Russia over the Murmansk route, and some thought it was Norway, and some Iceland. A few sincerely believed we were returning to America. It wasn't until the fifth day out, when the army distributed booklets on how to conduct ourselves in North Africa, that everybody knew where we were going.

The troops were warned about smoking or using flashlights on deck at night, and against throwing cigarets or orange peels overboard. It seems a sub commander can spot a convoy, hours after it has passed, by such floating debris.

One night a nurse came on deck with a brilliant flashlight guiding her. An officer screamed at her—so loudly and viciously that I thought at first he was doing it in fun. He bellowed:

"Put out that light, you blankety-blank blank! Haven't you got any sense at all?"

Then I realized he meant every word of it. One little light might have killed us all. I was sorry he didn't kick her pants for good measure.

Smoking was prohibited in the dining room. There was a bar with soft drinks, but no liquor was sold. As someone wisecracked, "We catch it both ways. We can't smoke because it's a British ship, and we can't buy liquor because it's an American trooper."

GIs Show Talent.

The trip no sooner started than rehearsals for an enlisted men's variety show began. They dug up an accordionist, a saxophonist, a trumpeter, a violinist, two banjo players, a dancer, a tenor, a cowboy singer and several pianists.

They rehearsed every afternoon. The big night came a couple of nights before we got to Gibraltar. They put on two shows that night, for the enlisted men only. Word got around, and the officers and nurses wanted to see the show, so the night we were approaching Gibraltar they put it on again.

The show went over terrifically. There was genuine talent in it, and serious music as well as the whiz-bang stuff. But the hero of the evening was a hairy corporal—Joe Comita of Brooklyn—who did a strip-tease burlesque of Gypsy Rose Lee.

His movements were pure genius. Gypsy herself couldn't have been more sensuous. Joe twirled and stripped, twirled and stripped. And then when he was down to his long, heavy GI underwear he swung to the front of the stage, lifted his veil, and kissed a front-row colonel on top of his bald head.

The whole show was marvelously good. But there was something more to it than just that: There was the knowledge, deep in everybody's mind, that this was our night of danger.

The radio had just brought word that Germany's entire U-boat pack was concentrated in the approaches to Gibraltar. More than 50 subs were said to be waiting for us. I doubt that there was a soul on board who expected the night to pass without an attack.

And in that environment the boys from down below went through their performances buoyantly. We sat with life preservers on and water canteens at our belts. We laughed and cheered against a background of semi-conscious listening for other sounds. As the show ended a major said to me:

"That's wonderful, those boys doing this when they're being taken to war like galley slaves down there in the hold. When you think of people at home squawking their heads off because they can only have 20 gallons of gasoline it makes your blood boil."

* * *

At Last—Fighting.

From now onward, stretching for months and months into the future, life is completely changed for thousands of American boys on this side of the earth. For at last they are in there fighting.

The jump from camp life into front-line living is just as great as the original jump from civilian life into army. Only those who served in the last war can conceive of the makeshift, deadly urgent, always-moving-onward complexion of front-line existence. And existence is exactly the word; it is nothing more.

The last of the comforts are gone. From now on you sleep in bedrolls under little tents. You wash whenever and wherever you can. You carry your food on your back when you are fighting.

You dig ditches for protection from bullets and from the chill north wind off the Mediterranean. There are no more hot-water taps. There are no post exchanges where you can buy cigarets. There are no movies.

When you speak to a civilian you have to wrestle with a foreign language. You carry just enough clothing to cover you and no more. You don't lug any knickknacks at all.

When our troops made their first landings in North Africa they went four days without even blankets, just catching a few hours' sleep on the ground.

Everybody either lost or chucked aside some of his equipment. Like most troops going into battle for the first time, they all carried too much at first. Gradually they shed it. The boys tossed out personal gear from their musette bags and filled them with ammunition. The countryside for 20 miles around Oran was strewn with overcoats, field jackets and mess kits as the soldiers moved on the city.

Arabs will be going around for a whole generation clad in odd pieces of American army uniforms.

* * *

At the moment our troops are bivouacked for miles around each of three large centers of occupation — Casablanca, Oran and Algiers. They are consolidating, fitting in replacements, making repairs—spending a few days taking a deep breath before moving on to other theaters of action.

They are camped in every conceivable way. In the city of Oran some are billeted in office buidings, hotels and garages. Some are camping in parks and big, vacant lots on the edge of town. Some are miles away, out in the country, living on treeless stretches of prairie.

* * *

The American soldier is quick in adapting himself to a new mode of living. Outfits which have been here only three days have dug vast networks of ditches three feet deep in the bare brown earth. They have rigged up a light here and there with a storage battery. They have gathered boards and made floors and sideboards for their tents to keep out the wind and sand. They have hung out their washing, and painted their names over the tent flaps. You even see a soldier sitting on his "front step" of an evening playing a violin.

Men Anxious to Move Forward

Now that the first phase is over, a new jubilance has come over the troops. There is a confidence and enthusiasm among them that didn't exist in England, even though morale was high there. They were impatient to get started and get it over, and now that they've started and feel sort of like veterans, they are eager to sweep on through.

That first night of landing, when they came ashore in big steel motorized invasion barges, many funny things happened. One famous officer intended to drive right ashore in a jeep, but they let the folding end of the barge down too soon and the jeep drove off into eight feet of water. Other barges rammed ashore so hard the men jumped off without even getting their feet wet and were soon at their posts.

Great Year-Round

American Women Pilots Helped Deliver Planes Which Enabled Red Armies to Launch Offensive That May Have Been Turning Point of the War

By ELMO SCOTT WATSON
Released by Western Newspaper Union.

THIS is a story of the great 1944 summer offensive of the d army which historians of future may write down as turning point of the war. It the little-known story of the tribution of a small group of erican women to the success that drive, of the part they yed in making it possible for determined Russians, who stopped the Nazi hordes the gates of Moscow and Stalrad, to push them back across plains of White Russia and mud of Poland to the very rman border itself.

t is the story of the civilian men ferrying pilots of the Air ansport Command's ferrying ision, a skilled, determined courageous little group from ong the members of the men's Air Force Service ots, popularly known as SPs.

his story begins just about a year . The "clouds of planes" which sident Roosevelt had promised at beginning of the war (and at ch our enemies had scoffed) e rolling from American produc- lines. Lend-Lease was making se planes, especially the fighter es, available to our allies, the sians. But it's a "long, long l" from the factories of America he Eastern front—it winds from Bell Aircraft factory in Niagara ls, N. Y., across the fertile Mis- ippi Valley, the Great Plains the West, the Rocky mountains, wilds of Canada and Alaska, the pes of Siberia and the Ural ntains to Moscow, and then the tern fighting front.

ow to get these fighter planes to Russian front—and especially to ver them in time for the great sian offensive—that was the stion. To fly them there seemed be the logical way, but fighters, their limited range, must avoid overwater flights. An overland e was needed. That need had n foreseen long before and the ail," previously mentioned, had ady been established by the Air nsport command's ferrying divi- and its Alaskan division.

he War department accorded No. iority to the movement of Amer- planes to the Russian armies the problem of getting them e was assigned to the ATC fer- division, commanded by Brig. . Bob E. Nowland, to its pilots its groups. As a matter of fact, es of many types were moved to fighting fronts, taken there by pilots, both American and Rus- . But this story deals only with fighter planes and the Women's Force Service pilots.

The ferrying division's third ferng group, based at Romulus, h., was assigned the mission of ying the deadly, fast Airacobra m the Bell factory in Niagara to Great Falls, Mont., where Seventh Ferrying group took r for the delivery to the Rus- s at Fairbanks and at Nome.

Barbara Donahue, commanding officer of the WASP squadron of the 3rd Ferrying Group, based at Romulus field, Mich., poses beside one of the nine Bell Airacobras which she delivered over the "long, long trail" from Niagara Falls, N. Y. to Great Falls, Mont.

BRIG. GEN. BOB E. NOWLAND

Then, it became a question of manpower, of availability of pilots to keep pace with the output of the production lines. To meet this emergency, the ferrying division decided to utilize the services of its qualified and trained civilian women ferrying pilots on the domestic section of the "long, long trail."

Each male pilot released from the 1,800-mile trip from Niagara Falls to Great Falls simply meant one more male pilot for the long, dangerous hop from Great Falls to Nome. These women hadn't been flying fighter planes . . . light ships had been their assignments in the past . . . but they had long experience, hours in the air and, with a short period of transition training, they were ready for the task.

It wasn't a glamorous one. The ferry pilot of the Army's Air Transport Command is a hard-working individual who lives out of his B-4 bag, spends long stretches of time away from his home base, flies long hours and encounters little of the glamour, the heroics and the recognition that come to the combat pilot.

These Women's Air Force Service pilots were going to share that lot with the men. So their story can't be one of glamour either. It's merely the record of a job well done. By comparison with the number of male pilots engaged in the operation, the WASPs were a small group. But by comparison, the job they did equaled the performance of their male partners.

They delivered from Niagara to Great Falls sufficient planes to completely arm a half dozen Russian squadrons, and they did such a workmanlike job that their loss ratio compares favorably with that of the men. In fact, only three Airacobras leaving Niagara with a WASP at the controls failed to reach Great Falls.

The normal flying time from Niagara to Great Falls is approximately nine hours, but the lapsed time on the average delivery probably is three times that great, considering that the ferrying division demands almost perfect weather conditions for the operation of fighter aircraft, and that winter through Minnesota, the Dakotas and Montana and in the Great Lakes region of the Middle West often is far below the minimum required.

And when a delivery is completed from Niagara Falls to Great Falls, the pilot must return to the Third Ferrying Group, a 14-hour ride on the special crewliners provided by the military air transport section of the ferrying division for just that purpose.

Yet, despite the ruggedness of the trip, WASPs of the Third Ferrying group delivered Russia-bound fighters from Niagara to Great Falls in a single day, delivered three planes in ten days, which is a feat to equal the best performances of their male coworkers.

Barbara Donahue, commanding officer of the Third Ferrying group, WASP detachment at Romulus, paced the delivery of Russia-bound fighters for her detachment, with nine to her credit, while WASP Mary C. Johnson of the Third group ranked second in the list of individual achievement with seven as her score.

WASP Ellen Grey is one of the few pilots who can boast of a one-day delivery from Niagara to Great Falls, a flight accomplished in eight hours and 18 minutes of actual time in the air, and an elapsed time of approximately 11 hours. Consider that five hours in the air is considered a day's work by the average fighter pilot and that the usual delivery from Niagara to Great Falls is considered a two or three-day job, and you'll realize that Miss Grey . . . to say the least . . . was working "overtime." Three of the seven deliveries credited to WASP Mary C. Johnson were made over a 12-day period—a record of which any pilot, man or woman, may well be proud when one considers the sheer physical exertion involved.

But while WASP Grey's feat of making a one-day delivery and WASP Johnson's feat of three deliveries in 12 days are outstanding examples of WASP performance, they are not really unusual. The records of the Third Ferrying group WASP detachment show that all of these women pilots are hard-working and conscientious. There's Betty Archibald and Pat Dickerson with records of two deliveries in eight days. There are Grace Burge and Virginia Claire with two deliveries each in 10 days. And the chances are that it was weather which kept some of these girls from equaling the record of WASP Johnson.

When the movement started, these women ferry pilots were not trusted as fly-alones on the "long, long trail." They were assigned as wingmen to experienced male pilots familiar with the route. But as they gained experience through hard work they were graduated to the fly alone class, and now they take their turns flying alone, still rushing planes to the Russians.

But the "long, long trail" is not the only place in which the civilian women pilots of the Air Transport Command's ferrying division have proved their worth in the two years since Mrs. Nancy Harkness Love formed the first women's ferrying squadron at the 2nd Ferrying Group base, Wilmington, Del., on September 10, 1942.

Mrs. Lenore Louise McElroy, operations officer of the WASP squadron of the Third Ferrying Group at Romulus field, Mich. WASP McElroy recently made aviation history when she delivered a big Consolidated "Catalina" flying boat (designated by the Navy as PBYs and by the Army as OA-10s) at one of the aviation fields in this country. It was the first time one of these big ships has ever been flown by a woman pilot. Since then she has flown more than 80 hours in this type of ship, adding the time to her already impressive total of more than 3,000 pilot hours.

Since that date women pilots assigned to the Ferrying Division have flown more than 7,500,000 miles ferrying planes from factories to destinations within the United States. Originally assigned only to light liaison and training type planes, they now are qualified to fly 68 different types of ships, ranging from heavy four-engine bombers down.

Of their number, 16 per cent are qualified to fly class four planes such as the Billy Mitchell and Marauder medium bombers, and 98 per cent have made deliveries in class three planes such as twin-engine transports. But, in the ferrying division, emphasis is placed on the ferrying of lighter type planes and fighter planes, and it is significant to note that 68 per cent of the women pilots in this division are now qualified fighter pilots, making regular deliveries of Airacobras, Mustangs, Thunderbolts and Warhawks.

Of even greater significance is the fact that 100 per cent of these pilots hold army instrument ratings and are qualified to make cross country flights under weather conditions which require the use of instruments.

The Old Sergeant Didn't Want to Be a 'Petticoat Herder'

The sergeant was "Old Army." ash marks indicating nearly 30 ars of service adorned his left eve, topped by the stripes of a ster sergeant.

o, you can imagine his reaction en, on reporting as crew chief on army flying boat, he found a man civilian pilot of the Ferrying sion Air Transport Command at controls, another in the co- t seat.

30 years in the Army I herd Petticoats," the sergeant mumbled to other male members of the crew.

Grumbling, he supervised the starting of the engines. Grumbling, he settled back in the depths of his humiliation as the huge plane took off, bound for delivery under lend-lease to the British at Montreal.

"Women flyin' in the Army," he muttered in disgust, adding for emphasis, "and me with 'em. Hell!"

But on arrival at Montreal, it was a different story.

"I'm sorry, mum," the sergeant greeted his pilot, "for what I said back there. I'd a dum sight ruther ride with you than a lot of them young fellows."

That, remarked WASP Pilot Lenore McElroy, a veteran woman civilian pilot with 3,000 air hours to her credit, "was about the finest compliment I ever received." You see, the sergeant is crowding 50 and any male who flies a plane is a "young fellow" in his vernacular.

IMPROVED UNIFORM INTERNATIONAL

SUNDAY SCHOOL Lesson

JESUS BEGINS HIS MINISTRY

LESSON TEXT—Matthew 3:13 - 4:11.
GOLDEN TEXT—Thou shalt worship the Lord thy God, and Him only shalt thou serve.—Matthew 4:10.

Ready for service—this is the next scene from our Lord's life which comes before us in Matthew. Thirty years had passed since His birth, but these are hidden in silence, save for the one glimpse of Him in the temple which is given only by Luke.

These were not years of idleness or luxury. He was obedient to Joseph and Mary. He worked in the carpenter shop. He fellowshiped with God's people, and best of all, with His heavenly Father. He showed obedience and faithfulness in life's ordinary things. And then, all at once, the day of His public ministry was at hand.

His baptism and temptation were a part, the opening event, of that ministry. We find Him:

I. Identified With Sinners (3:13-15).

John, the fiery forerunner of Jesus, had come with a burning message of repentance, and sinners were coming to him to be baptized as a sign of their contrition.

Suddenly Jesus appeared. John pointed to Him as the "Lamb of God which taketh away the sin of the world" (John 1:29). When He offered Himself for baptism, John demurred. There was no sin in Jesus that He should need baptism. There was no occasion for Him to express in a special act His obedience, for He always did the will of God. (Heb. 10:7).

Why then was Jesus baptized? We find the answer in the central purpose for which He came into the world, namely, to save sinners. Here at His official entrance upon that work He, who though He knew no sin was to become sin for us, took the sinner's place in baptism. It was not because He had Himself sinned, but because He was to become the substitute for the sinner. What marvelous condescension and grace!

II. Approved of God (3:16, 17).

The Holy Spirit, like a dove, rested upon Him. The dove is one of the symbols of the Spirit, and speaks of gentleness, meekness, purity, peace and love.

Out of the eternal dwelling places in heaven came the voice of the eternal Father expressing His approval and pleasure in His son. The person and work of Christ bear their own commendation of Him to us as divine. Here we have the Father's word, and the Holy Spirit's coming. Thus we have here the entire Trinity.

III. Tempted by Satan (4:1-11).

A time of testing was ahead. Jesus did not fear it, but notice that He did not seek it either. He was led by the Spirit into this great conflict. We may learn that we must not seek nor put ourselves in the way of temptation, but when it comes we may meet it without fear. God is with us.

He was tempted as the Messiah, and the Son of God, and it was a real testing, one from which we need to learn what to do when tempted. It was threefold: physical, spiritual and vocational.

1. The Physical Temptation. Forty days of conflict with Satan made His body hungry. Under such circumstances it was a terrific temptation to use His divine power to make bread. He could have done it, but He did not. One doesn't have to live, but one does have to obey and honor God.

Note how effectively Christ used Scripture (from Deuteronomy—have you read it lately?). It is the only sure answer to Satan's temptations, but you must learn it if you are going to use it.

2. The Spiritual Temptation. Here Satan asked Him to presume on the grace of God. If he cannot get you to abandon your faith, he will urge you to go to some fanatical and unscriptural extreme in using it.

God always cares for His own when they are in the place where He wants them to be, but He does not deliver us from foolhardy and unnecessary risks which we want to call "faith."

3. The Vocational Temptation. Christ had come into this world to wrest from Satan, the usurper (who is now the prince of this world—John 12:31), the kingdoms of this world. Satan suggested to Him that He could accomplish this by simply bowing down to him—thus escaping Calvary's cross.

Satan is busy urging men to take spiritual bypaths. He has his own leaders who skillfully evade and avoid the cross. They have a religion without the offense of the cross, but, mark it well, it is not Christianity, even though it bears that name.

Jesus met and defeated Satan by the use of Scripture, and by honoring God the Father. Jesus' resistance of the devil caused him to go away. It still works. Read James 4:7. Then came the angels to minister to Him. Victory over the enemy of our souls brings peace and spiritual refreshment.

SEWING CIRCLE NEEDLECRAFT

Crochet in Butterfly, Floral Motif

ONE, two or three crocheted butterflies form the edge of lovely towels, scarfs, or pillow cases embroidered in these floral motifs.

Butterfly in pineapple design crocheted in no time. Pattern 7239 has transfer pattern of 5 motifs averaging 5 by 11 inches; crochet directions. For this pattern send 16 cents in coins, your name, address and the pattern number.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Columbus Tall, Dignified, Redheaded, Says Prof.

Christopher Columbus was a redhead until middle age, but his hair had turned white by the time he made his voyage to America in 1492.

That's the opinion of Professor Daniel Sargeant of Haverford university, after exhaustive research into the life of the noted explorer.

"Columbus was tall and well-built, of dignified mien, with red hair and beard, a long ruddy face, clear gray eyes and acquiline nose. He evinced a taste for yellow in beads and for crimson in caps, cloaks and shoes," Professor Sargeant said.

Relief At Last For Your Cough

Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm, and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Tell your druggist to sell you a bottle of Creomulsion with the understanding you must like the way it quickly allays the cough or you are to have your money back.

CREOMULSION
for Coughs, Chest Colds, Bronchitis

Druggists recommend PAZO for Simple PILES
Relieves pain and soreness

For relief from the torture of simple Piles, PAZO ointment has been famous for more than thirty years. Here's why: First, PAZO ointment soothes inflamed areas, relieves pain and itching. Second, PAZO ointment lubricates hardened, dried parts—helps prevent cracking and soreness. Third, PAZO ointment tends to reduce swelling and check bleeding. Fourth, it's easy to use. PAZO ointment's perforated Pile Pipe makes application simple, thorough. Your doctor can tell you about PAZO ointment.

"I'd Have Been a Goner . . ."

STAFF SERGEANT JOHN SCHUSTER, infantryman from Stelton, New Jersey

"'Hit the ditch, boys; here come the Jerries.' Like the rest of the men I dove for the nearest hedgerow in a Normandy field on the road to St. Lo. The low-flying planes dumped their bombs along the road. Only one missed, and that one hit near me. I was badly wounded by the shell fragments and the next thing I knew I was in an evacuation hospital and an Army nurse was giving me blood plasma. If it hadn't been for that I'd have been a goner. I'm an old hand at plasma for I've had it twenty times. Now they're giving me whole-blood transfusions. There were Army nurses with me all the time and, tired as many of them were, they'd spend their off-duty time with us wounded men, helping to bring us back to where we thought things were really worth fighting for. We need all the nurses we can get. If you can, join the Army Nurse Corps."

ALL Women Can Help!

If you are untrained— take a home nursing or nurse's aide course.

If you are a senior cadet nurse — serve your final six months in an Army hospital.

If you are a registered nurse — join the Army Nurse Corps. You may mean the difference between life and death to our wounded men. Visit or write your local Red Cross chapter for full information and application blank. Or communicate with the Surgeon General, U. S. Army, Washington 25, D. C.

NURSES ARE NEEDED NOW!

Please send me information on how to help the U. S. Army Nurse Corps to care for our wounded soldiers.

Have You Seen A Man?

The girls in the ration office in Creston would have liked to have found the services of a man for a few days recently. While two of the girls handled office routine, two others donned overalls and with brushes and paint painted the office ceiling. After finishing the ceiling they hoped to start on the walls. The girls thought after seeing their plight, some man might volunteer for the job of painting.

"Good Neighbor"

Mrs. Leo Knudson of Dike recently was chosen as the "Good Neighbor of the Day" on a national network radio program. The letter stating Mrs Knudsen's qualifications was written by Mrs. Arley Ford of Waterloo.

Good Reading

The entire New Testament was read orally at the Marion Christian Church the day before New Year's. An amplifying system was installed so that the scriptures could be heard in the neighboring area. The reading began at 4:30 o'clock Sunday morning and continued until the last word of Revelation was heard. Old and interesting copies of the Scriptures were on display during the day in the church. This was the third year that the church had sponsored the oral readings.

Same Candle

A red candle sent by C. C. McGuire's daughter, Loretta, to her home in Belmond has been burned for about an hour each Christmas season for the past 25 years. The candle was sent by Loretta when she attended St. Mary's College at Notre Dame. Originally the candle was about 18 inches tall but has burned down until it is now about nine inches tall.

Four Babies

The Decatur County Hospital was quite an eventful spot for four families on Christmas day. Four babies were born in the institution. Three of the babies were boys with only one girl to keep them company.

No Respect

Hamburg firemen get no rest from fighting fires even though they are "all dressed up" and attending their weekly dance. Last week, the firemen were called from their dance to extinguish a small blaze. It was the third fire they had been called on to extinguish in the one week.

Booming Lake!

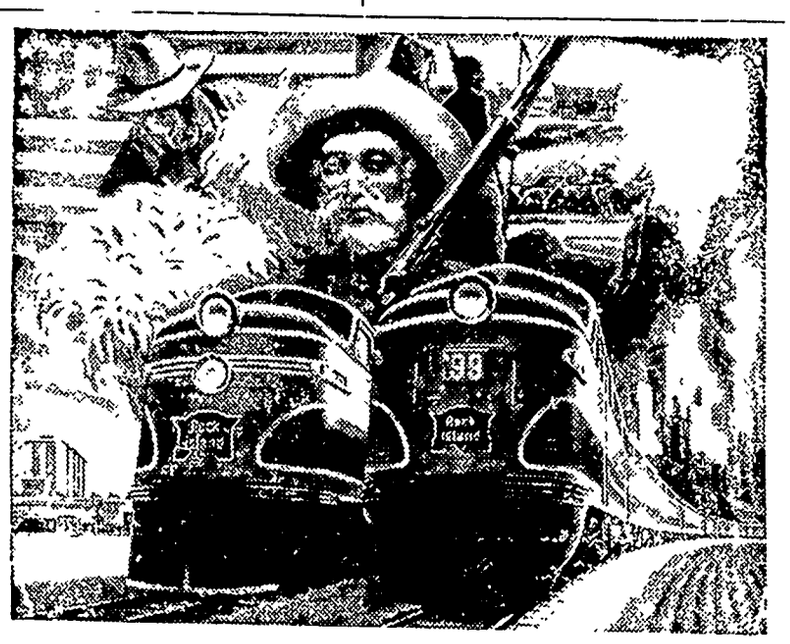
Five Island Lake near Emmetsburg might be called "Booming Lake" this winter. Sounds like a bad case of indigestion with rumblings and boomings coming from under the ice can be heard. The rumbling seems to travel under the ice from one shore to the other accompanied by a "boom" as a place on the shore is reached. On a clear night these sounds resemble artillery fire in the distance.

"Chicken Chase"

Thirteen chickens, six guineas, and six ducks were chased until caught by Mediapolis residents, mostly youngsters, one day recently. The occasion was sponsored by the Mediapolis Booster Club which released the fowl from the roof of a local building.

The total area of Norway is estimated at 124,964 square miles.

About 64 per cent of the land area of the Philippines is forest.



...into a Thousand Glorious Tomorrows

America is the land of dreamers and doers, where the tomorrows give promise and strength to those who dare to look ahead, work and have faith.

At the beginning of this new year we remind you that the ROCK ISLAND LINES has served and grown ... with America. We are proud of our 92 years of work and progress, through peace and war, prosperity and depression ... always with faith in the future of America and its progressive people.

But yesterday is important only because it gave us courage to plan for our tomorrows. And ROCK ISLAND LINES has plans for tomorrow... interesting and ambitious.

All America is planning now. Dreamers and doers will be rewarded by many glorious tomorrows; a nation grown even greater with ever higher standards of life, comfort and happiness.

ROCK ISLAND LINES, against a backdrop of proud and glorious yesterdays, pledges that it shall take a hand in providing the bright future you are hoping for. All of us, planning and working together, dreaming and doing, will prove once more that America can make its dreams come true.

As yesterday—and today—so tomorrow ROCK ISLAND'S sole purpose is to provide the finest in transportation.

Rock Island ROCK ISLAND LINES
ASTRIDE TWO OCEANS—ALL UNITED FOR VICTORY

Find Penicillin Aids in Skin Grafting on Burns

Penicillin appears to be the solution to one of the chief problems involved in early skin grafting of burned areas, John Winslow Hirshfeld, M.D.; Matthew A. Pilling, M.D.; Charles Wesley Buggs, Ph.D., and William E. Abbott, M.D., Detroit, report in the Journal of the American Medical association.

They report that from their experience with 17 patients to whom penicillin was administered at the time of skin grafting they believe that the use of the drug permits early grafting and also appears to prevent the loss of skin from infection that ordinarily occurs in about one-third of the cases in which split thickness grafts are placed on contaminated recipient sites. Nineteen split thickness grafts were performed on the 17 patients With one exception, from 90 to 100 per cent of the transplanted skin took in every instance, the exception occurring in an uncooperative alcoholic addict on whom 80 per cent of the grafts took.

"Before penicillin was available," they say, "we performed over a hundred grafts on patients with third degree burns Although many excellent takes were obtained, in about one-third of the cases 25 per cent or more of the graft was lost because of the occurrence of infection. Therefore the consistency with which excellent takes were obtained in this series of 19 grafts has been very impressive to us. . . ."

Panning Helps Retain Fresh Vegetable Flavor

Homemakers will save food value and flavor of their fresh garden vegetables by panning them. A heavy pan with a tight-fitting cover should be used so that vegetables can be cooked in their own juices with just enough fat to season. Prepare vegetable for cooking and allow about two tablespoons of fat for each quart of vegetable.

Melt fat in the pan, add vegetable and cover to hold in steam. Cook vegetable slowly until just tender but not mushy. Stir vegetable occasionally or shake pan to prevent sticking. When ready to serve, season with salt and pepper. Many August vegetables are just right for panning Thinly sliced green beans, shredded cabbage, diced summer squash, spinach, kale and sliced okra lend themselves to pan cooking.

Homemakers can add a few extra touches to vary the flavor Chopped chives, onion or parsley may be panned with the vegetable or added just before vegetable is tender Snappy cheese or crisp bits of meat also may be sprinkled over vegetable just before serving. Adding milk or cream slightly thickened gives another variation Sift flour lightly over cooked vegetable and blend well. Add milk or cream and simmer until thickened, stirring to prevent sticking.

Made Thicker

Pipe and fittings are made thicker than is required to sustain water pressure. This is to guard against corrosion and the strains caused by cutting, threading, and joining pipes and by the expansion and contraction of pipe lines All waters and soils corrode, the action being particularly noticeable at threaded joints in wrought pipe. The results are "red water," reduced capacity and shortened life Sometimes the bore is clogged or closed with a rusty coating or deposit long before the pipe wall is destroyed.

Ordinarily, small black wrought pipe in the ground should last 10 to 20 years; galvanized steel, 15 to 30 years; galvanized wrought iron, 20 to 40 years; lead and cast iron, 40 to 75 years. It is, however, not uncommon to find lead and cast-iron pipes sound after 80 to 100 years, and, except for slight external corrosion, cement-lined black wrought pipe has been found in excellent condition after 40 to 60 years in the ground.

Dangerous Speeds

A car traveling 40 miles per hour is moving as fast as if it had fallen from the top of a four-story building—and if it hits something solid the effect is just as bad It should be remembered, too, that a car can be stopped in about 75 feet when traveling at 30 miles per hour, but it takes 25 feet to stop at 60 miles per hour. A mile-a-minute speed is equivalent to 88 feet per second, which means that in an emergency the car will travel 50 feet or more before the driver can move his foot to the brake pedal. If the driver will always choose his speed so that he can control his vehicle in any emergency, it is not probable that there will be any emergency.

Black Walnuts

Choose a half-bushel or so of good-sized black walnuts, knock off the outer green husks, and drop them along three inches apart in a furrow two inches deep, and cover them. Next spring, if the squirrels do not discover this cache, a fine row of black walnut seedlings should develop They will be ready to set out in a permanent location as one-year-old seedlings Once established in good soil, black walnut will increase in diameter at the rate of one inch in five years for a half century or more, if the crown is kept free.

List Highlights in 1944 Tax Legislation

Highlights of the 1944 tax legislation, according to a report by the federation of tax administrators, include: Mississippi's 10 per cent "black market" tax, applicable primarily to alcohol beverages; reenactment by Louisiana of its 1 per cent sales tax on a permanent basis; the repeal by New York, New Jersey and Virginia of exemptions formerly granted federal property which is not exempted from state taxation under federal law. Also the Kentucky enactment making rural electric cooperatives subject to ad valorem and franchise taxes, and the Mississippi property tax exemption for slaughter houses and curing plants. The increase in Rhode Island on gross earnings of electrical plants and distributors by an additional tax amounting to one-fourth the tax collected under the old 2 per cent rate. This additional tax does not apply to gross earnings resulting from production of gas.

Taxation affecting servicemen: during their 1944 legislative sessions, 11 states thus far have enacted legislation concerning special privileges for servicemen with regard to income taxes, property taxes, poll taxes and various license fees.

Flea Development Is Similar to Other Insects

Fleas have four stages in their development similar to many other insects. However, people seldom realize this fact. The immature stages of the flea are spent in dry loose soil, similar to that found in cracks in the floor or under the porch of a house. The young flea or larva feeds on organic matter and doesn't bite or feed on fresh blood. In fact, it doesn't look anything like an adult flea. It is about one-fourth of an inch long, very slender, with a brown head and white body.

Fleas may be controlled in the yard with one part of 40 per cent nicotine sulphate in 150 parts of water to which has been added enough soap to cloud the water. They may also be controlled by sprinkling creosote, crude petroleum or used oil about the areas in which they are breeding. Fleas in the home may be controlled by closing the doors and windows in the infested room and spraying liberally with a household fly spray.

Aids Wounded

Russian experiments in using animal blood for transfusion to human patients have proved so successful that some hospitals now have special herds of cows for that purpose, reports the Soviet information bureau.

Injections of 100 to 200 cubic centimeters of cows' blood at a time have a positive effect on badly wounded men, accelerating healing, raising vitality, improving appetite and sleep, and curing avitaminosis.

The special herds of "donor" cows are fed chiefly on alfalfa, which contains a high percentage of vitamin A.

In one hospital 1,000 liters of blood were obtained from cattle during the past year, each "donor" supplying three to four liters twice monthly. Experiments have shown that animals can safely give over 20 liters of blood per month.

Ladder Safety

Ladders permanently located should be fastened securely at both top and bottom The top should project at least four feet above the landing to which it leads. Always prop or brace a long ladder at the middle, to prevent bend or sway; unusually long ladders should be braced at intervals of 10 to 12 feet. Ladders that are nailed to a wall should stand at least eight inches from the wall to allow room for firm footage on the rungs Two ladders joined together to obtain additional reach should overlap at least six feet; the spliced ends fastened substantially; the center of the combined span braced firmly to building or ground.

Broken or rickety ladders are a liability; adequate repairs an asset. Keep every ladder in prime condition; discard those which are rotting or which cannot be repaired. And then, there is the equally important matter of how to use a ladder for the conservation of life and limb—

Don't sacrifice the free use of both hands because you have a load to carry. A firm grip on side rails means a better grip on safety. Lifting heavy weights by rope or block and tackle is the sensible way.

Seed Bolting

Adverse weather conditions are considered the principal cause for premature seed bolting of plants for the reason that, in some seasons, there will be practically none of this trouble and in others it is very widespread. Excessive and continued rains and long periods of cold, foggy weather, followed by sudden short periods of hot weather in the early spring, are generally blamed for causing plants to go to seed. There must be other factors besides adverse weather which cause seed bolting because some fields show practically no trouble. It seems quite certain that the variety of seed may be a contributing factor. For example, if growers plant a summer variety of cabbage or celery in the winter time, they may have much more trouble from seeding than if they use a standard winter variety.

FIRST NATIONAL SHOWS OVER MILLION AND A HALF

The First National Bank of Klemme this week publish their financial statement which shows a total footing of over a million and a half dollars, or to be exact, $1,639,250.38.

Their total deposits have now reached $1,569,027.08.

Former Klemme Resident Died In Montana, Saturday

Art Knoke and Clarence Bachman left Sunday morning for Glendive, Montana, to attend the funeral of Fred Haupt, who passed away Saturday.

The Haupt family lived in this community several years ago. Mrs. Haupt is a sister of Art Knoke.

984th Air Engineering Squadron,
566th Air Service Group,
Robins Field 2, Georgia.

KLEMME SCHOOL BOARD APPLIES FOR TWO BUSES

At a special meeting a week ago the directors of the Klemme Independent Schools applied to the O. P. A. for two school buses.

If the O. P. A. allows the application, the Board plans to purchase two buses to be used in transporting rural pupils to and from school here. The Board expects a reply from the O. P. A. this week, and will then take further steps to procuring the buses.

Chimney Should Not Rest On Wooden Construction

A chimney should be well constructed, built from the ground up, set on a solid foundation. It should not be dependent for its support on wooden construction. Nor should it be used to support any part of the building itself. Standard flue lining is recommended. Where it is not feasible to rebuild an existing chimney, the walls of which are not of standard thickness, frequent cleaning will reduce the likelihood of fire. All defective chimneys should be rebuilt. Chimneys, flues, stoves and furnaces should be kept clean.

Stoves and furnaces should be set well away from walls and woodwork. They should rest on substantial bases, and combustible floors should be protected by incombustible material under and adjacent to the bases.

Smoke pipes should be substantially supported, kept in good condition, separated 12 inches or more from woodwork or other combustible material. Use a ventilating thimble which provides at least 6 inches of air space on each side of any smoke or heating pipe which passes through a partition, floor or ceiling. And such partitions should be protected by air-spaced metal backed by asbestos board one-fourth inch or more thick. Ashes belong in metal cans, never in wooden or cardboard containers.

Good Times Cut Number Of Railroad Trespassers

A total of 1,667 illegal train riders and other trespassers on railroad property lost their lives in 1943, according to reports just received by the Protective Section of the Association of American Railroads. During the year, 1,126 trespassers were injured.

While there was a material increase in locomotive miles and tonnage handled, the number of fatalities to trespassers on railroad property in 1943 showed a reduction of 258 compared with 1942, and a decrease of 222 in the number of trespassers injured.

The almost complete elimination of unemployment and the increase in the number of minors working full or part time in war and allied industries have all had a bearing on the decrease in the number of trespassers on railroad property.

Reports just received by the Protective section show that approximately 584,000 illegal train riders or trespassers were removed from trains, prevented from getting on trains, or ejected from railroad premises, but not arrested, by 76 of the principal railroads of the country in 1943. This was an average of 48,600 trespassers per month.

Poison Danger

The dangers of the medicine cabinet are common to homes throughout the land—both urban and rural, and bottles should be kept beyond reach of small children and clearly labeled for the benefit of everyone having access to them. Medicine cabinets should be well lighted or a flashlight can be used.

Beyond these normal hazards, there are many other sources of poisoning peculiar to the farm. Among them are poisonous plants—poison ivy and poison oak, especially; and the four poisonous snakes of America—the rattler, the copperhead, the moccasin, and the coral snake. Insecticides are frequently stored in or near the kitchen, with a likelihood of becoming mixed with flour or sugar. Great quantities of canned goods are often on the pantry shelves, and of course improperly sterilized canned foods may lead to botulinus poisoning.

Lightning Losses

Farm property loss from lightning averages about $10,000,000 a year. It is estimated that 400 persons are killed, and 800 to 1,000 persons are injured by lightning on farms each year.

Properly installed and well-maintained lightning rods will provide practically complete protection against damage to buildings by lightning. In order to obtain the best results, lightning rods should be installed in accordance with the National Code for Protection Against Lightning. Tracks for carriers and other metal bodies inside the buildings should be grounded and bonded together to prevent electrical flashes from one body to another.

A metal roof, electrically bonded, properly grounded, and provided with air terminals to protect chimneys or other nonmetallic projections, usually affords satisfactory protection.

Synthesize Own Protein

Cattle, sheep and goats have special digestive equipment which enables them to utilize non-protein nitrogen for the synthesis of true protein needed for growth of body tissues and production of milk. Their stomachs have four compartments —the rumen or paunch, the honeycomb, the manypiles, and the true stomach. The rumen or first stomach, instead of having the usual digestive fluids, contains myriads of micro-organisms which prepare the food for digestion. In the process, nitrogenous materials are broken down and rebuilt into proteins. The more soluble part of the food passes on to be digested, while the more resistant is chewed as the cud, a pastime enjoyed by every cloven-hoofed animal except the swine.

List Rules for Keeping Garden in Dry Spell

The following are a few "do's" and "don'ts" that will help the gardener to keep his garden going until copious rains come:

Hoe and cultivate just enough to keep the weeds under control and no more. Do not cultivate deeply or ridge and hill the crops, for this wastes rather than conserves moisture. Use care in removing large weeds. Do not pull, but instead cut large weeds, particularly when they are close to the roots of the vegetables. For example, large weeds should be pulled from rows of beans, carrots, beets, hills of corn, etc.

Water the garden whenever feasible. On the average, vegetables require about one inch of water a week. Soak the ground thoroughly when water is applied. Do not add less than one quart per square foot even for small seedlings; larger crops should have two or three times this quantity. Use the coolness of early morning and late afternoon for watering the garden. Do not be afraid of injuring the plants if mid-day watering must be done. This time of irrigating, however, is not recommended because of excessive evaporation of the water, especially when a sprinkler is used.

Vetch Good Cover Crop For Vegetable Gardens

In many respects, hairy vetch is the best cover crop to sow on vegetable growing farms, says H. R. Cox, extension agronomist at the college of agriculture, Rutgers university.

It can be seeded any time during August or September, either after an early market crop has been removed or just before the last cultivation of a late market crop, according to Cox.

"When plowed down next spring a good stand and growth of vetch will add to the soil the equivalent of several hundred pounds per acre of nitrate of soda. A cover crop containing vetch should, if possible, be allowed to stand for a while next spring before plowing since vetch makes its best growth in spring.

"The seed of vetch should be inoculated with a culture especially prepared for that crop, if neither vetch nor peas has been grown successfully on the field in recent years," Cox warns. "Vetch will not tolerate excessive soil acidity, and it makes a better stand with a moderate amount of seed if it is drilled rather than broadcast by hand and scratched in.

Milk Test

Many dairymen have experienced difficulty at times with milk which does not readily pass through the strainer. This condition may be one of the first indications of mastitis infection observed in the dairy herd.

Inasmuch as a strip cup test used daily on each cow in the herd often reveals the animals producing abnormal milk, such as "flakes," "stringy milk," or "watery milk," college veterinarians suggest the following procedure: Before regular milking of the cow, draw one or two streams of milk from each quarter onto a fine screen or black-surfaced material. Use a slow full hand squeeze to avoid mistaking air bubbles for "flakes." Examine the screen or black background for abnormalities in the milk for each quarter. At the present time, it may be impossible to purchase a strip cup. A cup covered with black cloth or a pan four to five inches wide and five to eight inches long with a thin sheet of metal painted black will serve the purpose. A piece of phonograph record cut to suitable size makes a good black background. Place the metal sheet or piece of record so that one end sits on the end of the pan with the other end inclining to the bottom.

Deep Well

The world's deepest hole, drilled by the Phillips Petroleum company, near Fort Stockton, west Texas, became an oil well at a depth of 15,279 feet. It was completed recently after two years of drilling. The details of the task were revealed in an issue of "Mining and Metallurgy." A total of 467 drill bits were used, 20-inch ones for the top and 7.75-inch for the bottom. The pipe lining the well weighs 156 tons. Two pockets of high pressure gas were encountered, one at 11,556 and another at 12,832 feet. The temperature at the bottom of the well is between 235 and 240 degrees Fahrenheit, or more than hot enough to boil water at surface pressures. The pressure at the bottom is 2,800 pounds a square inch, or about 200 atmospheres.

Fringe on the Flag

Congress on December 22, 1942, enacted a law on Flag display which provides in part that "The Flag should never have placed upon it, nor on any part of it, nor attached to it any mark, insignia, letter, word, figure, design, picture or drawing of any nature." Congressman Sol Bloom who introduced the legislation in the house of represenatives interprets this to exclude the use of fringe or tassels.

Army regulations on the Flag, however, provide for trimming "on three edges with a knotted fringe of yellow silk 2½ inches wide" for mounted, motorized, or dismounted regiments and such other independent dismounted units as may be authorized to carry the colors.

SCHOOL NEWS

JUNIOR HIGH SCHOOL NEWS
Mrs. Smith, Teacher

For Art Work Friday we drew original pictures of winter sports. Our pictures showed children skating, skiing, coasting, and building snow men.

The Eighth Grade are studying the poem, "Snowbound," in Reading.

The Seventh Grade are learning how to work interest problems. They also learned how savings accounts are kept.

Next week we expect to write our Semester tests, which will also include State Tests that are being used again in the county.

FIFTH AND SIXTH GRADE NEWS ITEMS
Mrs. Voetberg, Teacher

Everyone was present Tuesday and ready to begin work after the Christmas vacation.

In Fifth Grade Arithmetic, we have begun our work on the Addition of Fractions.

We have begun reviewing for our Semester tests.

THIRD AND FOURTH GRADE NEWS NOTES
Miss Holmes, Teacher

During the past week the Third and Fourth Grade room has lost two of its pupils: Gary Smith, a Fourth Grader, has moved to Garner; and Bonnie Jean Mau, a Third Grader, is leaving our school to attend a rural school near the farm where she is moving. Our present enrollment is eleven in each Third and Fourth Grade.

On Friday afternoon the First Grade came into our room and gave a dramatization of "The Two Pets." We enjoyed it very much.

KINDERGARTEN, FIRST AND SECOND GRADE NEWS
Miss Bugh, Teacher

The First Grade dramatized the story "Two Pets," which they read in Reading Class. We chose the following cast: Dick, Roger Bachman; Jane, Shirley Barz; Sally, Bonnie Mace; Grandmother, Lois Heginger; Grandfather, David Waddingham; Mother, Carol Bridges; Father, Jimmy Karsjens; Spot, Warren Terhufen; Puff, Douglas Jones; and Rabbit, Robert Larson. We went into the Third and Fourth Grade room and presented our dramatization for them on Friday.

The Second Grade read and discussed "Safety in Winter." They summarized their lesson with the following rule:

Slide in safe places.
Do not slide on busy streets.
Do not slide near trees.
Skate on thick ice.
Ski on hills in safe places.
If you make snow-balls, make soft snow-balls.
Throw them only at your snowman, not at people.

SENIOR CLASS NEWS

After a week and a day's vacation we all came back to school ready to work Tuesday.

We don't have very long until semester tests so we are working harder than ever to try and finish what we have to do before next week.

In English Literature we finished the December Reader's Digest. We read many interesting articles in it. Not so many words to remember, though.

Now we are back on our Vocabulary drill again.

JUNIOR CLASS NEWS
—By Jeanne Trumbell.

Next week, January 11 and 12 we have Semester tests.

Our Commercial Law class will finish our books this week and review the first of next week with our test Friday afternoon.

In Economics we will finish our book and review the first part of next week with our Semester exams Thursday afternoon.

Economics and Commercial Law are semester subjects.

In English Literature along with our text book we have been using "The Reader's Digest," "News Review," and a handbook entitled "Vocabulary Quiz." Our semester test will include material from all of these and will be given Thursday forenoon of next week.

The Typing Class is now working on business letters.

SOPHOMORE NEWS
—By Lois Ann Lau.

We are glad to get another student in our grade this week, Francis Sherwood. He formerly attended the Mason City high school. He plays a cornet and our school band welcomes him. This now makes an enrollment of nineteen in our grade.

In English we have been diagraming sentences. It seems to be quite a hard task for most of the class.

Friday in Biology we had two special reports, "Teeth," and "Poisonous Fangs." Both were very interesting.

The World History Class has finished the unit on the Middle Ages and are now reviewing over it.

Bumper Vs. Brakes

Bumping of one automobile into a parked car sometimes starts a train of events resulting in damage especially if the parked car is pointed down an incline of a street such as Stevens street in Iowa Falls. This happened to the parked car of Glenn H. Ryan who later found his vehicle, still in gear, half-way down the bluff at the foot of Stevens Street, its all broken by a tree Damage was estimated at $200.

Romance

Forty years after they were schoolmates in the public schools of Keosauqua, Mrs Grace Lorene Shaw of Oakland, California, and Ernest E. Evans of Cantril, were married at Keosauqua, December 10. The bride is the former Grace Connor of Bloomfield. Attorney A. L. Henninger of Keosauqua is a former teacher of the couple.

Glommen, the principal river of Norway, is 400 miles long.

ASK ME ANOTHER?

A General Quiz

The Questions

1. Why was the son of Edward III of England called the "Black Prince"?
2. What U. S. President was a tailor by profession?
3. What does "begging the question" mean?
4. What is the oldest royal family in the world?
5. Is the butterfly a dainty eater?
6. What is a peccadillo?
7. What silent and beautiful bird is supposed to burst into song just before its death?
8. What is a nuance?

The Answers

1. Because of the color of his armor.
2. President Johnson.
3. The taking for granted of the point to be proved.
4. The Japanese, dating from 660 B. C.
5. No; it consumes the equal of half of its weight each day.
6. A slight offense.
7. The swan.
8. A shade of difference; a subtle variation.

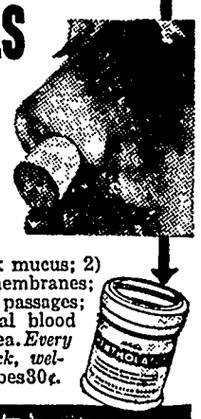
UNCORK STUFFY NOSTRILS



Nostrils clogged, membranes swollen? Quick, spread cooling Mentholatum in nostrils. Snuff well back. Speedily it starts 4 vital actions: Helps 1) Thin out thick mucus; 2) Soothe irritated membranes; 3) Reduce swollen passages; 4) Stimulate local blood supply to "sick" area. *Every breath brings quick, welcome relief.* Jars, tubes 30¢.

MENTHOLATUM

SNAPPY FACTS ABOUT RUBBER

The popular size tire for bombers is the 56-inch, the making of which takes as much time as the building of seven large truck tires. And an active bomber may need an entire new set of tires each month.

Statisticians have developed the fact that the rubber used by the U. S. in the war up to date averages about 145 pounds per man in uniform. In World War I rubber consumption represented about 32 pounds per man.

How Sluggish Folks Get Happy Relief

WHEN CONSTIPATION makes you feel punk as the dickens, brings on stomach upset, sour taste, gassy discomfort, take Dr. Caldwell's famous medicine to quickly pull the trigger on lazy "innards", and help you feel bright and chipper again.

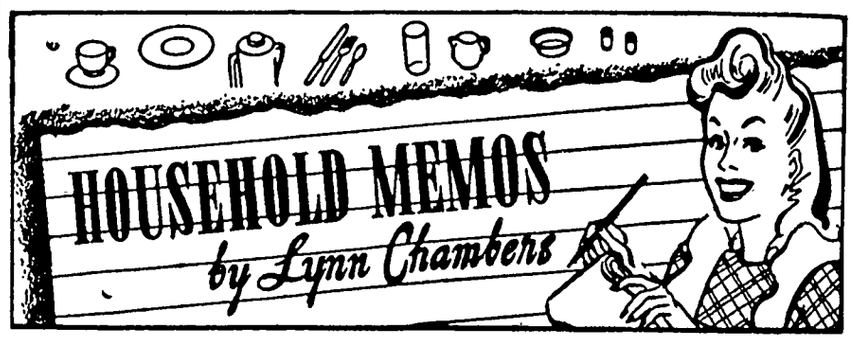
DR. CALDWELL'S is the wonderful senna laxative contained in good old Syrup Pepsin to make it so easy to take.

MANY DOCTORS use pepsin preparations in prescriptions to make the medicine more palatable and agreeable to take. So be sure your laxative is contained in Syrup Pepsin.

INSIST ON DR. CALDWELL'S—the favorite of millions for 50 years, and feel that wholesome relief from constipation. Even finicky children love it.

CAUTION: Use only as directed.

DR. CALDWELL'S SENNA LAXATIVE WITH SYRUP PEPSIN



Sugar Substitutes Come Into Limelight After the Holidays

Pears and other fruit may be stewed or baked with very little additional sugar because the fruit is so sweet in itself. Fruit desserts are kind to low-on-sugar budgets.

Sugar-Shy Sweets

Have the holidays exhausted your supply of sugar and sweets? Today's collection of recipes is especially planned for the low sugar budget, for strange though it may seem, there are many foods which can be fixed with a minimum of sugar.

Try packaged mixes, dried fruits, candied fruits, and the sugar substitutes if the sugar canister is getting empty. There are many packaged fillings which will relieve sugar from being used in pie and cake fillings, and these come in a variety of flavors.

Substitute as many of the fresh fruits for dessert as possible, and if they are baked, sweeten with maple or corn syrup. If your favorite cookie recipes call for one cup of sugar, use ¾ of a cup. They will be just as good, if a little less sweet:

Marble Molasses Cake.

½ cup butter or substitute
¾ cup sugar
2 eggs beaten
2 cups sifted cake flour
2 teaspoons baking powder
¼ teaspoon salt
⅔ cup milk
2 teaspoons allspice
3 tablespoons molasses

Have all ingredients at room temperature. Measure out flour, sugar, salt and butter in bowl. Beat for 2 minutes. Add eggs and milk and beat for another two minutes. Take out one-third of batter and mix with molasses and allspice. Drop by spoonfuls into greased loaf pan, alternating light and dark mixture. Bake in a moderate oven for 1 hour. Serve plain or frosted.

Angel Cake.

1½ cups light corn syrup
5 egg whites
5 egg yolks
1 teaspoon vanilla
1 teaspoon baking powder
1 cup sifted flour
1 tablespoon lemon juice
¼ teaspoon salt

Boil syrup until it forms a soft ball when tested in cold water. Beat egg whites stiff but not dry, pour syrup over them slowly, continue beating. Add lemon juice and vanilla. Beat this mixture until it holds its shape. Fold in egg yolks, beaten until thick and lemon-colored. Fold in sifted dry ingredients. Bake in large ungreased tube pan in a slow oven (300 deg.) until well browned and done, about 60 minutes. Invert on rack until cake loosens. Ice with following:

Lynn Says:

Sugar-Savers: When stewing fresh or dried fruits or making fruit sauces, add sugar or syrup just a few minutes before cooking is finished. Don't forget to add a pinch of salt to the fruit while it cooks. Both these little tricks will help make the fruit seem sweeter without using up a great deal of sugar.

Dried fruits are rich in sweetening and may be made into fruit whips without any sugar. Simply stew the fruit, cook and put through a sieve. Beat two egg whites until stiff and use ⅓ cup of dark corn syrup beaten into them. The amount of fruit puree required for this amount of egg white-syrup mixture is ¾ cup.

Since powdered sugar is more readily obtained than the granulated type, use it in icings. Powdered sugar is especially good when mixed in the proportion of one cup to a three-ounce package of cream cheese and flavored with orange juice.

Lynn Chambers' Point-Saving Menu

Calves' Liver Baked in Sour Cream
Buttered Spinach Fried Potatoes
Apple-Cranberry Salad
Rolls Jelly
*Ginger Pudding
*Recipe given.

Sugarless Icing.

1 egg white, unbeaten
½ cup light corn syrup
⅛ teaspoon salt
½ teaspoon vanilla

Combine all ingredients in top of double boiler. Beat with a rotary beater until thick enough to stand in peaks. Spread on cake.

A delightful spicy pudding can easily be made from sugar substitutes, and these are guaranteed to satisfy the family:

***Ginger Pudding.**
(Serves 6)

1 cup hot coffee
2 tablespoons shortening
1 cup molasses
1 well-beaten egg
⅓ cup sugar
2 cups flour
½ teaspoon salt
1 teaspoon baking powder
1 teaspoon soda
½ teaspoon cinnamon
¼ teaspoon each cloves, nutmeg, ginger

Pour coffee over shortening and stir until melted. Add molasses and mix thoroughly. Add egg and beat. Add sifted dry ingredients, mix until smooth. Pour into wax-lined square pan and bake in moderate oven (350 deg.) for 30 minutes. Spread with the following:

Orange Topping.

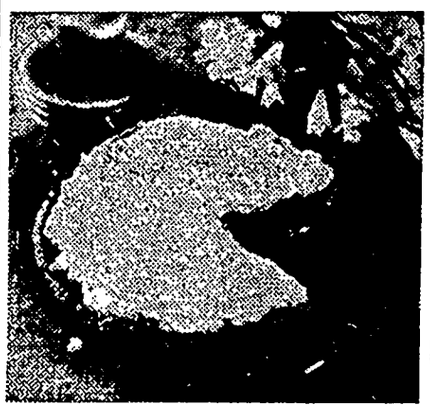
⅓ cup sugar
2 tablespoons grated orange rind
2 tablespoons orange juice

Mix all ingredients and sprinkle on top of pudding. Return to oven which has had heat turned off, for about 10 minutes.

Orange Fig Whip.
(Serves 6)

1 cup evaporated milk
1 cup broken fig-filled cookies
1 cup orange sections
½ cup broken nutmeats

Whip milk and fold in cookies. Add orange sections and nut meats then chill thoroughly. Pile lightly into sherbert glasses and serve.



Use an unbaked crumb filling for pie to save fat. Filling can be made of prepared pudding mixes to save sugar.

Cookies, too, may be made with a pleasing combination of a sugar substitute and only a small amount of sugar:

Peanut Cookies.

1 cup shortening
½ cup sugar
½ cup honey
1¾ cup sifted flour
¼ teaspoon salt
½ teaspoon baking powder
½ teaspoon soda
⅓ cup milk
2 cups quick-cooking oats
1 cup chopped seedless raisins
1 cup chopped peanuts

Cream shortening, add sugar and honey. Beat and add sifted dry ingredients, alternately with milk. Add oats, raisins and nuts. Drop by spoonfuls onto a greased cookie sheet and bake for 15 minutes in a pre-heated (375 degree) moderate oven.

Pecan Crispies.

1 cup shortening
1½ cup sifted flour
½ cup confectioners' sugar
2 teaspoons vanilla
2 cups pecans, chopped

Cream shortening, add sugar and vanilla. Add pecans and flour. Make rolls about 2½ inches long and ½ inch wide. Place on cookie sheet and bake 15 to 20 minutes at 325 degrees. When baked, roll in powdered sugar and cool on wire rack.

Yamashita and the Snore Threat

("General Yamashita, new commander-in-chief of the Japs against General MacArthur, often closes his eyes and snores, even in the midst of important business. This gives the impression that he is not alert and fools people."—Japanese radio.)

—*—

This introduces another new weapon into the global war. A snorer can be quite a threat, and Yamashita is no ordinary, low gauge, one-tube snorer. He gets volume and power, not to mention distance.

—*—

It may herald the launching of an all-out Japanese snore attack.

—*—

The Yamashita "horror weapon" may be the robot-grunt or even the jet-propelled snore. We may have to combat a nasal blitz any moment, now!

—*—

America does not include snoring among its major weapons. It is not a nation of top snorers. It has never gone in for snoring as an instrument of aggression, nor even of defense.

—*—

But that may be because it has never been challenged in this respect by any world conquering snorers.

—*—

Washington seems undisturbed. Secretary Stimson expressed the opinion that while we are not much as a snoring nation today, we led the world at it between 1919 and 1941. "And that was unintentional snoring," he said. "Once we set our minds to snoring aggressively, the results will be amazing."

—*—

General Marshall spoke with similar confidence. "Let Yamashita bring on his Burping battalions, his grunting Grenadiers," he said calmly. "I understand Yamashita snores from the toes up, the effect being heightened by a bad case of halitosis. But we will take him on, grunt for grunt."

—*—

General MacArthur was equally passive. "I will spot the general two deep inhalations and make him cry for help. We can lick him at anything, including any noises he cares to make," he declared.

"He is very deceptive," we warned MacArthur. "He can snore while awake."

"That makes him an ideal foe," was the reply.

"He sometimes does his deepest planning between grunts," we pointed out.

"We will keep him grunting," smiled MacArthur. "Is he a straight-front snorer or a side-wheeler? Anyhow we will look for an all-around snorer. Do you knew if he snores with his mouth open?"

"Our scouts so report," we said.

"That kind are a dime a dozen, even when made in Japan," said MacArthur. "It is the man who snores with his mouth closed who is really dangerous."

—*—

MacArthur went on to say that, anyhow, America had been experimenting with a new snore of greater range and velocity, a snore that would go anywhere.

"We fear no enemy snorers," he added. "Kaiser Bill was a better than fair hostile snorer and look at his finish! Hindenburg was tops."

—*—

General Eisenhower admitted one fear from the snore technique. "If Hitler, Goering, Himmler and Goebbels should all snore at once, that would be a disturbance!" he admitted.

* * *

Justice on the Home Front

"Coincident with the distribution to all private lending institutions of new regulations covering housing loans for war veterans, the Federal Housing administration today urged the setting up of full safeguards against veterans being victimized through the purchase of jerrybuilt houses."—News item.

—*—

One of our yens is to see a tough, seasoned veteran return from the wars, get one of those modern houses with walls that wobble in the breeze, and chase the realtor across country with a bayonet. Getting, of course, his money back.

* * *

Portrait of a Self-Confident Man.

(Our Fuehrer stands like a rock amid the surging tide, holding fast to his conviction Germany will win this war."—Herr Goebbels).

There stands Adolf
Like a rock
While the breakers
Roughly sock
He's not worried,
He's not wet;
He's not shaken. . . .
Wanna bet?

* * *

Secretary Ickes was aboard a train derailed at 60 miles an hour. Unhurt, he says he didn't even know about it. And it will do no good to show him the reports because he says he doesn't believe what the newspaper says.

* * *

"I am not fond of dancing on a narrow stage," says General Yamashita, Japanese commander-in-chief.

After a time you will find it amazing, Yammie old thing, how easily you can do it to the tune of the "Stars and Stripes Forever."

SEWING CIRCLE PATTERNS

Attractive All-Occasion Play Suit Play Sets for Brother and Sister

Girl and Boy Play Suits

PLAY togs for boy or girl—little tots will love this practical set made in corduroy with bright flower applique. Sister's dress has pert puffed sleeves—and she may have overalls just like brother's! Use pretty scraps for the applique.

Jerkin Suit

IDEAL for any occasion, this two-piece jerkin suit is tops with the teen-age crowd. The well-fitting jacket can be collarless, if you like, and is smart too with long or short sleeves. A change of blouses gives you many attractive costumes.

* * *

Pattern No. 8732 comes in sizes 11, 12, 13, 14, 16 and 18. Size 12, without sleeves, requires 3½ yards of 35 or 39-inch material; short sleeves, 3¾ yards.

Long-Distance Flight

The longest distance flown nonstop today over a regular civilian air route is the 3,563-mile hop made by the planes of the Qantas Empire Airways across the Indian ocean between Albany, Australia, and Colombo, Ceylon.

The second longest distance is the 3,376 miles flown between New York City and Lisbon, Portugal.

Household Hints

In the kitchen where but little space is available, place the trays from under the gas burners atop of the burners. A good place to stack the soiled dishes before washing them.

—•—

When ripping clothing with a two-edged razor blade, cut a slit in a cork and put it on one side of the blade to protect your hands from being cut.

—•—

Pin perfume-soaked dabs of cotton to the hems of garments to lend a subtle fragrance to body and clothes.

—•—

Use a curling iron to stretch the fingers of washable kid gloves.

—•—

As far as possible all windows in a house should have a similar appearance from the outside; if the draperies hang straight, sheer curtains used with them should also hang straight.

—•—

If you have difficulty driving a finishing nail into hardwood without bending the nail, drive the nail through a bottle cork, then through into the wood. After nail has started well into the wood, pull the cork off and finish driving the nail.

HANCOCK ASSESSORS ARE READY FOR BUSINESS

At the annual meeting of assessors of Hancock County held at the Court House, C. A. Frisbie, Garner was elected chairman, and Ole G Peterson, secretary of the Hancock County Assessors' Association.

Instructions and supplies were received by the assessors.

Hancock County Supervisors increased the days allotted to the assessors for completing their 1945 assessment on real and personal property about 20 per cent.

Clarence Neuberger Appointed Assessor For Ell Township

The Board of Trustees have appointed Clarence Neuberger assessor for Ell Township to fill the vacancy caused by the resignation of Donald Neuberger, former assessor. The latter resigned because he is moving to a farm north of Clear Lake early this spring.

Making a Blouse Aids Bond Buying

The slashed neckline of this gold wool blouse is repeated in the V of the waistband in the checked gold and tan skirt. Cut on a bias, the slim skirt falls into a becoming flare at the hemline. Save for War Bonds by making it. Patterns available at local stores. *U. S. Treasury Department*

Local Happenings

Klemme and Vicinity

W. J. Barz of Garner was in Klemme on business Tuesday.

Mrs. C. F. Keraus visited Sunday with Mrs. Rose Horecka at Garner.

Earl Ruka attended a meeting of insurance men at Fort Dodge Saturday.

J. A. Chambers left today for Iowa City to enter the hospital for an examination and check-up

A practice fire drill was held at school Tuesday afternoon which was just about perfect.

Mr. and Mrs. Frank Schoun of Duncan were transacting business in Klemme, Tuesday.

Supervisor Penn Eckels of Britt was a business caller in Klemme Tuesday afternoon.

"That They May Walk Again"—join the March of Dimes with your dimes and dollars, January 14-31.

Mr. and Mrs. Cecil Pethick and son of near Thornton, were shopping in Klemme Saturday afternoon.

Mrs. Don Carson of Des Moines came Friday and visited until Sunday with her parents, Mr. and Mrs. John Johnson and family.

Rose Mary, daughter of Mr. and Mrs. Alfred Josten visited with her grandmother, Mrs. Peter Josten from Sunday until Monday eve.

Mrs Earl Schaeffer of Forest City is teaching in the 1st and 2nd grades this week while Miss Bugh is attending her brother's wedding.

Erick Josten suffered a severe stroke Saturday and was taken to the Mercy hospital Tuesday for treatment and care.

Mrs Fred Nagel was called to Grinnell last week by the serious illness of her son-in-law, Mr. Ole Thompson.

Lloyd Smith and family moved last week to Garner where they had purchased a house Mr. Smith has a cream route out of Garner.

Mrs. Lena Schroeder entertained to supper Monday evening Mrs. H G. Voetberg, Mrs. Clara Barz, and Mrs. Mary Waterman.

Fred Nuehring and Tom Roths trucked a load of cattle to Austin, Minnesota, Saturday, for Mr. Nuehring.

Mrs. Frances Swalve entertained to dinner Sunday Mr. and Mrs Herman Priebe; and Mr. and Mrs Frank Sandrey.

Carl Finders and family moved last week to the Lloyd Smith residence in the north part of town which they purchased recently.

Mr. and Mrs. Herman Paul and Mrs. C. F. Keraus were at Mason City Monday. Mrs. Paul went to have a check-up on her recent operation.

Mr. and Mrs C. G. Waterman and Mrs. Lyle Wilcox were dinner guests Tuesday of Mrs C. F. Keraus, in honor of Mrs. Waterman's birthday, which was Monday

Yes, we are still enjoying winter weather up here in North Iowa. Temperatures range from 20 degrees below zero to about 20 degrees above zero.

Mr. and Mrs. Charles Gibbs, of Big Lake, Minnesota, came Saturday evening for an extended visit with Miss Anna Gibbs and other relatives in this community.

Mrs. Herman Paul returned to her home Thursday afternoon from the Mercy hospital where she underwent a throat operation. Mrs. Paul is making a good recovery.

Mrs. C. A. Arnold and Mrs. Lester Stille went to Des Moines Sunday evening where they were joined by Miss Ruth Stille and the trio then went to Chicago for a visit with Duane Ridder who is a patient in a service hospital. Duane became seriously ill soon after entering the armed service and has been in the hospital for several months.

Bolivia is the principal world producer of antimony ore.

The silkworm and the honeybee are domesticated insects.

Your dimes and dollars will help the Annual March of Dimes.

Miss Lydia Bock began work at the Kingery home Monday, caring for Mrs. Kingery who is ill. Mrs. Ronald Barz assisted Mrs. Kingery for three weeks.

Mr. and Mrs. Arthur Schlawin entertained to dinner Sunday Mr. and Mrs. Henry Buseman; Mr. and Mrs Francis Buseman and Albert Priebe and family.

Mrs. Ronald Barz, has received word from her husband, Seaman Barz, that he is now at sea and is on a destroyer and says he likes his work very much.

Mrs. Naska Bock received word that her grandson, Bobbie Burr of Mitchellville underwent an appendicitis operation at a Des Moines hospital. He is making a good recovery.

Miss Betty Etchen of Des Moines, spent the week end in Klemme visiting with her parents, Mr. and Mrs. John Etchen. Miss Etchen is employed in the accountng department of the Brown - Campbell Co.

Join the March of Dimes January 14-31.

Lews Mau and family moved Monday to the Ora Ford farm located 8 miles east and 2 miles north of Klemme. The Maus farmed the Edith Haupt farm southwest of Klemme several years, and for several months have lived in Klemme, or since the house on the farm was destroyed by fire.

"The Girls They Left Behind"—another painting in the series of delightful covers by the distinguished British artist, David Wright. See it in full color on the front page of The American Weekly, the magazine distributed with next week's Sunday Chicago Herald-American. 1tc

KANAWHA POSTMASTER RETIRES FROM DUTIES

Postmaster T. H. Thompson, of Kanawha, has resigned and will retire, having reached the retirement age. He has served as postmaster at Kanawha for 15 years. His nephew, Henry Johnson, is serving as acting postmaster until a permanent postmaster is appointed.

Thos. H. Thompson, who served several terms as Treasurer of Hancock county, is the father of our townsman, Ed. J. Thompson.

Canada has given over two billion dollar's worth of mutual aid to Britain, Russia, China, and others of her allies.

NOTICE OF PROBATE OF WILL

M., of the day above mentioned all persons interested are hereby notified and required to appear and show cause, if any they have why said instrument should not be probated and allowed as and for the last Will and Testament of said deceased

Dated at Garner, Iowa, January 1945.

ELMER RAW,
Clerk of District Court

(Publish Jan. 10, 1945.)

Bermuda is 677 miles southeast of New York.

THERE IS ONLY ONE WAY

• TO BECOME CONVINCED—

•

We might tell you over and over about the better quality and finer taste of our food but at last there would be only one way we could convince you—and that is to come and eat a few of our delicious meals and lunches—then and then only would you know positively that you do get finer foods, more deliciously prepared than you find a lot of places.

hursday night's games begin at o'clock when Garner plays the ner of the Klemme-Crystal en- ter. Goodell meets Britt at o'clock, and Corwith plays the Hayfield team at 9:00.

iday evening at 7:30 the win- of the Klemme-Crystal Lake- ner tussle meets the winner of Corwith-Hayfield game. And at the winners of the Kanawha- en game meets the winner of Goodell-Britt game.

e consolation final will be on rday night at 7:30 and the big pionship game at 8:40.

e officials are J. H. McKibbon ampton, and O. F. Moore of field.

E AT STORM LAKE OUGH THE ICE

ite seine crews in three hauls a 3,600-foot seine have remov- ,300 pounds of carp and buffa- om Storm Lake In 1942 the took 150,000 pounds of carp buffalo in a single haul. The interesting fact revealed in recent operation is that some game fish were caught and ned to the water, compared to ounds taken three years ago. fish taken include crappies, bass, walleye pike, yellow , and northern pike. All were cellent condition, and many of walleye pike weighed more eight pounds.

rm Lake, one of the best fish- akes in the state in the past, een greatly over-crowed with and buffalo, and their con- removal is making this lake habitable or species of fish will provide sport fishing.

FUNERAL SERVICES HELD ON MONDAY FOR ALEX ROSS

Funeral services for Alexander A. Ross, 74, who died at his home in Garner Saturday, were held at the Bohn funeral home at 1:30 p m. Monday with the Rev. E. F. Broberg, pastor of the Garner Methodist church in charge. Interment was in the Memorial Park cemetery at Mason City.

Alexander Ross was born Oct. 31, 1871, in Glasgow, Scotland. He came to this country as a young man and on October 25, 1900, he was united in marriage to Abbie Busick. He came to the Garner community 44 years ago and lived on a farm near there.

He leaves his wife, 2 brothers, Dr. W. G. Ross of Kempton, Ill., and Walter of Garner, and a sister, Mrs. Sam Barr of Manhattan, Ill.

Mr. And Mrs. George Cosgriff Celebrated 25th Anniversary

Mr. and Mrs. George Cosgriff celebrated their 25th wedding anniversary Sunday with a family dinner and had as their guests for the occasion Martin Cosgriff, Jr. and family, and Thos. Cosgriff and family of Britt.

George Cosgrif and Edithe Warnock were married at Britt twenty-five years ago and are the parents of one son, Billy, a junior in the Klemme high school. The Cosgriffs have been residents of our town for about a year.

Mrs. Cosgriff is chief operator of the Klemme telephone exchange.

Methodist Choir Had Birthday Party For Members

The Klemme Methodist choir met at the Rev. Harvey home last Thursday evening and after the rehearsal had a party for the members whose birthday was in December: Emil Beier, Mrs. Harvey, Peggy Coobs, and January birthdays of Marie Blank, Mrs. Clarence Waterman and Nellie Lou Sherwood.

Games and stunts were in charge of Mrs. Lyle Wilcox and Rev. Harvey. Late in the evening a lunch of cup-cakes, home-made ice cream and coffee was enjoyed.

Executive Committee Of Ell Farm Bureau Met At Anderson Home

The Executive Committee of the Ell Township Farm Bureau met at the Jennings Anderson home on Thursday evening, January 11th to plan for the annual year book and take up other business, after which a social evening was enjoyed.

At a late hour a delicious lunch was served, consisting of sandwiches, cake, home-made ice cream and coffee.

Those present, besides the W. J. Anderson family were: Mr. and Mrs. W. F. Weaver and Bernice; Mr. and Mrs. Edwin Thieman; and Mr. and Mrs. Alvin Goll and Lyle.

County Buys New Truck

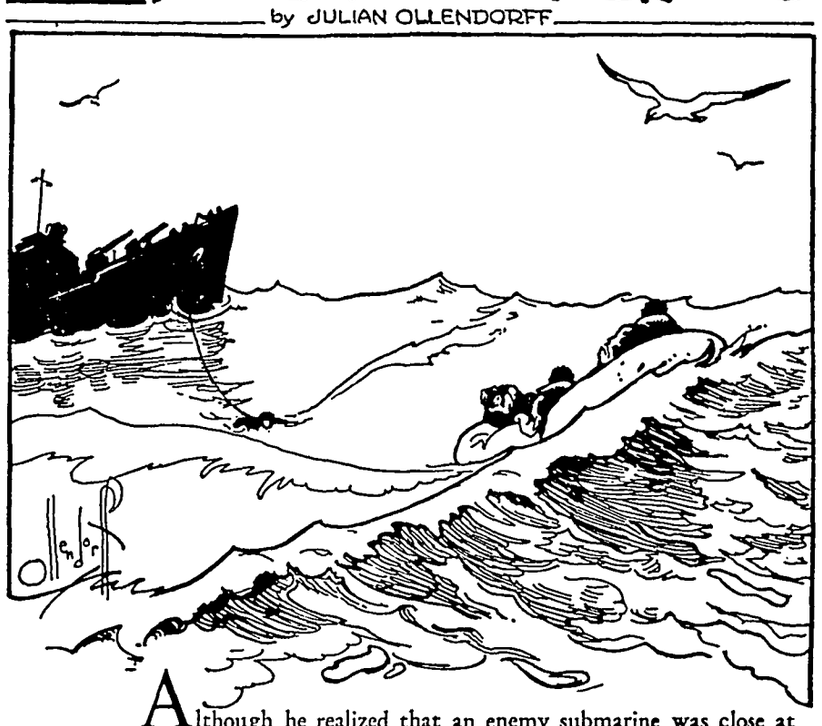
The Hancock County Board of Supervisors recently purchased a new truck, a three-ton outfit to be used for highway maintenance work and snow removal. County Engineer C. F. Merten and county employes Elmer Carr and Roy Davis went to Davenport and drove the truck through last week.

Supervisors Name Official Papers For Hancock County

The Hancock County Board of Supervisors have named The Garner Leader, Britt News-Tribune, The Klemme Times and The Kanawha Reporter as official newspapers for 1945. These papers will publish all legal matters, such as the proceedings of the board, list of all claims, etc. during the year.

AMERICAN HEROES

by JULIAN OLLENDORFF



Although he realized that an enemy submarine was close at hand and his U. S. destroyer would leave him in the event of attack, Fireman, First Class, David Jack Stephenson, U.S.C.G.R., of Clendenin, Va., went over the side to rescue three men in a small raft. He swam to the raft and fastened lines around the survivors. Stephenson was cited for his heroic performance. The ropes, raft and destroyer were paid for out of War Bond funds.

Shamrocks And Ventura Met In Real Thriller

Klemme Boys Build Log Cabin On Newberger Farm Hills

No, that is not the home of an old pioneer in the hills south of town on the Clarence Newberger farm, but a log cabin built by a group of Klemme boys.

The boys needed a place to get warm after coasting and skiing on the hills and Mr. Newberger gave the boys permission to cut down trees along a creek and they made a nice log cabin, all complete with a built-in fire place. The cabin is about eight feet square and six feet high and built in real woodsmen style with an axe and chinked up with mud.

The boys who built the cabin are Dick, Don and Jerry Finder, Roger Ridder, Roger and Willie Bock.

The editor was given a personal invitation to visit the cabin. However, we think we'll wait until the weather warms up a bit before we spend a night there.

The 2 million-volt sealed-off X-ray tube can radiograph in less than an hour thick metal sections.

When you have company or take a trip, that's news. Phone 12.

SHAMROCKS GAVE VENTURA A REAL BATTLE HERE

Game Was Close For Three Quarters When Ventura Pulled Ahead

Ventura's high-powered basket team had the wind taken out of their sails here Tuesday night as the Shamrocks played them on even terms for three quarters of the hotly contested battle. Ventura is unbeaten this year, but for a time it looked like Kingery's Shamrocks were going to upset their record.

At the end of the first quarter Ventura led by one lone point, 6 to 5. The Shamrocks tied them all up 16 to 16 at the half Up until that time Ventura's hot-shot Gisel had only found the loop twice for 4 points and gathered 2 more via the free throw route. But Gisel found the range in the 3rd stanza when he hit 5 times from the field to put his team in front by a slim 27 to 23 lead at the end of the 3rd quarter.

But from there on the Shamrocks tired against the big boys from the lake and were only able to roll up 3 field goals while Ventura put on a blitz attack with 6 field goals and 5 charity tosses to end the game 44 to 29.

The Little Shamrocks took their first loss of the season as the Ventura reserves led them in a close game which ended with Ventura in front 31 to 27.

In the main encounter the Shamrock scoring was evenly divided. Buntenbach and Brinkman each tallied 9 points, Jacobs 8 and Peck 3 for a total of 29.

Bob Gisel led Ventura with 24 points, Miller collected 9, Wolfram 6, Baker 3 and Anderson 2 for a total of 44.

The Shamrocks made good 9 out of 15 free throws, while Ventura made 12 out of 17 free throws.

The gym was packed to capacity and was more like a tournament crowd.

Mrs. Sumner Trumbell Entertained Double Four Bridge Club

Mrs. Sumner Trumbell was hostess to the Double Four bridge club at her home last week Wednesday.

Mrs. John Etchen won the high score for the afternon, and Mrs. Clarence Lemke was second high.

GOODELL YOUTH MISSING IN LUXEMBOURG ACTION

Mr. and Mrs. Henry Nolte of Goodell received a telegram from the war department Monday stating their son, Pvt. Bernard Nolte, 20, was missing in action December 18 at Luxembourg. Another son, Cpl. George Nolte, is with the armed forces in the Pacific.

DUANE RIDDER DIED SATURDAY IN CHICAGO HOSPITAL

Duane Ridder, son of Mrs. Adolf Ridder of Watertown, South Dakota, died Saturday in Hines Hospital at Chicago.

Duane, who was in the armed forces, was injured some months ago while playing ball at an army camp. He did not recover from his injuries and complications developed which caused his death.

His aunt, Mrs. C. A. Arnold, and his mother, a sister of Mrs. Arnold, were with him at the time of his death.

Funeral services and interment was at Watertown, South Dakota.

Duane was well known to the young people of this community as he spent several summers here at Mrs. Arnold's farm.

License On Hancock Pooches Boosted For 1945

The Hancock County Board of Supervisors fixed the license fees on dogs for 1945 at $1.50 for male dogs and $4.0 for female dogs. This is an increase of 50 cents on male dogs and $1.00 on female dogs.

Heavy losses to domestic animals caused by dogs and wolves in 1944 was given as the reason for the increase in license fees.

Surprise Birthday Party Held For Miss Marie Blank

The young people of the Klemme Methodist Church held a surprise birthday party on Miss Marie Blank last week Wednesday evening.

After an evening of playing games a nice lunch was enjoyed by all.

Mrs. Edwin Bock Teaching In Klemme High School

The school board has secured Mrs. Edwin Bock, of Garner, to fill the vacancy caused by the resignation of Miss Crabtree as Home Economics teacher in the Klemme high school.

Mrs. Bock, who taught here several years ago before her marriage, will also teach English.

Pvt. John Schwichtenberg Has New Army Address

Pvt. John Schwichtenberg, son of Mr. and Mrs. Dave Schwichtenberg has a new army address as follows:

Pvt. John W. Schwichtenberg, ... 37685260.
2132-A. A. F. Base Unit Casual,
Maxwell Field, Alabama.

FUNERAL SERVICES HELD FOR CHARLES SCHOENWETTER

Several Children Live In Klemme Community On Farms

Charles A. Schoenwetter, 89 who had been a resident of Garner for probably forty years, died at his home in Garner Saturday evening. Mr. Schoenwetter had been in failing health since last spring but his condition did not become serious until about a week ago.

Funeral services for Mr. Schoenwetter were held this Wednesday afternoon at the Garner Methodist Church with the Rev E. F Broberg in charge. Interment was in the family lot at Concord cemetery at Garner.

Mr. Schoenwetter was born on January 27, 1855. He farmed in Liberty township until he and his wife retired and moved to Garner where they built a large modern home at the time. Mr. Schoenwetter accumulated several fine Hancock farms during his lifetime.

He leaves 4 sons, Arthur, George, Edward and Victor, all of this vicinity; 3 daughters, Mrs. Emil Pringnitz of Twin Lakes township; Ella, Mrs. Ray Yeager and Myrtle at home.

Mrs. Charles Schoenwetter died last year, February 1st.

Methodist Work Circle Meets Thursday At Church

The Work Circle of the Methodist church meets Thursday. The ladies will work on a quilt and will begin at 10:30 a. m. Bring sandwiches for noon lunch.

There will be other hand work for those who don't quilt. Bring thimble and scissors.

HEADS BATTLE AGAINST POLIO

E. Lee Keyser

E. Lee Keyser of Des Moines has been named Iowa State Chairman of the March of Dimes, the annual fund appeal of The National Foundation for Infantile Paralysis, to be conducted Jan. 14-31

The appointment was announced by Basil O'Connor, president of the National Foundation.

Mr. Keyser, the Des Moines Area Director for the War Man Power Commission has always been active in civic affairs and served two terms as superintendent of parks and public improvements on the Des Moines City Council and for two years was Chairman of the Polk County Chapter of The National Foundation for Infantile Paralysis. He is nationally known as the originator of night baseball when he was president of the Des Moines baseball club and also was a former president of the Kansas City baseball club.

Commenting on the nation-wide appeal for funds, Chairman Keyser said: "In 1944 our nation experienced the second worst epidemic of infantile paralysis in its history. But we were better prepared to meet it than ever before. This preparedness was made possible by the dimes and dollars so generously contributed by the American people to the March of Dimes, held each January in celebration of the President's Birthday. No one can predict where infantile paralysis will strike in 1945. We must be ready to meet it."

Acid Indigestion

Relieved in 5 minutes or double money back

When excess stomach acid causes painful, suffocating gas, sour stomach and heartburn, doctors usually prescribe the fastest-acting medicines known for symptomatic relief—medicines like those in Bell-ans Tablets. No laxative. Bell-ans brings comfort in a jiffy or double your money back on return of bottle to us. 25c at all druggists.

Beware Coughs from common colds That Hang On

Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm, and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Tell your druggist to sell you a bottle of Creomulsion with the understanding you must like the way it quickly allays the cough or you are to have your money back.

CREOMULSION

CALOX TOOTH POWDER

BE PREPARED

to relieve colds' achy muscles, sore throat with St. Joseph Aspirin, world's largest seller at 10¢. No aspirin can do more for you. Big 100 tablet size for only 35¢.

SNAPPY FACTS ABOUT RUBBER

In spite of wartime restrictions, American motorists traveled 280 billion passenger miles in 1943, a drop of about 44 per cent from the all-time high set in 1941. Steam railroad passenger miles traveled in 1943 were 2000 per cent above 1941.

Another proof of the importance of rubber in tires: 34 large cities in the U. S. receive all their milk by motor trucks.

A single skid can take as much as 100 miles off a tire. Wartime speed and careful driving will prevent this mileage waste.

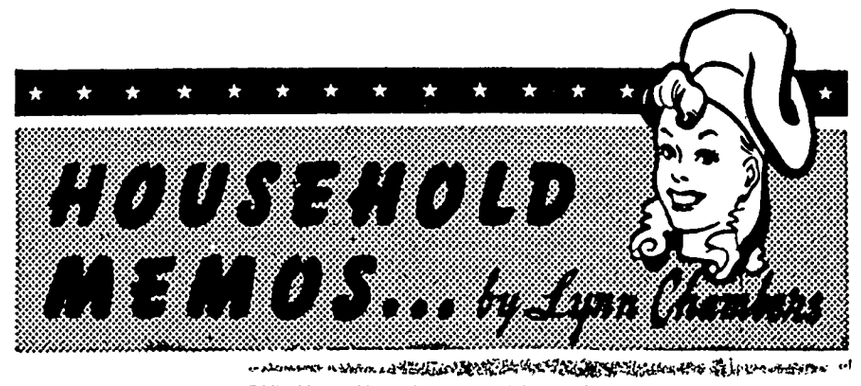
ONE WORD SUGGESTION FOR ACID INDIGESTION—TUMS



Crisply-Coated Fish Takes It Easy on the Budget
(See Recipes Below)

Serve Fish Often

As civilian meat supplies grow leaner, fish will again come to the rescue as a good protein food. Fish is easier to prepare than meat, and it bakes, broils, fries and cooks quickly.

Fish is at its best when it's perfectly cooked. By that, I mean, the bones separate from the delicate flesh, and the coating is crisp and golden brown if the fish is pan-fried or broiled.

This delectable food is available in large quantity now, and it's wise to plan to serve it not once a week, but several times, to lessen the drain on red points. When served with a garnish of lemon and parsley or one of the excellent sauces, fish can become a regular family favorite.

Condiments should be used wisely so that fish can take on an agreeable flavor. Their flavors should be subtle rather than pronounced so that the delicate flavor of the fish is not completely lost.

Baked Whitefish.

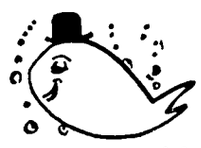
3 pounds whitefish
2½ cups bread crumbs (dry)
2 tablespoons bacon, minced
1 teaspoon green pepper, minced
Onion, large, minced
5 slices bacon
½ teaspoon salt
Pepper

Mix bread crumbs, minced bacon, green pepper, onion and seasonings and lay on fish. Place a slice of bacon on this and fold over fish. Place on rack in open pan and lay remaining bacon over top. Bake 35 minutes in a very hot oven (450 degrees), basting often with fat in pan. Serve with green pepper and lemon slices. For sauce, mix together the following: 3 teaspoons minced green pepper, 3 tablespoons catsup, and 5 tablespoons mayonnaise.

Broiled Halibut.

Anchovy butter or lemon
Halibut
Salt and pepper

Wipe fish with damp cloth. Brush with melted butter and season with salt and pepper. Arrange on broiler pan and broil until fish is well browned. Spread with anchovy butter when ready to serve or garnish with lemon.



Baked Fish With Mustard Sauce.

1½ pounds fillet of haddock
2 tablespoons melted butter
1 tablespoon flour
1 cup boiling water
1 tablespoon lemon juice
1 tablespoon prepared mustard
½ cup dried bread crumbs
Salt and pepper

Lynn Says:

Have Sauces with Fish: Combine melted butter with lemon juice and chopped parsley. Serve at once.

Take 1 cup hot white sauce (medium) and mix with 2 hard-boiled eggs and 1 chopped dill pickle. Keep hot until served.

Mix mayonnaise with an equal amount of sour cream and then add drained, chopped cucumber to it. Season with salt and pepper.

Mayonnaise may also be mixed with scraped onion, parsley, chopped pickle and chopped pimiento.

Add grated American cheese to heated tomato soup and blend lightly. Serve over baked fish.

Mix one cup of mayonnaise or white sauce with the finely chopped whites of two eggs. Put the yolks through a sieve and sprinkle over the top of the sauce.

Mix ½ cup finely chopped and drained cucumber with one cup of sour cream. Sprinkle with paprika or minced parsley before serving on fish.

Lynn Chambers' Point-Saving Menu

*Baked Fish With Cheese Sauce
Baked Carrots Mashed Potatoes
Whole Wheat Rolls
Green Bean Salad
Orange Chiffon Pie
Beverage

*Recipe given.

Cut fillets in six servings. Season lightly with salt and pepper. Lay in shallow, well greased pan. Make sauce of 1 tablespoon butter, flour, water, lemon juice and mustard, stirring constantly until thickened. Add remaining tablespoonful of butter to bread crumbs and sprinkle over fish. Bake in a hot oven (400 degrees) for about 20 minutes.

When much fish is served, it is good to vary the method of cooking and serve it as a souffle occasionally:

Fish Souffle.
(Serves 6)

1 package flounder or similar fish
½ cup boiling water
¾ teaspoon salt
Heavy cream
2½ tablespoons flour
2 tablespoons butter or substitute
⅛ teaspoon pepper
4 egg yolks, stiffly beaten
4 egg whites stiffly beaten

Cook the fillet of flounder in boiling, salted water until tender. Drain, reserving liquid. Add the cream to make 1 cup. Separate fish into fine flakes. Combine butter, flour, salt and pepper. Add cream and cook until smooth and thick. Add fish and cool. Blend in beaten egg yolks, mixing well. Fold in beaten whites. Turn into buttered casserole. Place in a pan of hot water and bake for 1 hour in pre-heated 350-degree oven.

Stuffings add interest to any type of fish. Bread stuffings or those with celery, mushrooms, or chestnuts may be used. In the following, rice stuffing is suggested with pike:

Fish With Rice Stuffing
(Serves 4)

1 3-pound pike
2 tablespoons butter
½ pound mushrooms, chopped
2 tablespoons chopped onion
¼ cup bacon drippings
1 cup cooked rice
Salt and pepper
½ teaspoon poultry seasoning
2 beaten eggs

Place fish in shallow pan and broil under moderate heat for 15 minutes, basting with the 2 tablespoons of butter. Turn; broil 10 minutes. Season with salt and pepper. Cook mushrooms and onions in bacon drippings until tender. Add rice, seasonings and eggs; mix well and mound the stuffing in center of serving platter. Place fish, skin side up over stuffing. Fish may also be baked with stuffing, in a moderate oven for 45 minutes, basting with butter. Garnish with lemon slices.

Cheese sauce is an excellent accompaniment for fish as in this case:

***Baked Fish With Cheese Sauce.**
(Serves 4)

1 chopped onion
¼ pound sliced cheese
1 2½-pound pike, halibut or perch
1½ teaspoons Worcestershire sauce
1 teaspoon dry mustard
1 teaspoon salt
½ teaspoon pepper
1 cup milk

Place onion and half of cheese in fish cavity. Place remaining cheese on top of fish. Add remaining ingredients and pour over fish. Bake in hot oven (400 degrees) for 25 minutes.

SENATORIAL CIGARETTE INVESTIGATION

Senator Wibbie—As I stand here doing my part in the great battle for the preservation of that thing which is so dear to America, the cigarette, I sometimes wonder if my colleagues fully appreciate the part played by it in the life of our glorious country. What, I ask, would civilization be without it? What would democracy be with no smoke-rings curling above it? What would a free world be with no ashes on the rugs?

Senator Bunkem—Does the Senator contend that the world could not survive on the old-fashioned clay pipe of our forefathers?

Senator Wibbie—We have passed beyond the era of pipes. They are a relic of the days before mankind, and womankind, reached that stage of development where the very home was built around the cigarette. With the last drop of my blood I will hold the fort against those reactionaries who would plunge our wives, mothers, and sisters and kiddies back into those dark ages when nicotine-stained fingers were the privilege of princes and prelates, when the great blessing of blowing smoke through the nose was unknown to the masses, and when that great blessing to all mankind, the ashtray, was almost unknown.

Senator Toopsey—In my grandfather's time they had to use old saucers for trays.

Senator Bunkem—I remember my grandfather going around the old home looking in vain for something to empty his pipe into, and finally using grandma's ginger jar.

Senator Wibbie (resuming) — My friends, this is one of the gravest hours in history. This country must face that great question, can our people get all the cigarettes they need, and upon which their lasting happiness depends. Deprive us of our cigarettes and you strike a blow at the very foundation of liberty. Would Thomas Jefferson stand idly by today and watch long lines of mothers and daughters waiting patiently before the store offering but one pack to a customer? Would Jackson submit to cigarette rationing? Would Lincoln, Cleveland, McKinley and the great Teddy Roosevelt have stood unmoved by the suffering involved when thousands of our school children were obliged to reduce their cigarette quota by as many as two smokes per day?

—*—

Senator Toopsey (getting into the spirit)—The important place of the cigarette in our civilization is plain to all. With it we conquer, without it we fail. I have a few statistics here marking the extent of the crisis now confronting us. In 11 of the northern states 60 per cent of the women and children haven't been able to inhale in weeks. In 8 western states over 80 per cent of the wives and mothers do not know where their next smoke is coming from. In 4 border states the nicotine stains are fading fast."

A strong Democratic senator—Let us here and now place the blame for the cigarette shortage where it belongs, at the door of Herbert Hoover.

A Left Winger—Right! But let us not forget that the forces of reaction as represented by Wall street, the capitalistic system and the United States chamber of commerce are also to blame.

A Republican—There was no cigarette shortage under Hoover!

Senator Earake—There probably as, but it was concealed by the Tory press.

—*—

Senator Bunkem—Are we sure there is a shortage? I listen to the radio and all the big cigarette companies are filling the air with sales talks for their product. Why do they do this if they are out of cigarettes?

Senator Earake—They are building up good will.

—*—

Senator Duffer—Would it be possible at this time for the senate to take up the arms shortage on the western front? It seems to me to be more important.

(Cries of "Throw him out" and "No! No!)

Senator Duffer — Is it not advisable that we look into the matter of getting more shells to General Patton, stopping the drift of workers from war factories and focusing the attention of the American public on the more vital aspects of the world situation?

Chorus of Voices—What! And make cigarettes a secondary issue!!

(The session ends in disorder.)

The Gotham Taxists Don't See:

To this writer's mind one of the sights of New York worth seeing, yet seldom mentioned by the guides, is Washington Market. A combination county fair, food show, Elks picnic, carnival and home town "general store," it is one of the town's big shows. During the noon hour, when thousands crowd into it to lunch at its unique clam, sandwich, fish and quick-lunch bars, it is at its best.

Pete's Chili Bar . . . Hotloaf's Seafood Bar . . . Charlie's Oyster Bar . . . The Hotloaf Bakery Bar . . . and many others . . . with, in most cases, the five-cent cup of coffee still reigning like something out of bygone days!.

SEWING CIRCLE PATTERNS

Pretty, Be-Ruffled Dress for Tots

Party Dress

A PRETTIER party dress would be hard to find! Your pride and joy will love this gay be-ruffled pantie frock with its sweet round yoke, scalloped front and swing-time skirt. Make it for kindergarten too in bright colorful cottons.

Pattern No. 1250 comes in sizes 2, 3, 4, 5 and 6 years. Size 3 years, dress and pantie, requires 2½ yards of 35 or 39-inch material; 1¼ yard machine-made ruffling to trim.

Patient Had Aptitude For Variety of Tasks

An inmate of an asylum was about to be discharged as cured. As he was preparing to leave, the superintendent called him in and asked him about his plans.

"Well," was the reply, "I was admitted to the Bar, so I may practice law. I used to be an accountant, so I may become a bookkeeper. I speak six languages, so I could be an interpreter. If I find the going tough, I may become a house painter or a carpenter."

With that he arose, placed his left hand on his hip, the back of his other against his forehead, extended his fingers, and added: "Or—I may become a tea kettle!"

Allies Balk Nazis With Message-Scrambling Cable

The destruction of telephone wires by the Nazis retreating from France and the Low Countries did not interfere with the communications of the pursuing Allies, says Colliers. They were equipped with a new cable that, although no larger than a pencil, carries three telephone and four telegraph circuits, is laid alongside the road as fast as the troops advance.

This cable transmits "scrambled" messages which, if intercepted without a special device, sound to the enemy like a series of meaningless squeaks and squeals.

Splendid Cough Relief Is Easily Mixed at Home

No Cooking. Makes Big Saving.

To get quick and satisfying relief from coughs due to colds, mix this recipe in your kitchen. Once tried, you'll never be without it.

First, make a syrup by stirring 2 cups granulated sugar and one cup of water a few moments, until dissolved. A child could do it. No cooking needed. Or you can use corn syrup or liquid honey, instead of sugar syrup.

Then get 2½ ounces of Pinex from any druggist. This is a special compound of proven ingredients, in concentrated form, well-known for its prompt action on throat and bronchial membranes.

Put the Pinex into a pint bottle, and add your syrup. This makes a full pint of splendid medicine and you get about four times as much for your money. It never spoils, and tastes fine.

And for quick, blessed relief, it is amazing. You can feel it take hold in a way that means business. It loosens the phlegm, soothes the irritated membranes, and eases the soreness. Thus it makes breathing easy, and lets you sleep. Money refunded if not pleased in every way.

It's BALANCED... that's the difference

HULMAN AND COMPANY TERRE HAUTE INDIANA

SORETONE
soothes fast with
COLD HEAT* ACTION

In cases of
MUSCULAR LUMBAGO OR BACKACHE due to fatigue or exposure
MUSCULAR PAINS due to colds
SORE MUSCLES due to overwork
MINOR SPRAINS

Naturally a man looks old beyond his years when he's sore from lumbago or other muscle pains. The famous McKesson Laboratories developed Soretone Liniment for those cruel pains—due to exposure, strain, fatigue or over-exercise. Get the blessed relief of Soretone's *cold heat* action;—

1. *Quickly Soretone acts to enhance local circulation.*
2. *Check muscular cramps.*
3. *Help reduce local swelling.*
4. *Dilate surface capillary blood vessels.*

Soretone contains methyl salicylate, a most effective pain-relieving agent. There's only one Soretone—insist on it for Soretone results. 50¢. A big bottle, only $1.

MONEY BACK— IF SORETONE DOESN'T SATISFY

"and McKesson makes it"

*Though applied cold, rubefacient ingredients in Soretone act like heat to increase the superficial supply of blood to the area and induce the glowing sense of warmth.

EDITORIAL COMMENT

WAR VETERANS SUPPORT SCHOOL BILLS

"All of the twenty bills to be submitted to the Fifty-first General Assembly by the Iowa School Code Commission are endorsed and supported by the Iowa Department, Veterans of Foreign Wars," said Arthur S Buckner of Cedar Rapids, Department Commander, in stating the position of his organization on the vital school measures which will be passed upon by the legislature in 1945.

In explaining the reasons for his organization's support of the twenty bills, Commander Buckner said, "We owe many obligations to the members of the Armed Forces who are bringing the present world conflict to a successful conclusion. Our obligations extend to the dependents of the veterans of this World War.

"Public education is the birthright of every American citizen. We owe an obligation to the returning veteran that his children's birthright will be protected. We must assure him not only that public education will be guaranteed to his children, but that such public education will be adequate.

"The providing for the necessary funds to permit the returning veteran to complete his education is an obligation of the Federal government, and provision is made in such Congressional acts as the Servicemen's Readjustment Act of 1944.

"The providing for the necessary funds and facilities for the adequate education of the children of the returning veterans is the obligation of the state of Iowa State legislation such as proposed by the Iowa School Code Commission will discharge the obligation of the state.

"With the possibility of 300,000 veterans returning to Iowa, it is probable that during the next 20 years the great majority of school children in Iowa will be children of veterans. For this reason the veterans of Iowa are pledged to support the report of the Iowa School Code Commission."

IT'S AN HONOR, HE SAYS!

W. C. "Bill" Keraus had an unusual experience the other day.

In addition to his insurance business, Bill also helps people make out their income tax reports. The other day he received a telephone call from a farmer near Klemme who asked Bill for an appointment and said, "I want my name put on the honor roll."

Bill asked for an explanation and his client continued: "Well, it is this way, I consider in both an honor and a privilege to pay my income tax to Uncle Sam."

And that man should have a bouquet for his patriotic attitude toward the tax which gripes most of us.

HIGH POWERED HENS

Luther Schmidt our "town farmer" in the north part of Klemme, was in The Times office the other day on business and the conversation turned to poultry.

We learned that Luther is a good poultryman as well as a stockman. Mr. and Mrs. Schmidt have a flock of 225 white leghorns. (And by the way they are products from our own Swansons Hatchery right here in Klemme) During the month of December Luther's flock averaged 168 eggs per day, a per centage of 75, which is mighty good in anybody's flock.

We might add that Mr. and Mrs. Schmidt have done some improving and painting since they moved to their place and it looks mighty attractive.

A NEW TWIST TO AN OLD OLD STORY

You have all heard the old story that when a dog bites a man that is not news, but when a man bites a dog, that IS news. Well a promising young man was applying for a job on a big daily. The city editor was giving him the above old story to illustrate what was wanted of him in the way of getting a news story. He was instructed to go to a desk and write up a sample story for the approval of the editor. Here is what he came up with:

"FLASH! Fire Hydrant Bursts. Wet Dog!"

(He got the job.)

BOARD PROCEEDINGS

5TH ADJOURNED NOVEMBER MEETING

Garner, Iowa, December 30, 1944

The Hancock County, Iowa, Board of Supervisors met in session on above date with F J Schoun, John Chambers and Penn Eckels present

The minutes of the last meeting were read and approved as read

On motion and second the following quarterly and annual reports are approved Leslie M Brower, Sheriff Charles S Whitney County Superintendent, Elmer Raw, Clerk and Fred C Missal, County Auditor

Supervisor F J Schoun is appointed committee to investigate and cause repairs to be made in D. D. No 81 Main.

On motion and second the annual Financial report of the Hancock County Farm Bureau is approved

REGULAR JANUARY MEETING

Garner, Iowa, January 2, 1945

The Hancock County, Iowa, Board of Supervisors met in session on above date with F. J. Schoun, Penn Eckels and John Chambers, present.

The Board proceeded to organize for the year 1945 by electing Penn Eckels of Britt, Iowa, Chairman.

The minutes of the last meeting were read and approved as read.

On motion and second the combination Messenger and Robbery Policy No. 70-064883 is approved.

On motion and second the following appointments are approved: Helen Patrick, Deputy Recorder; Dolores Lenz, and Veletta Jurgenson, Deputy Treasurers; Elmer A. Katter, Deputy Sheriff; Irene Holck, Deputy Clerk of the District Court; Myrtle White and Marian Weiland, Deputy Auditors.

On motion and second the following reports are approved: R. J. Fritsch, H. H. Mullin, John D. Welsh, Justices of the Peace and Fern Peck Katter, County Recorder.

On motion and second the official bonds of R. J. Fritsch and John D. Welsh, Justices of the Peace are approved.

On motion and second the committee to count the cash in the various offices of the Hancock County Courthouse at the close of business on December 30, A. D., 1944, is approved.

Your committee appointed by your honorable body to count the cash in the offices of the County Recorder, Clerk of District Court, Hancock County Sheriff, County Superintendent, County Auditor and County Treasurer, begs leave to report that I did on the 30th day of December, 1944, A. D., as directed, discharge my duties and find the following:

County Recorder	None
Clerk of District Court	None
Hancock County Sheriff	None
County Superintendent	None
County Auditor	None
County Treasurer	$1,019.36

On motion and second Charles F. Merten is appointed Engineer to investigate the feasibility and necessity of establishing a drainage district in Section 10-14 and 15 in Liberty Township, Hancock County, Iowa, petitioned for by John Goll et al.

On motion and second F. J. Schoun Penn Eckels and Mrs. Paul Elling are appointed as the Hancock County Board of Social Welfare for the year 1945.

The County Auditor be and he is hereby ordered to certify the personnel of said Board to the State Board of Social Welfare in Des Moines.

WHEREAS, Hancock County, Iowa, di transfer $1000 from the Domestic Animal Fund to the General County Fund on August 24, 1942, (Transfer Wt. No. 1283) and

WHEREAS, the funds in the Domestic Animal Fund are now insufficient to pay claims for Domestic Animals and fowl killed by dogs in 1944.

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, that a transfer of $1000 be made from the General County Fund to the Domestic Animal Fund of Hancock County, Iowa, as provided for in section 5457, Code of Iowa, 1939, and laws amendatory hereto

On motion and second the sum of $256 25 is hereby appropriated for aid to the blind and the sum of $4,428 25 for aid to Dependent Children, said appropriations are made from the Poor Fund of Hancock County and are made for the year ending December 31, 1945.

On motion and second the real estate tax of all recipients of Old Age Assistance are hereby suspended for the year 1944, all as provided for by law.

WHEREAS, the Hancock County, Iowa Farm Bureau has requested the Board of Supervisors of Hancock County, Iowa, to appropriate the sum of $3000 to the Hancock County Farm Bureau for the year 1945, and

WHEREAS, the certificate of membership of the Hancock County Farm Bureau and Financial Report have been filed as by law directed and said Hancock County Farm Bureau has qualified for such appropriation under section 2930, Code of Iowa, 1939, and laws amendatory thereto.

BE IT THEREFORE RESOLVED by the Board of Supervisors of Hancock County Iowa, that there be and is hereby appropriated the sum of $3000 00 from the General Fund of Hancock County, Iowa, to the Hancock County Farm Bureau for the year 1945, to be paid in four equal installments of $750 00 each on February 1, April 1 July 1, and October 1 1945

The County Auditor be and he is hereby directed to draw warrants on the General County Fund in payment of said appropriation to the Hancock County Farm Bureau all in accordance with and as directed by Chapter 138, Code of Iowa 1939 and law amendatory thereto.

The foregoing resolution was offered and read by Supervisor Schoun who moved it adoption, was seconded by Supervisor Chambers whereupon the Chairman placed the motion of its adoption and upon roll call the vote thereon is F J Schoun Penn Eckels and John Chambers, ayes, Nays non

BE IT RESOLVED, that the sum of $150 00 be appropriated from the General County Fund of Hancock County and credited to the Teachers' Institute Fund of said County and the Auditor be and he is hereby ordered to issue a transfer warrant ordering the Treasurer to transfer $150 00 from the General County Fund to the Teachers Institute Fund of Hancock County, Iowa All in accordance with section 4118 5, Code of Iowa, 1939.

In the matter of the depositories for the year 1945 for the various county offices,

BE AND IT IS HEREBY RESOLVED that the following named banks be named as depositories for the ensuing year for the following named officers in the sums set opposite each name:

Hancock County Roads	
Total Acres	

To All Lienholders and Encumbrances of Record And To Whom It May Concern:

You and each of you are hereby notified that on August ... there was filed a petition by John H. Lauen et al asking that a ... hereafter known and hereinafter referred to as Drainage ... Hancock County, Iowa, be established and constructed in section ... 27, Township 94, Range 23, West of the 5th P. M.

You are further notified that Wm. Henschen was appointed ... August 3, A. D 1944, to make a survey and report on the ... establishing and constructing a new drainage district as ... John H. Lauen et al and that Wm Henschen did on December ... file his report and recommends the establishment and construct... ed.

Said report is now on file in the office of the County ... be amended at any time before final action is taken thereon ... Supervisors of Hancock County, Iowa, and the 19th day of ... 1945, at the hour of 10:30 o'clock A. M. is the date set for ... Said hearing to be held at the Court House in Garner, Iowa.

All objections to such establishment and construction of ... as petitioned for by John H. Lauen et al, and as recommended ... the engineer and all claim for damages must be in writing and ... in the office of the County Auditor at or before the hour ... thereon.

The foregoing notice is published by order of the Board ... of Hancock County, Iowa, in accordance with sections 7440 and ... Iowa, 1939, and laws amendatory thereto.

Please take notice and govern yourselves accordingly. ... at your own peril.

Witness my hand and seal this 10th day of January, A. ...

(S E A L)

FRED C. ...

(Publish January 17 - 24, 1945.)

COUNCIL PROCEEDINGS

Klemme, Iowa, December 11, 1944

Regular meeting called to order by Mayor J. E. Stille, with four members of the Council present.

Minutes of the previous meeting were read and approved.

On motion the following bills were allowed:

Geo. Buseman, Nov. Salary	$ 100 00
Central States Electric Company, Power and Light	86 68
Klemme Times, Publishing and Supplies	15 31
Fire Company, Keraus Fire	5 00
Hancock County Cooperative Oil Co., Gasoline	12.7½
Verner Priebe, Posts	3 90
Northern Lumber Co., Supplies and Repairs	7.35

On motion meeting adjourned

A. J. KUDJE, Clerk.

Long Slide

Sports enthusiasts of Ventura have built 90-foot toboggan slide, with a long run onto the lake. Steps have been built for climbing the hill. A large skating rink was made by scraping the ice and a warming house moved in. The project was promoted by the community and everyone invited to participate.

There are more species of minerals found in North Carolina than in any other state.

The atomis weight of radium is 226.

SCHOOL NEWS

JUNIOR HIGH SCHOOL NEWS

Mrs. Smith, Teacher

The Eighth Grade is proud of the rating "Excellent" received on the last Self-Testing Aritmetic Drill written this week. This is the highest rating shown on the Class Progress Charts thus far.

Only three people in the room have been neither absent nor tardy the first semester. They are:

Jerry Finders
Marjorie Lau
Alice Meyers.

FIFTH AND SIXTH GRADE NEWS ITEMS

Mrs. Voetberg, Teacher

On Wednesday of last week we took the State Tests. Thursday and Friday we took some tests over material of the first semester's work.

Friday marked the end of the first semester. We've all resolved to do better work the second semester.

The following were neither absent or tardy this past six weeks in the Fifth Grade:

Janice Carpenter
Richard Tiggerman.

The following were neither absent or tardy this past six weeks in the Sixth Grade:

Sondra Bridges
Jo Ann Carpenter
Dolores Karsjens
Charlotte Nuehring
Beverly Pringnitz

Janice Carpenter, Richard Tiggerman were neither absent or tardy the first semester.

Jo Ann Carpenter and Beverly Pringnitz were neither absent or tardy the first semester.

THIRD AND FOURTH GRADE NEWS NOTES

Miss Holmes, Teacher

On Wednesday of this week the Fifth Grade came into our room and we spent the day writing tests. The tests were the "Iowa Every Pupil Tests," which are taken by boys and girls throughout the entire state.

There were several persons who were neither absent nor tardy during the third six weeks period. They are:

Ronald Karsjens
Sharon Bridges
Neva Ann Anderson
Lu Verne Heginger.

We had one boy in the Third and Fourth Grade room who was neither absent nor tardy all semester. He is Lu Verne Heginger.

KINDERGARTEN, FIRST AND SECOND GRADE NEWS

Miss Bugh, Teacher

The following children were neither absent or tardy during this six weeks period:

Berleen Bridges
Janice Stokesbary
Eva Thiemann
Shirley Barz
Jimmy Karsjens
George Anderson
Graydon Barz
Lyle Heginger
Carole Montgomery
Merlyn Olson
Donald Thiemann.

THE TIMES PRINT SHOP

Ships Are Patterned in Gigantic Mold Lofts

In one of the world's largest mold lofts, the 150 men shipbuilders who work there are almost invisible. The premises are tremendous, stretching 765 feet and 185 feet in breadth, bigger than two football fields end to end. Without the mold loft, the productive capacity of 25,000 shipyard workers would be halted.

The mold loft is the place where the structural parts of a ship are made in paper or wood, for duplication elsewhere in steel or some other metal.

This mold loft is so large that at one time, seven different types of ships, ranging from an aircraft carrier to an LST were simultaneously being layed-out on its floor.

There are few counterparts in industry to the mold loft. In clothing manufacture and dressmaking establishments, patterns of the designs are made and then placed on top of the materials which are marked for trimming. In a few aircraft plants, a modified mold loft is used when a new model is being planned. Steel buildings and bridges are also lofted somewhat similarly. Otherwise, the shipyard mold loft is distinctly maritime as to its functional characteristics.

Devise Spike Bombs to Rip Jap Rail Lines

"Spike" bombs, improvised in Burma to meet a critical situation, are being used with success to destroy Japanese-held railroads and bridges in the Burma sector, the war department reported.

Ordinary 100-pound bombs with delayed action fuses would not always remain squarely between the tracks, but had a tendency to ricochet and explode harmlessly a few feet away. Yet delayed action bombs were necessary in order to allow the low-flying planes time to get away from the blast.

The necessity to make bombs stick where they landed led to development of spike bombs. They were built by taking out the nose fuse of each bomb and putting in its place a spike made of an old axle with one end threaded to screw into the missile and the other sharpened to a point.

The B-25s and B-24s flew low, dropped the spike bombs and they stuck. Seconds later there was an explosion and jagged, twisted steel was all that remained of the track at the point of explosion of each bomb for six to ten feet.

Keep Fats Cool

All fats should be kept cool, covered and in light-proof containers, for heat, light and air tend to make fats rancid.

Pure fats, such as well-rendered lard, lard compounds and the vegetable fats and oils, can be kept for long periods, provided these simple precautions are taken. Mold on the surface of these fats indicates the presence of moisture. The mold should be removed carefully to avoid scattering the spores and the fat heated, if possible, in order to drive off the moisture.

Meat drippings, the fat skimmed from soup stock, bacon fryings, and butter are not pure fats, but contain bits of meat, meat juices, buttermilk, or other substances rich in protein which tend to decompose rapidly and ruin the flavor of the material. Such fats should be used up as promptly as possible; but if a large quantity does accumulate, it may be clarified by heating with an equal quantity of water at a moderate temperature for a short time and straining, while hot.

Harbor Parasites

Meat sometimes harbors animal parasites, such as the tapeworm and trichina. The microscopic larvae of these parasites are embedded in the lean meat, awaiting opportunity to complete their development in the human body or some other favorable environment. Rigid inspection by Federal or other official inspectors at packing plants has done much to exclude infested carcasses from the market, but the danger is still to be reckoned with, especially in uninspected, home-dressed meat. In any case, thorough cooking of the meat is the real safeguard. Even the popular rare roast beef should be cooked until the color has changed from purplish to a bright red. The vitality of these parasites is not destroyed by preservatives, such as salt and smoke, and there is great risk in eating uncooked sausages and similar meat preparations, even though they have been smoked.

Farm Sales

The proportion of sales made by owner operators and retired farmers continued to increase but sales by credit agencies again declined in the year ended last March. Somewhat over two-fifths of all sales were made by farmers, compared with a ratio just under two-fifths the previous year, and one-third for the 12 months ended in March, 1942. The proportion of sales by retired farmers also increased, whereas sales by credit agencies declined from almost one-third two years ago to one-sixth during the year ended last March. Sales by owner operators varied from almost two-thirds of all sales in the East South Central states down to about one-fourth in the West North Central states, which is the only geographic division in which sales by credit agencies still appear to be significant.

List Highlights in 1944 Tax Legislation

Highlights of the 1944 tax legislation, according to a report by the federation of tax administrators, include: Mississippi's 10 per cent "black market" tax, applicable primarily to alcohol beverages; reenactment by Louisiana of its 1 per cent sales tax on a permanent basis; the repeal by New York, New Jersey and Virginia of exemptions formerly granted federal property which is not exempted from state taxation under federal law. Also the Kentucky enactment making rural electric cooperatives subject to ad valorem and franchise taxes, and the Mississippi property tax exemption for slaughter houses and curing plants. The increase in Rhode Island on gross earnings of electrical plants and distributors by an additional tax amounting to one-fourth the tax collected under the old 2 per cent rate. This additional tax does not apply to gross earnings resulting from production of gas.

Taxation affecting servicemen: during their 1944 legislative sessions, 11 states thus far have enacted legislation concerning special privileges for servicemen with regard to income taxes, property taxes, poll taxes and various license fees.

Approximately 8 million tons of food are now stockpiled throughout Europe.

Styrene is widely used in the manufacture of plastics.

HINT FOR HOME BAKERS

New Quick Roll Recipe-Easy and Good!

Make them with Fleischmann's yellow label Yeast—the only yeast with those EXTRA vitamins

QUICK ROLLS

½ cup milk
2 tablespoons sugar
1½ teaspoons salt
1 cake Fleischmann's Yeast
½ cup lukewarm water
3 cups sifted flour
3 tablespoons melted shortening

Scald milk, add sugar and salt; cool to lukewarm. Dissolve yeast in lukewarm water—and be sure it's Fleischmann's *yellow label*, the only fresh yeast with all those extra vitamins. Add to lukewarm milk. Add 1½ cups flour and beat until perfectly smooth. Add melted shortening and remaining flour, or enough to make an easily handled dough. Knead well. Shape into rolls and place in well-greased pan. Cover and let rise in warm place, free from draft, until doubled in bulk (about 1 hour). Bake in moderate oven at 400°F. about 20 minutes. Makes 12.

FREE! New Revised Wartime Edition of Fleischmann's Famous Recipe Book!

Clip and paste on a penny post card for your free copy of Fleischmann's newly revised "The Bread Basket." Dozens of easy recipes for breads, rolls, desserts. Address Standard Brands Incorporated, Grand Central Annex, Box 477, New York 17, N. Y.

WEEKLY NEWS ANALYSIS

Yanks Strike Back at Germans; Move to Step Up War Effort; National Income Sets Record

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

Taken from roll of captured German film, picture shows American prisoners being taken to rear as German drive roared through Belgium.

EUROPE:
Patton to Rescue

On the western front, it was big, blustery Lieut. Gen. George S. Patton to the rescue, as U. S. forces smashed into the flanks of the Germans' great drive into Belgium and Luxembourg and compelled Von Rundstedt to divert strength toward meeting the threat to his whole position.

Gen. Patton

Called upon to thwart the German drive shortly after it got underway, General Patton, then attacking in the Saar basin, pulled up his offensive in that area and shot major forces to the north to rip into the lower wing of Von Rundstedt's offensive. Charging over the snow-capped Ardennes hills on a 35-mile front, General Patton's Third army soon bit deep wedges into the enemy's lines, forcing diversion of his strength from advanced spearheads within four miles of the Meuse.

While General Patton attacked from the south, Lieut. Gen. Courtney Hodges' First army smashed at the northern flank of the German bulge, reducing the enemy threat to important supply lines around Liege. Faced with these strong twin U. S. thrusts, Von Rundstedt concentrated the bulk of his strength in the center of his bulge, meanwhile probing Allied lines behind the First and Third armies for a blow at their rears.

Intelligence Slips

Knocked out of complacency by the great Nazi winter drive, Allied quarters cast about for the reason of the setback, with opinion general that the fault lay in an underestimation of German military strength and failure to detect substantial Nazi troop movements.

Although Allied chieftains expected a German attack, they felt that the enemy needed more time to reassemble his shattered forces, and they also overlooked the Ardennes forest as a possible ground for Nazi operations because of the rough character of the terrain.

Biggest slip, however, occurred in the Allied intelligence department's failure to observe Von Rundstedt's massing of 200,000 men in the Ardennes sector, an operation which ex-U. S. Chief of Staff of World War I, Gen. Peyton C. March, likened to the movement of the population of Richmond, Va., toward Washington, D. C., without our knowing anything about it.

Lucky Winnie

Having come to Greece to untangle the knotty political problem in that embattled country standing athwart Britain's Mediterranean life line, Prime Minister Winston Churchill twice cheated death in Athens within a week.

First, caches of explosives were found in a sewer below Britain's headquarters where Churchill was expected to visit, and then a sniper's bullet whistled past the prime minister and struck a woman 300 yards away as he was entering the British embassy.

That Lucky Winnie's presence in Athens served to force a settlement of the Greek political crisis was seen in the report that the radical and conservative elements had agreed upon the formation of a mixed council to rule the country in behalf of the king.

MEAT PRODUCTION

Despite the fact that both producer and packer had to overcome many wartime obstacles, the industry turned out a record output of 25 billion pounds in 1944, Chairman T. Henry Foster of the American Meat institute declared in a year-end report.

Citing U. S. department of agriculture estimates, Foster said the total number of dressed animals for the year included 96,600,000 hogs, 24,300,000 sheep and lambs, 19,700,000 cattle and 14,200,000 calves.

NATIONAL INCOME:
Record Level

With wartime economic activity reaching its peak early in the year, the total of goods and services produced and income received in 1944 set all-time records, the U. S. department of commerce reported. At the same time, the department stated that activity in 1945 can be expected to level off.

Value of goods and services of 1944 approximated 197 billion dollars compared with 88.6 billion dollars in 1939, the department said, while income received by individuals for crops, wages, salaries, dividends, interest, social security and military dependency reached 155 billion dollars against 70.8 billion in 1939. Farm income alone totaled over 20 billion dollars.

Of 197 billion dollars in goods and services produced in 1944—85 billion dollars were for war; 96.6 billion dollars for consumer spending; 13 billion dollars for governmental non-war spending, and 2.6 billion dollars for industrial investments.

HOME FRONT:
Pull in Belt

With the war bringing new demands upon the nation, the government moved for fullest utilization of both manpower and resources.

War Mobilization Director James F. Byrnes appealed to the country's 80 race tracks to suspend operations in 1945, thus making their 40,000 employees available in the labor pool, and also answering complaints that absenteeism was being caused by workers from nearby plants patronizing the sport.

In a move designed to make most efficient use of labor, the War Production board announced that it would withhold priorities or allocations of material from plants found guilty of violating War Manpower commission regulations governing employment ceilings or hiring of help.

With civilian supplies of many food items reported at the lowest point since the war began, OPA reestablished rationing on utility beef, better cuts of veal, bacon, pork shoulders, spareribs, beef and veal liver and meats in tin and glass, and also on such canned vegetables as peas, corn, green and wax beans, asparagus and spinach. In addition, individual sugar allowances of five pounds were extended to three months, and point value of butter was raised from 20 to 24 per pound.

PACIFIC:
Philippine Battleground

Though Leyte and Samar island have been lost, and U. S. troops speeded conquest of Mindoro, the Japanese indicated their determination to fight to the last ditch in the Philippines and make the gangling archipelago the battleground of decision in the Pacific.

Even as War Minister Sugiyama urged that the issue be decided in the Philippines, B-29 Super-Fortresses roared over Tokyo, smashing aircraft factories, refineries and docks, and continuing their sustained drive to seriously impair the delivery of war material to enemy forces in the field.

No less than 112,000 Japanese were killed in the 67-day U. S. conquest of Leyte, featured by a climactic north, south and east pincer squeeze on the enemy after he was cornered on the northwestern tip of the island.

MISCELLANY

With a heavy demand for new tubes and sets and television and frequency modulation receivers expected in the postwar period, the radio industry looks to the employment of at least 145,000 persons compared with the prewar total of 86,173. Of this about 60 per cent of the workers would be women, it was estimated.

MONTGOMERY WARD:
U. S. in Again

The government's second seizure of Montgomery Ward, unlike the first, headed for settlement in court as the U. S. again took over the huge corporation on charges that its disrespect of War Labor board orders threatened vital war production.

With the legality of the second seizure scheduled for judicial review, the government contended that Montgomery Ward's importance in the war effort was attested by its sale of farm machinery and supplies and manufacture of military products, while the company replied its major operations did not directly affect the war and it would be unconstitutional to accept the War Labor board's order for a closed shop denying individual workers the right to decide on joining a union.

In filing suit in court for affirmation of its right to take over Montgomery Ward, the government declared that the company's persistent refusals to abide by War Labor board settlements led other parties to defy WLB directives and threatened a wave of strikes and lockouts.

LABOR:
Stay in Unions

Apparently sold on the strength of organization in the achievement of better working conditions, the great majority of union people have retained their membership when given the chance to quit, the U. S. bureau of labor statistics reported.

Covering 21 plants and 75,000 union members, the BLS discovered that only 395 of these workers, or less than 1 per cent, withdrew from labor organizations during the 15-day period allowed for such action before maintenance of membership contracts went into effect.

Industries covered by the BLS study included shipbuilding and ship repair, textile, radio, auto parts, chemical, electrical machinery, steel products, transportation equipment, and tobacco.

Postwar Projects

With wartime income remaining substantial, and projects postponed because of manpower and material shortages, many states are accumulating huge balances to be used in the postwar period, when their expenditure should help bolster the economy.

Although far from possessing the biggest surplus, Oregon, with $61,535,000 available, already has completed $190,000,000 of postwar construction plans, far more than any other state. Although possessing the largest of all balances at $344,000,000, Oklahoma has only $114,000,000 of projects in the ready to go stage.

Other states with big surpluses and the dollar value of completed postwar construction plans include California with $195,000,000 balance and $75,000,000 projects; New York with $163,000,000 and $65,400,000; Pennyslvania with $150,000,000 and $25,000,000, and Illinois with $100,000,000 and $10,000,000.

WAR RELIEF:
Buy Clothes

In the largest purchase so far undertaken for the United Nations Relief and Rehabilitation administration, the U. S. treasury will buy $15,000,000 worth of outmoded but warm and durable clothing.

In making the purchase, a treasury official said, the government hopes to obtain the major share of the clothing from manufacturers' and dealers' old stocks, and to speed up the procurement, it appealed to these businessmen to take a rapid inventory of such supplies.

With 170,000,000 people looking to UNRRA for relief, a treasury spokesman said, the present purchase program is but a drop in the bucket.

STEEL:
Peak Output

Hitting its peak in March before gradually leveling off, U. S. steel production for 1944 reached a record 89,400,000 tons of ingots and castings, 80 per cent over maximum output in World War I and 1½ times over Axis Europe's probable turn-out last year.

Because of the industry's heavy output during the first part of the year, it was able to top 1943 production by 600,000 tons. Output in the last part of the year dropped more than 600,000 tons over the same period in 1943.

"Despite higher production, earnings, after taxes, for 1944 probably will approximate 170 million dollars, compared with 201 million in 1943," a spokesman for the industry said.

GI PLANS

One enlisted man out of every eight plans, on being discharged from the army, to operate a business or farm of his own, according to a survey.

Seven per cent of the men now in the army have definite plans for operating a business, 5 per cent plan to operate farms. For the most part they are interested primarily in relatively small enterprises, with half of those having definite plans saying they will invest $4,000 or less.

Ernie Pyle's Slant on the War:

Rode Between Nazi Tanks In a Jeep to Safety

One of the First Times in History American Troops Retreat

By Ernie Pyle

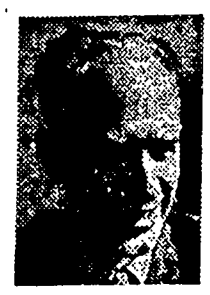
(Editor's Note): This dispatch was written and first published when Pyle was with the GIs at the Tunisian front. He is now on his way to cover the boys in the Pacific war zones.

THE TUNISIAN FRONT.—Capt. Jed Dailey of Sharon, Mass., got back safely in his jeep after the German break-through out of Faid Pass. But he had a horrible time.

He was beating it to the rear across the desert, along with the rest of the command post's personnel, when suddenly he saw a Mark Four tank staring him in the face not a hundred yards away.

The tank was stopped, the crew had the turret door open, and a German was just standing there, looking at Captain Dailey as cold as ice. It was enough to give you the creeps.

Jed swung the jeep around—and there was another Mark Four staring at him. He kept turning and dodging, but everywhere he could go he would be looking smack at the front end of a Mark Four. They just seemed to appear from nowhere, and there they'd be suddenly, until he felt like a mouse trying to get out of a room full of silent cats.



Ernie Pyle

Finally Jed did the only thing left to do. He took his heart in his hand and drove right between two German tanks, with their crews sitting there at the guns and looking at him as he passed 50 yards away.

They didn't shoot, and he doesn't know to this day why they didn't.

Then he stepped on that jeep and went soaring across the desert, flying over irrigation ditches you'd normally cross in low gear. German artillery got after him. They dropped an 88 on his right, and then one on his left, and then one in front of him. They had him pocketed.

When artillery does that, the next shot always gets you. But they never fired a fourth shell. He has no idea why. It was just kind of like a miracle.

Things like that went on all afternoon. Finally it got dark, and a sort of safety came. But it wasn't complete safety, for German patrols were out scouring the desert for stragglers.

Jed finally got away by driving the jeep straight up over the top of a mountain and down the other side. He just missed driving over several sheer cliffs. From now on he hates Germans.

Lost Razor Blades.

Most of the men who survived the German's surprise break-through on the first day of the Sbeitla battle lost everything they had. Major "Satch" Elkins of College Station, Texas, came out with only the clothes on his back. But he resented most losing 300 razor blades to the Germans.

Captain Dailey swears he will get the German who is now sleeping in his bedroll. One soldier was sore as a hornet because the day before he gathered up his inertia and accomplished the nasty job of writing six long overdue letters home. Now the Germans have them, and he has that writing job to do all over.

Again, Jed Dailey lost his camera and a dozen rolls of film he had been taking for months. One of them was a foolish picture, such as the soberest of adults sometimes indulges in. He had picked some desert flowers, stuck them behind his ears, and posed for the camera making a silly face.

"The Germans will develop those films for what information they can get," he says. "And when they come to the one of an American officer with flowers behind his ears, they'll probably tell Goebbels to put it out on the radio that Americans are sissies."

One soldier told me his most vivid impression of the afternoon was seeing 10 brand new tires burning up on the wheels of a huge American truck.

"With rubber so short at home, and tires rationed," he said, "it seemed awful to see those brand new ones burning."

Another soldier said, "You damn fools, here's the sky full of planes, and the country full of tanks, and 88s dropping all around you, and you're worrying about tires!"

* * *

Lieut. Col. George Sutherlin of Shreveport, La., and Lieut. Robert Simons Jr., of Columbus, Ohio, walked 29 miles across the desert that night. They had a compass, and it saved them.

We had been talking about them while they were missing.

"George will show up," one officer said. "I'll bet any amount of money on it. Germans will turn him loose after two days, to get rid of him before he talks them to death." And show up he did.

He and Junior Simons say they consider the compass the most valuable piece of equipment the army issues. They had one horrible experience that night. An Arab they encountered in the desert ran them almost into the hands of a German patrol. They escaped only by lying deathly still, hardly breathing, for an hour, while the Germans hunted within a few yards of them. But another Arab balanced the account by getting out of bed to give them drinking water.

They were so thirsty that they didn't take time to purify it with the pills they carried, but at this writing they are still feeling fine.

* * *

Majestic Withdrawal.

The withdrawal of our American forces from the vast Sbeitla valley, back through Kasserine pass, was a majestic thing in a way. It started before dawn one morning, and continued without a break for 24 hours.

It had no earmarks of a retreat whatever, it was carried out so calmly and methodically. It differed in no way, except size, from the normal daily convoys of troops and supplies.

I left Sbeitla in the middle of it. Vehicles were so well spaced, it was not difficult to pass them on the wide gravel road. And, since I was not required to keep line, I could go forward and back to get a good view of the entire movement.

Our planes were in the air almost constantly that day.

So far as I have heard, the Germans did not do a single road-strafing job on our withdrawing columns. They missed a magnificent opportunity. Why they didn't try is still a mystery to me.

First, before daylight, came the kitchen trucks and engineers to prepare things ahead. Then came rolling guns, and some infantry to set up protection along the roads. Then the great vast bulk of long supply trains, field hospitals, command posts, ammunition wagons, infantry, artillery, and finally — when night came again—the tanks started and moved on until the next dawn.

The whole thing was completely motorized. Nobody was walking.

It was hard to realize, when you were part of it, that this was a retreat that American forces in large numbers were retreating in foreign battle one of the few times in our history.

We couldn't help feel a slight sense of humiliation. Yet, while it was happening, that humiliation was somewhat overcome by our pride in the orderliness and accomplishment.

It simply could not have been done better. Military police patrolled the road with jeeps and motorcycles to see that there was no passing, no traffic jams, no loitering.

Not many of our American trucks broke down; and those that did were immediately taken in tow. There were almost no accidents.

* * *

The withdrawal from Feriana and Thelepte airdrome was separate, and smaller than ours. They were evacuated in the dawn hours. Ammunition dumps were set off, and all gasoline that could not be moved was set ablaze.

Planes that took off that morning on dawn missions did not return to the field but landed elsewhere. All planes that could not get off the ground, because of minor damage or needed repair, were burned.

There never was anything built above ground at Thelepte, because the field had to take too much bombing.

Refugees Delayed Retreat

There were French civilian refugees on our road, but not enough to hinder traffic. Most of them walked, carrying brown suitcases and bundles. I noticed they did not carry much, so they apparently had faith in our coming back.

There were few Arabs among them. The Arabs are permanent. They get along, whoever comes to take charge of their country.

French artillery and infantry also were withdrawing. They did hinder traffic, after we were safely back at Kasserine pass and the road grew narrow and poor.

We well knew the French were the best fighters in the world. But this delaying stream of high-wheeled carts, toiling along so last-century-like, seemed symbolic of France's whole disaster

DOAN'S P...

Students of 'Foxhole University' Do Homework Between Battles

Million Servicemen Continue Education By Correspondence

ew months ago an Ameri- doughboy lay concealed in dvance scout post among 's hills, walkie-talkie ped to his chest and strain- very faculty to catch any l from the Germans just the crest of the rise.

ddenly he heard a guttural , speaking authoritatively rman. The Yank frowned ncentration, trying to catch y words. Fortunately, he been studying German in hole University'' in his time, and the knowledge he had already gained ed sufficient.

pping open the circuit of his -talkie he raised his own com- post in the rear, and warned: 're going to move behind the the right,'' and send a few o the left as a feint. Watch r tricks.''

had understood the German correctly. American gunners d the feinting movement, fired the flanking maneuver had almost completed, and prac- annihilated the enemy com-

time the soldier's German s paid a timely dividend, but not unusual as Foxhole Uni- 's courses frequently improve udent's military efficiency at me time that they improve ances of success upon his re- civilian life.

nded early in 1942, "Foxhole rsity," formally known as the States Armed Forces Insti- s now the world's largest edu- al institution. In November, approximately 1,000,000 men omen in uniform were study- lividually in correspondence of aching courses or in groups in organized classes.

Far-Flung Student Body.

rever Americans are stationed hout the world, men and n of the army, navy, coast and marine corps are study- bjects ranging from econom- engineering or from Spanish iology. And the students them- are just about as varied as rriculum.

instance, there's Pvt. Arnold r, an Eskimo member of the Supply Squadron, who is based the Arctic circle. In his off- ours he is studying USAFI's ntary English course.

rporal in a medical battalion, m H. Lindley had completed years pre-medical study at In- University when he entered rmy. After completing his basic training, he enrolled h USAFI in an extension given by Indiana University. accumulating credits toward . D. degree.

atore J. Ezzo, Philadelphia, gh school before he had com- his senior year. A sergeant fuel control office at an air Ezzo became the first soldier North African, Italian or Mid- ast theaters of war to obtain school diploma for in-service ng.

cely a month after Americans established a beachhead on inville in the South Pacific, the island was still under con-

Perched on the hood of his jeep, Sergeant Hoffman employs a few spare minutes to study during a lull in firing on the camp rifle range, somewhere in the Middle East.

tinuous bombing, strafing and shelling, T/Sergt. Donald N. Roberts, Coshocton, Ohio, a machine gunner, completed and sent in to USAFI another in his series of automobile mechanics lessons.

Spanish Class on Bougainville.

Bougainville is considered one of the wettest islands in the world, with 11 feet of rainfall a year. Despite weather conditions, another soldier, T/Sergt. John Alcorn of San Francisco, conducted nightly Spanish lessons for his mates under the USAFI group study plan. He also studied Japanese by himself.

Because he had missed elementary physics 10 years before while in high school, Pvt. Richard E. Gunnerson, Kansas City, Mo., stationed in North Africa with an operations office attached to an engineer unit, studied USAFI's elementary physics course.

While in a North African battle area, S/Sergt. Donald L. Clement continued his bookkeeping lessons. Returning his papers for correction to USAFI he wrote: "Red ink has not been used on these bookkeeping lessons, as I do not have any available and the local foxhole does not carry it in stock."

From Anzio beachhead, when American forces were pinned down for months, an infantryman wrote of his USAFI course: "It's funny but I can concentrate best when I'm driven into my hole by artillery fire and have to stay there for hours. I keep my books and a typewriter in the hole and just start studying when the shelling begins."

Nearly Three Years Old.

Established in April, 1942, as the Army Institute, to give Army enlisted personnel a chance to continue study that the war had interrupted, to aid them with their military duties, and by adding to their education, improve their citizenship, USAFI's services were extended to Navy, Marine Corps and Coast Guard personnel in September, 1942. The following February the name was changed to United States Armed Forces Institute.

An official Army and Navy school, its headquarters a former mail-order company store overlooking the Wisconsin capitol at Madison, USAFI is operated by the War Department (Information - Education Division, Army Service Forces) with the cooperation of the Navy Department (Educational Services Section, Bureau of Navy Personnel).

At first USAFI offered only correspondence courses. Now, however, self-teaching courses and off-duty classes have been added. Self-teaching study and off-duty group studies have been particularly feasible for soldiers stationed in all sorts of places, sometimes near and inside battle areas.

USAFI now offers a complete academic program in high school, technical and college subjects. More than 250 subjects may be studied through the institute's own correspondence classes. Hundreds of similar subjects may be studied in extension courses offered by the 85 colleges and universities, located in more than 40 states, as well as Hawaii and Canada, which cooperate with the institute.

In November, 1944, nearly 400,000 men and women were enrolled in correspondence courses, some working for high school diplomas, others taking technical subjects to perfect skills or increase their knowledge, others picking up university credits that would lead to degrees. Approximately 600,000 were enrolled for self-teaching or off-duty classes.

Enrolled with USAFI in September, 1944, among the thousands of others, were: 311 members of the armed forces who had left school before completing the sixth grade; 35 with PhD degrees; 26,573 high school graduates; 2,211 with bachelor's degrees; 191 with master's degrees.

Corporal Schwarz gazes proudly on her certificate, proclaiming that she has completed the course in Arabic with distinction.

Follows Its Students.

USAFI has kept pace geographically with its students and there are now nine overseas branches in operation. The first branch was established in Hawaii in the fall of 1942. Others were opened in rapid succession in England, New Caledonia, Alaska, Egypt, Australia, India, North Africa (now located in Italy), and Panama.

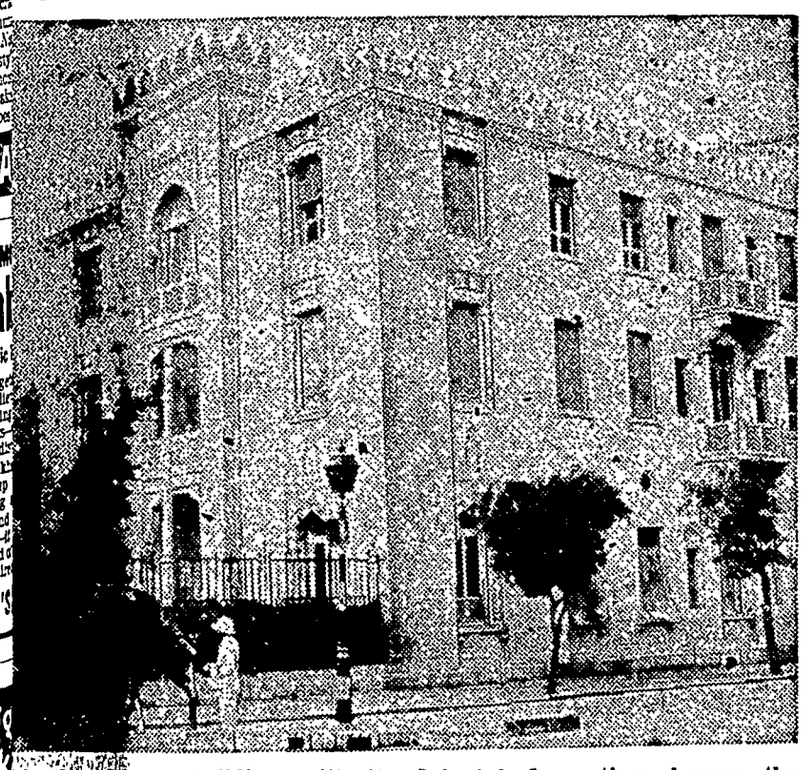
One fee, $2, enrolls any member of the armed services (except Army officers who pay the entire cost of any USAFI course or examination they require) for any course or service offered by the Institute. As long as the student continues to "pass," he may continue to enroll for additional self-teaching and correspondence courses given by the Institute.

Except for commissioned and warrant officers, and flight officers of the Army, the Government will pay half the text and tuition fees up to $20 for each university correspondence course. Army officers must pay for their own courses.

Former musicians, salesmen, lawyers, farmers, mechanics, bike racers, clerks, engineers, chemists, professional basketball, football, and hockey players are taking USAFI courses. More than half of the students are stationed overseas. Every week USAFI ships 60,000 textbooks abroad, a freight-car load of learning.

"Now that all the Japs here are dead ones, and we are getting lights, I have started reviewing my lessons and will send No. 3 to you as soon as possible," wrote S/Sergt. Arthur Davis, with a weather squadron, stationed on a Pacific Island.

Corp. Edward A. Wittenhauer, granted an extension in the time allotted for his course, wrote: "I find it very difficult to keep my lessons up to date. I am at a bomber station in England. This should explain why I am so busy."



his handsome building with its Oriental decorations houses the e East branch of the USAFI in Cairo. Notice the camel in the ound, and the British policeman in white uniform and pith helmet.

urning Veterans Can Buy or Build New Homes With Federal Aid

one section of the "G.I. Bill hts" congress recognized that t the most fundamental hopes returning veteran will be for d home. It provides that the al Government, through the istrator of Veterans' Affairs, uarantee up to 50 per cent or ximum of $2,000 loans made to ns for the purchase, construc- repair or improvement of or for paying off over-due taxes or special assessments on homes owned by veterans.

Where a veteran on his own behalf secures a first mortgage on his home from a Federal agency or under Federal insurance, he also can borrow a down-payment through a second loan up to $2,000, fully guaranteed by the Federal Government. The law limits the interest rates which may be charged and requires repayment within 20 years.

A veteran can buy a home without having the ready money for a down payment, if he has a job or income which will enable him to repay his loan on easy terms over a long period of time. The bill also requires that the purchase price and repayment terms for homes financed under the act be reasonable, and that the properties be suitable for dwelling purposes.

It is estimated that about 1,400,000 married men in the armed services will need houses immediately after their return to civilian life.

IMPROVED UNIFORM INTERNATIONAL

SUNDAY SCHOOL Lesson

STANDARDS OF THE KINGDOM

LESSON TEXT—Matthew 5:3-10, 43-48.
GOLDEN TEXT—Blessed are they which are persecuted for righteousness' sake: for theirs is the kingdom of heaven.—Matthew 5:10.

A kingdom must have laws, and here we have the laws for Christ's kingdom—the kingdom of heaven—which He shall one day establish on this earth. In the Church we have the joy of living as loyal subjects of Christ, and hence these standards are for our counsel and guidance.

The verses of this greatest of all discourses are addressed to those who have actually taken Christ as King of their lives. These beatitudes are not a substitute for the gospel. They are not laws that the unbeliever can keep and thus be saved, for this would be uterly impossible. Only he who knows and has called upon the power and grace of God in Christ can qualify to walk as a citizen of Christ's kingdom.

We note two things in this wonderful and instructive passage from God's Word:

I. The Character of the Follower of Christ (vv. 3-10).

The eight characteristics of the Christian here presented are worthy of extended individual attention, but we can offer only brief suggestions. "Blessed are the poor in spirit" speaks of humility as a commendable quality. How contradictory the present-day philosophy, which calls for self-assertion and self-reliance. But Jesus was not mistaken. The way into the kingdom of heaven is not that of assertive self-sufficiency.

"Blessed are they that mourn." The world does not believe that statement. It shuns the house of mourning. It tries without avail to philosophize away the fact of sorrow. The Christian, on the other hand, feels with his fellow man and thus receives a blessing. One can really learn from sorrow.

I walked a mile with Pleasure;
She chattered all the way,
But left me none the wiser
For all she had to say.

I walked a mile with Sorrow,
And ne'er a word said she;
But, oh, the things I learned from her
When Sorrow walked with me.

"Blessed are the meek." Poverty of spirit comes when a man rightly sees himself, and has a sympathetic touch with sorrow. Then he "inherits the earth," because he truly comes to enjoy it as a place of service and Christian growth, and not because he has a deed to a single foot of its soil.

"It is the hunger and thirst for righteousness (v. 6), and not the possession of it, that is blessed" (Plummer). Self-satisfied people know nothing of the glory of having their hunger and thirst satisfied by God.

We have here also the Christian's spirit of mercy which invites divine mercy; a purity of heart, cleanness of mind, and sincerity of purpose, which enable a man really to see God even in this impure world; that Christlike spirit which makes him a peacemaker in a fighting world—yes, that spirit which makes him like the Master in sweetly bearing unjustified persecution. These indeed are the marks of the man who follows Christ as King.

II. The Conduct of the Follower of Christ (vv. 43-48).

There can possibly be no more severe test of a man's Christian character than the manner in which he treats his enemies. Many who pass the other tests meet failure (at least in part) at this point.

It is no easy thing to love your enemies, but it is the standard of Christ, and He will enable us to live up to it. Now is a good time to put it into practice, not only personally, but nationally.

There can be no doubt that love for the brethren will be a more intimate and satisfying experience because they return our affection (v. 46). Anyone can do that and enjoy it. Enemies often return hatred for our love—they persecute us (v. 44). But we are still to love them.

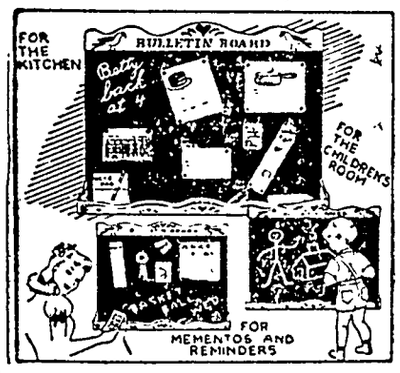
That love must move us to treat them kindly and to pray for them. Someone says, "It can't be done." Yes, it can by the grace of God in Christ, and it is being done.

We need to exercise care lest we fall into the easy habit of speaking with derision or scorn of the ungodly — that wicked, dissipated neighbor who hangs around taverns and other questionable places. Let us never condone their sin—that we should hate—but may God help us to love them and lead them to Christ.

This lesson is indicated as being a temperance lesson. The application can only be made indirectly, but it may have value. The use of alcohol is so destructive of everything that is good, that it is quite obvious it is not in accord with these standards of the kingdom of heaven. It is time some church people decided whether they want to belong to the world or belong to Christ. If the latter is their purpose, we believe the only consistent position to take is that of abstinence from alcoholic liquors.

All-Purpose Bulletin Board With Wide Trough Useful to Juniors or Seniors

By Ruth Wyeth Spears



HERE is an all-purpose bulletin and blackboard that will be welcomed by juniors and seniors. Its gayly stenciled or painted top and bottom trim makes it quite handsome enough for front hall, kitchen, sewing and rumpus room or nursery. It also has a number of special features that one does not find in ordinary bulletin boards.

The main part may be made of plywood or composition board and is finished with a special black paint mixture so that it may be used as a blackboard as well as for pin-ups of all sorts. The useful trough at the bottom holds that elusive chalk, eraser, memo pad, pencil and thumbtack. Both the trough and scalloped finish at the top may be made of plywood or scraps or other thin wood and are decorated with a pair of quaint birds and hearts.

HINT FOR HOME BAKERS

Now Quick Roll Recipe-Easy and Good!

Make them with Fleischmann's yellow label Yeast—the only yeast with those EXTRA vitamins

QUICK ROLLS

½ cup milk
2 tablespoons sugar
1½ teaspoons salt
1 cake Fleischmann's Yeast
½ cup lukewarm water
3 cups sifted flour
3 tablespoons melted shortening

Scald milk, add sugar and salt; cool to lukewarm. Dissolve yeast in lukewarm water—and be sure it's Fleischmann's *yellow label*, the only fresh yeast with all those extra vitamins. Add to lukewarm milk. Add 1½ cups flour and beat until perfectly smooth. Add melted shortening and remaining flour, or enough to make an easily handled dough. Knead well. Shape into rolls and place in well-greased pan. Cover and let rise in warm place, free from draft, until doubled in bulk (about 1 hour). Bake in moderate oven at 400°F. about 20 minutes. Makes 12.

FREE!

New Revised Wartime Edition of Fleischmann's Famous Recipe Book!

Clip and paste on a penny post card for your free copy of Fleischmann's newly revised "The Bread Basket." Dozens of easy recipes for breads, rolls, desserts. Address Standard Brands Incorporated, Grand Central Annex, Box 477, New York 17, N. Y.

Custom Still Good

A Knoxville insurance man was making his usual rounds on New Year's Day, exchanging greetings with his policy holders, when one lady gave him "two bits" too much. He remonstrated with her but she insisted that he keep the money as it was an old custom in her family. Her mother always gave a coin to the first person who entered the home on New Year's Day and the Knoxville resident has continued the custom. The lady advised that it was supposed to bring good luck to both the one who gives and the one who receives the coin.

Grief Stricken

"Duke" has died. "Duke," a dog owned by Junior Johnson of Grundy Center, died the day after W. [illegible] (Bill) Scott was buried. Bill and "Duke" had been very good friends for years. Every morning 'Duke' was at the office door waiting for Bill and every morning he received a sandwich for his breakfast. Mr Scott had been ill for a number of weeks and had not been at his office but every morning 'Duke' was there waiting. The dog would not eat the breakfast others offered him and he would not eat at his home. 'Duke' must have known that Bill would not be coming back.

There are about 30,000,000 men, women and children on farms in the United States.

Shirtwaist Dress Saves for Bonds

Softly rounded lines of scalloped yoke and sweetheart neckline are repeated in three-quarter sleeves in this shirtwaist dress. Dresses like this are easy to make and help in buying War Bonds. Patterns available at local stores.

Treasury Department

Local Happenings

Klemme and Vicinity

Mr. and Mrs. Geo. Cosgriff and son, Billie, were visiting in Britt Friday afternoon.

Mr. and Mrs. Ernest Helps visited at the Henry Helps home Sunday.

Mrs Mary Waterman entertained Mrs. C. F Keraus to dinner Sunday.

Rev. and Mrs. H. E. Harvey and La Nelle were dinner guests at the R. A. Jorgenson home Tuesday

Mr and Mrs. John Day attended the Alex Ross funeral at Garner on Monday afternoon.

Mrs. Rose Lewis and son, Duard; Mrs. C. E. Kluckhohn, and Mrs. C. F Keraus were Mason City visitors Friday afternoon.

Miss Adella Nelson of Mason City spent the week end visiting with her parents, Mr and Mrs. Verner Nelson in Avery township

Mr. and Mrs. Ben V Greeman and son visited Friday evening at the Harvey Barz home. Mrs. Barz and Mrs. Greeman are sisters.

Joe Eejlit of Garner was a business caller in Klemme Saturday morning. We acknowledge a very pleasant call.

Congratulations! Today, Jan. 17 is the 25th wedding anniversary of Mr and Mrs. Ed. Buntenbach of Klemme.

The Mission Study Group of the Methodist Church met Thursday afternoon at the home of Mrs. Jean Chambers, with 30 women present.

Miss Audra Schlichting of Mason City spent the week end visiting with her parents Mr and Mrs. Fred Schlichting.

Mr. George Albers entered the hospital, last Thursday for a checkup and returned home again Saturday.

Mr and Mrs. H. F. Jost and Dianne Masterson left Monday morning for Grinnell to visit Ole Thompson who is ill and in the hospital.

Mrs. Conklin of Goodell and son Dale, who is home from the Navy visited at the Sumner Trumbell home Monday

J. A. Chambers returned home Tuesday evening from Iowa City where he went to go through the University hospital clinic.

Relatives had received word that Will Rudder of Waterloo has undergone two operations recently and is still confined to his bed in a hospital.

Mrs. H. E. Harvey was in charge of the lesson and Rev Harvey sang some solos. Lunch was served by Mrs. Chambers at the close of the meeting.

Pfc Herbert Webner, wife and son, Dennis, of Madison, Wis. spent two days at the parental Dan Webner home near Klemme last week. Dennis is spending a few days with his grandparents.

The Fifty-Fifty class of the Methodist Sunday School held a party at the home of Mr and Mrs. Carl Finders Monday evening. The evening was spent playing games after which lunch was served.

Sgt. Homer Schoenwetter leaves tonight, Wednesday for his camp in Texas after spending the past week and furlough visiting with his parents, Mr and Mrs. George Schoenwetter in Liberty township.

Mr and Mrs. Herman Gast entertained the members of the Liberty choir at their home in Liberty last Friday evening. After choir practice all enjoyed a taffy pull. Mrs. J. A. Chambers made the taffy for the choir.

Seaman Cecil Katter spent the past week visiting with his wife here and with his parents, Mr. and Mrs. Ben Katter, northwest of town. Seaman Katter was transferred from the Great Lakes Station to New Orleans.

Mr. and Mrs. Fred J Arnold entertained to a 5:00 o'clock dinner Sunday evening, Mr and Mrs. Chas. Gibbs, of Big Lake, Minnesota, who are visiting in the community; Miss Anna Gibbs and Mrs. Edna Thada.

Mr. and Mrs. E. J. Schneider entertained to dinner Sunday evening Dr. and Mrs. W. F. Missman, Mr and Mrs. P. M. Wilson and Mr and Mrs. E. A. Jorgenson. Tuesday, January 16th, was Mr. and Mrs. E. J. Schneider's 38th wedding anniversary.

Anniversaries come in bunches for the Verle Keraus family of Garner. Monday Mrs. Keraus had a birthday on Tuesday her daughter had a birthday and on Wednesday her parents, Mr. and Mrs. Ed. Buntenbach observed their 25th wedding anniversary.

Pfc. Roy E. Arnold, of Geiger Field, Washington, visited with his parents, Mr and Mrs. Elmer Arnold and family from Friday until Monday evening, when Mrs. Arnold, Wilbur and Bruce took him to Mason City where he boarded a train for the west.

Fairy Tale Life of the Lady Swindler. In this unusual story is revealed the peculiar life of a woman who dreamed of grandeur, and lived a false life until the law finally caught up with her. Read it in The American Weekly, the magazine distributed with next week's Sunday Chicago Herald-American.

Good Telling!

Herbert Braasch of Rembeck claims that he had not shot a rabbit in 30 years nor had he ever shot a pheasant but his experience the other day proves that he is an "expert" shot. Crows in the vicinity of Rembeck have been numerous and many farmers have been killing them and collecting the 10c bounty. Last week, Mr Braasch with one shot from a 16-guage shotgun, brought down eleven crows. He made a good profit on the one shot at 10c per crow, or $1.10 for all of them.

Two For One

Another story about good marksmanship is told by Fos Sarchett of Indianola. Accompanied by Don Stewart and Howard Geeman, Sarchett went fox hunting. They saw one fox and Fos shot it on the run. When the men went to pick it up, they found two foxes. The two had evidently run together at the time the shot hit.

SEAMAN RAYMOND SWALVE WRITES TIMES PUBLISHER

Fleet Post Office,
San Francisco, Calif.
Thursday Afternoon.

Hi Jergie:

I have received so many nice Christmas cards and letters this year that I can't get them all answered. I also received many nice packages and I would appreciate it very much if you would thank all the people, through The Times, who sent me cards and letters this Christmas, and also thanking the United Service Women of Klemme for their Christmas box, and the ladies of the church.

I receive The Klemme Times every week from the folks and it sure is swell to get it and read the good home town news. Although there seems to be a few changes around the the home town since I left and it will be a little strange to one when we get back.

The fellows here in the barracks enjoy reading The Times after I get through with it. We really appreciate the home town news like that and one can keep up on what is happening and taking place at home. Mail service was somewhat snowed under during the holidays but is getting back to normal Thank you, Jergie.

Your home town friend,
Raymond.

R. B. Swalve, AM 3-c.

TOM ROTHS SOLD TRUCKING BUSINESS TO FT. DODGE MAN

New Family Will Move To Klemme In Near Future

Tom Roths has sold his trucking business to Mr. Verne Bisom, of Fort Dodge, who is now in possession.

Mr Roths has been in the general trucking business for the past five years and has built up a good business during that time.

Mr. Bisom has been employed by the Colonial Bread Co. of Des Moines and has operated a bread route for the past ten years, and has regularly called on Klemme grocery stores. Mr. Bisom has a family who will move to Klemme in the near future.

One automotive company estimates it will need 3,600 new machine tools to resume car production at 50 per cent of its 1941 schedules.

While the SS William T. Coleman was moored beside an ammunition vessel, enemy planes set the latter afire. Radio Operator, James C. Huett, volunteered to sever the lines that held his ship as bursting bombs and blazing gasoline endangered the Coleman. Quickly he completed the hazardous operation for which he was awarded the Merchant Marine Distinguished Service Medal. His ship moved off to a safe distance; the ammunition ship sank. War Bond purchases pay for ships so badly needed to carry on this war. *U. S. Treasury Department*

Mr. And Mrs. John Neuberger Married Forty-nine Years

MARCH OF DIMES GETS UNDER WAY IN HANCOCK

G. B. Kirchner, Hancock county chairman for the "March of Dimes" announces that the drive will continue until Jan 31st.

Letters have been mailed to each person in the county by the township and town chairmen. Mr. Kirchner expects the drive to exceed that of last year Mrs R. A Jorgenson, Klemme, county secretary, reports that each mail brings in large numbers of letters containing contributions. The letters are immediately placed in a sealed box and will not be opened until the "March of Dimes" Committee meets at the close of the drive.

COOP OIL ASSOCIATION HAS NICE INCREASE IN BUSINESS

The Hancock County Coop Oil Association had its biggest year in its history, according to W. J Barz, manager. At the annual meeting held last week he announced that a 20 per cent gain was shown over 1943 business.

Directors elected for 3 years were: Chas. Grau, W. J. Barz, E. C. Ollenburg and Oscar Greiman Erwin Rosendahl was elected director to succeed F F. Boehnke The directors will eet on Febr. 10 to organize and elect officers.

The company has stations at 3 towns: Klemme, Garner and Ventura which in addition to Goodell, also have truck service.

PLAN TO CELEBRATE GOLDEN WEDDING NEXT JANUARY

Lived On Their Farm East Of Town For 46 Years Continuously

Mr and Mrs. John Neuberger of Klemme observed their 49th wedding anniversary on Monday, January 22nd in a quiet manner at their home here as they are planning a big celebration for their Golden Wedding next year. They spent the day at home with their daughters, Ruth and Faye. However, their son, John Neuberger Jr. and wife of Brownsville, Texas, sent them a beautiful bouquet of roses and ferns from their own garden. Mr. and Mrs John Neuberger Jr. observed their 16th wedding anniversary on the same day.

Mary Jahnke, daughter of Mr. and Mrs. Fred Jahnke, and John Neuberger, son of John Neuberger Sr., were married at the Methodist parsonage in Klemme by Rev. Gottlieb Haefner on January 22nd. 1895

They began housekeeping on the Neuberger farm east of town where Mr. Neuberger had already lived for 5 years. Here the family resided continuously for 46 years until Mr. and Mrs. Neuberger came to town 3 years ago.

They are the parents of nine children: Clarence, Klemme; Walter, Thornton; Mae (Mrs. Walter Blumer,) Klemme; Ruth, Klemme; John Jr, Brownsville, Texas; William, Ventura; Faye, Klemme, Merlin, Klemme. Margaret, a twin sister of Merlin, died at the age of 1½ years.

When Mr. and Mrs. Neuberger retired from the farm they purchased a modern house in Klemme and their daughters, Ruth and Faye live with them. Their son, Merlin and family, live on the old home place east of Klemme.

REFORMED LADIES TO MEET JANUARY 31 AT CHURCH

The Womens' Guild of the Evangelical & Reformed Church meets on January 31st at the church parlors. Hostesses are Mrs. Alvin Goll and Mrs. Raymond Barz.

BROTHER OF WM. LACEY KILLED IN ACTION

Sunday William Lacey received the sad news from the war department that his brother, T-Sgt. Patrick Eldon Lacey was killed in action in Luxembourg on December 31st. T-Sgt. Lacey was a member of the 157th Infantry in General Patton's army. Mr. Lacey had received a letter written from his brother at Christmas time in which he described the city of Metz nad other places he had seen.

T-Sgt. Lacey had been in the service for about three years.

Funeral Services Held At Watertown For Young Soldier

KLEMME POST OFFICE HAS INCREASE IN BUSINESS OVER PAST YEAR

Postmaster John N. Day reports that receipts at the local post office for the past year were $4.893 47, which is an increase of $636.46 over the 1943 volume.

Total War Bond sales amounted to $19,014.50, and War Savings Stamps totaled $2,160 00

Postmaster Day is assisted by Franklyn Kluckhohn, an honorably discharged war veteran. Sumner Trumbell is carrier on route one.

GOODELL U. B. CHURCH CELEBRATES WITH DINNER

The members of the U. B. Church at Goodell enjoyed a big dinner at the church dining room Sunday to celebrate the completion of improvements which were installed and paid for, with money left over.

The church recently had a new heating system installed which cost about $2,500. Other improvements were made in the building, and when everything had been paid for there was still a nice balance in the fund. And that was worthy of a celebration and dinner.

The people of Goodell and community are to be congratulated for their fine accomplishment.

DR. PAUL PETERSON WILL SPEAK TO METHODIST MEN

The Klemme-Liberty Methodist Men will meet in regular session on Tuesday, January 30, at 7:30 in the Klemme Methodist Church.

The rarity of the occasion will be in the speaker, Dr. Paul A. Peterson, of Mason City, who will use the theme: "The Preacher Goes To Sea" Dr. Peterson will tell of his own unbelievable experiences as a traveler on the high seas. The Old Timers Quartet will sing, and other special numbers on the program

Every man and friend of the churches are cordially invited to attend. Lunch will be served at the close of the program. Make this a night out with the men.—Rev. H E. Harvey.

HELLO, FOLKS!

A 6-pound, 15-ounce daughter was born Tuesday, Januray 16 at the Mercy hospital, Mason City, to Mrs. Glenn Bredlow of Liberty township. The baby's father was recently reported killed in action on the western front in Europe.

Bonds Over America

GORGAS HOUSE

Because pioneers in Alabama did not have wives and children with them, education received little attention until statehood was achieved in 1820. Poor and middle-class children attended the public schools while children of planters and other well-to-do families attended private schools up to the War Between the States. The University of Alabama was opened at Tuscaloosa in 1831. Gorgas House, built in 1829 and occupied by the famous Confederate General while he was president of the University, stands as a splendid tribute to education's rapid rise in the State. It is worth buying War Bonds to supply U. S. service men who are fighting to protect educational advantages such as Alabama has attained. *U. S. Treasury Department*

MILITARY RITES CONDUCTED FOR DUANE RIDDER AT WATERTOWN, S. D.

(Clipping from Watertown Paper.)

Funeral services for Duane E Ridder, 21, son of Mrs Martha Ridder, (of Watertown, South Dakota) were held Tuesday afternoon at 2 o'clock in the First Methodist Church, preceded by a prayer service in the Shaw-Messer chapel The Rev William R Peterson officiated at the ceremony and burial was in Mount Hope cemetery Mr. Ridder died January 13 at the Hines Veterans' hospital, at Hines, Ill., where he had been a patient. He had received a medical discharge from the army.

J.E. Messer, accompanied by Miss Bertha Taecker at the organ, sang, "Jesus, Savior Pilot Me," and the organ prelude and recessional were also played by Miss Taecker

Pallbearers were Sgt Walter Schlick, Pvt. Emmet H. Nanna, S-Sgt George T. Allen, Pvt Joe C Buckles, Pfc. Charlie D. Parker and Pvt Joe L. LaCaze.

Military honors were provided by the Codington county post No 17 of the American Legion and the official staff of the Watertown Air Field Serving as color guard were the post adjutant, Wright Tarbell, Capt F A. Duffner, Corp Israel J Litchman and Corp. Scot D Rovden Taps were sounded by Robert Seater and the presentation of the American flag to Mrs. Martha Ridder was made by the post adjutant, Wright Tarbell

Relatives and friends from away who were here for the services included Mrs. O. A Fredin and two sons, James and Donald of Fort Dodge, Ia, Mrs. C. A. Arnold of Klemme, Ia, and Jule Ridder of Fairmont, Minn.

Duane Ridder, son of Martha A and Adolph A. Ridder, was born at Watertown, South Dakota, on October 11, 1923 He was graduated from the Watertown high school in 1941, and attended college at Ames, Iowa He was employed the Boeing Aircraft company Seattle, Wash., as a draftsman, before entering the service.

He entered the army in June 1943, as a student in the air corps He received his basic training at Lincoln, Neb, later going to Mount Pleasant, Iowa, and to Santa Ana Calif He entered Letterman army hospital at San Francisco, Calif., January, 1944, and later transferred to Hines Veterans' hospital.

Survivors are his mother, Mrs. Martha A. Ridder of Watertown his sister, Mrs. O. A. Fredin of Ft. Dodge, Ia.; his brothers, Homer A and Gayle, both of Watertown.

His father, A. A. Ridder, died in December, 1943.

MRS. FRANK CARPENTER MARRIED IN TEXAS

Klemme friends of Mrs. Id (Frank) Carpenter have received the announcement of her marriage to Mr. John B. Smith at Maypearl. Texas on January 9th.

Mrs. Carpenter, who lived in a house in the northwest part of town, left a couple of months ago for Mason City where she visited with a daughter for a few weeks before going to Texas. Mr. Smith is an old acquaintance of Mrs. Carpenter.

The couple reside at Maypearl.

Hancock County Ministers Hold Meeting In Klemme

Rev. H. E. Harvey was host to the Hancock County Ministerial Association which met in regular session Monday morning at the Klemme Manse.

Rev. E. F. Broberg, the president, presided. The Rev. H. C. Shrout gave the devotions and the Rev. Robinson presented a timely paper to the benefit of all present.

The next meeting will be held in the council room at the Britt State bank in February.

WEEKLY NEWS ANALYSIS

Allies Shift Weight of Attacks Against Nazis to Belgium Front; Vital Issues Face New Congress

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

Democratic leaders leaving white house after pow-wow with President Roosevelt before opening of 79th congress included (left to right) Vice President Wallace, Speaker Rayburn, Senate Majority Leader Barkley, Vice President-Elect Truman, and House Majority Leader McCormack.

EUROPE:
Tables Turned

With U. S. forces having reacted quickly to Field Marshal Von Rundstedt's great winter offensive, which carried deep into the hilly Ardennes forest, the big German bulge in southeastern Belgium shrank under the steady hammering of the American First and Third armies ploughing forward in swirling blizzards.

As elements of the First and Third armies punched at the western nose of the Nazi bulge, other units of these tried battle forces gouged into the north and south flanks and advanced within a dozen miles of each other, threatening to cut the German sack in two.

But even as the First drove southward from Malempre and the Third northward from Longchamps, Von Rundstedt was reported setting up a new defense line half-way back from his deepest penetration, with strong Nazi armored formations throwing in constant counter-attacks in a deadly battle of attrition to cover up the move.

With both sides bringing their heaviest weight to bear in the withering battle of Belgium, and with Von Rundstedt seemingly determined to continue the fight in the hilly Ardennes, the enemy appeared to have temporarily succeeded in turning the struggle away from the vital Ruhr and Saar valleys, heart of his heavy industries.

As the Allies threw their full weight into the battle, it was revealed that elements of the British Second army joined the U.S. First in the attacks on the northern flank of the bulge, and Field Marshal Montgomery was given overall command of forces in this sector. Not only the British Second but elements of the U.S. Ninth and Seventh armies also were moved into the line to mount increasing pressure, the Nazis said.

With the withdrawal of the major strength of the Third army from the southern end of the western front, U. S. troops dropped back from extensive holdings in the Saar and Palatinate in the face of heavy German pressure designed to exploit the realignment of forces.

New Regimes

Europe's troubled political affairs took two new turns, with the formation of a liberal government in Greece expected to end civil strife, and the Russian - sponsored Lublin committee's establishment of a provisional government for liberated territory looked upon to further complicate the Polish problem.

Although Gen. Nicholas Plastiras assumed leadership of the new Greek government, principal attention was focused on Foreign Minister John Sofianopoulos, 57-year-old agrarian liberal, whose inclusion in the cabinet foreshadowed a sufficiently liberal policy to attract revolting Leftists.

In declaring itself the provisional government of liberated Poland, the Lublin committee, which favors territorial concessions to the Russians and a regime friendly to Moscow, clashed with the Allied - backed Polish government-in-exile in London, which contests Red land claims and radical internal social policies.

INSIDE GERMANY

Reliable and uncolored reports emanating from inside Germany indicate that the Nazis appear to possess both the manpower and the material to string out the war on the western front.

It took Von Rundstedt's lightning thrust into Belgium with 200,000 men to point up the Germans' ability to replenish their shattered western armies after the rout in France. These troops' supply of grade A weapons also focused attention on the Nazis' industrial machine.

PACIFIC:
Step Up Attacks

With General MacArthur's forces consolidating their positions in the central Philippines, U. S. airmen stepped up their attack on enemy shipping and installations about the main island of Luzon to the north. At the same time, carrier - borne aircraft blasted the Japs' big air bases of Formosa and Ryukyu, serving as reinforcement centers for the Philippines.

The anxious Japs themselves looked nervously to an American invasion of Luzon, with the enemy trying to comfort himself with the assumption that he had sufficient forces to meet a thrust there, and shorter supply lines favored him.

Not only did U. S. bombardment of shipping about Luzon hamper the movement of materials about the main island itself, but it also imperiled the movement of material to the southern islands.

CONGRESS:
Rolls Up Sleeves

In assembling for its first session, the 79th congress faced a stiff job on both foreign as well as domestic issues relating not only to the successful prosecution of the war, but to permanent peace as well.

In international affairs, of course, recent incidents in Poland, Greece and Italy are expected to lead toward congressional pressure for a stricter definition of our foreign policy, while attention also will be devoted toward the development of an organization to preserve the peace with proper respect toward the interests of all nations.

On the home front, the manpower problem will remain foremost, with need for maintaining an adequate production force and at the same time meeting military demands for more men. The line against inflation also will have to be held in the face of higher wage and price demands.

FARM DRAFT:
Seek Youth

Asserting that War Food Administrator Marvin Jones had advised him that no critical reduction in farm production would result, War Mobilization Director James F. Byrnes called for the induction of deferred farm workers between 18 and 26 years of age.

J. F. Byrnes

There are approximately 364,000 young men in this group, it was revealed, and Byrnes asked Selective Service to apply the most crucial standards in the further deferment of any of them. With the army calling for young men, he said, the only alternative would be to induct 26 to 29-year-olds in war industry, a move which the War Production board warned might hamper munitions output.

Farm state senators were quick to protest Byrnes' action, Senators Reed (Kan.) and Johnson (Colo.) citing department of labor statistics to show that the average work week in industry dropped to 46.1 hours in one year ended September, 1944.

Said Johnson: "From these statistics, it doesn't take a smart man to discover ways and means of decreasing the manpower shortage. . . . "

Heroes' Gallery

Maj. Gen. Orvil A. Anderson, deputy commander of Lieut. Gen. Jimmy Doolittle's Eighth air force, is well known to scientists and army men in Washington as the pilot who in 1935 guided the world's largest balloon to the greatest height ever attained by man. The helium-lifted balloon climbed to 13.71 miles, remaining there for nearly two hours for observation of numerous scientific phenomena of the upper air.

CIVILIAN GOODS:
1945 Prospects

With the European war having taken an unfavorable turn, and the nation's total resources needed for continued record production of war materials, there will be little improvement in stocks of civilian goods through 1945, the War Production board predicted.

With the frozen stockpile down to 45,000 units, and resumption of production unlikely until after the European war when almost six months will be needed for reconversion, mechanical refrigerators will remain practically unavailable. If manufacturers can start on production of 375,000 all-steel ice-boxes, civilians will receive about 56,000 a quarter in 1945.

Of 35,000 electric ranges authorized for 1945, civilians are to get 65 per cent, while about 1,200,000 electric irons will be assembled. Some aluminum kitchenware will reach the market but output of cast iron, enamel and galvanized utensils probably will remain down, primarily because of manpower shortages.

Although WPB authorized production of 319,492 vacuum cleaners in 1945—a fraction of the peacetime output of 1,903,000 annually—actual manufacture may fall short of goal. Because of the increasing scarcity of lumber, the supply for furniture is expected to remain short. Production of innerspring mattresses will be negligible for at least six months.

Only for small electrical appliances are prospects described as brighter.

House Wanted

Having literally sung himself into the senate, Idaho's crooning solon, Sen.-elect Glenn Taylor sought to sing himself into a home in crowded Washington, D. C.

Gathering his attractive brunette wife and two children about him on the cold steps of the capitol, and

Sen. Taylor With Family.

plunking on his battered banjo, Senator Taylor purred:

"O, give us a home, near the capitol dome,
With a yard where little children can play—
Just one room or two, any old thing will do—
O, we can't find a pla-a-a-ce to stay!"

Until the Senator's song strikes a responsive chord in some landlord's heart, the Taylors will live in a hotel.

UN-AMERICANISM:
To Resume Inquiries

The new house had barely settled into its seats before Rep. John Rankin (Miss.) set is agog by pushing through the formation of a new committee on un-American activities to succeed ex-Rep. Martin Dies' defunct investigating committee, bitter target of liberal elements.

Representative Rankin resorted to a legislative coup in having the house approve the organization of a new committee, suddenly inserting his proposal as an amendment to the rules being considered for the current session. Seventy Democrats joined 137 Republicans in voting for the proposal while 186 votes were counted against it.

Unlike the Dies committee, which concerned itself with investigation, the new committee on un-American activities will have the power to draft legislation for correction of abuses and submit it to the house for passage.

BANKS:
U. S.'s Biggest

Biggest bank in the world, the Chase National of New York wound up its 1944 business with a record-breaking total of $5,160,004,000 in resources, of which $4,835,219,000 were deposits. Holding of government securities reached almost $3,000,000,000.

Not far behind Chase's was the National City Bank of New York, with assets of $4,469,686,465, of which $4,205,072,012 were in deposits. Also of New York, the Guaranty Trust company finished the year with resources of $3,826,161,882.

Biggest bank west of the Alleghanies, the Continental Illinois National Bank and Trust company of Chicago wound up 1944 with $2,619,821,039 in resources, of which $2,447,740,085 were in deposits. The bank held over 1½ billion dollars in government securities.

TVA

With gross revenues of $35,429,000, the Tennessee Valley authority realized net income of $14,116,000 on power operations for the year ending June 30, 1944. Electricity production exceeded 10 billion kilowatt hours and the agency also turned out 100,000 tons of calcium carbide for synthetic rubber, 130,000 tons of ammonium nitrate for fertilizer, and 9,000 tons of dicalcium phosphate for mixed stock feeds.

Partly because of the draft, TVA employment dropped to 21,000.

Ernie Pyle's Slant on the War:

British and American Air Cooperation Strong

Non-Commissioned Officers Never Become Hardened to Men's Death

By Ernie Pyle

(Editor's Note): This dispatch was written and first published when Pyle was with the GIs at the Italian front. He is now on his way to cover the boys in the Pacific war zones.

IN ITALY.—If you ever heard a dive bombing by our A-36 Invader planes you'd never forget it.

Even in normal flight this plane makes a sort of screaming noise, and when that is multiplied many-fold by the velocity of the dive you can hear the wail for miles.

On the ground it sounds as though they are coming directly down upon you. It is a horrifying thing. The German Stuka could never touch them for sheer frightfulness of sound.

Ernie Pyle

Also, the Stuka has always dived at an angle. But these planes come literally straight down. If you look up and see one a mile above you, you can't tell where it's headed. It could strike anywhere within a mile on any side of you. That's the reason it spreads its terror so wide.

But our pilots have to hand it to the Germans on the ground. They have steeled themselves to stand by their guns and keep shooting. Pilots say the Italians would shoot until the bombs were almost upon them, then dive for their foxholes, and then come out and start shooting again after the bombs had exploded. But not the Germans—they stick to their guns.

Maj. Ed Bland, a squadron leader, was telling me about coming suddenly over a hilltop one day and finding a German truck right in his gunsights.

Now it's the natural human impulse, when you see a plane come upon you, to dive for the ditch. But the German gunner in this truck swung a gun around and started shooting at Bland. German and American tracer bullets were streaming back and forth in the same groove in opposite directions, almost hitting each other. The German never stopped firing until Bland's six machine guns suddenly chewed the truck into complete disintegration.

Our dive bombers don't have much trouble with German fighters. The reasons are several. For one thing, the Luftwaffe is weak over here now. For another, the dive bombers' job is to work on the infantry front lines, so they seldom get back where the German fighters are. And for another, the Invader is such a good fighter itself that the Jerries aren't too anxious to tangle with it.

Flying Allotment.

For several months the posting period back to America was set at a certain number of missions. Then it was suddenly upped by more than a score. There were pilots here who were within one mission of going home when the order came. So they had to stay and fly a few more months. Some of them never lived to finish the new allotment.

* *

Nowhere in our fighting forces is cooperation closer or friendship greater than between Americans and British in the air. I have yet to hear an American pilot make a disparaging remark about a British flier. Our pilots say the British are cooler under fire than we are.

They like to listen in on their radios as the RAF pilots talk to each other. For example, one day they heard one pilot call to another:

"I say, old chap, there is a Jerry on your tail."

To which the imperiled pilot replied:

"Quite so, quite so, thanks very much old man."

And another time, one of our Invaders got shot up over the target. His engine was smoking and his pressure was down and he was losing altitude. He made for the coast all alone, easy meat for any German fighter that might come along. He was just barely staying in the air, and he was a sad and lonely boy indeed.

Then suddenly he heard over his earphones a distinctly British voice saying:

"Cheer up, chicken, we have you."

He looked around and two Spitfires, one on either side, were mothering him back to his home field.

Platoon Leaders.

Buck Eversole is a platoon sergeant in an infantry company. That means he has charge of about 40 frontline fighting men.

He has been at the front for more than a year. War is old to him and he has become almost the master of it. He is a senior partner now in the institution of death.

His platoon has turned over many times as battle whittles down the old ones and the replacement system brings up the new ones. Only a handful now are veterans.

"It gets so it kinda gets you, seein' these new kids come up," Buck told me one night in his slow, barely audible Western voice, so full of honesty and sincerity.

"Some of them have just got fuzz on their faces, and don't know what it's all about, and they're scared to death. No matter what, some of them are bound to get killed."

We talked about some of the other old-time non-coms who could take battle themselves, but had gradually grown morose under the responsibility of leading green boys to their slaughter. Buck spoke of one sergeant especially, a brave and hardened man, who went to his captain and asked him to be reduced to a private in the lines.

"I know it ain't my fault that they get killed," Buck finally said. "And I do the best I can for them, but I've got so I feel like it's me killin' 'em instead of a German. I've got so I feel like a murderer. I hate to look at them when the new ones come in."

* *

Buck himself has been fortunate. Once he was shot through the arm. His own skill and wisdom have saved him many times, but luck has saved him countless other times.

One night Buck and an officer took refuge from shelling in a two-room Italian stone house. As they sat there, a shell came through the wall of the far room, crossed the room and buried itself in the middle wall with its nose pointing upward. It didn't go off.

Another time Buck was leading his platoon on a night attack. They were walking in Indian file. Suddenly a mine went off, and killed the entire squad following Buck. He himself had miraculously walked through the mine field without hitting a one.

One day Buck went stalking a German officer in close combat, and wound up with the German on one side of a farmhouse and Buck on the other. They kept throwing grenades over the house at each other without success. Finally Buck stepped around one corner of the house and came face to face with the German, who'd had the same idea.

Buck was ready and pulled the trigger first. His slug hit the German just above the heart. The German had a wonderful pair of binoculars slung over his shoulders, and the bullet smashed them to bits. Buck had wanted some German binoculars for a long time.

The ties that grow up between men who live savagely and die relentlessly together are ties of great strength. There is a sense of fidelity to each other among little corps of men who have endured so long and whose hope in the end can be but so small.

One afternoon while I was with the company Sgt. Buck Eversole's turn came to go back to rest camp for five days. The company was due to attack that night.

Buck went to his company commander and said, "Lieutenant, I don't think I better go. I'll stay if you need me."

The lieutenant said, "Of course I need you, Buck, I always need you. But it's your turn and I want you to go. In fact, you're ordered to go."

The truck taking the few boys away to rest camp left just at dusk. It was drizzling and the valleys were swathed in a dismal mist. Artillery of both sides flashed and rumbled around the horizon. The encroaching darkness was heavy and foreboding.

Rest Not Welcomed by Sergeant

Buck came to the little group of old-timers in the company with whom I was standing, to say goodbye. You'd have thought he was leaving forever. He shook hands all around, and his smile seemed sick and vulnerable. He was a man stalling off his departure.

He said, "Well, good luck to you all." And then he said, "I'll be back in just five days." He said goodbye all around and slowly started away.

I walked with him toward the truck in the dusk. He kept his eyes on the ground, and I think he would have cried if he knew how, and he said to me very quietly:

"This is the first battle I've ever missed that this battalion has been in. Even when I was in the hospital they were in bivouac.

SNAPPY FACTS ABOUT RUBBER

The "Weasel," one of the latest military vehicles, has become a major adjunct to the prosecution of the war because of its astonishing maneuverability on all sorts of terrain. The special rubber track on which it is propelled was designed and developed by The B. F. Goodrich Co.

If anyone has any doubt about the seriousness of the truck tire shortage, he only has to know that ODT figures show that the truck and truck tractors of the country run up close to 48 billion miles a year of road travel. That calls for plenty of tires!

ONE WORD SUGGESTION FOR ACID INDIGESTION—"TUMS"

ur Japanese Foes Are Proving Themselves to Be Original, Sly, Progressive and Fanatical Fighters

ons of Nippon Educated nd Trained for New Type War Now Being Waged

By WALTER SHEAD
WNU Washington Correspondent.

WASHINGTON. — When you ead that "all organized resist- nce has ended" on Leyte, Sa- ar, Mindoro or any other of the ousands of islands in the Phil- pines or the Micronesian or elanesian archipelagos in the outhwest Pacific, you will know at General Mac.rthur's anks have met and beaten a ell-trained, well-equipped, fa- atical foe that meets the Amer- an soldier on equal terms in most every fighting quality.

These sons of Nippon are hard- ed in endurance, trained in re- ression, wild and cunning, steeped militarism from early boyhood d brought up under a system of udalism which has disciplined em into acceptance of the convic- on that to die for their emperor is e highest duty of a good soldier.

What the Japanese soldier lacks d what the American soldier pos- sses is resourcefulness and indi- dual initiative. When the Japs are mmitted to a plan, they always llow it to the end . . . even if it comes apparent within a short me after the fighting starts that me other plan would be more fective. When an officer is killed, e initiative of the entire unit is mpaired unless some other officer equal rank appears to take his ace.

The system of feudalism which haracterizes Japanese life would be comprehensible to most Amer- ans. His station in society and his very act are predetermined for im. Contrary to the common fal- cy that Japs are more stolid than her persons, he is a highly emo- tional person, and this system of feudalism which trains him in re- pression accounts for his tendency to "blow up" in tight places. It also accounts, in part, for the futile death charges which seem to have become characteristic of the Japanese when they are admittedly beaten. The life-long repression and the result- ant inhibitions also account for the arrogance of the Jap soldier in vic- tory and, conversely, for his tenden- cy to fly to pieces in defeat.

Hara-kiri is in no way a sign of cowardice on the part of the Jap soldier, for by this peculiar- ly painful method of committing suicide, he is actually, in his own mind, telling his emperor, a semi-divine personage, that he has done all he can for him and is now presenting him with his own life.

The most widely believed popular fallacy concerning the Japanese is that they are an imitative rather than a creative people. Japanese inventiveness is considerable and is limited only by a scarcity of tech- nically trained manpower and by machine power.

The army endorses the viewpoint that the Jap soldier is a good fight- ing man and the belief that he is a stupid, insensate peasant is, ac- cording to the war department, com- pletely erroneous.

Japanese Army Reduced.

The Japanese army today num- bers approximately 4,000,000 men. To date, American troops have killed almost 300,000 Japanese troops while sustaining about 25,000 casualties themselves. Total Japa- nese losses in killed alone since 1937 total approximately 850,000. More than 250,000 Jap soldiers are now isolated through action of General MacArthur and the Pacific fleet in island pockets, removed from bat- tle, relief or rescue. The war de- partment says that the Japs are nowhere near the bottom of the bar- rel in fighting reserves, and can equip and train 2,000,000 more sol- diers without seriously affecting war production manpower reserves. This does not include the added millions who might be "recruited" from sub- ject nations.

Comparison of the average Japa- nese soldier with the average Amer- ican shows the Jap a much smaller man physically. He is 5 feet 3 inches tall and weighs 117½ pounds. He can lift 150 pounds with his feet together, bringing the weight to his knees, to shoulder and then to his back. The average American sol- dier is about 5 feet 8 inches tall and weighs 145 pounds.

Military training of the Jap soldier begins at the age of eight years along with his regular edu- cation, if at that time he is men- tally and physically fit. Educa- tionally the background of the typical Japanese professional sol- dier is as high as that of the typ- ical American fighting man. The regular professional Jap soldier has had the equivalent of two years of high school education, which equals the median level of the average American soldier in this war.

Able to read and write in Japan is 99.6 per cent of the adult popula- tion and between 40 and 50 per cent of all Japanese soldiers have studied English, while between 20 and 25 per cent speak English efficiently.

The cunning of the Japanese is in- dicated in their employment of ruses in their operations. A few encoun- tered to date include employment of lighted cigarettes, firecrackers, barking dogs and moving vehicles to lead defenders to believe the main attack would be made; use of the English language to confuse our soldiers; use of the name of certain individuals and when the person ad- dressed showed himself he was shot; use of booby traps on dead Allied and Japanese troops to detonate when the body was moved; placing a dead Allied soldier in a conspicu- ous place with an automatic weapon covering it. Thus when Allied troops attempted to remove the body, they were shot; when badly wounded, or apparently dead, Japanese troops have produced hand grenades from their clothing and attempted to kill medical personnel going to their aid; use of the white flag of truce to get close to Allied troops.

Japanese Conscription Laws.

Peacetime conscription of Japan- ese calls for two years of military service for all males between the ages of 17 and 40 except for phys- ically unfit and those guilty of cer- tain crimes. Military training be- gins with physically able-bodied children at the age of eight (third grade pupils) who get at least two hours of drill weekly. Army youth soldiers, 14 and 15 years, begin an apprenticeship in military training and when they become of age they are rated by the army as superior privates. Later they are made into lance corporals and, upon gradua- tion from school, become corporals. After six years' service the corporal may become a sergeant-major and upon ten years' service he is pro- moted to warrant officer.

One of the distinguishing charac- teristics of the Japanese soldier is his hardiness, and special patrols, starting at midnight, have been known to cover 60 miles by the next afternoon, marching constantly with- out rest periods. An entire battalion can march more than 20 miles a day. The principle of "no retreat" is a part of this training and a small detachment, caught in a tight place, cannot appeal for reinforcements. The officer in charge may make a report of his predicament, but the matter of insisting upon reinforce- ment is beyond his prerogatives.

The unwritten law of the Jap- anese army is that any soldier captured by the enemy must "atone" for his disgrace later by committing suicide.

Rigid training of commissioned and noncommissioned officers is car- ried out at several army schools and although the system is narrow and arbitrary and inflexible in its system of indoctrination, it is pro- gressive, thorough and modern. However, its rigidity often has in- hibited originality in thought and ac- tion. The schools include the Mili- tary Academy, six military prepara- tory schools and four noncommis- sioned officers' schools.

The Japanese constitution pro- vides that the emperor is command- er-in-chief of the army and navy; that he determines their organiza- tion; and that he declares war, makes peace and concludes treaties. He is advised by two military coun- cils, the board of marshals and ad- mirals, and the supreme military council.

To date a major Japanese weakness has been in artillery, especially in variety, concentra- tion and marksmanship. Weap- ons over 47-mm. captured to date bear model numbers ear- lier than 1936. Japan has had access to German designed weapons for some years and it may be assumed that guns em- bodying German features may soon be encountered.

Japanese engineers are well equipped and have shown outstand- ing ability both in construction and demolition of bridges. On the other hand, airfields and roads so far en- countered have not been up to Allied standards in speed of construction or serviceability. Construction of field fortifications has been highly developed and even at remote points, Jap engineers have been suc- cessful in constructing first class de- fense positions from material im- mediately available.

Weight of the ration for Japanese soldiers as compared with Ameri- cans' is about two-thirds, or slightly over four pounds. The average ra- tion in active theaters is about 3½ pounds and, because of supply fail- ure, this ration has often been re- duced to a half or a third of that amount. The standard or normal ration consists largely of rice and barley, fresh meat and fish, fresh vegetables, and various condiments and flavorings.

Every American soldier has learned by experience that the Japs are hard, fanatical fighters and in defensive action will often hold out to the last man. They place a low value on human life and do not count the loss in taking an objective. Our war with the Japs has further taught us that the Japs know of no such thing as impassable terrain, that speed is one of their cardinal tac- tical principles. They take full ad- vantage of natural cover and un- derstand thoroughly the importance of camouflage.

One thing, however, although they believe strongly in sudden offensive action they often attack premature- ly, and despite their extensive train- ing and confidence in the bayonet, they have not been outstanding in close combat.

Jap fighters will tenaciously and fanatically hold on to a defensive position without thought of the cost in life. Here it was necessary to use a flame thrower on the Nips. Note the GI in the left foreground with rifle poised to knock off the first one who pops up.

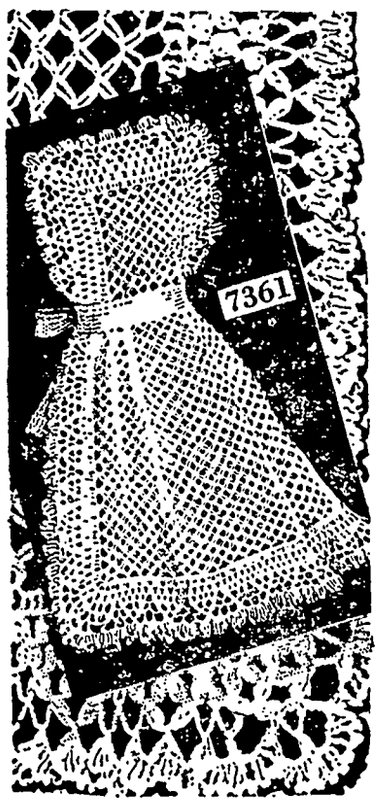
This captured Jap 70-mm. howitzer bears a model number prior to 1936. Nippon's major weakness is in its artillery, especially in variety con- struction and in marksmanship of crew. This howitzer was used as a booby trap.

NIPPON WEAPONS

Captured Japanese battle flags and equip- ment shown here include a knee mortar, light machine gun, rifles, and a 25-calibre gun "woodpecker." Pictured are five fight- ing coastguardsmen, who participated in the initial landing on Manus.

The Japanese rifle is a 7.7 mm. known as model 99. It has a blade front sight and leaf rear sight graduated from 300 to 1,500 meters. Length over all without bayonet is 44 inches. It weighs 8.8 pounds and has muzzle velocity of 2,300 feet per second.

'Fluffy Ruffles' Apron In Simplest Crochet



"FLUFFY ruffles" — crocheted apron in feminine pastels or white. Quickly and easily made of inexpensive mercerized cotton.

* * *

Dainty crocheted apron adds glamour to your entertaining. Pattern 7361 contains crochet directions for apron; stitches.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

EDITORIAL COMMENT

RURAL PEOPLE WILLING TO PAY FOR EDUCATION

The rural people of southern Iowa want better schools and are willing to pay for them, said former State Senator Oliver Turner of Corning in a statement issued Tuesday He pointed to the state income tax as a "fair way for the renter to help contribute towards the education of his family," and stated that the property tax on some rented farms will not begin to maintain a good standard school.

"We favor the return of the state income tax to 100 per cent," said the senator, "in order to help raise funds for better schools in Iowa The rural people in southern Iowa are living in hopes that the 51st General Assembly will see fit to give due consideration to the report of the Iowa School Code Commision and vote the passage of goodly portions of it."

The problem is two-fold, according to Turner, involving schools and roads, and the two must go hand in hand "We have too many schools with only four or five pupils," he said, "making the cost per pupil very high The students are the losers in these small schools, which are naturally not attractive to the better trained teachers

"Our boys are paying the price of blood and life for the preservation of the ideals of liberty, and it will be their children who will be the students of the next generation Why shouldn't we be making plans right now that will benefit them? Can we ask less?"

Early consideration of the report of the Iowa School Code Commission was asked by Governor Robert D Blue in his inaugural address The report proposes that state support of schools through a general aid fund which would benefit all schools of the state in proportion to the number of school census children, as well as an equalization fund which would garantee a minimum standard of education thruout the state. It also includes proposals for transportation aid, tuition aid, and tax relief on agricultural lands.

Losses by fire, including those caused by lightning, amounted to $380,000,000 in the United States in 1943

Red Cross Women Will Meet Again Next Tuesday

The Klemme Red Cross women did not work Tuesday as they were waiting for more material.

They will probably sew on kits for servicemen next week.

Long Tenure

For 40 years, Barney Bunkers has held the office of justice of peace in Remsen. During that time he has handled approximately 2,000 cases, but none of them marriages. It is believed that Mr. Bunkers' record tops all records of long service in Plymouth county. Mr. Bunkers was re-elected last fall and is now serving his 41st year in office.

Tired Of Life

You've heard the story of the fox jumping for the grapes, this one is a little different. Clarence Houg of West Union found a fox caught in the crotch of two tree limbs, apparently caught when it attempted to jump for a bird sitting in a bush. The fox had been unable to free itself from its "trap" and froze to death.

List Rules for Keeping Garden in Dry Spell

The following are a few "do's" and "don'ts" that will help the gardener to keep his garden going until copious rains come:

Hoe and cultivate just enough to keep the weeds under control and no more. Do not cultivate deeply or ridge and hill the crops, for this wastes rather than conserves moisture. Use care in removing large weeds. Do not pull, but instead cut large weeds, particularly when they are close to the roots of the vegetables. For example, large weeds should be pulled from rows of beans, carrots, beets, hills of corn, etc.

Water the garden whenever feasible. On the average, vegetables require about one inch of water a week. Soak the ground thoroughly when water is applied. Do not add less than one quart per square foot even for small seedlings; larger crops should have two or three times this quantity. Use the coolness of early morning and late afternoon for watering the garden. Do not be afraid of injuring the plants if mid-day watering must be done. This time of irrigating, however, is not recommended because of excessive evaporation of the water, especially when a sprinkler is used.

Vetch Good Cover Crop For Vegetable Gardens

In many respects, hairy vetch is the best cover crop to sow on vegetable growing farms, says H. R. Cox, extension agronomist at the college of agriculture, Rutgers university.

It can be seeded any time during August or September, either after an early market crop has been removed or just before the last cultivation of a late market crop, according to Cox.

"When plowed down next spring a good stand and growth of vetch will add to the soil the equivalent of several hundred pounds per acre of nitrate of soda. A cover crop containing vetch should, if possible, be allowed to stand for a while next spring before plowing since vetch makes its best growth in spring.

"The seed of vetch should be inoculated with a culture especially prepared for that crop, if neither vetch nor peas has been grown successfully on the field in recent years," Cox warns. "Vetch will not tolerate excessive soil acidity, and it makes a better stand with a moderate amount of seed if it is drilled rather than broadcast by hand and scratched in.

Milk Test

Many dairymen have experienced difficulty at times with milk which does not readily pass through the strainer. This condition may be one of the first indications of mastitis infection observed in the dairy herd.

Inasmuch as a strip cup test used daily on each cow in the herd often reveals the animals producing abnormal milk, such as "flakes," "stringy milk," or "watery milk," college veterinarians suggest the following procedure: Before regular milking of the cow, draw one or two streams of milk from each quarter onto a fine screen or black-surfaced material. Use a slow full hand squeeze to avoid mistaking air bubbles for "flakes." Examine the screen or black background for abnormalities in the milk for each quarter. At the present time, it may be impossible to purchase a strip cup. A cup covered with black cloth or a pan four to five inches wide and five to eight inches long with a thin sheet of metal painted black will serve the purpose. A piece of phonograph record cut to suitable size makes a good black background. Place the metal sheet or piece of record so that one end sits on the end of the pan with the other end inclining to the bottom.

Deep Well

The world's deepest hole, drilled by the Phillips Petroleum company, near Fort Stockton, west Texas, became an oil well at a depth of 15,279 feet. It was completed recently after two years of drilling The details of the task were revealed in an issue of "Mining and Metallurgy." A total of 467 drill bits were used, 20-inch ones for the top and 7.75-inch for the bottom. The pipe lining the well weighs 156 tons. Two pockets of high pressure gas were encountered, one at 11,556 and another at 12,832 feet. The temperature at the bottom of the well is between 235 and 240 degrees Fahrenheit, or more than hot enough to boil water at surface pressures. The pressure at the bottom is 2,800 pounds a square inch, or about 200 atmospheres.

Fringe on the Flag

Congress on December 22, 1942, enacted a law on Flag display which provides in part that "The Flag should never have placed upon it, nor on any part of it, nor attached to it any mark, insignia, letter, word, figure, design, picture or drawing of any nature." Congressman Sol Bloom who introduced the legislation in the house of represenatives interprets this to exclude the use of fringe or tassels.

Army regulations on the Flag, however, provide for trimming "on three edges with a knotted fringe of yellow silk 2½ inches wide" for mounted, motorized, or dismounted regiments and such other independent dismounted units as may be authorized to carry the colors.

Chimney Should Not Rest On Wooden Construction

A chimney should be well constructed, built from the ground up, set on a solid foundation. It should not be dependent for its support on wooden construction. Nor should it be used to support any part of the building itself. Standard flue lining is recommended. Where it is not feasible to rebuild an existing chimney, the walls of which are not of standard thickness, frequent cleaning will reduce the likelihood of fire. All defective chimneys should be rebuilt. Chimneys, flues, stoves and furnaces should be kept clean.

Stoves and furnaces should be set well away from walls and woodwork. They should rest on substantial bases, and combustible floors should be protected by incombustible material under and adjacent to the bases.

Smoke pipes should be substantially supported, kept in good condition, separated 12 inches or more from woodwork or other combustible material. Use a ventilating thimble which provides at least 6 inches of air space on each side of any smoke or heating pipe which passes through a partition, floor or ceiling. And such partitions should be protected by air-spaced metal backed by asbestos board one-fourth inch or more thick Ashes belong in metal cans, never in wooden or cardboard containers.

Good Times Cut Number Of Railroad Trespassers

A total of 1,667 illegal train riders and other trespassers on railroad property lost their lives in 1943, according to reports just received by the Protective Section of the Association of American Railroads During the year, 1,126 trespassers were injured.

While there was a material increase in locomotive miles and tonnage handled, the number of fatalities to trespassers on railroad property in 1943 showed a reduction of 258 compared with 1942, and a decrease of 222 in the number of trespassers injured.

The almost complete elimination of unemployment and the increase in the number of minors working full or part time in war and allied industries have all had a bearing on the decrease in the number of trespassers on railroad property.

Reports just received by the Protective section show that approximately 584,000 illegal train riders or trespassers were removed from trains, prevented from getting on trains, or ejected from railroad premises, but not arrested, by 76 of the principal railroads of the country in 1943. This was an average of 48,600 trespassers per month.

Poison Danger

The dangers of the medicine cabinet are common to homes throughout the land—both urban and rural, and bottles should be kept beyond reach of small children and clearly labeled for the benefit of everyone having access to them Medicine cabinets should be well lighted or a flashlight can be used

Beyond these normal hazards, there are many other sources of poisoning peculiar to the farm Among them are poisonous plants—poison ivy and poison oak, especially; and the four poisonous snakes of America—the rattler, the copperhead, the moccasin, and the coral snake. Insecticides are frequently stored in or near the kitchen, with a likelihood of becoming mixed with flour or sugar. Great quantities of canned goods are often on the pantry shelves, and of course improperly sterilized canned foods may lead to botulinus poisoning.

Lightning Losses

Farm property loss from lightning averages about $10,000,000 a year. It is estimated that 400 persons are killed, and 800 to 1,000 persons are injured by lightning on farms each year.

Properly installed and well-maintained lightning rods will provide practically complete protection against damage to buildings by lightning. In order to obtain the best results, lightning rods should be installed in accordance with the National Code for Protection Against Lightning. Tracks for carriers and other metal bodies inside the buildings should be grounded and bonded together to prevent electrical flashes from one body to another.

A metal roof, electrically bonded, properly grounded, and provided with air terminals to protect chimneys or other nonmetallic projections, usually affords satisfactory protection.

Synthesize Own Protein

Cattle, sheep and goats have special digestive equipment which enables them to utilize non-protein nitrogen for the synthesis of true protein needed for growth of body tissues and production of milk. Their stomachs have four compartments —the rumen or paunch, the honeycomb, the manypiles, and the true stomach. The rumen or first stomach, instead of having the usual digestive fluids, contains myriads of micro-organisms which prepare the food for digestion. In the process, nitrogenous materials are broken down and rebuilt into proteins. The more soluble part of the food passes on to be digested, while the more resistant is chewed as the cud, a pastime enjoyed by every cloven-hoofed animal except the swine.

Birthday Party Held At The Lloyd Lau Home

Mrs. Lloyd Lau entertained several friends Sunday evening to celebrate Lloyd's birthday which is January 27, and Carl Swanson's birthday on January 29th.

"Five Hundred" was played at 3 tables and high scores were won by Mrs Fred Etchen and Mr. Will Hoeft, and second high by Mrs. Earl Ruka and Carl Swanson.

Mrs. Lau served a nice lunch.

Standard Bearers Met At C. G. Waterman Home Friday Eve

The Standard Bearer girls of the Methodist Church met at the home of their leader, Mrs. Lyle Wilcox Friday evening. Mrs. Gerald Koerner assisted.

A short study program was held followed by games and entertainment. Lunch was served at the close of the games.

The girls will have a Valentine Party for their next meeting.

George Washington could not laugh late in life without his false teeth popping out.

SCHOOL NEWS

SOPHOMORE NEWS

This week was the beginning of the second semester of school. We received our report cards Wednesday and saw our 1st semester average. Most of us are going to try to make it higher next semester.

In Geometry we are studying Inequalities.

Our World History Class is now studying the period after the Middle Ages. It is very interesting.

Friday in Biology Class we had two special reports read. They were "Foxes" and the "Giraffs." They were both very interesting.

Mrs. Ed. Bock is our English teacher now. She is replacing Miss Esther Crabtree who left at the end of the semester. In English we have been writing themes.

FRESHMAN NEWS
By Kathryn V.

The Freshmen have started their new semester by resolving to study harder.

In Algebra we have a new member, Charles Christie, who is taking the second semester in Algebra.

We have been studying interest and formula problems.

We have a new teacher in English, Mrs. Bock. We are learning to write Business Letters. We are beginning to use our English work books.

The girls have started to clean the Home Economics room, so we can begin to cook soon.

JUNIOR HIGH SCHOOL NEWS
Phyllis Kirkwood, Reporter.

Wednesday our room had a visitor, Ardell Rosendahl, who was with us for the afternoon.

In Seventh Grade Health Class we are making vitamin charts.

For our first semester in outside Reading, the following read the most books: Luella Priebe was first, Larry Ramsay was second, Norma Early and Maurice Trumbell tied for third place.

In Art we are making silhouettes with India ink.

FIFTH AND SIXTH GRADE NEWS
Mrs. Voetberg, Teacher

Monday both the Fifth and the Sixth Grades began reading in their new Readers. We are enjoying them very much.

In Sixth Grade Language we have begun work on pronouns. That makes three parts of speech we have had.

This week we celebrate two birthdays: Tuesday for Iris Schafer, and Friday for Charlotte Nuehring Both girls gave treats to the room.

KINDERGARTEN, FIRST AND SECOND GRADE NEWS
Miss Bugh, Teacher

The Kindergarten children did clay modeling this week. We enjoyed making our pets with clay.

The First Grade read about Sally's "New Toy," which was a telephone. In Language we learned how to talk on the telephone by calling each other on a toy telephone.

The Second Grade read about Eskimos in their Weekly Readers. We learned about the kinds of clothes they wear, their homes, their schools, their food, and how the animals of Eskimo land help them.

Pvt. Elmer V. Buckley's Address Slightly Changed

There is a slight change in Pvt. Elmer Buckley's address. His new address follows:
Pvt. Elmer V. Buckley 37780873
Co. A, 154 Bn. 92 Regt. I. R. T. C.
South Camp Hood, Texas

Pvt. Lloyd K. Ax Stationed At Camp Wolters, Texas

Pvt. Lloyd K. Ax, son of Mr. and Mrs. Wm. Ax, is stationed at Camp Wolters, Texas. Lloyd's address is as follows:
Pvt. Lloyd K. Ax, 37776987,
Co. B., 58th Bn., I. R. T. C. Area 1,
Camp Wolters, Texas.

CIVIC CLUB MEETS THIS WEEK, JANUARY 25

The Klemme Civic Club will meet at the Community Hall on Thursday evening, January 25th at 7:30 o'clock, sharp.

The number of milk cows in the United States at the beginning of 1943 was estimated by the U. S. Department of Agriculture at 26,946,000.

Lichens Form Partnership To Promote New Growth

Lichens, those leafy growths appearing on tree trunks and bare stones, initiate the formation of soil for new forest lands, Dr. Josiah L. Lowe of New York State college of forestry declared.

"No other biological agency can begin to accumulate soil over rock, and allow Mother Earth to cover the raw scars left by flood, fire or wind," he pointed out. "Though slow, the process is steady, and fire-blackened areas or bare rocks slowly but inevitably take on a sightly and protective cover of green.

"Lichens are biological curiosities, because they are not one but two plants—two unrelated forms of plant life that have entered into a partnership to form a characteristic vegetative structure that can endure conditions which either, alone, could not survive.

"One of the partners is an alga, a very simple kind of microscopic plant that can make its own food, and the other is a fungus, something like a mushroom, which is dependent on the alga for food, but which assists in forming a firm protective shell about the delicate algal bodies."

Cure Potatoes Before Placing Them in Storage

When it's time to dig potatoes, handle them carefully and as little as possible to save labor and reduce bruising.

To keep well, potatoes should be well matured and reasonably free from disease and bruises. For the first 10 days or two weeks, keep the tubers at temperatures from 60 to 68 degrees Fahrenheit. This is a curing period which has much to do with reducing storage losses caused by shrinkage and decay.

Then cool the storage room to between 34 and 38 degrees F. This is the recommended temperature for tubers throughout the rest of the storage period. Below 34 degrees, potatoes tend to become sweet; above 38 degrees, rotting tends to develop and sprouting starts earlier.

Relative humidity or proportion of moisture of the air in storage is also important. Keep it between 85 and 95 per cent. In other words, the air should contain about all the moisture it can hold. It is often necessary to throw water on the floor to keep the storage room damp enough. This prevents tubers from shriveling.

Jersey Devil

The Jersey or Leeds Devil is an old superstition of southern New Jersey. This phantom, supposedly the unwanted child of a family named Leeds in Estelville, near Great Egg Harbor river, was cursed by his mother and transformed into a devil. On the second day of life he flapped his wings and flew off to the swamps. He has been described as a cloven-hoofed and winged kangaroo, with the disposition of a lamb despite a frightening appearance. Although regarded as a bad omen and countless chicken slaughters are laid to him, he is said to be harmless and inordinately fond of ham and eggs. Curiously tradition has it that the devil scares horses and in turn is terrified himself by women.

A hoax in 1905, credited to Norman Jeffries, publicity agent for the old Dime museum here, occurred when he hitched wings to a kangaroo and set it loose in New Jersey. After the proper degree of interest and terror were aroused he captured it and displayed it for a-dime-a-look in his museum.

Humidity Necessary

It is claimed by physicians and others familiar with the subject, that a certain amount of humidity is necessary to preserve good health in the household. It is held that colds, which are prevalent during the heating season, often result from overheated rooms, particularly where the percentage of moisture in the air is not sufficient. According to the "comfort chart," prepared by the American Society of Heating and Ventilating Engineers, a humidity of 45 per cent (saturation of the air) at 70 degrees F. room temperature is considered good from a comfort standpoint. In addition to health requirements, a certain amount of moisture is necessary in a house to prevent the drying out and opening of joints in furniture and woodwork. Too much moisture, however, may result in condensation, and because of these possibilities, it is quite essential that a proper average be maintained.

Sweet Pea Culture

One of the secrets of success in sweet pea culture is early planting. The sweet pea is a cool weather plant and thrives best in areas where summers are cool, such as certain sections of the Pacific Coast. In sections where extreme summer heat is common, such as midwest areas and southern areas, early planting is essential. In the north, this usually involves planting before the soil is workable to any great depth. Therefore the seedbed must be prepared the previous autumn if the seed is to be planted sufficiently early. Incidentally, the inability of sweet peas to grow and bloom satisfactorily, once hot weather sets in, explains the widespread custom of planting on St. Patrick's day. By planting so early, the plants mature and bloom before hot weather injures the vines.

Watch Your Kidneys

Help Them Cleanse the Blood of Harmful Body Waste

Your kidneys are constantly filtering waste matter from the blood stream. But kidneys sometimes lag in their work—do not act as Nature intended—fail to remove impurities that, if retained, may poison the system and upset the whole body machinery.

Symptoms may be nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—a feeling of nervous anxiety and loss of pep and strength.

Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.

There should be no doubt that prompt treatment is wiser than neglect. Use Doan's Pills. Doan's have been winning new friends for more than forty years. They have a nation-wide reputation. Are recommended by grateful people the country over. Ask your neighbor!

DOAN'S PILLS

QUICK RELIEF FOR HEAD COLD MISERY

When nostrils are clogged, nose feels raw, membranes swollen, reach for cooling Mentholatum. Speed-Jet (1) Helps thin out thick, stubborn mucus; (2) Soothes irritated membranes; (3) Helps reduce swollen passages; (4) Stimulates local blood supply, right to "sick" area. Every breath brings relief. Jars, tubes, 30¢.

MENTHOLATUM

Happy Relief When You're Sluggish, Upset

WHEN CONSTIPATION makes you feel sunk as the dickens, brings on stomach upset, sour taste, gassy discomfort, take Dr. Caldwell's famous medicine to quickly pull the trigger on lazy "innards", and help you feel bright and chipper again.

DR. CALDWELL'S is the wonderful senna laxative contained in good old Syrup Pepsin to make it so easy to take.

MANY DOCTORS use pepsin preparations in prescriptions to make the medicine more palatable and agreeable to take. So be sure your laxative is contained in Syrup Pepsin.

INSIST ON DR. CALDWELL'S—the favorite of millions for 50 years, and feel that wholesome relief from constipation. Even finicky children love it.

CAUTION: Use only as directed.

SUNDAY SCHOOL Lesson

BY HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for January 28

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

LOYALTY TO THE KINGDOM

LESSON TEXT—Matthew 6:33; 7:12, 16-29.
GOLDEN TEXT—Seek ye first the Kingdom of God, and His righteousness; and all these things shall be added unto you.—Matthew 6:33.

In the kingdom of Christ there must be unquestioned loyalty. If then He is the King of our lives, we as Christian men and women will want to live in accordance with His blessed will.

Loyalty to Christ leads to the best kind of living. It surpasses any experience of loyalty to a cause or a human personality. Instead of hindering or limiting our development, it opens wide the grand vistas of a life altogether worth-while. It is a life:

I. Well Ordered (6:33).

Much of the distress in which men and women find themselves is caused by the fact that their lives are not well ordered. They live in a constant flurry of uncertainty, indecision and disorder. They have no proper center for their lives, and consequently they are lopsided and lacking in real usefulness.

See how delightfully right is the experience and activity of a follower of Christ. He is the center. The interests of His kingdom are the first in thought. His righteousness is the rule of life. Other things? Well, all that is necessary, God adds day by day.

When the center of life is right, everything else is right—when that is wrong, all is wrong. Is your life centered in Christ?

II. Kind (7:12).

Spiritual principles apply to daily living, to our attitude toward our fellow men. Here we have the so-called Golden Rule. It is not the way of salvation; it is a summary of the teaching of the law and prophets. But it does provide us with a splendid principle of daily conduct.

Our active concern each day and in every touch with others is to be, "How would I like them to deal with me? Let me do thus to them." That is a higher standard than you think until you really try it. Only Christ can enable you to do it.

III. Fruitful (7:16-20).

Two fruit trees or vines may look almost alike until the fruit appears, and then we learn the true character of each—whether good or bad.

Every life brings forth some kind of fruit, and in its outward manifestation the life speaks of the inward condition of the life. Unclean and profane speech, hatred, dishonesty and trickery—these come out of an evil heart. Righteousness, pure and kindly speech, thoughtful actions, honest and straightforward dealings—these speak of the good heart.

The one whose life is centered in Christ (see above) is a vine after God's own planting. His roots strike deep down into the grace and mercy of God, and his fruit is the Christ-like grace of Christian character (see Gal. 5:22, 23).

IV. Genuine (7:21-23).

Lip service will not do (v. 21). Even an imitation of the real service of God's people, but rendered without the backing of a life of faith, will result only in disappointment and our Lord's own disavowal (vv. 22, 23).

The opposite of that is equally true. The real child of God works for Christ; he speaks of his Lord, and calls on His name. But in and through it all there is the evident ring of sincerity and genuineness which marks it as the real thing.

One does not hear much mention these days of hypocrites in the church. Perhaps we are too polite to speak of them, or it may be that we think them too obvious to need pointing out. But they are there, going through the motions of a Christian life, talking the language, and imitating the works, but completely dead spiritually.

V. Well Grounded (7:24-29).

The figure of speech changes. Instead of being likened to fruit trees, men's lives are said to be like houses, with their various kinds of foundations and superstructures.

The figure is an interesting and instructive one. There is only one foundation upon which one can build a Christian life. "Other foundation can no man lay than that is laid, which is Jesus Christ" (I Cor. 3:11).

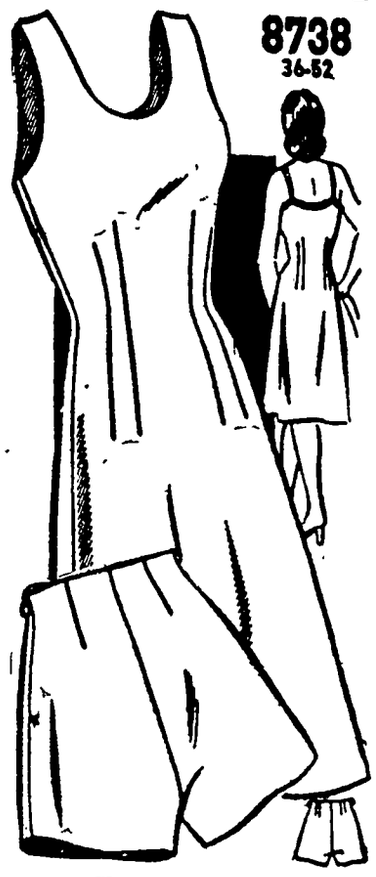
Therein lies the folly of the modernist or liberal. He has denied and rejected the only foundation—and yet tries to build a house of Christian character. When the real problems of life strike, he goes down in ruin.

On the other hand, let no Christian who has laid a foundation on the rock fail to go on and build upon it. Thus grounded, his house of faith will stand though the wind and rain and floods of life seek to tear it down. Of that kind of house we read that "it fell not: for it was founded upon a rock" (v. 25).

This lesson will afford many professed Christians a chance to test their lives and their loyalties by God's standards.

SEWING CIRCLE PATTERNS

Well-Fitting Slip for Larger Figure



Slenderizing Slip

AN IDEAL slip for the slightly heavier figure. This well fitting slip has darts to give it figure-hugging lines, and built-up shoulders that stay put. Nicely tailored panties make an attractive ensemble.

W. S. C. S. WOMEN WILL STUDY THE AMERICAN INDIAN

The W. S. C S. will meet at the Klemme Methodist Church, next week Thursday afternoon, Feb. 1 and will study "The American Indian" under the leadership of Mrs. John Waddingham.

Anyone possessing Indian relics is requested to bring them to the meeting.

The hostesses are Mesdames E. H. Patet, Lester Stille and Ernest Hipps

BASKETBALL SCHEDULE

Feb 2. Kanawha, there.
Feb. 8. Hayfield, here.
Feb 16 Garner, there.
Feb. 19. Britt, here.
Feb. 23 Swaledale, here.

OUR WISH FOR YOU—is that you are one of the fortunate ones who owns a labor-saving range that burns Shellane. For there is plenty of Shellane so that you can continue to enjoy the many advantages of cooking with this modern bottled gas.

In fact, owners of Shellane equipment can still count on us for prompt deliveries and service to their ranges, automatic water heaters or refrigerators.

To those who do *not* own labor-saving Shellane-burning equipment we suggest that you plan now to modernize your kitchen after the war . . . free yourself from the slavery of working with old-fashioned appliances. Drop in any time and let us show you the many advantages of Shellane, the modern bottled gas.

School Buses

KLEMME SCHOOL GIVEN GO-AHEAD SIGNAL ON PURCHASE OF BUSES

State O. D. T. Coordinator Paul B. Norris yesterday approved the purchase of two new school buses for the Klemme Schools The applications have gone to Washington, D C for final approval The decision of the Federal Government should be received in about 2 weeks, according to Supt A L. Kingery

The school board has placed an order with the Northern Lumber Company Implement Store for two new K-5 International chassis The bodies for the buses are made by the Wayne Company and are of 42 passenger capacity, each.

Routes have already been planned and approved by the O. D. T.

KLEMME COOP. GRAIN CO. HAD SUCCESSFUL YEAR

At the annual meeting of the Klemme Cooperative Grain Company, the reports read showed that the company had enjoyed one of its most successful years of operation.

In 1940 the company was re-organized under the Cooperative Law and memberships sold at $10 00 Since then the company has grown from 150 members in 1940 to over 240 members now.

Patronage dividend checks were handed out at the annual meeting which was attended by about 80 people, according to Manager Glen Bridges.

Besides Manager Bridges, three other men are now regularly employed at the elevator: Fred Bell, Henry Smid, and Dean Merkle.

HANCOCK PATIENTS IN STATE HOSPITALS COST $71.63 EACH, AVERAGE

The cost of Hancock County patients at the state hospital in Cherokee for the 4th quarter of 1944 was reported at $2,167 44, according to a statement received by the Hancock County auditor from the hospital. Thirty-one patients were cared for at the average cost of $71.63 for the quarter.

Bonds Over America

SAKOKAWEA

Credit for the success of Lewis and Clark's great expedition across the Rockies to the Pacific has long been attributed to Sakokawea, wife of a French interpreter. The Shoshone Indian girl with a baby on her back acted as guide, cook and emissary to the Indian tribes that murderously roamed the dangerous trails from Stanton, North Dakota, to the West Coast. Her statue adorns the State House lawn at Bismarck, serving as a constant inspiration to North Dakotans fighting to defend the great lands she opened to white men. Japs might already have a foothold on that land but for the supplies furnished American service men through the purchase of War Bonds. *U. S. Treasury Department*

AMERICAN HEROES
by JULIAN OLLENDORFF

Lieut. John A. Sabini, U. S. Marine Corps, of Washington, D. C., would not ask his men to do anything he would not do himself. To locate Nips on Bougainville, he deliberately exposed himself to draw their fire. His men knocked out the enemy. Wounded in the chest and left leg, Lieut. Sabini received the Silver Star medal for gallantry. Buy War Bonds to train more men to exterminate the Japs.
U. S. Treasury Department

Shamrocks Will Enter Sectional Tournament At Forest City

SECTIONAL TOURNAMENT TO RUN FOR FIVE DAYS

Shamrocks Draw Joice For Tuesday Night, February 27th

The Iowa High School Athletic Association has announced the boys sectional basketball tournaments would be extended over a 5-day period this year instead of the customary 3

The 2 extra days were added because there are more teams in the meets, and also so that not as many games will have to be played each night A total of 889 teams will compete this year compared with 873 last season.

New Rating This Year

The tournament series will operate on a new system this year. There will be 3 classes—AA for the schools with an enrollment of 401 or more, A—Schools with enrollment from 101 to 400 and B— for schools with enrollment 100 and below

The double A schools will not compete in the sectional tournaments but qualify automatically for the 16 district tournaments in which they will compete with the Class A schools.

The sectional meets will be held February 27 and 28 and March 1, 2 and 3 The association has announced the following pairings at Forest City where Klemme will compete:

Class A

Lake Mills vs. Garner, Thursday, 7 30 p m.

Forest City vs. Thompson, Thursday, 8:45 p. m.

Class B

Woden vs. Fertile, Tuesday, at 7:00 p. m

Scarville vs. Hanlontown, Tuesday, 8:15 p m.

Klemme vs. Joice, Tuesday, Feb. 27, at 9:30 p. m.

Hayfield vs. bye

Leland vs. bye.

Goodell vs. bye.

Ventura vs. bye.

Crystal Lake vs. bye.

Kanawha and Corwith will go to the sectional at Algona.

HANCOCK COUNTY FUNDS SHOW BALANCES

Hancock County supervisors approved the semi-annual report of Treasurer Roy L. McMillin.

The report discloses a balance on hand as of December 31 in the amount of . 616,258.47. On June 1, 1944, the balance on hand totaled $571,759.86.

Treasurer McMillin says that all funds show ample balances and tax collections in 1944 broke all previous records.

?

WILL THE GROUNDHOG SEE HIS SHADOW FRIDAY?

Friday, February 2nd is "ground hog" day; a day which is watched by the old-timers as a forecast on what to expect in the way of weather for the next six weeks.

According to tradition, if the sun is shining on February 2nd, the groundhog will be frightened by his shadow as he comes out of his den and will scamper back in for another six weeks as the weather will be too cold for him outside.

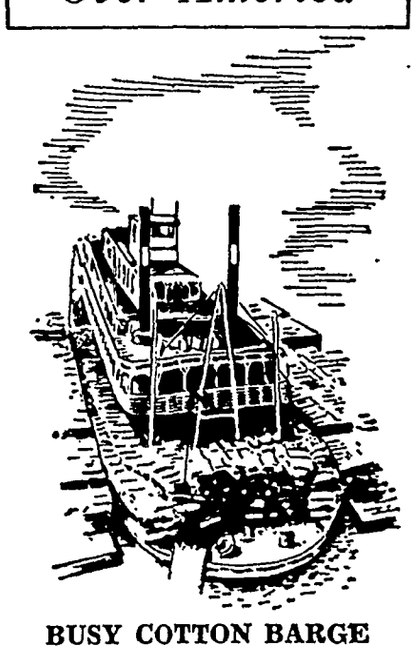
On the other hand, if the day is cloudy and gloomy, the groundhog will remain outside and we can expect an early spring.

PAPER LATE THIS WEEK

The publisher of The Times, also the linotype operator, pressman, ad-man, makeup man, and what have you, all wrapped up in one package, was "under the weather" for a couple of days and unable to do much work in the shop, so the Times is a bit late this week.

The war will be over some day and we will hire a flock of printers to run this outfit.

Bonds Over America



BUSY COTTON BARGE

Cotton, coal, steel and marble have contributed greatly for the past 60 years to the growth and prosperity of Alabama. Busy barges groaned but kept going under heavier cargoes just as they had plied the rivers for decades when life was more colorful and a continual struggle. The real upturn in Alabama's affairs started in 1880 and has continued. It has brought better working and living conditions. The war brought added calls for cotton, added loads for the barges. Men on the fighting fronts need cotton and more War Bonds must be purchased to pay for it. Cotton, barges, War Bonds . . . all needed to win the war.
U. S. Treasury Department

Shamrocks Finish Runner-Up In County Cage Tournament

SHAMROCKS LOST TO BRITT BY ONE POINT IN FINALS

Inability To Cash In On Free Ones Cost Shamrocks Championship

The Klemme Shamrocks battled their way to the top of the Annual Hancock County Tournament by first defeating Crystal Lake 38 to 11; Garner was next put out of the running 29 to 18 and then the fast Hayfield team hit the Shamrocks for 21 to 15 drubbing, to put the Shamrocks into the championship game against Britt only to lose that one by failing to cash in on free throws.

In the championship game, the Shamrocks outplayed Britt on the floor by scoring 12 field goals, against 10 for Britt. However, the Britt Eagles had an eagle-eye on their free throws and made 5 out of 11 tries, while the Shamrocks were only able to make 2 out of 12. And there is why the Shamrocks lost the championship.

In the consolation final Hayfield took the measure of the Woden team in a game that went 2 overtime periods, 26 to 24. The game was tied at 12 all at the half and 22 all at the end of the regular playing period. During the first overtime period each team made 2 points with the extra session ending 24 all. Horecka of Hayfield dumped in a basket at the end of one minute of play in the second overtime thus giving Hayfield the victory.

In the Britt-Klemme game the Eagles defeated the Shamrocks by one point, 27 to 26 After getting off to an early 8 to 2 lead in the first quarter the Britt team faltered as the Shamrocks forged ahead to a 12 to 11 lead at the half.

During the second half the lead see-sawed and was close all the way, with Britt leading 19 to 18 at the end of the third quarter

The Shamrocks lost the services of Jacobs, who went out in the 3rd quarter after he had made 6 points. Brinkman lead the Shamrocks with 10 counters, and Peterson of Britt led his team with 8.

Supt. S. T. Tweed reports that seven hundred fans saw the games Saturday night, and that over 2 500 paid admissions were reported for the four nights of the tournament and that receipts totalled $943.00

FIRST AID MEETING

There will be a meeting for all those who have taken first aid, are interested in the same, at Britt on February 2, at 2:00 p. m.

Xmas Seals

1944 CHRISTMAS SEAL SALE TOTALS $2,367.70 IN COUNTY

Workers Held Meeting At Garner Saturday To Discuss Plans

The Hancock County workers of the 1944 Christmas Seal Campaign met at the Garner cafe Saturday for a one o'clock luncheon. Sixteen members were present and regular busines was taken up and plans made for the 1945 campaign. The present officers were re-elected for the coming year.

Town and township reports were given. In Magor township, Mrs. Bill Erdman heard from all but 1 letter she sent out, a near 100 per cent return.

In Twin Lake township, Bernice Tanner had 16 people who took 2 sheets of stamps, and 66 others who purchased one sheet, making a fine showing for Twin Lake.

Mrs. Lloyd Raber, Kanawha, presented the following report on the 1944 sale of stamps:

Township	Chairman	Amount
Amsterdam:		
	Mrs. H. J. Johnson	$ 85.95
Avery:		
	Mrs. Henry Ostendorf	82.51
Bingham:		
	Mrs. Fred Bentele	64.75
Boone:		
	Mrs. J. E. Gourley	91.20
Britt:		
	Mrs. H. L. Lee	81.07
Concord:		
	Mrs. Peter Engstler	64.40
Crystal:		
	Mrs. Elmer Griggs	52.50
Ell:		
	Mrs. E. J. Schneider	92.00
Ellington:		
	Mrs. Harvey Sorenson	105.02
Erin:		
	Mrs. Floyd Friedow	62.50
Garfield:		
	Mrs. Arthur Hanselman	74.70
Liberty:		
	Mrs. Frank Bredlow	111.15
Madison:		
	Mrs. C. M. Lackore	85.45
Magor:		
	Mrs. W. G. Erdman	104.73
Orthel:		
	Mrs. Jerry Fox	75.80
Twin Lake:		
	Miss Bernice Tanner	104.45
Town	**Chairman**	**Amount**
Corwith:		
	CorwithW omans Club	$101.38
Crystal Lake:		
	Mrs. Harry Rose	46.55
Garner:		
	Mrs. W. G. Williams	276.91
Goodell:		
	Mrs. Voral Finn	40.50
Kanawha:		
	Kanawha Womans Club	172.26
Klemme:		
	Mrs. Martha Bredbenner	102.00
Woden:		
	Mrs. J. C. Helm	58.90
Britt:		
	Britt Jr. Womans Club	231.02
	Total	**$2,367.70**

By the above report it will be seen that Liberty Township was at the top of the townships, with Ellington, second and Magor and Twin Lake practically tied for the third place. Garner led the towns and Britt was second, Kanawha, third, and Klemme fourth.

The campaign was a real blow to tuberculosis, a disease that is being rapidly stamped out. The seals provide funds for eradicating the disease. The people of Hancock County are to be commended for their fine support in buying Christmas Seals so generously.

AUTO STOLEN AT BRITT FOUND AT CENTERVILLE

Hancock County Sheriff L. M. Brower and Treasurer Roy L. McMillin drove to Centerville Wednesday to claim a car which was stolen recently from H. L. Ryerson of Britt. The youth who stole the car was apprehended at the county treasurer's office at Centerville when he tried to secure a transfer for the car.

Mr. Ryerson accompanied the 2 officials to drive his car back.

PROMOTED

S-SGT. GEO. NEITLAND

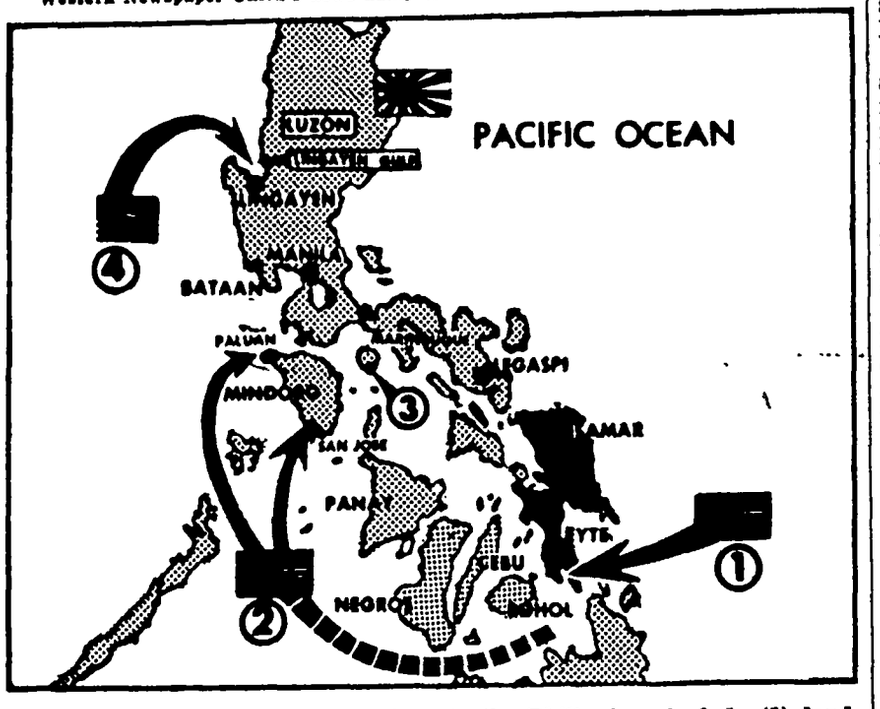
Mr. and Mrs. Ben Neitland, Klemme, have received word that their son, George Neitland, was recently promoted from Technician 4th class to Staff Sergeant. S-Sgt. Neitland has been over-seas over two years in the Pacific area and at present is in New Guinea. He is an engineer. George writes that he expects to receive a transfer and may be home in a couple of months.

WEEKLY NEWS ANALYSIS

Great Battle Shapes As Yanks Move on Manila in Philippines; Extend Controls on Home Front

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)



Key steps in MacArthur's return to the Philippines include (1) landing on Leyte and neighboring islands; (2) invasion of Mindoro; (3) landing on Marinduque, and (4) great invasion of main island of Luzon.

PACIFIC:
Battle Looms

On the great plain leading southward to Manila in Luzon, the decisive battle of the Philippines shaped up, as the U. S. Sixth army moved inland from an expanding 25 - mile beachhead on Lingayen Gulf and the Japanese brought up troops to counter the liberators.

General MacArthur Outfoxed Wily Foe

As the first large-scale open fighting of the whole Pacific campaign loomed, after three years of arduous undercover jungle warfare, U. S. war planes clouded the Philippine skies in endless attacks upon enemy installations and lines of communications leading to the big battleground.

Like a good prize-fighter, General MacArthur struck on Luzon in a 800-ship, 70-mile long convoy after successfully feinting the enemy out of position, with the result that the American landings were almost bloodless. In establishing a base on Leyte, and overrunning Mindoro and Marinduque, all just south of Luzon, MacArthur compelled the enemy to keep a strong guard strung below Manila. Then, he moved to the north.

With Luzon the center of their whole Philippine defense system guarding the Asiatic mainland, the Japanese appeared determined to put up a stiff fight for it, with the enemy's top field marshal, Tomoyuki Yamashita, reportedly commanding some 200,000 troops.

Working in close coordination with the ground forces, Adm. Chester Nimitz' Pacific fleet rode the enemy's inner sea lanes in an effort to prevent the Japanese from rushing reinforcements to their Philippine armies.

EUROPE:
Back Again

Their drive stopped, their flanks under increasing pressure from Field Marshal Montgomery's forces on the north and Lieutenant General Bradley on the south, the Germans slowly withdrew from their big bulge in Belgium and Luxembourg, seeking satisfaction in their claims that the offensive had relieved Allied pressure on the Ruhr and Saar.

Meanwhile, the Nazis continued their limited offensive in Alsace on the southeastern end of the winding 460-mile front, shifting the weight of their attacks to the Strasbourg region after the U. S. Seventh army blunted their attempt to split it in two near Bitche.

Although relinquishing most of the ground gained during the initial burst of his great December offensive, Field Marshal Von Rundstedt managed to extricate the bulk of his forces from the bulge, leaving only scattered rearguards to cover his retreat through the swirling blizzards.

By diverting the bulk of Allied forces with the drive into Belgium, the Nazis claimed, they preserved much of their war-making potential by temporarily stalling the drives on the great steel, chemical and coal centers of the Ruhr and Saar.

Action on the eastern front continued to center in Hungary, though the Russians were reported probing into German defenses in the Baranow region, some 120 miles below Warsaw on the road to Silesia.

HOME FRONT:
Tighten Economy

Congressional hearings on a work or fight bill for men from 18 to 45 years old; imposition of an $18 ceiling per 100 pounds on live beef cattle; an appeal to householders to keep temperatures at 68 degrees, and a ban on all advertising lighting using power developed from coal marked the government's latest moves on the home front to fit the nation into the tightening war economy.

Considered after President Roosevelt's demand for a national service act, the work or fight bill under discussion provides for the induction of any draft registrant from 18 to 45 into army labor battalions if he fails to enter essential employment or shifts jobs without permission of local boards. With the services planning to take 900,000 men within the next six months, and with another 700,000 persons needed in essential war work plus replacements for those drafted from industry, some sort of legislation was held to be the most effective way for routing manpower in the future.

Regarding the draft, Secretary of War Stimson said practically all able-bodied men under 30 will be drafted this year, because of the services' emphasis on younger men.

Establishment of an $18 ceiling on live cattle up to July 2, when the top will fall to $17.50, came after lengthy discussion between government representatives and feeders, who declared the move would result in less choice beef because of rising production costs. Emphasizing its desire for output of more low grade beef, Economic Stabilizer Vinson ordered OPA and War Food administrator to limit choice and good cattle slaughter for each month.

The appeal to householders to keep temperatures at 68 degrees, and the order to cut off advertising lighting, were both aimed at conserving fuel, what with estimated consumption of soft coal for 1945 set at 620,000,000 tons and production at 580,000,000, with the latter figure reflecting a reduction of 45,000 in the mining force since 1943. Furthermore, the industry's stockpiles amount to only one month's supply.

Exclusive on Farm Draft!
By Walter Shead
WNU Washington Correspondent

The farm public is unduly alarmed over the recent directive of War Mobilizer James F. Byrnes subjecting 360,000 agricultural workers 18 to 26 to induction in the new mobilization of manpower for the army and navy, according to farm leaders in the nation's capital.

There is no evidence, they say, that the Selective Service commission intends to nullify the Tydings amendment to the Selective Service act, which specifically provides for deferment of farm labor, if replacements are not available, and if local draft boards determine the workers are more essential on the farms.

It could be, authorities say here, that if there are any farm workers who have left the farm for other work . . . if there are any who may be considered non-essential, such as workers on hop farms, or mushroom growers . . . they may be called to military service under reclassification.

FOOD:
1945 Prospects

So far well fed Americans can continue to look forward to substantial nutritious fare in 1945 although supplies will be below last year's, WFA Supply and Distribution Director Lee Marshall declared.

Although there will be about the same amount of beef, there will be less pork, veal and lamb, Marshall said. Poultry supplies should be larger.

Supplies of dairy stocks will be spotty, Marshall predicted, with more fluid milk, enough evaporated milk to meet essential needs, but less butter.

Although in good supply, the volume of fresh fruits and vegetables for the next three months will not approach last year's, Marshall said. Offsetting a slight increase in the supply of canned vegetables for 1945 will be about 12 per cent less canned fruits and juices.

Cereal products will be plentiful but the sugar situation will be tight, the WFA official declared, because of smaller reserves and increased military requirements.

PEACETIME DRAFT:
Hit by Colleges

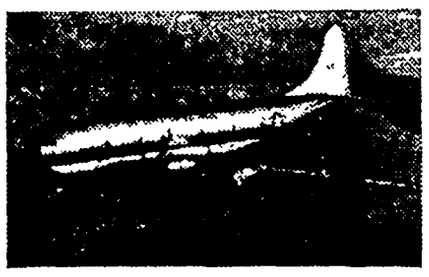
Although pledging full support for an adequate defense program, the Association of American Colleges went on record as against immediate enactment of compulsory peacetime military training for youth because other methods have not been fully explored and the subject should be given more study than now is possible.

Chairman of the committee drawing up the resolution against immediate enactment of peacetime conscription, Dr. Donald J. Cowling, president of Carleton college, said: "This country did not get into the present mess through lack of manpower, but because it lacked a real foreign policy, as was evidenced in failure to apply economic sanctions against Japan and Italy."

In the field of education, the association found " . . . menacing possibilities (in compulsory military training) that indoctrination — its traditional method of wholesale teaching — might become a dangerous political weapon with us as has been true in other countries. . ."

RECORD FLIGHT:
Postwar Promise

Model of America's super airliner of the postwar world, Boeing's converted B-29 army transport flew from Seattle, Wash., to Washington, D. C., in an indicated six hours, surpassing the giant Lockheed Constellation's time of 6 hours and 58 minutes from Los Angeles, Calif., to the capital.



"Strato-cruiser" in flight.

To be known as the "strato-cruiser," the postwar version of the B-29, now known as the army's C-97, will carry 100 passengers and use engines of more than 3,000 horsepower each.

Although army officials refused to comment on the B-29's record flight, the ship has been undergoing service tests on the west coast since November with gratifying results, it was learned.

BUDGET:
87 Billion Asked

Total authorizations for the war program since 1940 will have reached 450 billion dollars by June 30, 1946, with President Roosevelt's request for an 87 billion dollar budget for the next fiscal year ending on that date.

At 87 billion dollars, the President's budget was about 13 billion dollars below last year's 100 billion dollars, with most of the reduction in war expenditures. Because of decreased war expenditures, however, individuals and corporations will receive less income and pay less taxes, with revenue expected to go down to about 41 billion dollars. By the end of June, 1946, the national debt will reach 292 billion dollars, the President estimated.

Included in the President's budget was a request of 2½ billion dollars for veterans' benefits, which can be expected to increase upon demobilization, he said, and the asking of a half billion dollars for the War Food administration for the farm price support program. He also requested that the borrowing authority of the Rural Electrification system be raised to 150 million dollars and that of the Farm Security administration to 125 million.

EGGS:
New Program

In a program separate from price support, the government reportedly planned the purchase of from 1,000,000 to 3,000,000 cases of shell eggs for shipment to Great Britiain, with the possibility that success of the venture may lead to the development of a postwar trade in that country, which imports the produce in peacetime.

The shell egg program is in addition to the government's intention to dry about 365,000,000 pounds of eggs.

WACS SAVE UNCLE SAM $2,700,000 YEARLY ON FOOD BILL

The rigor of army life notwithstanding, the WAC, true to her femininity, still eats less than the average G.I., the war department has discovered, with the result that a readjustment of the women's army corps' menu will effect a $2,700,000 annual saving to Uncle Sam.

The WAC, though a soldier and leading an active life, does not eat a man's ration. She can be adequately nourished on rations providing 3,100 calories per day—which is 650 calories less than the number required by male soldiers, but is still 600 calories over the minimum recommended by the national research council for the moderately active woman.

The WAC likes about the same food that her soldier brother likes, but in different quantities.

Ernie Pyle's Slant on the War:

Lack of Experience at First Slowed Up Allies

American Algerian Troops Were Green and Officers Unseasoned

By Ernie Pyle

(Editor's Note): This dispatch was written and first published when Pyle was with the G.I.s at the Algerian front. He is now on his way to cover the boys in the Pacific war zones.

ORAN, ALGERIA.—Men who bring our convoys from America, some of whom have just recently arrived, tell me the people at home don't have a correct impression of things over here.

They say people at home think the North African campaign is a walkaway and will be over quickly; that our losses have been practically nil; that the French here love us to death, and that all German influence has been cleaned out.

Ernie Pyle

If you think that, it's because we newspapermen here have failed at getting the finer points of the situation over to you.

Because this campaign at first was as much diplomatic as military, the powers that be didn't permit our itchy typewriter fingers to delve into things internationally, which were ticklish enough without that. I believe misconceptions at home must have grown out of some missing part of the picture.

It would be very bad for another wave of extreme optimism to sweep over the United States. So maybe I can explain a little bit about why things over here, though all right for the long run, are not all strawberries and cream right now.

In Tunisia, for instance, we seem to be stalemated for the moment. The reasons are two. Our army is a green army, and most of our Tunisian troops are in actual battle for the first time against seasoned troops and commanders. It will take us months of fighting to gain the experience our enemies start with.

In the second place, nobody knew exactly how much resistance the French would put up here, so we had to be set for full resistance. That meant, when the French capitulated in three days, we had to move eastward at once, or leave the Germans unhampered to build a big force in Tunisia.

So we moved several hundred miles and, with the British, began fighting. But we simply didn't have enough stuff on hand to knock the Germans out instantly. Nobody is to blame for this. I think our army is doing wonderfully—both in fighting with what we have and in getting more here—but we are fighting an army as tough in spirit as ours, vastly more experienced, and more easily supplied.

* * *

Our losses in men so far are not appalling, by any means, but we are losing men. The other day an American ship brought the first newspaper from home I had seen since the occupation, and it said only 12 men were lost in taking Oran.

The losses, in fact, were not great, but they were a good many twelves times 12.

Wounded to England.

Most of our convalescent wounded have been sent to England. Some newly arrived Americans feel that, if more of the wounded were sent home, it would put new grim vigor into the American people. We aren't the sort of people from whom wounded men have to be concealed.

* * *

The biggest puzzle to us who are on the scene is our policy of dealing with Axis agents and sympathizers in North Africa. We have taken into custody only the most out - and - out Axis agents, such as the German armistice missions and a few others. That done, we have turned the authority of arrest back to the French.

The procedure is that we investigate and they arrest. As it winds up, we investigate—period.

Our policy is still appeasement. It stems from what might be called the national hodgepodge of French emotions. Frenchmen today think and feel in lots of different directions. We moved softly at first, in order to capture as many French hearts as French square miles. Now that phase is over. We are here in full swing.

We have left in office most of the small-fry officials put there by the Germans before we came. We are permitting fascist societies to continue to exist. Actual sniping has been stopped, but there is still sabotage.

The loyal French see this and wonder what manner of people we are. They are used to force, and expect us to use it against the common enemy, which includes the French Nazis. Our enemies see it, laugh, and call us soft.

Both sides are puzzled by a country at war which still lets enemies run loose to work against it.

* * *

There are an astonishing number of Axis sympathizers among the French in North Africa. Not a majority, of course, but more than you would imagine. This in itself is a great puzzle to me. I can't fathom the thought processes of a Frenchman who prefers German victory and perpetual domination rather than a temporary occupation resulting in eventual French freedom.

But there are such people, and they are hindering us, and we over here think you folks at home should know three things:

That the going will be tough and probably long before we have cleaned up Africa and are ready to move to bigger fronts. That the French are fundamentally behind us, but that a strange, illogical stratum is against us. And that our fundamental policy still is one of soft-gloving snakes in our midst.

* * *

Nurses are Tops.

The American nurses over here—and there are lots of them—have turned out just as you would expect: wonderfully.

Army doctors, and patients, too, are unanimous in their praise for them. Doctors tell me that in that first rush of casualties they were calmer than the men.

One hospital unit had a nurse they were afraid of. She had seemed neurotic and hysterical on the way down. The head doctor detailed another nurse just to watch her all through the hectic first hours of tending the wounded. But he needn't have. He admits now she was the calmest of the lot.

The head of one hospital, a colonel who was a soldier in the last war, worked in the improvised hospitals set up at Arzow to tend the freshly wounded. He says not a soul in the outfit cracked up or got flustered.

"You're so busy you don't think about its being horrible," he says. "You aren't yourself. Actually you seem to become somebody else. And after it's over, you're thrilled by it. Gosh, I hope I'm not stuck in a base hospital. I want to get on to the front."

* * *

The Carolina nurses of the evacuation hospital about which I've been writing have taken it like soldiers. For the first 10 days they had to live like animals, even using open ditches for toilets, but they never complained.

At this tent hospital one nurse is always on duty in each tentful of 20 men. She had medical orderlies to help her. In bad weather the nurses wear army overalls.

But Lieut. Col. Rollin Bauchspies, the hospital commandant, wants them to put on dresses once in a while, for he says the effect on the men is astounding.

The touch of femininity, the knowledge that a woman is around, gives a wounded man courage and confidence and a feeling of security. And the more feminine she looks, the better.

Only about 100 of the hospital's 700 patients are wounded men. The others are just sick with ordinary things, such as flu, appendicitis, sprains. They've got a whole tentful of mumps, and a few cases of malaria and dysentery.

At the far end of the hospital, behind an evil-looking barricade of barbed wire, is what Colonel Bauchspies calls "Casanova park." Back there are 150 soldiers with venereal disease.

"What's the barbed wire for?" I asked. "They wouldn't try to get out anyhow."

"It's just to make them feel like heels," the colonel said.

Army Hospital Cuts Red Tape

The hospital already has handled more than 1000 patients and hasn't lost a one. The doctors run to the nearest stake and knock on wood when they say it. The surgeons have performed more than 125 operations.

There's no red tape about whether a patient is legally entitled to enter the hospital or not. They take anybody who comes—soldier, civilian, Arab, Frenchman, anybody.

The other day we were looking at those round-bellied iron stoves half-buried in the ground in each tent.

"What do you burn in them?" I asked Lieutenant Colonel Bauchspies.

"Wood," he said.

"Where do you get the wood?" I asked.

"Steal it," he said.

SNAPPY FACTS ABOUT RUBBER
Technical men say that about three gallons of alcohol are used to produce sufficient butadiene to make an average-size synthetic tire.
Use of synthetics and alternate materials, particularly in field wire and telephone cable, resulted in the conservation by the Signal Corps of the U. S. Army of more than 12 million pounds of crude rubber in the first 4 months of 1944.
The importance of rubber tires to the economy of Michigan is indicated by the fact that 65.2 per cent of all inbound and 69 per cent of all outbound freight in that state is carried by motor truck.

ecent Deaths of Two Men, One in the West and he in the East, Recall Days When Gunfighters rote Their Names in Blood in the 'Wild West'

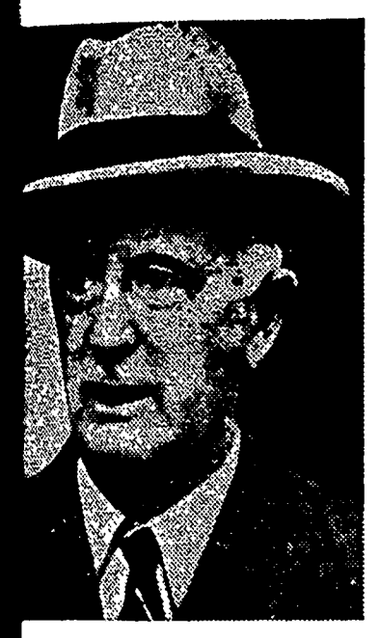
ELMO SCOTT WATSON
eased by Western Newspaper Union.

HE Old West lived again ecently and, paradoxically, ved again because of the ths of two men within the of two weeks.

e of them died in the West the other in the East, but had once been closely as- ated with events in what once known as the "Wild t" — the West of roaring towns and rowdy mining ps, of quick-shooting peace ers and equally hair-trig- fingered outlaws, of lusty, on-filled life and Boot Hill als.

en death claimed the Rev. En- t Peabody at the age of 87 in on, Mass., newspaper dis- hes chronicled the fact that he been the founder of the Groton ol and its headmaster for many s, during which time he had ed the minds and characters of an eastern notable, including ident Franklin Delano Roose- But few, if any, of these dis- hes mentioned the fact that this Rev. Endicott Peabody had lived and labored in one of the est towns in the history of the rican frontier — Tombstone, ona.

o such an environment in the mer of 1881 came a young Epis- l minister, recently ordained in on, and what happened there- is best told in the words of a who knew him then and there. man was William M. Breaken- e, who was one of Sheriff John- Behan's deputies in Tombstone he time. In his book, "Helldo-



DR. ENDICOTT PEABODY

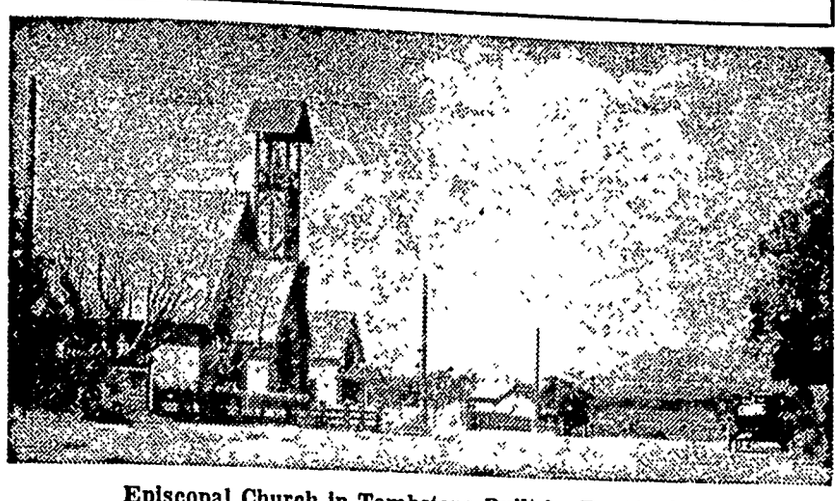
o: Bringing the Law to the Mes- e," published by the Houghton lin company in 1928, "Billy" akenridge writes of "The Fear- Preacher" thus:

His name was Endicott Peabody. was about twenty-four years of and full of vim and energy. immediately got busy building up membership for his congregation getting funds together to build hurch. He was a good mixer and n got acquainted, not only with very best element of society in nbstone—and there were some cated people there—but he un- took to get acquainted with ev- body, with the mining magnates managers, the federal, county city officials, the professional business managers, the miners muckers, the ore-haulers or nsters, and the saloonkeepers gamblers. He soon had a large gregation and had the money do- ed to build his church. When it s completed, he had the money pay for it, and the church has er been in debt since."

How the Money Was Raised.

n incident which Breakenridge tes sheds light on the young acher's money-raising ability. day a group of mining men, luding E. B. Gage, general man- r of the Grand Central and Con- tion mines, was sitting in a back m of the Prospector hotel enjoy- a stiff poker game in which fre- ntly as much as a thousand dol- was in the pot.

Gage was an Episcopalian," tes Breakenridge. "Mr. Pea- y came back where they were ying and introduced himself and ed them for a donation to help ld a church. He explained that was something needed badly, and only way it could be built was get everybody he possibly could subscribe toward building it. e counted out about a hundred fifty dollars from his pile in t of him, and everyone else in



Episcopal Church in Tombstone Built by Dr. Peabody.

the room followed his example. Peabody was dumbfounded for an instant, and then told them that it was a much larger contribution than he had expected, but it was for a good cause and he knew they would never regret it.

"Peabody was a fine athlete, and was named the official referee in all baseball games and other outdoor sports that were carried on by the young men of Tombstone. His decisions were never questioned, as he was known as being absolutely square and he had no favorites. He loved a good horse-race, and frequently attended the gymnasium where he kept himself in fine physical condition by exercise; he never refused an invitation to put on the gloves with anyone and never was bested."

Bad Man "Backs Down."

Perhaps that fact had something to do with the "back-down" of one of the bad men who infested Arizona in those days when he tried to bluff the "fearless preacher." Breakenridge tells the story thus:

"In the summer of 1881 the Reverend Mr. Peabody was invited down to Charleston to deliver a sermon. His subject was the evil of the cattle-stealing rustlers and the drinking and carousing cowboys. Billy Claybourn, the would-be bad man who had killed one or two in saloon fights in Charleston and who was afterwards killed by Frank Leslie in Tombstone, heard of the sermon and sent word to Mr. Peabody that if he ever came to Charleston again and preached such a sermon, he, Claybourn, would come to the church and make him dance. Peabody told the man who delivered the message that he expected to return to Charleston in about two weeks, and would preach a sermon that he thought appropriate, and if Mr. Claybourn would come to the church and listen to it, and then thought he could make him dance, to try it.

"Peabody was known to go into the saloons and gambling-houses and go up to the gambling-tables when they were in operation, with a crowd around them, and say 'Gentlemen, I am going to preach a sermon on the evil of gambling Sunday night, and I would like to have you all come to the church and listen to it.' All who could get away went to hear him. He had large audiences always."

Less than two weeks after the death of Dr. Peabody, the wires carried the news that Albert Bacon Fall had died at the age of 83 in El Paso, Texas. The news of his passing served to recall briefly a great national scandal in the recent past—how Senator A. B. Fall of New Mexico was appointed secretary of the interior in President Harding's cabinet, how he was one of the chief figures in the Teapot Dome oil case, and how he became the first cabinet officer in American history to serve a prison sentence for a crime.

Again few, if any, of the newspaper accounts gave much space to his career as a young lawyer in the Southwest nor told of his association with some of the notables of the frontier. Yet he was the attorney for the defense who won freedom for the slayers of two famous gunfighters—both of whom illustrate the truth of the age-old saying that "he who takes the sword perishes by the sword."

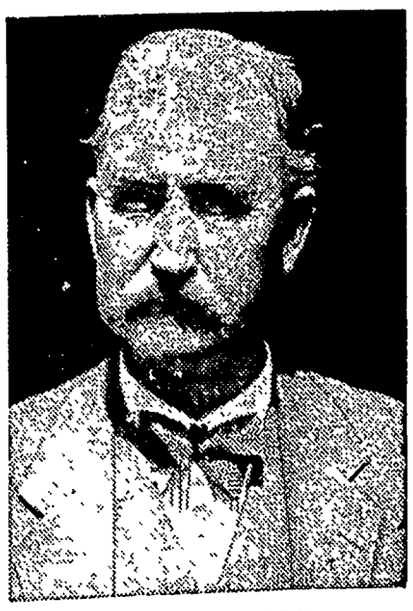
One of these gunfighters was John Wesley Hardin of Texas, possibly the most notorious killer in the annals of the "Wild West" and popularly credited with 40 notches on his six-gun—39 of them before he was 21 years old.

The 40th notch—it was Deputy Sheriff Charles Webb of Brown county—put Hardin in the penitentiary for 15 years. He employed them usefully, studying law, and after his release in 1894 he hung out his shingle in various Texas towns, ending up in El Paso the following year. There he became involved in a dispute with the Selmans—Young John, a city policeman, and Old John, a constable who had a record as a killer himself. The result was that on the night of August 19, 1895, Hardin went down before the blazing six-shooters of Old John Selman—shot from behind, so his friends said, as he stood drinking at the bar of the Acme saloon.

Selman, when tried for the killing, denied that he had shot Hardin in the back. He insisted that Hardin was looking him straight in the eye and apparently about to draw his gun when the constable fired. A young attorney, named Fall, who had just come to El Paso, agreed to assist in Selman's defense. Years later, Ex-Senator Fall, recalling the case, told Eugene Cunningham, author of "Triggernometry: A Gallery of Gunfighters":

"I couldn't help being impressed by Selman's appearance when he assured me that he had been looking Hardin in the eye. I knew Selman well and I felt that he wouldn't lie to me and he had all the appearance of a man telling what he firmly believed. It puzzled me, so I went down to look over the scene of the killing. I stopped at the Acme's door and looked inside. There was a man standing at the bar and he lifted his head. Then I had the explanation of Selman's statement. For as that man stared into the mirror, I had the illusion for an instant of looking him straight in the eye." Apparently Fall's explanation was convincing to the jury, for Selman was freed.

"Few of the gunmen of that era lived past the turn of the century," says an editorial on the passing of Albert B. Fall which appeared in the Chicago Daily News recently. An exception to that statement is Pat Garrett, slayer of Billy the Kid, the 21-year-old gunman with the 21 notches. That killing made Garrett a national figure. Three times he was elected sheriff of Donna Ana county in New Mexico. In 1901 President Theodore Roosevelt appointed him collector of customs in El Paso, Texas. Then he retired from public life and took up ranching in New Mexico. He had a dispute over some trifling matter with a comparatively unknown young



ALBERT B. FALL

man named Wayne Brazel and on February 29, 1908, a shot from Brazel's six-shooter ended the career of the great Pat Garrett.

Brazel was tried for the killing and acquitted. His attorney was Albert Bacon Fall. "Few of the men who knew these gunmen or who saw them alive remain alive today," continues the Daily News editorial. "Albert Fall knew a lot about many of them. It was popularly believed in the Southwest that he might, if he chose, shed light on mysterious circumstances surrounding the sudden demise of a number of them. But, if he could, he didn't. And, with his death, another colorful segment of frontier history grows fainter and recedes farther and farther into the fabulous past."

amblers Helped the Rev. Endicott Build His Churchyard Fence

Tombstone was unique among the ntier towns that have achieved id distinction in the history of the erican West. It had, according its legend, its man for breakfast ry morning, but it was touched h the refinements of old and or- ed communities. It was isolated an Arizona desert, but civilization just over the horizon. . . . A ing town in the heart of a cattle ntry, it had the picturesqueness a boom silver camp and the col- our of a trail-end, cowboy capital. It was a town of lawlessness and law, saloons and schools, gambling halls and churches, lurid melodrama and business routine, red lights and altar candles . . .

The Rev. Endicott Peabody, educated at Cheltenham and Cambridge university in England, and now rector of the Tombstone Episcopal church, is anxious to have the churchyard fenced and takes up a collection for the purpose. His congregation gives meagerly. Gamblers playing poker in the Crystal Palace learn of the good pastor's disappointment and, with their compliments, send the Rev. Peabody the kitty from the night's play, the kitty comprising chips taken out for all hands above two pair. The Rev. Peabody returns a note of polite thanks and the church fence is built. —Walter Noble Burns in "Tombstone: An Iliad of the Southwest."—Doubleday, Page & Co., Publishers.

IMPROVED UNIFORM INTERNATIONAL

SUNDAY SCHOOL Lesson

BY HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for February 4

JESUS' CONCERN FOR ALL

LESSON TEXT—Matthew 9:1, 9-13, 18-26.
GOLDEN TEXT—Therefore all things whatsoever ye would that men should do to you, do ye even so to them: for this is the law and the prophets.—Matthew 7:12.

What is a man worth? Well, say we, that depends, and then we are prone to undervalue him. Jesus had (and taught) a high regard for the inherent value of man. He saw possibilities in all men. He had a love for them. He was concerned about their welfare, and they responded by an interest in Him.

Jesus showed by His dealings with men how wrong are most of the standards and attitudes of the world. With Him there were:

I. No Social Barrier (vv. 1, 9, 10).

The caste system of some lands, dividing people into social strata which separate men and hinder fellowship, does not exist in our land. Yet, in practice, we have such levels which are a formidable barrier in the thinking of many (perhaps most) people.

Jesus knew nothing of social barriers. He ignored them and went straight to the one in need. In our lesson it was a man of position and wealth who was an outcast among his people because he was a hated gatherer of taxes for Rome.

Jesus saw in him a man of faith and a useful witness for Him. And He not only talked with him, but called him to be His disciple. Then He went further and, to the astonishment of His critics, went in to a great feast where many such men were gathered.

He ate with publicans and sinners, not because He approved of their manner of life, but because He wanted to change it as He changed them.

II. No Fear of Criticism (vv. 11-13).

Many a kind and noble impulse has died a-borning because of the fear of criticism. "What will people say?" has kept many a Christian from speaking to some sinner about his (or her) soul.

"The world is too much with us—" and we all too often guide our lives and service by the possible reaction we may receive from those round about us. We did not learn such an attitude from Jesus.

His answer to His critics made it clear that there will be no self-righteous, "good enough" people in heaven. The Lord is not even calling them, so long as they trust in their own goodness. He came to seek and to save sinners (v. 13, and Luke 19:10).

We, too, may go forward without fear of our critics. That doesn't mean that we "don't care what people think" about us. We ought to care, but if their opinion is based on unbelief and self-righteousness, it should certainly not deter us from our all-important business of soul-winning.

III. No Limitation of Time and Place (vv. 18-22).

Often the help of man to those in need is circumscribed by so many regulations that those who most deserve help cannot get it. There are times and places for application forms, and tests must be completed, etc. Doubtless much of this is needed, but one wonders at times whether our charitable impulses have not disappeared under a mountain of red tape.

Be that as it may, how interesting it is to see that Jesus met the need when and where it appeared. He was already on one errand of mercy when the sick woman touched His robe. He was not too busy nor too preoccupied to stop and give her a word of help and comfort (v. 22).

Is there not a significant lesson here for us in the church? The need is reason enough for the extension of our help. The place is anywhere that men are in sadness or sorrow, and the hour is now—when they need our help.

IV. No Lack of Power (vv. 23-26).

How often the human heart is prompted to help, and willing hands are ready to follow its promptings in loving action, yet we find that we cannot do anything. The need is too great for our meager resources. Our strength does not suffice. We have no money, or the situation is one beyond human help.

How wonderful it is then to remember the Lord Jesus! A touch on the hem of His garment in faith made the woman whole (v. 22). A word from Him brought the dead little girl out to face the scorners of Jesus, in the bloom of life and health.

Has He lost any of His great power? No. He is just "the same yesterday, and today, and forever" (Heb. 13:8). Why not trust Him?

Do you need help—spiritual, mental, physical? He is able. He has no prejudice regarding your social position. He will meet you right where you are, and right now. He is seeking the sick and the sinful—"the lost, the last, and the least." Look to Him by faith.

The great Physician now is near,
The sympathizing Jesus:
He speaks, the drooping heart to cheer;
O hear the voice of Jesus.

SEWING CIRCLE NEEDLEWORK

Lingerie Makes Acceptable Gift

EASY to make and easy to launder, this charming round necked nightgown will be lovely in a flowered rayon crepe or satin or in soft pastels. Tie with velvet or taffeta ribbons in rich colors. It makes a treasured gift for birthdays, showers or trousseaux.

* * *

To obtain complete pattern and finishing instructions for the Round-necked Nightgown (Pattern No. 5818); sizes 14, 16, 18 included in pattern, send 16 cents in coin, your name, address and the pattern number.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Russian Scientist Swaps Frogs' Hearts; No Change

Five months ago, a Russian scientist removed the hearts of a number of frogs and transplanted the hearts of other frogs in their place in the blood-vessel system, says Collier's.

Following the operation, the animals, many of which are still alive, showed no change in their behavior, and an electrocardiograph recorded no difference in muscle action between their original and transplanted hearts.

GROVE'S COLD TABLETS

HEARTBURN
Relieved in 5 minutes or double money back
When excess stomach acid causes painful, suffocating gas, sour stomach and heartburn, doctors usually prescribe the fastest-acting medicines known for symptomatic relief—medicines like those in Bell-ans Tablets. No laxative. Bell-ans brings comfort in a jiffy or double your money back on return of bottle to us. 25c at all druggists.

MONEY CAN'T BUY
aspirin faster-acting, more dependable than genuine pure St. Joseph Aspirin, world's largest seller at 10¢. Why pay more? Big 100 tablet size for only 35¢.

I'LL SETTLE FOR 25 MORE YEARS OF YOUR COOKING!

ED: It was worth having all the young folks here for our anniversary just to hear 'em rave about your delicious rolls. But weren't they a lot of extra work, Mary?
MARY: Pshaw, no trouble at all! But they did turn out nice. I used a grand double-quick recipe with Fleischmann's yellow label Yeast . . . the yeast with extra vitamins!
YES, SIREE! FLEISCHMANN'S IS THE ONLY YEAST FOR BAKING THAT HAS ADDED AMOUNTS OF BOTH VITAMINS A AND D AS WELL AS THE VITAMIN B COMPLEX. VITAMINS APLENTY, I SAY!

Around Iowa

Not A Fire

Mrs Leslie Eibeck of Elk Horn reported to officials that she saw a stream of fire in the basement of her home. Immediately after turning in the alarm, she learned that the "fire" was Arthur Anderson trying to thaw out water pipes with a gasoline torch.

One Tenth Of A Ton

A 200-pound Holstein heifer calf was born on the E. R. Wood farm near Spring Hill on Christmas day Dr. J. W. Winter, Norwalk veterinarian, stated it was the largest calf he had ever seen at birth The calf lived only a few minutes but was normal in every way.

Left Hurriedly

Milton residents attempted to do all they could to help a supposedly stranded "veteran" from overseas one day recently. The local Red Cross chapter was contacted and authorization was given the telegraph office to send a message to the "veteran's" folks in Wyoming. At this point the stranger found that no cash was being handed him first-hand from Milton people He immediately found some money of his own and purchased a ticket for some other destination.

Popular Date

January 1, is a popular date in the home of Mr. and Mrs. Edwin Bullerman of Calmar. Four years ago on that date a son was born. January 1, 1945, was the birth date of another son. Another son born two years ago has to celebrate his birthday alone, his is January 3.

Unruly Kids May Be Just Hungry

Educators Find Out What Makes American Child 'Act That Way.'

CHICAGO. — The youngster who throws spitballs in school, scrawls bad words on the walls or biffs other kids on the nose more likely than not is hungry, or tired out, or unloved.

It doesn't follow, says Dr. Daniel A. Prescott, that he's just plain ornery, or incorrigible, or dumb. Dr. Prescott of the University of Chicago's collaboration center on human development and education, is one of a group of educators devoted to finding out what makes the American child tick.

It's important, he said, that teachers see a child's present actions as based on his past experiences, shaped by his present circumstances and influenced by his desires and hopes for the future.

Dr. Prescott reported recently on the work of a special division set up several years ago at the University of Chicago by the commission on teacher education to put together material gleaned over the last 15 years by scientific groups which had been studying individual aspects of child development and behavior.

Commission Findings.

Representatives from 20 colleges and universities and 14 groups of school systems were sent to Chicago to do this job. What Dr. Prescott said was an advance view of the commission's findings, to be published soon.

"We believe that the task that lies ahead is primarily one of training teachers to make sound judgments about children," he said.

Findings of the group include the following:

1. Children are often expected or required to learn things they are not ready to learn, or that they can't see any reason for learning. Children's interests and tasks should be related to maturity more closely than to chronological age.

The reason, Dr. Prescott explained, that two-thirds of those failing to learn to read in the first grade are boys is that it takes boys longer to grow from birth to maturity than girls. Girls at the age of 6 are where boys are at 7 and more likely to be ready for reading.

2. Children often are expected, or even required, to behave in ways unreasonable to expect in view of their development, family background or physical condition.

Some Teachers Blamed.

3. Many teachers often do not fully accept and respect each child as a person and often actually dislike or neglect certain youngsters. Many teachers make no attempt to see that the child is liked by others, or belongs to a group. Thus some children for years may remain lonely or rejected in a class group.

4. The behavior of a child often is not evaluated in terms of the factors that caused it, and is controlled by means that humiliate him before his classmates (such as standing in a corner), demean him in his own eyes, repress valuable interest and curiosity or develop a sense of being unfairly treated.

5. Problems with which children may be struggling often aren't noticed. Children with chronic infection, or correctible physical handicaps, with limited mental abilities, severe emotional maladjustments or personality problems are not given proper attention.

Nazis Roll Bomb Like Bowling Ball at Yanks

WITH THE SEVENTH ARMY IN SOUTH FRANCE. — The Germans should know by this time that they can't knock the Seventh army down like tenpins but—

On the Nice front they tried a weapon which consisted of a teller mine with a time fuse inside a round, oversized wooden casing that resembled a bowling ball.

On several occasions they tried rolling these balls down on the well-paved, smooth mountain roads towards the advancing Americans. On each occasion the balls bounced harmlessly into the shrubbery.

Set 'em up in the other alley, Adolf.

Quinine Substitute Is Praised by Army Medics

WASHINGTON.—The army medical department has come out flatly and rated atabrine, the war-developed substitute for quinine, as "even better" than quinine in the suppression and treatment of malaria.

It was the army's first unqualified statement with respect to the effectiveness of the synthetic drug. It came into wide use in the armed forces after Japanese conquests in the Dutch East Indies had cut off most of our quinine supply.

Some 6,000 Alien Sailors Have Deserted in U. S.

WASHINGTON, D. C. — About 6,000 alien merchant seamen have deserted their ships in United States ports since the beginning of the war and now are being rounded up by the immigration and naturalization service.

Those who are found, the war shipping administration said recently, will be given the choice of returning to ships of their nationality or face deportation.

Lights of New York

by L. L. STEVENSON

Ramblings and Ruminations: Central park trees looking rather tired and discouraged—they did have a hard, hot summer and unlike so many other New Yorkers, they had to stay right where they were . . . A bus hurrying through the 65th street transverse, its cargo, homeward bound school children who are doing a lot of shouting and squealing . . . A black clad, pale, but very pretty young woman, sitting on a secluded bench, reading a letter with tears streaming down her face—possibly a manifestation of another war tragedy . . . A hansom cab driver telling his passengers, a middle-aged couple, about the old times in Central park when the first snow brought a cutter race with a magnum of champagne going to the winner . . . A gray squirrel, sitting on its haunches, observing a boy and girl who are so interested in one another they are unaware of the rest of the world.

* * *

A two-chin dowager barging into a swank shop with all the pomp and circumstance of an ocean liner entering its slip . . . and a deferential doorman seeing that my lady gets inside with a modicum of discomfort . . . A gentleman with a stiff hat and old fashioned handlebar mustache, calmly consuming a banana as he walks along the avenue . . . One sunburned serviceman, at Fifth avenue and 46th street, remarking to another sunburned serviceman, "There ain't nothin' to do in New York. Now if we were just down in Dallas!" and the other replying, "You said it, buddie" . . . A gray-head, whose hands look as if she might be a scrub woman, inspecting a window display of mink coats that are "bargains" at a mere $3,000 each—with the notation, "plus 20 per cent government tax" . . . A derelict pouncing on a discarded half-smoked cigar and going on his way puffing jauntily.

* * *

Noisy flocks of blackbirds seeking resting places in the ornamental front of Grand Central Terminal . . . Maybe they figure that if they arrive early, they'll get the choicest lodgings . . . Baggage-laden travelers emerging from taxicabs and hurrying into the station as if every second meant much . . . But if they haven't got their tickets already, they'll spend a lot of time waiting in line . . . A diminutive red cap with a big suitcase under each arm and another, equally large, in each hand, speeding along as if he were carrying no weight at all . . . Cameramen waiting the signal that will cause them to dash down to the tracks to meet some motion picture queen arriving from the West coast . . . and in the background a flock of press agents ready to spring into action.

* * *

At a Times square subway station entrance, a graying woman pleading for a "nickel carfare to get to Brooklyn" . . . and, though she receives a dozen or so donations, remaining right in the same place . . . A very tall serviceman, accompanied by a pint-sized blonde, inquiring as to how long it will take to get to Coney Island . . . and on being told, "one hour," shaking his head and turning away . . . Evidently his leave is running out fast . . . Two very blonde chorines passing one another with elevated noses—possibly some backstage feud . . . A very correct British major informing a policeman that he requires assistance because he is absolutely unable to find the hotel at which he registered during the morning . . . and the officer replying that if he turns his head slightly to the left, he'll see the sign.

* * *

The tower of the Empire State building disappearing into the mists . . . Little side street restaurants emitting breaths of stale grease . . . A messenger boy with four telegrams stuck under his cap and a hot dog in each hand . . . Women shoppers, most of them carrying parcels, milling about in Herald square . . . Jersey residents hurrying into the Hudson tubes on their way home before the rush hour . . . A flock of sparrows battling over a dirty bread crust . . . A woman, whose excess flesh causes a middle bulge, colliding with a fat man because her attention is entirely taken by a window display of millinery . . . and the fat man apologizing despite the fact that the blame isn't his and in addition, he lost his cigar.

* * *

Lieut. Jack Raymond after 2½ years in the army, got his medical discharge at 12 the other night and one minute after midnight, went right back to work for his old boss, Praise Agent Ivan Black . . . Three V-Mail letters from France reached Josh Levin, manager of Cafe Society Downtown, asking for reservations for New Year's Eve 1945.

U. S. Soldier Reverses Lend-Lease Scheme

PRATT, KAN. — Lend-lease did a right-about-face recently when Sgt. Benny Maynard, reading in an American paper overseas that pingpong balls were scarce here, shipped a supply to the local chamber of commerce. Maynard is stationed in England where there is no shortage of the recreation equipment.

Not Too Happy Over Nazi Loot

'Cabbage Kids' Find Wiping Up After Retreat of Germans Tedious.

WITH U. S. TROOPS IN FRANCE. —Everybody in the American army is pleased with the supplies taken in captured German dumps except the "Cabbage Kids."

That is the name one detail gave themselves after being assigned to remove a couple of tons of cabbage left behind by the precipitate Nazi retreat from the Paris area.

It was a warm, sunshiny afternoon and the strong overripe cabbage made its presence widely known as the soldiers shoveled it into a truck.

The driver of the "Red Ball Cabbage Special" was Corp. Hal F. Crouse of Maiden, N. C., who said he had already carted away one truckload and was bemoaning the fact that it was not a load of Luger pistols so he could have stocked up on souvenirs.

Not For Mailing.

"But you can't mail your friends a boxful of German cabbage," he said, leaning against a tire and holding his nose.

"The next time the Jerries move out I hope they take their cabbage with them—or make sauerkraut out of it," said Pvt. Meyer Matluck of the Bronx, N Y.

Pvt. Solon Gray of Flint, Mich., just shoveled away in silence as two "cabbage removal" squad sergeants — Sgt. H. M. Woodall of Gladys, Va., and Sgt. James F. Beale of Terre Haute, Ind.—looked on from a safe distance.

Another unusual job for soldiers was performed by army engineers who built three ferries and operated a passenger service for troops and vehicles across the Loire.

All Bridges Knocked Out.

All bridges had been knocked out by Allied planes or blown up by French Maquis to trap German forces in southern France.

Ferry vehicles were made by putting pieces of treadway bridging across six assault boats lashed together. They were powered by small outboard motors, whose efficiency amazed the French farmers. They couldn't see how such a little putt-putt gadget could work so well.

The ferries were promptly named "42nd Street," "Brooklyn," and "Hoboken."

"We can take a ton and one half ambulance across," said Corp. Michael Suprock of St. Clair, Pa.

Their most "distinguished" passenger was Nazi Maj. Gen. Erich Elsner, who surrendered the last 20,000 enemy troops south of the Loire. But his 20,000 troops walked across a bridge which was repaired and put into service soon after.

4,000 Autos a Day Are Headed for Scrap Heap

WASHINGTON —More than 4,000 autos are being scrapped daily and approximately 1,500,000 will leave the highways permanently this year.

The OWI estimated that the supply of new cars subject to rationing had dwindled to 20,000 and that 650,000 used cars are in dealers' hands.

By the end of this year the number of privately owned passenger cars in operation is expected to be about 23,750,000. The ODT regards 20,000,000 privately owned cars run by essential drivers as the minimum number necessary to keep the civilian economy in operation.

Find Louvain Library Partly Wrecked Shell

LOUVAIN, BELGIUM. — The famous Louvain library is partly in ruins, another victim of German ruthlessness. The library was destroyed by the Germans in World War I and rebuilt by public subscriptions in the United States The building was again partly destroyed by the Germans when they entered Louvain four years ago, and hasn't been touched by Allied aerial bombardment. The front walls and roofs still stand, but the rear is an empty shell, framed by bare walls and empty windows.

Robots Will Displace Other Planes, Forecast

BALTIMORE, MD — Peyton M. Magruder, airplane designer recently returned from the European battle front, predicted that the German robot plane would revolutionize air warfare and eventually replace piloted bombers.

"Two hundred years from now Hitler will be remembered as the man responsible for the first pilotless plane," Magruder said.

Magruder is chief of new design at the Glenn L. Martin airplane manufacturing plant. He originated the Martin Marauder bomber.

Nazi General Is Rooted Out of Cellar in France

SUPREME HEADQUARTERS, AEF.—The 10th German general killed or captured by the American Seventh army in France was rooted out from the cellar of a little farmhouse west of the Belfort gap.

He is Maj. Gen. D. Rodowski, commander of the garrison of Clermont Ferrand, where Pierre Laval published a newspaper. His force was scattered by the Seventh army's drive north from the Riviera.

NOTICE OF THE APPOINTMENT OF EXECUTOR

STATE OF IOWA, Hancock County, ss. No. 2815

NOTICE IS HEREBY GIVEN, that the undersigned has been duly appointed and qualified as Executor of hte estate of Dorothea Schroeder, Deceased, late of Hancock County. 3,250 AUTOS LICENSED IN HANCOCK THIS YEAR

County Treasurer Roy L. McMillin reports that his office has issued 3,250 passenger car licenses thus far this year. Last year the treasurer's office issued arcund 4,100 licenses which would indicate that there are about 800 car owners who have not yet applied for their 1945 license. Penalties attach this week, February 1st.

One out of every 5 U. S. adults is employed in growing, processing or distributing food.

War Production Board Prohibits Certain Uses Of Electricity

•

AS A SUPPLIER OF ELECTRICITY WE ARE REQUIRED TO BRING TO YOUR ATTENTION THE WAR PRODUCTION BOARD ORDER, EFFECTIVE FEBRUARY 1, 1945, WHICH PROHIBITS THE USE OF ELECTRICITY FOR THE FOLLOWING PURPOSES:

"(1) Outdoor advertising and outdoor promotional lighting.

"(2) Outdoor display lighting except where necessary for the conduct of the business of outdoor establishments.

"(3) Outdoor decorative and outdoor ornamental lighting.

"(4) Show window lighting except where necessary for interior illumination.

"(5) Marquee lighting in excess of 60 watts for each marquee.

"(6) White way street lighting in excess of the amount determined by local public authority to be necessary for public safety.

"(7) Outdoor sign lighting except for: (i) directional or identification signs required for fire and police protection, traffic control, transportation terminals or hospitals; or directional or identification signs for any similar essential public services the lighting of which is specifically certified to be necessary by local public authority. Certification shall be made in writing to the appropriate electric supplier and need not be in any particular form; (ii) directional or identification signs using not more than 60 watts per establishmet, for doctors and hotels, and other public lodging establishments."

This order of the War Production Board is by its terms mandatory, and places the responsibility for compliance upon the users of electricity. The War Production Board, however, urges voluntary compliance as soon as possible.

The order further requires that the Company notify any customer known by the Company to be in continued violation of the order after February 1. A copy of this notification must be sent to the Disrict Office of the War Production Board.

The War Production Board asks full cooperation of all users affected. The order provides that wilful violation is subject to fine or imprisonment, and further provides that the Board upon determination of continued violation, may direct the suspension of service and prescribe the conditions under which service may be restored.

Central States Electric Company

SCHOOL NEWS

KLEMME SCHOOL BAND NEWS
—Ruth Bell, Reporter.

Our local band has been meeting regularly on Tuesday evenings and Thursday afternoons. We are devoting the greater share of our time in practicing our two selected contest pieces.

The center of attraction now is the band clinic to be held at Forest City, February 15th. Students from all over northern Iowa will attend this clinic. It will consist of a session of rehearsals and solo groups. These will be directed by Carleton Steward of Mason City. The clinic band combined of all 154 members will present a concert in the evening at 8:00 o'clock. Anyone interested in music may attend this concert. Admission will be 25c and 50c. Those playing in the clinic band from Klemme will be the saxophone quartet, Peggy Poole and Ewald Grosshuesch.

SENIOR CLASS NEWS
—By Patricia Kudje.

We have had several class meetings this past week. We chose our class colors: Blue and Silver, and the rose as our flower. Our motto is, "The Past Forever Gone, The Future Still Our Own." We also decided that our pictures are to be taken on February 12th.

The beginning of this semester all of us changed some of our courses. We are all taking bookkeeping, which we find very interesting. The boys are taking manual training and most of the girls are taking business arithmetic. We are still having our Eglish Lit. and American History courses as we did the first semester.

SOPHOMORE NEWS

We have finished the Unit on Business Letters in English II. We will study literature once a week. Next Friday the class will be divided into three groups, and each group is to read and tell about a short story, using a planned outline.

The Geometry Class has finished the chapter on Inequalities, and are now studying Medians, bisectors of angles and triangles.

In Biology we are studying the unit on "Preparing Food for Use by Platoplasm."

Our World History class is now studying about the sixteenth century. We have learned much about many of the famous painters and writers of that time.

FRESHMAN CLASS NEWS
—By Kathryn Velau.

The Algebra Class has been very interesting this week. We have been drawing graphs after working the example. We had a test over this work on Friday.

The Home Economics Classes have started their study of breakfasts. We have prepared fruits in various ways, and also cooked cereals. Each Tuesday we have a class in Theory over the work to be done in the laboratory the following week.

We have nearly finished our study of business letters in English class. Each Friday will be Literature Day. We will read Poe's "The Gold Bug," to start our Literature unit.

Each boy in Manual Training Class is busy on a different problem in wood working.

JUNIOR HIGH NEWS
—Donald Finders, Reporter.

Seventh and Eighth Grades had a perfect attendance this week.

The Eighth Grade are studying about the Civil War in History. Friday they made maps to show the campaign movement of the war.

In Art we made Thrift Posters this week.

FIFTH AND SIXTH GRADE NEWS

We were very sorry to have Norene Peason, Audra Jones, and Iris Schaefer absent part of the time this past week.

In Fifth Grade History we have begun our work on the Civil War.

In Sixth Grade Geography, we have begun our study of Europe. We have just completed Norway and Sweden.

On Tuesday Richard Tiggerman treated his room to treats. The event was in honor of his birthday.

THIRD AND FOURTH GRADE SCHOOL NOTES

On Thursday afternoon Virginia Back visited our room. Virginia goes to school in the Garner Public Schools. She is in the Third Grade.

On Friday afternoon two students from Drake University visited in our room for a short while. They were Miss Velau and Miss Hoover.

In Language both the third and the fourth grade have completed a unit. Our new unit in each class is "Telephoning." We have had a lot of fun learning the do's and don'ts in the proper use of the telephone.

KINDERGARTEN, FIRST AND SECOND GRADE NEWS

The First Grade read stories about the pets which Dick, Jane, and Sally saw while visiting their grandparents on the farm.

We made "Pet Books" in which we illustrated rabbits, kittens, dogs, ducks, and ponies. We put our booklets on the reading table.

The Second Grade read in their Weekly Reader about how electricity helps the farmer and the farmer's wife in doing their work.

Shamrocks Will Play At Corwith Next Week February 5th

Coach Kingery has booked an extra game for his basketball boys and the Shamrocks will go to Corwith next week Monday evening, February 5th.

German Officer Learns About Allied Advance

ARRAS, FRANCE. — A stalwart German lieutenant was deeply chagrined recently when a 16-year-old French Maquisard, prodding him with a rifle, led him into a British field headquarters near the Belgian frontier.

"It is useless to take me prisoner," he told the British. "I will be free again in one hour. You are surrounded. The war is over."

With a side wink a British officer brought out an unmarked map and said gravely, "This is serious. We did not know we were surrounded. Show us."

The German captive bent over the map and pointed along the coast in the north and along the roads to the south.

The British officer then showed him a battle chart marked with the latest developments and told him something about the number of Allied tanks, troops and guns storming across France to Begium.

The German gaped incredulously.

"If what you say is true, then the war is indeed over—for us," he said glumly.

Vitamins for Winter Are Very Essential For Health, Well Being

Vitamin-rich vegetables tossed together with mayonnaise make this salad bowl good, healthy eating. Carrot curls and lettuce make a pretty color combination.

It's an easy matter to get vegetables and fruits into the diet during the summer months because supplies are plentiful. However, we need just as many fruits and vegetables in winter, and there is not as much available.

Every homemaker should make it her job to see that the family does not suffer from fruit and vegetable lack during the winter. True, supplies are shy but there are foods in both categories that are in season, and these should be used for all they're worth.

If fruits and vegetables are served raw, more of the valuable vitamins can be saved. Salads should have a big place in the menu. Apples, pears, oranges and grapefruit offer variety and vitamins aplenty, while carrots, cabbage, beets, green beans, squash, turnips, spinach and brussels sprouts can hold their own on the vegetable front.

Today I've selected vegetables which are particularly adaptable served in salad form. Tack these recipes where you can find them and serve often:

***Spinach Toss.**
(Serves 6)

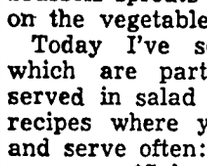
3 cups broken lettuce
¾ cup fresh spinach
¾ cup shredded raw carrots
¼ cup iced celery
6 radishes, sliced
1 tablespoon minced onion
¼ cup French dressing

Rub bowl with a clove of garlic, but do not let it remain in bowl. Put all vegetables together in bowl just before serving. Pour French dressing over all and toss with fork and spoon until well mixed.

Hearty Winter Salad.
(Serves 8)

1 package lemon-flavored gelatin
2 cups hot water
1 teaspoon vinegar
1 teaspoon salt
1 cup cooked peas
½ cup diced celery
½ cup finely shredded cabbage
⅓ cup diced pimiento, if desired

Dissolve gelatin in hot water. Add vinegar and salt. Chill until slightly thickened. Fold vegetables into gelatin and pour into shallow pan or 8 individual molds. Unmold on crisp lettuce and serve with mayonnaise which has been thinned with sour cream or milk.



Golden Winter Salad.
(Serves 6)

1 package orange-flavored gelatin
2 cups boiling water or 1 cup fruit juice and 1 cup water
1 apple, unpeeled and diced
2 tablespoons lemon juice
⅛ teaspoon salt

Lynn Says

Don't Waste a Scrap: Every bit of food you buy can be made to work. Outer leaves of lettuce, spinach, and leftover bits of parsley from garnish can be used to give flavor to soups. The same is true of leftover liquids left from cooking vegetables.

Stale cake may be sliced and served with fruit and fruit juices. Combine with eggs and milk and bake into pudding. Or, use it to line pudding molds and pour gelatin or custard over it to make icebox dessert.

Dry, leftover bread may be toasted and used on top of soup. Or, grind and make into bread crumbs, or use in stuffings to stretch meat.

Syrups from canned fruit may be utilized for fruit sauces to pour over puddings and custards. Leftover jams and jellies are ideal for pastry fillings and for flavoring and sweetening stewed fruits and berries.

Lynn Chambers' Point-Saving Menus

Chicken Liver Spaghetti
Parsleyed Carrots *Spinach Toss
French Bread with Butter
Pickles Olives
Honey-Baked Pears
Orange Crisps
*Recipe given.

1½ cups diced grapefruit sections
¼ cup chopped walnut meats

Dissolve gelatin in boiling water and chill until it begins to thicken. Cube apple and sprinkle with lemon juice and salt. Remove all membrane from grapefruit sections and dice. Combine grapefruit, apples and nut meats into gelatin. Pour into molds that have been rinsed with cold water. Chill until set and serve with mayonnaise.

Hot Slaw.
(Serves 8)

2 egg yolks, slightly beaten
¼ cup cold water
¼ cup vinegar
1 tablespoon butter
1 tablespoon sugar
½ teaspoon salt
3 cups shredded raw cabbage

Combine egg yolks, water, vinegar, butter, salt and sugar. Cook on low heat, stirring constantly, until mixture thickens. Add cabbage and reheat.

One of the factors which makes salad making so easy is the use of a real mayonnaise which is so smooth-textured and easily blended with the ingredients. It is nutritious, too, for it contains oil and egg yolk which adds a vitamin D boost to the diet:

Side Dish Salad.
(Serves 6)

12 carrot curls
1 cucumber, cut in fingers (or dill pickle)
Lettuce, sliced
Mayonnaise

Wash and scrape carrots; cut in very thin lengthwise strips and leave in ice water until curled. Arrange carrot curls, cucumber fingers and lettuce slices in salad bowl. Serve with real mayonnaise.

Make your lunches vitamin rich by serving a sandwich with a rich-in-vitamin-B salad:

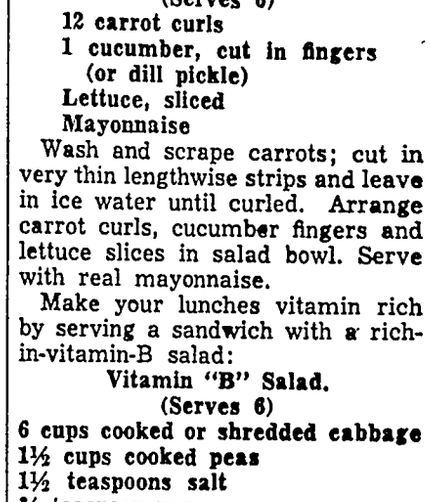
Vitamin "B" Salad.
(Serves 6)

6 cups cooked or shredded cabbage
1½ cups cooked peas
1½ teaspoons salt
⅜ teaspoon pepper
6 tablespoons mayonnaise

Mix cabbage, peas and seasonings with real mayonnaise. Chill.

Serve with a bacon sandwich made with whole wheat bread. Garnish with watercress.

Pears make a lovely salad when combined simply with lettuce, carrots and American cheese balls. It's nice enough for company!



When served with a whole wheat bread sandwich, this salad gives a rich vitamin "B" lunch. Lunch is a good time to get the salad into the menu.

Company Salad.
(Serves 5)

2 cups finely shredded lettuce
2½ cups grated carrots
5 pear halves
10 ½-inch balls of American cheese
10 ½-inch balls of cream cheese
French dressing

Arrange shredded lettuce on salad plates. In center of lettuce make a nest of grated carrot. Place pear half in each nest with balls of cheese in the pear cavity. Serve with French dressing.

French Dressing.

1 clove garlic, grated fine
½ cup sugar
1 teaspoon Worcestershire sauce
1 small onion, grated
⅓ cup tomato catsup
1 teaspoon salt
2 cups salad oil

Mix all ingredients in order given with a rotary egg beater. Place in quart jar and store in cool place until ready to serve. Shake well before using.

LOVE LETTERS OF A BUREAUCRAT

My (unless otherwise designated) Darling:

Your last letter expressing some apprehensions as to the depth of my affection for you has been received and placed on file. Under separate cover I am sending you a more detailed statement of my love for you. This will give you the overall picture of a more secure setup as man and wife, should the proposition under discussion be carried to a successful conclusion.

Your complaint that you fear ceilings have been imposed on my affections for you have been given careful consideration and will be processed further, and while a more complete report will be made to you later, it is my conclusion that your deductions are basically in error.

—*—

I have gone over my feelings again with special care to every phase of the project, and all my data shows I have reached a new high in devotion for the last fiscal year. My regard for you has reached 98 per cent as against a high of 95½ for the previous year. We can, I am sure, through the establishment of even greater unity, hold the line.

—*—

If we maintain a proper spirit of cooperation we can stablize our affections at the hoped-for levels of 100 per cent and then blueprint a course which shall surround them with the proper safeguards against seasonal declines, my (as within the meaning of Section 7) dear.

—*—

You are quite wrong, my honey child (and nothing in any subsequent paragraph shall be taken as conflicting with my use of this term of endearment), when you imply that my letter indicated my deep love for you had been frozen. Nor have I sought to establish any controls, as you also seem to suspect. My policy today is as announced to you in my communications of January 3, March 10, June 23 and October 8, and you may consider this document as a blanket authorization to so construe it.

—*—

While my affection for you has exceeded in scope anything originally charted, I have, of course, been very busy with war problems necessarily affecting our lives, and some reconversion plans will of course, be necessary to permit me to return fully to the realm of romance. I assume this is true of you, too, my sweeti-pie. (Note—A fuller distribution of terms of affection such as this is now made easier, due to a slight lessening of controls.)

—*—

Hold to your basic emotions toward me and in all moments of doubt please realize that you are entitled to my (1) steadfast devotion, or (2) complete affection (whichever is the larger), and without deduction.

Believe me to be (dear sir or madam) your devoted slave (within the meaning of the code of August, 1942).

UNO WHO.

* * *

THE DIAPER CRISIS

("Through Edward Sturgis Jr. of the National Institute of Diaper Service of 420 Madison avenue, OPA has been petitioned to lift ceilings on diapers. Diaper mills are refusing to manufacture them because of the low profit."—News Item.)

—*—

We know what the urge is,
Mr. Sturgis.
This war is one of the worst,
But let first things come FIRST!
On the list of preferentials
Let us keep the real essentials
Hey! Hey!
OPA!
Here's a crisis very
Extraordinary.
Of all goals,
Chester Bowles,
This is tops;
It's over crops,
It's over stocks
And over socks;
It's over rentals
And price of lentils;
Over hamburger prices,
And raspberry ices,
Over tires and peaches
And girdles and breeches!

—*—

No diaper mill shirking!
Get 'em working!
Come on, OPA!—
Let there be no delay!
Think, brothers,
Of your mothers!
Yes, Chester, your problems mount,
But consider things that COUNT!

* * *

No Cavities

Dentists are having a convention in New York. They had considerable trouble getting hotel rooms, for once their plea to "open wider" going largely unheeded.

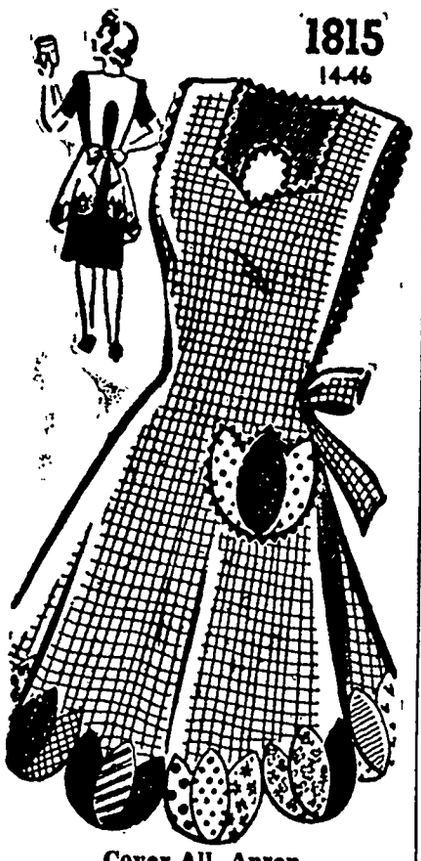
And we understand the favorite reply of hotel clerks to the dentists when about to tell them there were no rooms to be had was "Listen, doctor, this isn't going to hurt you."

* * *

It would seem from reports from abroad that when Greek meets Greek they open fire.

SEWING CIRCLE PATTERNS

Cover-All Apron Has Tulip Trim



Cover-All Apron

IF YOU like a covered-up feeling while you work, you'll be delighted with this pretty and practical apron with tulip shaped pocket and border. Look through your scrap bag for pretty pieces to trim this attractive apron.

Pattern No. 1815 comes in sizes 14, 16, 18, 20; 40, 42, 44 and 46. Size 16 requires 2⅛ yards of 32 or 36 inch material; 5 yards rickrack to trim.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Send your order to:

SEWING CIRCLE PATTERN DEPT.

'Twasn't So Breezy When Guest Awoke Next Morn

The traveling salesman had never struck such a stuffy hotel in all his life. In vain did he count sheep. Sleep just would not come.

He had made numerous attempts to open a window without putting on the light, but had found it tightly sealed.

He tossed and turned. Desperate at last, he got out of bed, wrapped a blanket around his hand, and smashed the window. Then he breathed deeply for a few moments, got back in bed, and almost immediately fell into a deep and refreshing sleep.

Next morning he had to pay five dollars for smashing the wardrobe mirror.

Of 55 Republics Since 1500 B.C., 21 Disappeared

Since 1500 B. C., there have been 55 republics, 21 of which had disappeared before the outbreak of the present war, says Collier's. Of these, the republic of Venice lasted 1,196 years; Genoa, 802 years; and Carthage, 704 years.

The three oldest republics today are San Marino, 1,059 years; Switzerland, 653 years; and the United States, 168 years.

For Quick Cough Relief, Mix This Syrup, at Home

No Cooking. No Work. Real Saving.

Here's an old home mixture your mother probably used, but, for real results, it is still one of the most effective and dependable, for coughs due to colds. Once tried, you'll swear by it.

It's no trouble at all. Make a syrup by stirring 2 cups of granulated sugar and one cup of water a few moments until dissolved. No cooking is needed. Or you can use corn syrup or liquid honey, instead of sugar syrup.

Now put 2½ ounces of Pinex into a pint bottle, and add your syrup. This makes a full pint of truly splendid cough medicine, and gives you about four times as much for your money. It keeps perfectly and tastes fine.

And you'll say it's really amazing, for quick action. You can feel it take hold promptly. It loosens the phlegm, soothes the irritated membranes, and helps clear the air passages. Thus it eases breathing, and lets you sleep.

Pinex is a special compound of proven ingredients, in concentrated form, well-known for its prompt action on throat and bronchial membranes. Money refunded if not pleased in every way.

It's BALANCED... *that's the secret*

Balanced double action... for positive action in the mixing bowl... for gratifying results in the oven.

You'll be Surprised!

CLABBER GIRL

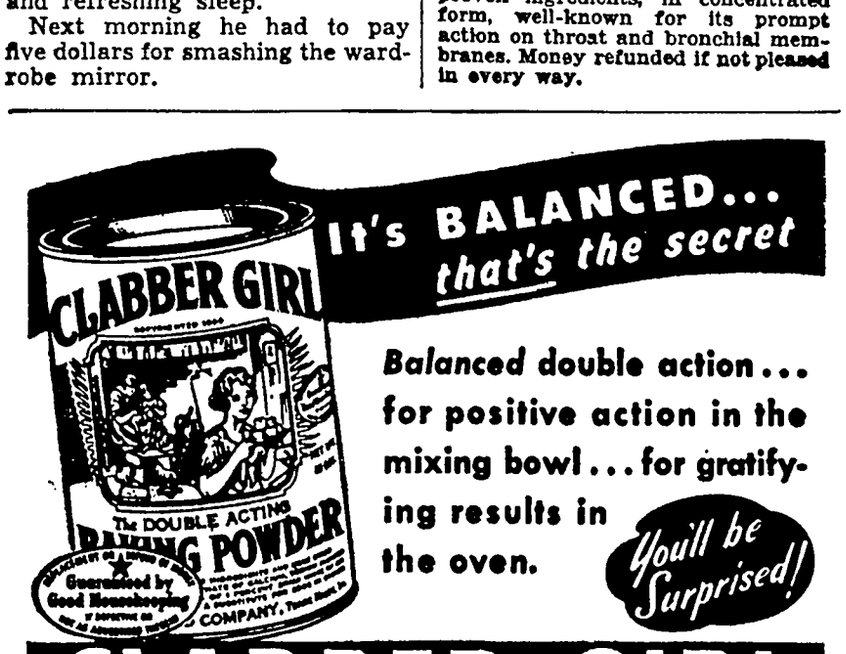
HULMAN AND COMPANY TERRE HAUTE INDIANA



SORETONE
soothes fast with
COLD HEAT* ACTION
in cases of
MUSCULAR LUMBAGO OR BACKACHE
due to fatigue or exposure
MUSCULAR PAINS
due to colds
SORE MUSCLES
due to overwork
MINOR SPRAINS

MUSCLE PAINS can do it to you—make you *feel* old—*look* drawn and haggard. SORETONE Liniment contains methyl salicylate, a most effective pain-relieving agent. And Soretone's *cold heat* action brings you fast, so-o-o-thing relief.

1. *Quickly Soretone acts to enhance local circulation.*
2. *Check muscular cramps.*
3. *Help reduce local swelling.*
4. *Dilate surface capillary blood vessels.*

For fastest action, *let dry, rub in again.* There's only one Soretone—insist on it for Soretone results. 50c. Big bottle, only $1.

MONEY BACK— IF SORETONE DOESN'T SATISFY

"and McKesson makes it"

*Though applied cold, rubefacient ingredients in Soretone act like heat to increase the superficial supply of blood to the area and induce a glowing sense of warmth.

New-Type Rockets Fired at Germans

Use High-Velocity Missile Developed by Navy.

WITH UNITED STATES NINTH AIR FORCE, FRANCE.—American fighter-bombers equipped with rockets that are in action in western Europe are using a new type of missile that offers the great advantage of a high ratio of fire control for the pilot.

Maj. Gen. Elwood R. Quesada, chief of the Ninth tactical air command, announcing the use of the high-velocity rocket by some Thunderbolt squadrons, said:

"It implements aircraft with a new weapon of tremendous possibilities. Further, it is very significant that the Thunderbolts are still able to bomb, machine-gun and fly as well with rockets as without.

"Their first use in France against enemy armor fully confirmed our high expectations and will undoubtedly lead to the increased use of this weapon."

General Quesada said that the new rocket had been developed by the United States navy, adding that "the navy did a better job on rockets than we."

"The power for the rockets is difficult to manufacture," he said, "and this held up their use until some weeks ago, when the first rocket-equipped planes were thrown in in close support of ground forces."

News of these rockets has been released now that several such planes have fallen into German hands.

GOODELL PARSONAGE SCENE OF MARRIAGE CEREMONY

Darlene Paige and Roy Boller were married Tuesday, Jan. 23 at the U. B. parsonage at Goodell by the Rev. Carleton Spencer.

They were attended by Mrs. Kenneth Boller of Belmond and Walter Boller of Goodell.

The bride is a daughter of Mrs. A. Paige of San Diego, Cal., and the past year has been employed in the Western Electric Telephone office in Belmond.

The bridegroom is a son of Mr. and Mrs. Anton Boller of Goodell. a graduate of Goodell high school and is employed by his brother, Harve Boller, in Goodell.

Following the wedding, the relatives were guests at the Walter Boller home.

Mr. and Mrs. Boller are residing in the Ed. Nuehring apartment at Belmond.

Railroad Saves Paper By Thinning Tickets

CHICAGO.—To aid in the paper salvage campaign, a Chicago road is using streamlined tickets.

By cutting down the weight of cardboard tickets from six ply to two ply, the Chicago & Eastern Illinois railroad has reduced its paper ticket consumption by two-thirds, says J. L. Phlering, purchasing agent.

He said because of the difference in weight it has been necessary to caution ticket agents against passing out two tickets instead of one.

Wilhelmina Is Given British Order of Garter

LONDON. — Queen Wilhelmina of the Netherlands was invested with the Order of the Garter, the highest British order, by King George VI in a private ceremony, the Netherlands news agency Aneta reported recently. The Netherlands Queen thus became the only reigning foreign queen admitted since the order was founded by King Edward II in 1348.

Easy Sleeping

A supposedly empty grain car assigned to the Soldier elevator for loading of corn turned out to be full. The car contained army cots, having been sent to Soldier thru error somewhere down the line.

As the United Nations move forward to victory, programs such as Scouting step forward to do their part in insuring the peace. The theme of the 35th anniversary celebration of the Boy Scouts of America from Feb. 8th to 14th is "Scouts of the World—Brothers Together."

Early Spring In Iowa Forecast

GROUNDHOG FAILED TO SEE HIS SHADOW FRIDAY, FEB. 2

And So We Can Expect An Early Spring This Year

According to tradition, the hibernating groundhog would awaken from a long nap on February 2nd; would come out of his den, yawn and stretch and look around If the sun was shining he would see his shadow and it would scare him back into his den, where he would take another nap for six weeks while the cold wind howled outside and snow piled high.

However, the sun did not shine all day in Iowa and so the groundhog did not see his shadow and he will be out prowling around every day and we can look for an early spring instead of six weeks more of blustery winter weather.

JIMMY BOCK HAS DECORATED CAKE FOR FIRST BIRTHDAY

Mr and Mrs. Mitchel Bock entertained to dinner Sunday in honor of their son Jimmy's first birthday anniversary: Mr. and Mrs. Wm Bessman and son Harry of near Dows; Mr. and Mrs. Irvin Meyers of Alexander, and Mrs. Naska Bock of Klemme

Jimmy thoroughly enjoyed his first experience with birthdays as he thought Christmas had come again when he received a number of nice gifts. But the decorated birthday cake, lighted by 1 candle really caught his fancy.

BILLY WADDINGHAM GROWING UP, HE'S PAST TEN NOW

Billy, son of Mr. and Mrs. John Waddingham was ten years old Saturday and he felt pretty important and so grown-up that he decided he would walk over to Grandpa and Grandma Ralph Elder's where grandma Elder had fixed up a man-sized dinner for him.

Saturday was a rather cold day and Grandpa Elder remined Billy that the day he first saw daylight 10 years ago, the weather was real warm and thatt he snow was melting.

1,000 Already Signed Up

NOW OVER 1,000 MEMBERS IN HANCOCK FARM BUREAU

The Hancock County Farm Bureau passed the 1,000 member mark Friday, when Organization Director Jackson visited Magor township picking up 14 memberships from one team. The goal of 1,200 is still to be reached.

The high townships are Concord, 123; Amsterdam, 106; Ell, 94; Garfield, 86. Quota townships are Ellington, Amsterdam, Avery and Orthel.

Card games were introduced into Europe in the 14th century by fortune-telling Gypsies wandering from India.

Bonds Over America

CHARLESTON'S CHARM

Charleston, S. C., retains its 18th Century architecture, so full of warmth, charm and beauty. It might not have been so well preserved except for funds raised by War Bonds that enabled our fighting forces to erect and hold an impenetrable barrier against attack from overseas. War Bonds bought now will keep it unmarred. The quaint house that Col. Charles Brewton gave his daughter in 1733 embodies that charm. The delicate iron balcony and carriage entrance leading directly to the street are characteristic touches—prevalent in Southern homes in the formative years preceding the Revolutionary War.

Our Men In Service

WOUNDED

Mr. and Mrs. C. J. Wille received a telegram from the War Department last Thursday informing them that their son, Aaron, had been wounded in action on the Belgium front.

Aaron has been overseas since about the first of November.

LT. LYNDON KILGORE FINDS ROUGH GOING IN BELGIUM

Somewhere In Belgium.
December 29, 1944.

Dear "Jergies":

I haven't too much time, and there's not too much space on here so you won't have to listen to too much of my rambling.

I think I wrote you a note on a Christmas card, promising you a longer letter, but since then I have not had time even to write a short one; not even to the folks. Things have been a bit rough around here. In fact, so much so, that I lost everything I owned except what I had on my back. I've seen "Jerry" and "Jerry" has seen me; we're not on speaking terms; and home is a wonderful place. Things are quieted down a lot now, though, and we even had a pretty nice Christmas.

They gave us the traditional turkey for Christmas dinner and a package from Mother made the day complete. Between the turkey and the package, I made myself about half sick, but it was worth it. "Jerry" added his 2 cents worth during the meal, but he was just guessing, so we didn't mind him too much.

Ray, I much rather be standing up to a printing press than doing what I'm doing, but I guess this has to come first. I'm not hunting too bad. In fact, I find a lot to enjoy over here. I've not been in it as long as Milton and some of the other boys, but I've seen enough. It'll be a grand day when we all get back home to stay.

That's all for now, so greet everyone for me, and write if you have a little spare time.

As ever, "Pete."

SGT. MILO PATET SWAPS CLOTHES FOR CHICKENS

January 22, 1945
Philippines.

Dear Ray and Mary Jane:

Been so busy that I have fallen away back on writing. You know how it is moving.

I like it here a little better as there is some civilization, but the Japs stripped it pretty well; really feel sorry for the people here. One nice thing about it is that the young people, most of them, speak English. That makes it easier to trade for a chicken or eggs once in awhile.

I have not been paid yet, so have to trade with clothes, but will have to watch myself or I won't have a shirt to wear. A person can get most anything for a mattress cover or underwear.

I notice today the natives are bringing in chickens, already barbecued on long sticks.

I guess a person could fish here but no boats available, and I just can't find time.

Saw a railroad the other day, the first in 19 months. Of course not much left of it. I better close now and will try to write a little later. Whenever you find time, write. So far I have not found a person I know overseas.

Enclosed is some Jap invasion money.

As ever, Milo.

When you have company or take a trip, that's news. Phone 12.

Shamrocks On The March

SHAMROCKS ADD UP FOUR MORE GAMES PAST WEEK

Coach A. L. Kingery's basketeers have chalked up four more victories the past week.

At Kanawha Friday evening the Little Shamrocks won their game 23 to 17.

In the Shamrock-Bulldog game Ed. Buntenbach scored 13 points to help win 32 to 18. Larson of Kanawha scored 11 points.

At Corwith Monday night the Shamrocks won another pair of victories. The Shamrocks won by a score of 29 to 21 in the feature game with Brinkman high point man for Klemme with 9 points Widen of Corwith was "hot" and hung up 13 counters.

The Corwith Reserves fell to the Little Shamrocks 38 to 20.

A red-hot game is in store for the fans this week when Hayfield comes Thursday night.

Hayfield has one of the best outfits in the county and defeated the Shamrocks in an early-seaon game However, the Shamrocks put Hayfield away in the county tournament and Hayfield seeks revenge

As it stands now, they are on even terms, so Thursday night's encounter should be a thriller.

BIRTHDAY PARTY HELD FOR DIANA MASTERSON, FIVE

Mr. and Mrs. Henry Jost entertained 18 little folks at their home Sunday afternoon in honor of their granddaughter, Diana Masterson's 5th birthday

Mrs. Carl Finders, Alice Mevers, Helen Suckow and Phyllis Kirkwood were in charge of the games and entertainment.

Later the children had a nice lunch and one table was set for 12. A decorated cake sserved as the centerpiece The other children were seated at small tables Miss Arlene Schmidt, Diana's Sunday school teacher, acted as hostess, while Mrs Ronald Barz assisted by serving the lunch.

Diana received many nice gifts in remembrance of the occasion

Raymond Barz Will Fill Pulpit At Reformed Church Sunday

Raymond Barz will preach the sermon at the Klemme Evangelical and Reformed Church Sunday morning.

Rev. Calvin Grosshuesch will conduct services at Waukon Iowa for Rev. F. Stucki, who is ill at the present time.

WEEKLY NEWS ANALYSIS

Germans Strive to Check Great Russian Break-Through in East; Congress Ponders Labor Draft

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

Evidencing cooperation given Yank forces in Philippines, native volunteers information of enemy activity on Mindoro island.

PACIFIC:
Advance Inland

Moving deeper inland down the great central Luzon plain to Manila, with elements probing into the mountains on either side to secure their flanks, Americans of the 6th army under Gen. Walter Krueger proceeded with caution as the Japs held back on committing their major forces to the battle.

At the same time, U. S. carrier planes ranged far to the west to strike at enemy sources of supply and reinforcements along the south China coast, and U. S. army airmen swept up and down Luzon hammering at communications lines and airdromes harboring the remnants of the Japs' air force.

Strongest opposition to the U. S. drive was encountered in the mountainous terrain on the east flank, where the Japs fought back hard from caves and entrenchments in an effort to hold open the country to the north of them.

NATION'S CUPBOARD:
Well Stocked

With larger supplies in some foods offsetting smaller stocks in others, civilians should eat as much during the first three months of 1945 as during the preceding three months, the War Food administration said.

In comparison, the WFA said, more milk, eggs, cheese and citrus fruits will be available for civilians, but less meat, chicken, fats, oils, butter, canned fruits and vegetables, potatoes, sugar and dry beans.

Reflecting prospects for a longer European war than anticipated last fall, farm production goals for 1945 were upped upon the War Food administration's recommendation for more milk, hogs and beef, and dry beans, potatoes, tobacco, flaxseed, sugar beets and clover seeds.

For 1945 as a whole, the WFA declared, civilian supplies will be smaller than 1944, but slightly larger than the 1935-'39 average. More milk, eggs, meat, chicken, fresh vegetables and fruits, lard, margarine, syrups, honey and cereal products will be available than before the war, but less butter, sugar, dry beans, canned fruits and juices, evaporated milk and canned fish.

LABOR DRAFT:
Push Bill

Spurred on by the President's insistence, congress gave increased attention to Rep. Andrew May's modified labor draft bill, prohibiting men between 18 and 45 from leaving essential work without their local Selective Service board's permission, or compelling them to accept jobs designated by such boards.

With the army calling for younger men for replacements, War Mobilizer Byrnes outlined procedure for the induction of registrants in the 26 to 29 group, with less important employees in essential and so-called critical war industries to be called up before key men. Probably half of the present 365,000 deferred farm workers between 18 and 25 now being examined prior to review of their cases can expect to be inducted, Draft Director Hershey said.

While the President said some sort of national service act was necessary to channel workers into necessary jobs, representatives of both labor and industry told congress that the present comparatively small manpower shortage could be best met by voluntary recruiting.

BUILDING MATERIAL

Because it is looked to as the largest single field of expansion, the building trade will have to employ 6½ million workers if the postwar objective of 60 million jobs is to be attained, R. J. Thomas of the CIO Automobile Workers union told the American Home Builders convention in Chicago, Ill.

With 6½ million workers, Thomas said, a minimum of 1,750,000 homes could be constructed each year, a small percentage of the new housing needed.

EUROPE:
'Greatest Offensive'

Their lines shattered and their border lands imperilled by what was described as the greatest offensive in history, Germany's armies of the east fell back for a feverish reorganization in an effort to stem the Russian tide that threatened to roll right on to Berlin.

Although the Russians plunged forward all along the sprawling Polish plains, the drive of their First Ukrainian army under Marshal Konev on the rich industrial province of Silesia to the southwest constituted the greatest immediate danger to the Germans, with the enemy frankly admitting its loss would seriously impair their ability to continue the war. In an effort to shore up the Russian advance there, Heinrich Himmler's home army was called into action under a hail of aerial and artillery bombardment.

To the north of this sector below Warsaw, the First White Russian army of Marshal Zhukov speared westward toward Pomerania, and also threw one wing southward in a move designed to hook up with the First Ukranian force and trap Ger-

Leaders in the great Russian offensive include (left to right) Marshals Zhukov, Konev and Rokossovsky.

man units in a huge pocket. As these two drives developed, Marshal Rokossovky's Second and General Cherniakvsky's Third White Russian armies squeezed East Prussia from the north and south.

Nazis Outnumbered

Frankly admitting the gravity of their situation, the Germans reported the withdrawal of their forces to the west, and the husbanding of their reserves for counter-action if the rapidity of the Russian advance should result in the spreading of their strength. Because of the numerical superiority of the Russians, it was said, it was impossible to stop the Reds' advance by attempting frontal resistance on the open plains along the whole line.

Yanks Regain Initiative

As the Russian fighting developed, the Nazis looked with apprehension to the west, where they feared another all-out thrust against the Rhineland.

Regaining their balance after the German break-through of a month ago, Allied forces were back knocking against the Nazi frontier, with the British Second army punching toward the Roer river along a broad front, and the U. S. First and Third armies whittling down the remains of the big bulge.

As the First and Third armies hacked off the shoulders of the bulge, they encountered stubborn rear-guard action as Von Rundstedt sought to pull his prize troops back into the Siegfried line.

While British and American forces exploited their initiative to the north, the Germans maintained pressure on the lower Alsatian plains, throwing in tanks and infantry to hold the positions gained in limited offensives while main Allied power was diverted to Belgium.

"They Say . . ."

In the event definite assurances are given to American corporations and business enterprises that their property rights will be respected and that they will be given the opportunity of making legitimate profits, it may be expected that a considerable flow of private American capital abroad in the form of direct investments will take place.—Alexander Hamilton Institute.

LEND-LEASE:
Food Shipments

Showing a 4 billion pound drop under 1943, lend-lease food and agricultural products shipments during 1944 totalled over 7 billion pounds, with meats, dairy items and grain cereals composing the bulk of deliveries.

Of meat lend-leased, 708,627,733 pounds were cured, smoked and frozen pork products; 65,238,418 pounds of frozen pork loins; 60,762,243 pounds of lamb and mutton; 23,285,892 pounds of frozen veal, and 16,101,290 pounds of frozen beef. Of dairy products, 280,845,699 pounds of cheese were delivered, 23,886,449 pounds of butter, and 17,860,503 pounds of butter oil.

Other food and agricultural products lend-leased included 543,930,297 pounds of granulated sugar; 44,041,306 pounds of canned peas; 41,424,897 pounds of canned peaches; 28,059,988 pounds of canned green beans; 24,650,997 pounds of canned tomatoes; 21,868,310 pounds of soap, and 20,195,112 pounds of canned pineapple.

SYNTHETIC RUBBER:
1944 Production

Built up almost overnight as a result of the severance of the nation's imports of crude rubber from the far east following the Japs' early conquests, the U. S.'s 700 million dollar synthetic rubber industry produced 763,000 long tons (of 2,240 pounds) last year.

Declaring that synthetic production can be boosted to 1,000,000 tons if necessary, Secretary of Commerce Jesse Jones said that the 1944 output was equal to the nation's annual peacetime rubber needs.

Because 60 per cent of the rubber was made from alcohol instead of petroleum, Jones said, production costs of the synthetic averaged 33 cents a pound, compared with about 19 cents for the crude.

Celebrities Stricken

On the same day, in mid-month, death came to three of the nation's celebrated figures:

In Meriden, Conn., 50-year-old Francis T. Maloney (Dem.) succumbed to a heart attack. Left to support four brothers and sisters at the age of 12, Maloney worked up to the senate from newspaper reporter, mayor of Meriden and congressman.

In Washington, D. C., to attend the President's inauguration, 57-year-old George D. Crowley, vice chairman of the division of finance of the Democratic National committee, and one of the founders of the 1,000 club during the recent campaign, died of heart trouble. A prominent Chicago insurance man and financier, Crowley was the son of an assistant secretary of the treasury under President Cleveland.

Creator of the famed "Frank Merriwell" fiction character, whose amazing exploits thrilled millions of readers, 78-year-old Gilbert Patten, who wrote under the name of Burt L. Standish, passed away in San Diego, Calif. Patten, who ran away from home at 16 because he didn't like school, wrote a 20,000-word adventure novel every week for 18 years, and was estimated to have written 40,000,000 words in his lifetime.

BASEBALL:
Gets FDR's Nod

With the game having been given presidential approval provided it did not interfere with the conduct of the war, major league baseball magnates began laying plans for the 1945 season, with their chief concern being to scrape together teams from the dwindling manpower pool.

Although the clubs were expected to rely again on discharged or rejected army personnel, their plans were complicated by recent government regulations calling for re-examination of 4-F's and work or fight orders to men under 38. Some of these men, however, intend to enter essential industry and arrange for playing ball on the outside.

Because of the need for personnel, " . . . kids about 17 . . . will have a wonderful opportunity to play in the big leagues," said Clark Griffith, owner of the Washington Senators.

U. S. NAVY:
Greater Firepower

Its firepower increased five times since July, 1940, combatant ships, auxiliaries and coast guard vessels of the U. S. navy can now hurl 2,000 tons of steel in a 15 second firing run, the equivalent of 50 freight carloads of steel.

Packing a wallop 92 per cent greater than the pre-Pearl Harbor battleship, Texas, the modern Iowa is armed with nine six-inch guns mounted in threes, twenty five-inch double purpose guns in twos, and many smaller anti-aircraft guns.

Possessing 123 per cent more firepower than the 1930 heavy Pensacola, the modern Baltimore carries nine eight-inch guns in threes, twelve five-inch anti-aircraft guns in pairs, and numerous smaller anti-aircraft weapons.

BRITISH CASUALTIES

With the United Kingdom of England, Scotland and North Ireland suffering 635,107 casualties alone, British Empire losses totaled 1,043,554 up to last November, Prime Minister Churchill told the house of commons.

Of the other constituents, India's losses reached 152,597; Australia, 84,861; Canada, 78,985; New Zealand, 34,115; South Africa, 28,943, and other colonies, 28,946.

Including recent western front casualties, U. S. losses totaled 721,325.

Ernie Pyle's Slant on the War:

Digging Ditches Becomes A Welcomed Job to G.I.s

Foxholes Offered Protection Against Nazis' Continued Attack

By Ernie Pyle

(Editor's Note): This dispatch was written and first published when Pyle was with the G.I.s at the African front. He is now on his way to cover the boys in the Pacific war zones.

WITH TROOPS IN AFRICA:—When our Sahara salvage expedition found wrecked airplanes far out on the endless desert, the mechanics went to work taking off usable parts; and four others of us appointed ourselves the official ditchdiggers of the day.

We were all afraid of being strafed if the Germans came over and saw men working around the planes and we wanted a nice ditch handy for diving into. The way to have a nice ditch is to dig one. We wasted no time.

Ernie Pyle

Would that all slit trenches could be dug in soil like that. The sand was soft and moist; just the kind children like to play in. The four of us dug a winding ditch 40 feet long and 3 feet deep in about an hour and a half.

* * *

The day got hot and we took off our shirts. One sweating soldier said: "Five years ago you couldn't a got me to dig a ditch for $5 an hour. Now look at me.

"You can't stop me digging ditches. I don't even want pay for it; I just dig for love. And I sure do hope this digging today is all wasted effort. I never wanted to do useless work so bad in my life.

"Any time I get 50 feet from my home ditch you'll find me digging a new ditch, and brother I ain't joking. I love to dig ditches."

Digging out here in the soft desert sand was paradise compared to the clay-like digging back at our base. The ditch went forward like a prairie fire. We measured it with our eyes to see if it would hold everybody.

"Throw up some more right here," one of the boys said, indicating a low spot in the bank on either side. "Do you think we've got it deep enough?"

"It don't have to be so deep," another one said. "A bullet won't go through more than three inches of sand. Sand is the best thing there is for stopping bullets."

A growth of sagebrush hung over the ditch on one side. "Let's leave it right there," one of the boys said. "It's good for the imagination. Makes you think you're covered up even when you ain't."

That's the new outlook, the new type of conversation, among thousands of American boys today. It's hard for you to realize, but there are certain moments when a plain old ditch can be dearer to you than any possession on earth. For all bombs, no matter where they may land eventually, do all their falling straight at your head. Only those of you who know about that can ever know all about ditches.

* * *

A Soldier's Letter.

While we were digging, one of the boys brought up for the thousandth time the question of that letter in Time Magazine. What letter, you ask? Why, it's a letter you probably don't remember, but it had become famous around these parts.

It was in the November 23 issue, which eventually found its way over here. Somebody read it, spoke to a few friends, and pretty soon thousands of men were commenting on this letter in terms which the fire department won't permit me to set to paper.

To get to the point, it was written by a soldier, and it said: "The greatest Christmas present that can be given to us this year is not smoking jackets, ties, pipes or games. If people will only take the money and buy war bonds . . . they will be helping themselves and helping us to be home next Christmas. Being home next Christmas is something which would be appreciated by all of us boys in service!"

The letter was all right with the soldiers over here until they got down to the address of the writer and discovered he was still in camp in the States. For a soldier back home to open his trap about anything concerning the war is like waving a red flag at the troops over here. They say they can do whatever talking is necessary.

"Them poor dogfaces back home," said one of the ditchdiggers with fine soldier sarcasm, "they've really got it rugged. Nothing to eat but them old greasy pork chops and them three-inch steaks all the time. I wouldn't be surprised if they don't have to eat eggs several times a week."

"And they're so lonely," said another. "No entertainment except to rassle them old dames around the dance floor. The USO closes at 10 o'clock and the night clubs at 3. It's mighty tough on them. No wonder they want to get home."

"And they probably don't get no sleep," said another, "sleeping on them old cots with springs and everything, and scalding themselves in hot baths all the time."

"And nothing to drink but that nasty old ten-cent beer and that awful whisky," chimed in another philosopher with a shovel.

"And when they put a nickel in the box nothing comes out but Glenn Miller and Artie Shaw and such trash as that. My heart just bleeds for them poor guys."

"And did you see where he was?" asked another. "At the Albuquerque Air Base. And he wants to be home by next Christmas. Hell, if I could just see the Albuquerque Air Base again I'd think I was in Heaven."

That's the way it goes. The boys feel a soldier isn't qualified to comment unless he's on the wrong side of the ocean. They're gay and full of their own wit when they get started that way, but just the same they mean it. It's a new form of the age-old soldier pastime of grousing. It helps take your mind off things.

* * *

Into Northern Tunisia.

We moved one afternoon to a new position just a few miles behind the invisible line of armor that separates us from the Germans in Northern Tunisia. Nothing happened that first night that was spectacular, yet somehow the whole night became obsessed with a spookiness that leaves it standing like a landmark in my memory.

We had been at the new camp about an hour and were still setting up our tents when German planes appeared overhead. We stopped work to watch them. It was the usual display of darting planes, with the conglomerate sounds of ack-ack on the ground and in the sky.

Suddenly we realized that one plane was diving straight at us, and we made a mad scramble for foxholes. Two officer friends of mine had dug a three-foot hole and set their tent over it. So they made for their tent, and I was tramping on their heels. The tent flap wouldn't open, and we wound up in a silly heap. Finally it did open, and we all dived through the narrow opening all at once.

We lay there in the hole, face down, as the plane came smack overhead with a terrible roar. We were all drawn up inside, waiting for the blow. Explosions around us were shatteringly loud, and yet when it was all over we couldn't find any bomb holes or anybody hurt.

But you could find a lot of nervous people.

* *

Dusk came on, and with dusk began the steady boom of big guns in the mountains ahead of us. They weren't near enough for the sound to be crashing. Rather it was like the lonely roll of an approaching thunderstorm—a sound which since childhood has always made me sad with a kind of portent of inevitable doom.

We went to bed in our tents. A nearby farmyard was full of dogs and they began a howling that lasted all night. The roll of artillery was constant. It never stopped once in 24 hours. Once in a while there were nearer shots which might have been German patrols or might not.

We lay uneasily in our cots. Sleep wouldn't come. We turned and turned. I snapped on a flashlight.

"What time is it?" asked Chris Cunningham from the next cot.

"Quarter to one," I answered. "Haven't you been asleep?"

He hadn't.

General Doolittle Meets a Doolittle

The last time I had seen General Doolittle was at the desert airdrome of Biskra on the edge of the Sahara.

Lieut. Gen. Jimmy Doolittle, head of the Eighth air force over here, noticed one day in the roster of officers at his staff headquarters the name of a Captain Doolittle. One day not long after that his phone rang and the voice at the other end said, "This is Captain Doolittle."

"Oh, yes," said the general. "I had noticed your name and I meant to call you up sometime."

"I'd like to come in and see you," said the voice at the other end.

"Why, yes, do that," the general said. "I'm pretty busy these days, but I'll switch you to my aide and he'll make an appointment for you. Glad you called, captain. I'll look forward to seeing you."

u of reclamation to get the am underway.

ident Roosevelt signed the bill ecember 23, but put a hiatus proceedings by recommend- he creation of a Missouri Val- uthority to handle the project sserting that his approval of ill was with the distinct under- ing that it would in no way rdize the creation of such an y. He appealed for early con- ation of the new authority by th congress.

President further asserted: nsider the projects authorized e bill to be primarily for post- construction."

Only Blue-Print Now.

nce, the project is now merely e blue-print stage and it is pos- that a fight may develop in the congress over whether there be divided responsibility as to army and the reclamation au, or whether a new Missouri y authority shall be created.

oponents of single regional con- point to the Tennessee Valley ority and its successful opera- as a yardstick for future fed- policy in developing and con- ng all the nation's waterways. ever, there are powerful inter- which oppose the creation of regional authorities, such as power utility interests, the rail- s, the national rivers and har- congress, the Mississippi Val- association, and even divided ic opinion along the waterway. e rule of thumb, for instance, of TVA is that regional authority produce the largest possible efits at the least possible costs, "each task must be carried in such a way as to contribute he total result to salvage every

ONE OF MANY dams and reservoirs already constructed in the Missouri Valley basin is the Gibson dam on the Sun river in Montana. The top of the great wall is about 200 feet above the river bed. Eighty-nine more such projects are planned.

possible benefit and the ultimate goal should be the greatest procurable economic returns and human benefits for the entire region."

Arguments on Rule.

Even agricultural interests are divided on the pros and cons of regional authorities as opposed to operation by established federal agencies. For instance, in agricultural sections where there is plentiful rainfall along the lower Missouri and water resources are adequate, opposition is voiced as "subsidized competition" by the extension of irrigation. Public opinion is joined in industrial areas with the railroads in opposing the development of new competing waterways.

One basic objection to operation by the reclamation bureau has come from large land owners and ranchers of the west and northwest. Under the law governing the bureau of reclamation, this agency cannot propose irrigation for more than 160 acres of land for any one person. Another objection is that all reclamation projects must be self-liquidating over a period of approximately 40 years. In contrast, the statutes governing TVA give 60 years or more for liquidation and a regional authority likely would not be hamstrung by the limitation of acreage proviso.

In a recent pronouncement however, Harry W. Bashore, commissioner of the reclamation bureau said: "We continue to stand on the basic policy that the bureau will support the principle of relatively small family farms as one of the foundations of American agriculture and rural social life. On new land which is brought under irrigation for the first time, we shall insist that the undeveloped property be parcelled in lots of not more than 160 acres."

Forms Shrink in Size.

During the past 20 years the average size farm or ranch in the states of the Missouri basin have increased, rather than diminished in size, due largely to the decrease in population. For instance, in 1920, the average size farm in Montana was 480 acres, in Wyoming was 749 acres and in Nebraska it was 339 acres. By 1940 the farms had increased to 821 acres, 1,866 acres and 391 acres, respectively.

Dust bowls, droughts, floods have driven farmers and ranchers from the plains states during the past decade. Net loss of population in the period from 1930 to 1940 in the seven plains states was 302,314. In the Missouri-Souris area of North Dakota, a strictly rural farm area, 28.7 per cent of the population moved out, equal to 1,000 families of five each. The financial loss entailed by this shift of population in at least four of these states is reflected in abandoned farms, abandoned towns and unused properties. It is further reflected in increase of size and congestion in the three larger cities of the basin, Denver, Omaha and Kansas City.

These Benefits Expected.

The agreed plan of the reclamation bureau and the army engineers is intended to do these things:

1—Provide navigation and flood control on the river from its mouth to Sioux City, a distance of about 760 miles, by construction of levees and revetments to provide a channel 6 feet deep and 300 feet wide.

2—Construct 89 reservoirs and dams with a combined capacity of 45,700,000 acre feet of water. (An acre-foot is water a foot deep over one acre.) This is more than the annual average flow of the river at its mouth. These reservoirs are to be constructed to withhold water along the main tributaries including the Yellowstone, the Big Horn, the Belle Fourche, the Cheyenne, the North Platte, the Republican, the Smoky Hill and along the main stream.

3—Irrigation of 4,760,400 acres of new land and furnishing supplemental water to 547,000 additional acres to increase crop values approximately $130,000,000 annually on 53,000 farms of about 90 acres each.

4—To increase the population of the Basin by about 636,000 from irrigation development alone.

5—To increase the assessed valuation of properties approximately $600,000,000.

6—To furnish adequate and safe water supply and sewage facilities for 19 cities and towns along the river.

7—To construct 17 hydroelectric plants which will provide 3,800,000,000 kilowatt hours of electricity to be sold at an annual value of $17,141,000.

8—To create additional recreational facilities through formation of new lakes and parks and the protection of fish and wild life.

9—To introduce proper land use, soil erosion conservation, contour treatment and reforestation.

States in the Missouri Basin watershed include approximately two-thirds of Montana, from the source of the Missouri in the southwest corner of the state; North Dakota, South Dakota, Nebraska, Wyoming, including roughly the northeast half from a line bisecting the state from the northwest to the southeast corner; approximately the northeast quarter of Colorado; the north half of Kansas; a tip of the southwest corner of Minnesota; a strip along the west boundary of Iowa and the northern part of Missouri from a line reaching from the Ozarks in the southwest in a northeasterly direction to St. Louis.

Needs of the people in these widely scattered areas of long distances are divergent. Those living along the lower river want flood protection at one season, and supplemental water for navigation at others. In the western and northwestern section the people want protection from local floods, water for irrigation, water for sanitary and domestic uses and power for various purposes. The comprehensive plan which has been agreed upon is intended to store water to prevent floods and water the land in time of drought. The great river will be made to serve the people to live within its basin and thus decrease its destructive power.

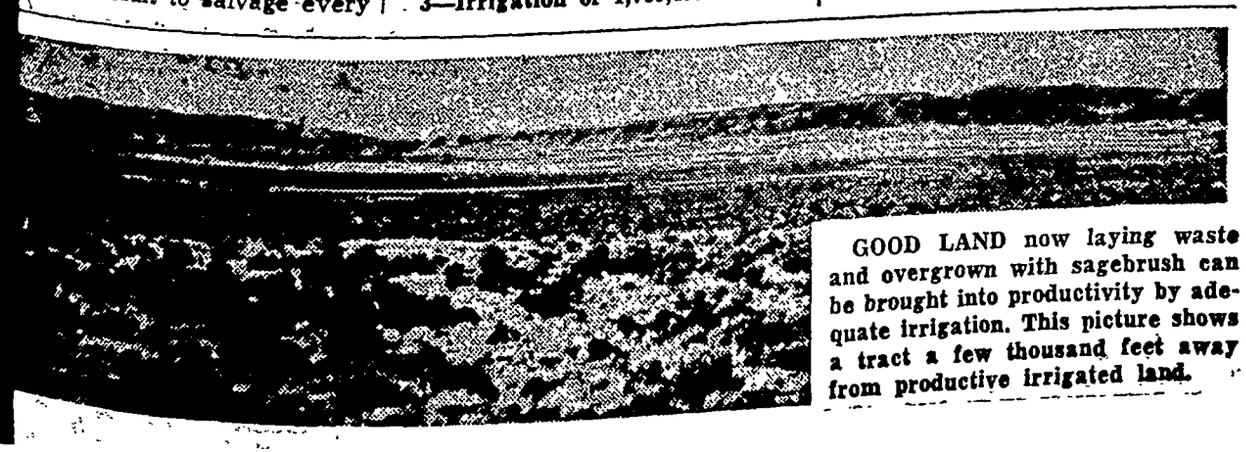
Will Pay for Itself.

Construction cost of the plan is estimated at approximately $1,325,000,000 which is to be self-liquidating from the sale of water and power over a period to be determined. Only $400,000,000 of this cost has been authorized.

The entire nation has a stake in maintaining the agricultural productivity of the plains states, for even in the drought period of 1930-1939 these seven states—Montana, the Dakotas, Wyoming, Colorado, Kansas and Nebraska, produced 41.5 per cent of the nation's wheat; 43.4 per cent of the rye; 43.8 per cent of our barley; 15.3 per cent of our oats and 10 per cent of our corn.

Droughts, the dustbowls and the lowering of the ground water level by the rampaging river has permitted wheat yields to reach 20 bushels to the acre only 5 times—1879, 1882, 1883, 1895 and not again until 1942. In many of those intervening years the yield has been below 10 bushels to the acre, and thousands of acres of seeded land have been abandoned year in and year out.

But at last the government has developed a comprehensive plan aimed at the relief of this agricultural arsenal of the nation. From Cut Bank, Mont., in the northwest to St. Louis in the southeast; from Denver in the southwest to Devils Lake, N. D., in the northeast—the harnessed Missouri will extend its benefits—but not until after the war.



GOOD LAND now laying waste and overgrown with sagebrush can be brought into productivity by adequate irrigation. This picture shows a tract a few thousand feet away from productive irrigated land.

JESUS AND THE TWELVE

LESSON TEXT—Matthew 10:1, 5-8; 11:1, 25-30.

GOLDEN TEXT—Ye are my friends, if ye do whatsoever I command you.—John 15:14.

Service for Christ has not always been as impressive and effective as it should be because it has lacked conviction and spiritual power. God did not intend it to be the weak and faltering thing that it often is, because of our failure to go God's way.

The sending out of the twelve had special significance, and yet it brings forth principles which have a bearing on the service of every believer in Christ.

The Servants of Christ—

I. Have a Divine Commission (10:1, 5-8).

The twelve disciples had already been called into the Lord's service. Now they were to be prepared for the service which was ahead. It was a time of commissioning and empowerment for service.

God calls men today to serve Him. In fact, there is a very real sense in which every Christian is called to serve. Let no one try to excuse himself from that responsibility and privilege.

To some comes a special call to leave their accustomed daily work and launch out into a broader service for Christ. When that time comes, we may go forth with the assurance that the power of a divine Saviour goes with us. The twelve disciples had some special powers which we do not have and do not need. God suits the power to the need, and that means that in every circumstance we may look to Him with assurance, and go on.

One of our difficulties in dealing with such matters as spiritual power is that we interpret the things of the realm of the spirit by physical standards and measurements. We are so quick to say "I cannot" on the basis of our logical human reasoning, when an appreciation of the power of God which is operative on our behalf would make us say with confidence, "I can." But, sadly enough, having left God out of our reckoning, we find that it is indeed true that we cannot.

Serving Christ means doing so in His power, and with His grace upon us. Nothing less will do! Nothing more is needed!

II. Declare a Divine Revelation (11:1, 25-27).

The messenger's responsibility and importance are largely determined by the nature of the message he has to convey. Particularly is that true where the message must pass through his personality and thus be proclaimed. The nations of the earth choose their most able men to be their ambassadors and grant them full power.

The glorious thing about being a messenger for God is that we carry no ordinary communication. What we have to present is far above the most important message any earthly ambassador could possibly have to carry.

We, the children and servants of God through Jesus Christ, have something direct from the throne of God. He has revealed it (v. 25), and it seemed good in His sight to give it to those who had the childlike faith to believe Him.

God's revelation is hidden from those who are wise in their own conceits, who are too proud to come by way of humility and faith. Thank God, some of the wise and mighty of this world have been willing to become as little children and learn at the feet of Jesus.

The encouraging thing about it is that the door is open to the simplest believer to trust God, to take the revelation of God's truth in His word, and give it out with grace and power.

III. Extend a Divine Invitation (11:28-30).

"Come"—what a blessed word for the needy and sinful! They are not to be shut out by their sin, nor to be hindered by their weakness. The door is open, and the invitation is to come. Why not respond?

To whom are they to come? To Jesus. There are times when men can help us, when friends or church officers or the pastor can give us an uplifting word of counsel and encouragement. But for salvation, for a real lifting of the burden from the shoulders of those "that labor and are heavy laden," there is no one like Jesus.

We are privileged to invite people to Jesus, knowing that if they "learn" of Him (v. 29), they will not only have their loads lifted and find rest, but will enter into a blessed yoke, fellowship with Him in life and service.

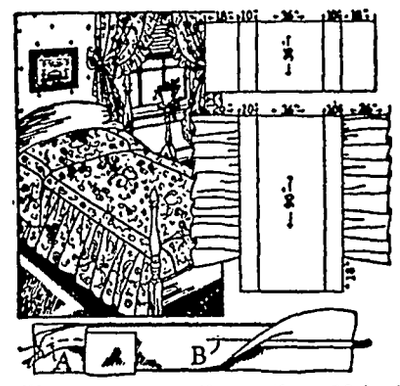
His is a wholesome or a kindly yoke. That is the meaning of "easy" in verse 30. It is not always easy to serve Christ, but being yoked with Him in a kindly fellowship of service makes the burden light.

The world is full of tired and discouraged people. We who know Christ have the adequate answer to their need. Shall we not go in His name to present the truth to them and invite them to come to Christ?

Bed Spread Made Of 36-Inch Goods

THIS spread for a double bed may be made out of chintz or any 36-inch-wide material that you have on hand. Eleven and one-half yards will be required for a bed 54 inches wide.

Cut the center parts first; then the 18-inch side sections for the



pillow cover; then the 10-inch strips for the pillow cover and spread. This leaves a long strip for the flounce. You may buy seam welting or cover cable cord with bias strips as at A. Use your machine cording foot for the seam so that the stitching will be close to the cord as at B.

* * *

NOTE—This spread is from SEWING Book 1 which is 32 pages of illustrated directions for slip covers, dressing tables, couch covers and other things to keep homes bright and attractive for the duration. To get a copy of Book 1 enclose 15 cents with name and address direct to:

ASK ME ANOTHER?

A General Quiz

The Questions

1. What is the difference between a mosquito and a Mosquito?
2. A barleycorn was once used as a measure of length. How long was it?
3. Since 1775 how many years has the United States been at peace? At war?
4. What is the only musical instrument represented on a national flag?
5. Is a Brahman a Hindu of the lower caste?
6. Which is the highest rank, a captain in the U. S. army or a captain in the U. S. navy?
7. Absolutely pure gold is said to contain how many carats?
8. Who was the first person to be portrayed on a U. S. coin while still alive?

The Answers

1. A mosquito is an insect; a Mosquito is an inhabitant of the Mosquito coast of Central America.
2. One-third of an inch.
3. One hundred forty-eight years of peace; 21 years of war.
4. The harp on the Irish flag.
5. No. He is of the sacred or priestly caste.
6. A captain in the navy.
7. Twenty-four.
8. Calvin Coolidge. The Sesqui-Centennial half dollar issued by the mint in 1926 shows George Washington and Coolidge.

MULTIPLE RELIEF EASES COLD MISERIES LIKE A DOCTOR'S PRESCRIPTION

Many doctors prescribe a combination of ingredients for relief of cold symptoms. Colds don't show up as a single ailment, but as a complex series of miseries. Grove's Cold Tablets are a combination of eight active medicinal ingredients. Work internally and promptly on all these symptoms: relieve headache, reduce fever, ease body aches, lessen muscular pains, ease nasal stuffiness. Take exactly as directed. Get Grove's Cold Tablets.

GROVE'S COLD TABLETS

Happy Relief When You're Sluggish, Upset

WHEN CONSTIPATION makes you feel punk as the dickens, brings on stomach upset, sour taste, gassy discomfort, take Dr. Caldwell's famous medicine to quickly pull the trigger on lazy "inards" and help you feel bright and chipper again.

DR. CALDWELL'S is the wonderful senna laxative contained in good old Syrup Pepsin to make it so easy to take.

MANY DOCTORS use pepsin preparations in prescriptions to make the medicine more palatable and agreeable to take. So be sure your laxative is contained in Syrup Pepsin.

INSIST ON DR. CALDWELL'S—the favorite of millions for 50 years, and feel that wholesome relief from constipation. Even finicky children love it.

CAUTION: Use only as directed.

DR. CALDWELL'S SENNA LAXATIVE CONTAINED IN SYRUP PEPSIN

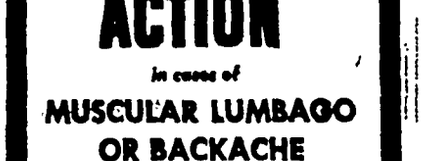
FARMERS Say—

IT PAYS BIG TO INOCULATE WITH

NITRAGIN INOCULATION

● Farmers report that inoculation with NITRAGIN makes bigger yields and surer crops. NITRAGIN is good crop insurance for every planting of clovers, alfalfa, lespedeza, soybeans, other legumes. It costs a few cents an acre, takes only a few minutes to mix with the seed. It's the oldest, most widely used inoculant. Produced by trained scientists in a modern laboratory. Get it, in the yellow can marked Nitragin, from your seed dealer.

FREE booklets tell how to grow better cash, feed, and soil building crops. Write today.



Below: Experiment Station test plots showed this improvement.

THE NITRAGIN CO., 3998 N. BOOTH, MILWAUKEE 12, WIS.

SORETONE

soothes fast with

CAPITAL REPORT

WHAT OUR IOWA MEN ARE DOING IN CONGRESS

Washington—Feb. 7 A newcomer in the House of Representatives has many lessons to learn about procedure in the House Rules for the governing of a deliberative body of 435 members must necessarily be technical and require the earnest study and attention of a new member But a new Congressman does not suffer from any hazing at the hands of the older members He is received with courtesy and every attempt is made to inform him of the House routine and other things he should know.

* * *

Congressman James I. Dolliver of Fort Dodge, the new Representative from Iowa's Sixth District, is now settled in his office in 308 of the Old House Office Building and invites all Iowans visiting Washington to call upon him Miss Marguerite Mullen of Fonda is his secretary, and the office staff is kept busy with the countless duties a Congressman's office is called upon to perform.

* * *

Dolliver hasn't missed a roll call and doesn't expect to miss any. He is intent on doing his job well. He has been assigned to the Post Office and Post Roads Committee and the Immigration & Naturalization Committee, both of which are important to Sixth District residents. The committee assignments of the other members of the Iowa delegation are also of interest: Martin, 1st district, Military Affairs; Talle, 2nd district, Banking and Currency; Gwynne, 3rd, Judiciary; LeCompte, 4th, Public Lands, Insular Affairs, Election of President, Vice-President, and Members of Congress; Cunningham, 5th, Veterans Affairs, Roads; Jensen, 7th, Appropriations; Hoeven, 8th, Agriculture.

* * *

Congressman and Mrs Dolliver attended the inauguration and the White House luncheon that followed. The guests at the luncheon were greeted in the main hall of the White House by Mrs Roosevelt and Mrs. Truman and later were served chicken salad, a sandwich, cake and coffee.

* * *

The Iowa Society of Washington honored the Hickenloopers and the Dollivers on January 20 at a reception and dance at the Shoreham hotel. Other members of the Iowa delegation were on hand to welcome the newcomers.

* * *

A speech in Congress that personally interested the Sixth District Congressman was Clare Booth Luce's talk on her trip to the European battlefronts, in which she lauded the 34th Division and told of its valor and sacrifices. It is well known that a great many young men from the Sixth Iowa District are serving in that Division. "Only a few days prior to Mrs. Luce's report," Dolliver said "Lt. Col DeLoss Marken, chaplain of the 34th, called on me and we talked at length of what the Division had done in some of the toughest fighting of the war. I am intensely proud of these boys, so many of whom we all know."

* * *

It is interesting to note that every member of the Iowa delegation is a veteran of World War I and knows from personal experience the problems that will confront those returning from World War II

* * *

Gen. Louis Hershey, Selective Service Director, recently held conference at which Congressmen took up with him the question of large-scaled rafting of farm workers. Dolliver reports Gen Hershey as saying it would be up to the local draft boards to decide who would be inducted, and adds: "My own feeling is that the local boards in Iowa have done a most difficult task well and that they will keep on doing so. They will continue to see that we do our full share in the war effort, both in food production and in the armed forces As Gen. Hershey said, there probably is no group of men more entitled to the gratitude of the American people than the local selective service boards."

The extreme breadth of Norway is about 260 miles, with the average about 60 miles, and its length is 1,000 miles.

Approximately 638,000,000 tons of coal were mined in the United States in 1942.

Simple Emulsion Removes Stubborn Grease Spots

For stubborn, greasy spots on painted or enameled woodwork that resist ordinary suds and water, home management specialists suggest a kerosene emulsion which can be easily prepared at home.

Excellent as a cleaner for painted, enameled and varnished wood surfaces, this emulsion works quickly and efficiently. To make the solution, dissolve one teaspoon of trisodium phosphate in a quart of hot water, 120 to 130 degrees Fahrenheit.

Melt three to four ounces of beeswax in an aluminum utensil. Remove utensil from the stove, and add two-thirds of a cup of kerosene. Slowly add the hot water solution to the melted wax-kerosene solution, stirring rapidly.

With a soft cloth, apply a small amount of the emulsion to the soiled woodwork, and rub dry, using a clean cloth. You'll be amazed at the speed with which it works—cleaning and polishing at the same time. The emulsion may separate while standing, in which case simply shake well before using again.

Moderate Climate

Despite the northern latitude, Finland's climate is moderate. Coastal waters temper extremes. Winter rules about four months in the south; seven months in the north. Average winter temperatures range from 25 degrees Fahrenheit in the south to 12 degrees in the north. Regional summer averages are 63 degrees and 53 degrees, respectively. Northern Finland has its midnight sun in summer and even in the south during the summer season there are only a few hours of darkness in the 24.

From the low southern and western coasts the land rises to central heights of 300 feet to 700 feet. The Koli mountains, near the eastern boundary, top 1,000 feet Finland's highest peak, Haltia, lifts its summit 4,300 feet in the extreme northwest. Rivers are numerous and swift. Power from rapids has been used to a considerable extent for industries.

Different Species

A plum is a prune and vice versa since they belong to the same species, whatever the average consumer may think about the matter, say horticulturists. The two words were originally used for the same fruit, plum being the Anglo-Saxon and prune the French, although modern usage differentiates between the fresh fruit from standard plum trees and a particular type of the dried fruit and its fresh equivalent.

How or when prune came to mean the dried plum is not known, says the U S. department of agriculture. Most plums ferment in the process if dried with the pit left in. Prunes dry successfully because they contain more sugar, firmer flesh and often more acid.

Today a prune is a plum with these particular characteristics, whether it is fresh, dried or canned. When plums are dried after the pits are removed they are called "dried plums," not prunes.

Mighty Palm

The carnauba palm increases in its productivity of wax and is said to reach its maximum at 50 to 60 years. Unlike most palms, the carnauba has a long life span and it is not uncommon for it to live 200 years. It grows to heights of from 50 to 60 feet. The palm requires plenty of sunshine and air and dwarfs the other vegetation around it. It prefers to grow along the banks of rivers and lakes, but it is also found in small isolated groves from the damp lowlands along the Brazilian coast to the forests of the interior. It is found on dry, sandy ground and resists the floods which sweep the countryside during the rainy season.

Oldest German City Dotted With Roman Ruins

Trier, German frontier town near Luxembourg, in the vicinity of which American forces made their first major penetration into German territory, is believed to be the oldest city in all Germany It was established under the Roman Emperor Augustus and has had a colorful history for nearly 2,000 years.

Visitors to peacetime Trier were constantly confronted with the contrast between the old and the new: the ancient Roman ruins that are everywhere, and the comparatively modern city houses and buildings. Trier might be compared to a modern print whose golden frame has tarnished with age.

The city's modern tree-shaded, flower-bordered square, like that of most German cities, often witnessed the gathering of its citizens for summer concerts, winter sports, or autumn festivals. Since Trier was the center of the Moselle valley wine industry, the autumn grape-harvesting festivals were particularly colorful, some of the pageants incorporating old Roman customs.

The greatest architectural treasure is the Porta Nigra (Black Gate), reputedly built in the fourth century and considered by some antiquarians the finest Roman ruin north of the Alps. On the narrow crooked streets of the old town, this three-storied fortified Roman gate still stands. With its two entrances and well-built foundations, it recalls the early periods when the city had to defend itself against its foes.

Lifers Guinea Pigs In Plague Battle

Convicts Used in Fight on Tropical Diseases.

TRENTON, N. J.—Behind the gray walls of the sprawling state prison here, 200 convicts are paying off a debt to society by risking possible death in a grim, patriotic fight to unearth a preventive against tropical diseases. Most are lifers and all are long-time prisoners.

If they win, and their 1,000 fellow inmates are praying that they do, their only reward will be the knowledge that they helped the war effort by wiping out plagues which menace the health of fighting men on nearly all fronts.

Seventy of the 200 volunteers already have suffered intensely in the experiments undertaken by the army service forces and the Rockefeller institute for medical research.

The results of the research in the three-city-block prison are a closely guarded secret. But prison officials make no bones of their pride in the men. Only a few years ago bloody revolts and escapades rocked the prison's 10 buildings. But the setting was different when the army called for volunteers from among the lifers and other long-termers, and these men volunteered.

Then Dr John Paul, professor of medicine at Yale university, and Maj. Albert B. Sabin, of the army service forces, and their staffs went to work on the human "guinea pigs."

Their aim was not a cure for the diseases The army wanted its men immunized against the maladies which reduce ranks, put soldiers in beds, retard campaigns and sometimes lose wars.

These men were reputedly shot with malaria and dysentery germs. They were subjected to projects so secret that neither Warden Ellis nor the researchers would talk about experiments, results and progress.

Ellis admitted nearly all the volunteers suffered intensely, but they smiled through their ordeals. Many spent 10 agonizing days in bed, wracked by disease, and now are convalescing satisfactorily.

Chiggers, We Are Told, Also Prefer Blondes

LINCOLN, NEB. — The ubiquitous chigger, like gentlemen of two decades ago, prefers blondes, and has an unerring ability to locate same.

The pesky bugs seek and find thin-skinned victims, according to Extension Entymologist Don B. Whelan of the state agricultural college, and their keen sense of location leads them directly to the most likely source of food.

The majority of people fail to realize they have provided feeding ground until several hours after the unhappy event, he said, when small, red, itchy spots appear.

Whelan suggested a film of sulphur dust around the ankles, on the clothing, and at all likely points of contact to discourage the foragers' appetites. After exposure to the tiny tormentors, a drop of fly-spray on each bite will tend to kill the chiggers and soothe the itching, he said.

A warm, soapy bath was next on the entymologist's list of recommendations for scratching sufferers.

"If they have used sulphur on their skins, they'll need it," he commented, "and if they haven't, they'll need it even more."

Scoops Tree Leaves to Be Used as Luck Tokens

WITH ALLIED AIR FORCES ATTACKING SOUTHERN FRANCE.—Flying Frenchmen of the famous Lafayette escadrille and sister squadrons unleashed their Thunderbolts over their native land, supporting the Allied sea and air borne invasion which struck France's southern shore.

Each pilot of the P-47s with Tricolors painted on the tails carried a leaf from a tree in France next to his heart as he flew.

The French major who commands a fighter-bomber group supplied the leaves. He was strafing a train over France not long ago and swept so low he hit a tree. But the powerful Thunderbolt plowed on through and brought him back—with a big bunch of leaves decorating his plane. He divided them among his fellow pilots.

Bumper Rice Crop Bans Danger of Bengal Famine

CALCUTTA. — Crop prospects in the lush green rice fields of Bengal indicate that there will be no repetition of last year's famine. Calcutta a year ago was crowded with hungry hordes estimated at more than 250,000 men, women and children, while in other parts of Bengal thousands were dying of hunger and disease.

Yank Beats British Expert at Own Game

LONDON. — Sgt. Jerry Psycyolkowski of Philadelphia, a cook, has at last proved to the British that a dart in the hand of a U. S. soldier is a dangerous weapon. In the finals of a pub tournament, the sergeant beat a Royal air force expert, who claimed to have never before been defeated.

SCHOOL NEWS

SENIOR CLASS NEWS
—By Patricia Kudje.

This semester we started on the unit about slavery and the Civil War The chapter we are on now is "Slavery in Politics." Our notebooks are getting full again—there really is a lot to remember in American History.

In Bookkeeping we have studied some of the first things that we must know. We know how to keep a journal, ledger, trial balance, balance sheet, and profit and loss statement All of us think that it is very interesting. We have class in the study hall and each of us has an individual drawer to keep our things in.

* * *

JUNIOR HIGH SCHOOL NEWS

We are beginning a unit on Communication and Transportation in our Civics. We expect to learn more about our postal service and problems that confront public utilities. Last week we debated on the topic: "Resolved, that our state laws should require all persons to obtain a high school education or it's equivalent."

In Health, we wrote a test over Unit III which was about our respiratory system and our eyes.

Friday we sketched pictures of our pets in Art. Our pictures showed more dogs as pets than any other animal.

* * *

FIFTH AND SIXTH GRADE NEWS

Iris Shaefer was absent this past week because of illness.

For Art this week we completed our Eskimo posters. We now have them up on display in our room.

Thursday Sondra Bridges and Darlene Bachman entertained our room with treats. The occasion being their birthdays.

Friday was the only day this week that all of the Third and Fourth Graders have been at school. Many of the boys and girls have been out due to illness.

We had two birthdays in our room during the week. On Wednesday Neva Ann Anderson was 10 years old, and on Friday we celebrated Billy Waddingham's birthday. Both people gave us very nice treats.

The Third Grade has just completed a Unit in their Geography on Clothing. We read about the different kinds of materials. We were interested in seeing how the clothing has changed from the time of the cave people up to the present time.

* * *

KINDERGARTEN, FIRST AND SECOND GRADE NEWS

The Kindergarten children have enjoyed learning Mother Goose Ryhms in Literature Class.

First and Second Graders read in their Weekly Readers about the Animals in a Zoo. Miss Bugh showed us pictures she had taken of animals in the Brookfield Zoo. She described them to us. We learned about their size, their color, and where they lived.

Home Builders Entertained By Mr. and Mrs. Wilbur Haefner

The Home Builders Class of the Liberty Methodist church met last Sunday evening at the home of Mr. nd Mrs Wilbur Haefner where a social evening was enjoyed. There was a good attendance. Mrs. Kenneth Schultz had charge of the program and Mrs. Haefner served a delicious lunch.

Star of German Films Blackballed in Sweden

STOCKHOLM. — Zarah Leander, Swedish actress of the German film industry, announced today she would not appear in the Karl Gerhard revue in Stockholm this fall because of the strong protests of Danish and Norwegian refugee artists in Sweden.

She had already signed a contract with Gerhard, noted Swedish producer and notably pro-Allied.

Beauteous Zarah even got in trouble with the Nazis after she signed the contract—they banned all her recordings from Germany.

'Thought Capsules' Are Now Aiding Alcoholics

NEW YORK. — "Thought capsules" are contributing to rehabilitation of alcoholics, says Edward McGodrick, director of the bureau of alcoholic therapy.

Of the 17 "thought capsules" this is typical:

"I know I must abstain from alcohol, not merely for the sake of others, but first and foremost for my own self-esteem. . . . An alcoholic is made, not born. . . . I do not need alcohol. . . . I know from my own personal experience that drinking never solved a problem for me."

GI Art Professor Will Help Restore Cassino

ST. PAUL, MINN. — After the war, Pvt. Frank Kacmarcick, 25, of North St. Paul, hopes to take a hand toward restoration of masterpieces of Beuron liturgical art, destroyed in the bombing of Monte Cassino.

Private Kacmarcick is a graduate of Minneapolis school of art, and expects to return after the war to St. John's university, Collegeville, Minn., where he taught art for five years. He has specialized in the study of Beuron art, so called because it originated in the Beuron Benedictine abbey in Germany.

When fully developed, a typhoon or hurricane may be 900 miles in diameter, with a 30 mile center of calm.

Fruit, Meringue and Cupcakes . . . Dessert Trio
(See Recipes Below)

Dessert Simplicity

ts that are delicious in spite simplicity and yet hearty o satisfy appetites whipped keenest by sharp wintry are the order of the day. concentrating on des- at take up little time and effort, little of the precious, rationed sugar, but use plenty of fruits in season. There are many recipes among them that use eggs or milk to fortify diets hese two important foods. rst is an especially quickly d dessert that is satisfying too heavy:

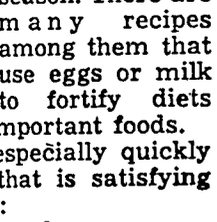
Fruit Cupcakes

plain bakery cupcakes into s, cutting only half way . Open gently and fill the ith meringue and fruit. Bits left over from breakfast or ay be used. Served with cof- another hot beverage, these tempting climax to heavier winter meals.

terscotch Rice Pudding.
(Serves 6)

cup rice
cups milk
teaspoon salt
tablespoons butter
cup brown sugar
tablespoon lemon juice
teaspoon vanilla
cup chopped dates

rice and add salt and rice ilk. Bring to a boil and then 25 minutes. Meanwhile, utter, add brown sugar and er a low flame until very own but not burned. Add the l mixture to the rice and nd stir until dissolved. Re- from heat dd lemon anilla and Pour into a owl and When cold, dding can molded.



lain or with cream.
s are in season and are good e with cake or just plain r stewed. Here they are com- nto cake:

Pear Cake.

p shortening
p sugar
gs
sifted flour
spoon baking powder
aspoon salt
spoon cinnamon
aspoon lemon extract
g:
ar halves, pared and stewed
p sugar
spoon cinnamon

m shortening, add sugar and until light and fluffy. Add ne at a time and beat well. ur which has been sifted with powder, salt and cinnamon.

Lynn Says

ing Sugar: Syrups may be in cookies while sugar is for cakes. The texture of es is not affected enough by in place of sugar so that it fectly all right to use it. Use p honey or corn syrup in of each cup of sugar, and tablespoons of flour to each called for in recipe.

uits may be sweetened with and jellies or honey. Add toning last with a pinch of o make the most of it.

epared pudding and gelatin s may be used with unbaked cooky crusts to save sugar aking pies.

cken left-over fruit syrup canned fruit with cornstarch se as sauce for puddings.

ke use of dried and fresh for their natural sugar con- stitute fresh fruits in sea- and custards for cakes and ies as often as possible.

Pear Salad
Cinnamon Rolls Jelly
Rice Pudding
Beverage

Add flavoring. Pour into a well-greased oblong or square pan. Press the cooked pear halves into the batter and sprinkle with sugar and cinnamon mixed together. Bake for 30 minutes in a 400-degree oven.

Have you tried cookies and fresh fruits for dessert simplicity and satisfaction? You'll like:

Orange Crisps.
(Makes 7½ dozen small cookies)
2 cups sifted enriched flour
½ teaspoon baking powder
¼ teaspoon soda
½ teaspoon salt
½ cup shortening
1 cup sugar
1 egg
2 teaspoons grated lemon rind
2 teaspoons grated orange rind
3 tablespoons orange juice

Sift together flour, baking powder, soda and salt. Cream together shortening and sugar until light and fluffy. Add egg and beat well. Add fruit rinds and juice. Add flour mixture to creamed mixture. Mix thoroughly. Shape into rolls and wrap up in waxed paper. Chill until firm. Slice ¼-inch thick and bake on ungreased baking sheets in a moderate (350-degree) oven 12 to 15 minutes. These cookies may also be shaped by using a cookie press, if fancy shapes are desired.

Spiced Apple Pudding.
(Serves 6)
1½ cups sifted flour
¼ cup sugar
¼ teaspoon cinnamon
¼ teaspoon nutmeg
½ to ¾ cup milk
2 teaspoons baking powder
½ teaspoon salt
4 tablespoons shortening
2 cups sliced apples
2 tablespoons butter
¼ cup sugar
Juice of ½ lemon

Sift flour, sugar, baking powder and salt together. Cut fat into flour, using fork or pastry blender. Add one-half cup chopped apples and enough milk to make a soft dough. Melt butter into the bottom of a casserole, then add sugar, remaining apples and lemon juice. Pour the batter over the apples. Steam for 1½ hours and serve hot with lemon juice or cream.

Chocolate is such a big favorite that it should be included in desserts occasionally to add to appetite appeal. Here is a nutritious dessert that is bound to bring cheers:

Chocolate Floating Island.
(Serves 6)
1½ squares unsweetened chocolate
½ cup sugar
3 cups milk
4 eggs
¼ teaspoon salt
½ teaspoon vanilla
4 tablespoons sugar

Melt chocolate in top of double boiler, add ½ cup sugar and mix well. Add milk slowly, stirring constantly. Reserve 2 egg whites for meringue. Beat remaining whites and 4 yolks slightly with salt. Pour hot milk mixture over eggs, then return to double boiler. Cook, stirring constantly until mixture coats the spoon and foam disappears. Add vanilla. Strain into serving dish; cover; let stand until cold. Chill before serving. Garnish with meringue made of egg whites, sugar and a dash of salt.

Sportlight
by GRANTLAND RICE

THE toughest sporting job for 1945 belongs to the committee who must make the next nominations for baseball's Hall of Fame.

There are now from twenty to thirty present and former stars who stand along the border line, where the dividing margin is thinner than a razor blade — such men as Jimmy Collins, Roger Bresnahan, Mel Ott, Bill Klem, Clark Griffith, Frank Chance, Johnny Evers, Ed Walsh, Fred Clarke, Miller Huggins, Lefty Grove, Carl Hubbell, Rube Waddell—on and on.

Grantland Rice

Most of these players, numbering twenty or thirty, will have to wait for another year. All left deep impression on baseball fans and their mark in baseball history, but only a few can be chosen.

Any Hall of Fame that becomes too crowded and has too many names, loses at least a part of its enduring value. But the long list of available names still left, proves again why baseball for over sixty years has contributed so much to the sporting side of American life.

There are any number of old stars who won't even get a vote—who won't even be mentioned—and yet these are not so far away from top rank. Your correspondent has been covering and watching baseball for over forty years, yet the problem of selecting leaders from the long parade of stars becomes a blur.

"How," we keep muttering, "can anyone leave so-and-so out?"

You might suggest that if a ballplayer isn't a standout, why should he be considered? But what are you going to do about so many standouts—at least so many who have given so much skill and color to the game that they wind up in a photo finish? Ed Delehanty, Frank Frisch, Dizzy Dean, Mickey Cochrane, Herb Pennock, Gabby Hartnett, once again it is on and on.

Frank Chance

For example, there's Frank Chance, named as "The Peerless Leader" of the old Cubs. Chance led his Cubs to four pennants and two world series from 1906 through 1910. His Cubs set an all-time, up-to-date winning record in 1906. The Cubs of Chance, the Giants of McGraw and the Athletics of Connie Mack were among the greatest of all ball clubs over a period of years.

It was F.P.A., also known as Franklin Pierre Adams, who sounded the best remembered tocsin of Chance and his Cubs. After more than thirty years, where our memory may be vague, we recall these lines after the Cubs had slaughtered the Giants—

"These are the saddest of possible words—
Tinker to Evers to Chance.
Trio of bearcats—and fleeter than birds—
Tinker and Evers and Chance.
Pricking forever our gonfalon bubble,
Forcing a Giant to hit into a double,
Words that are heavy with nothing but trouble—
Tinker to Evers to Chance."

As I recall it, Charles Dryden was the first to call Chance "The Peerless Leader." Later on Charley shortened this title to P. L. Chance was a great fighting field manager. He was a fine first baseman, a dangerous hitter. But above all a game, scrappy battler, fearing nothing, not even a flock of bean-balls.

Gamest Players

Which reminds me that the two gamest ballplayers I ever knew were Johnny Evers and Walter Maranville. They played together for the Boston Braves of 1914—the overlooked team that whipped the famous Athletics four straight games.

Evers was as smart as he was game. "The Human Splinter" is a big part of our baseball history. He is now at his old home, Troy, N. Y., and if you get the chance drop him a hello.

Pepper Martin was another who belonged in this class. By that I mean any one of the three mentioned would break a leg or a back or a neck to win a ball game—or even to get an extra base. Maybe you can name me a gamer ballplayer than Evers, Maranville or Martin. Maybe you can—but I doubt it. They were the Three Musketeers of baseball who could take it—no matter what it was—take it and like it.

Passing Marvel

It is still my belief that Harry Gilmer, Alabama's crack rifleman, is the best college passer I ever saw, including Sammy Baugh.

This might be taken as a rather large order. The Alabama kid, barely 18, weighing from 158 to 160 pounds, narrow-shouldered and thin-chested, is the top artist of them all. Gilmer is not only a brilliant long and short passer, accurate to the inch, but he is the only passer I ever saw who can keep nailing a target 50 yards away.

WHEN NEW AUTOS ARE MADE

Salesman—What kind of car are you interested in?

Customer—Anything that is all in one piece and has all the door handles on it.

Salesman—Here's a nice sedan model.

Customer — Quick! A pair of smoked glasses!

Salesman—What for?

Customer—I can't stand anything so clean and glossy. What are those things on the side?

Salesman—Fenders.

Customer—Oh, yes; it's been so long since I had any on my car I thought they were something new.

—•—

Salesman—How do you like the radiator?

Customer—How did that big dent get into the front of it?

Salesman—We designed it that way. So many owners have been driving around for the last five or six years with their radiators all knocked in that we thought a car with an undented one would seem too radical an innovation.

Customer—Right you are! Those new models with all the hinges on the doors are going to be quite a shock, too.

Salesman—Yes; we realize that. If you've been driving a car so long with the doors rattling we'll be glad to loosen the hinges on this 1945 model for you.

Customer—I think you'd better.

—•—

Salesman—What color do you prefer?

Customer—Any color but gray or mud.

Salesman—Most people are demanding bright reds and yellows—just to get away from the drab looking cars they've been driving during the war.

Customer—Naturally! Why a big mirror in every door?

Salesman—Those are not mirrors, it's just new bright unshattered glass, so clean you can see your reflection like in the prewar days.

Customer — (astonished) — How wonderful!

Salesman—What do you think of the upholstery?

Customer—I can't believe it's true. No holes, no stains, no mice, no bird nests!

Salesman—You'll get used to it after a while.

—•—

Customer—What are those things on the side and ceiling?

Salesman — Inside lights. They really work!

Customer—Now don't exaggerate!

Salesman—Didn't the inside lights on your old car work?

Customer—Only for the first six years!

Salesman—Notice those comfortable arm rests in the rear?

Customer—Is that what they are?

Salesman—What did you think they were?

Customer—All I know is that in my old bus a pair of field mice lived in 'em.

—•—

Salesman—Our new gearshift is quite a feature on this model. It's quite a novelty.

Customer — Any gearshift that doesn't come out in my hand every time I shift will be novelty enough. And it is going to be a treat to reach for a hand brake and find it there, too! Say, what are those things on the side of each wheel?

Salesman—Hub caps. Didn't you have 'em on your car?

Customer—Not since Pearl Harbor!

• • •

WAR BOND SLACKER

He buys some war bonds with a cheer
And roots for 'em in accents clear;
He does it with a grin or laugh
While posing for a photograph;
He says, "It's just my duty and
To do my bit this way is grand" . . .
But then at selling out he's spry—
Who wants to be that kind of guy?

He gives no argument at all
When war bond salesmen make a call;
He even makes a pretty speech
About a battle on a beach;
But presently he'll turn 'em in;
His staying powers are quite thin;
He is no asset at the bat—
Who wants to be an egg like that?

A pox upon this patriot!—
To be his kind you'd rather not;
Your country's bonds help win the fight;
They're not for selling overnight!
So buy, and hang on, if you can,
As if you were a fighting man. . . .
How would we fare in days so tough
If soldiers' faith were short-term stuff?

• • •

Ain't It So!

Thumbnail description of the Sinatra audience upon getting news he is ill: Sad socks.

• • •

LINES ON A FIRE MENACE

Smokers in the crowded stores
Need a spell behind steel doors,
There to sit and ruminate
On the dunce caps that they rate.

• • •

Hard folks, those New Englanders! We heard of a man who gave his wife a pair of gloves and a snow shovel for Christmas.

SEWING CIRCLE PATTERNS

Dainty First Clothes for Baby
Versatile and Smart Two-Piecer

Baby Clothes

HERE is an adorable set of tiny first clothes for the very small member of your family. It makes a lovely gift for a new baby. Make the little dress of organdy, dimity or dotted swiss—the dainty underthings in fine lawn or batiste.

• • •

Pattern No. 8706 comes in sizes 6 mos., 1, 2 and 3 years. Size 1, dress, requires 1⅜ yards of 35 or 39 inch material; pantie and slip, 1½ yards; 3 yards lace for pantie and slip.

Two-Piecer

THE long-line torso hugging two-piecer is the last word in smartness. This clever style, made up in light weight woolen, will give you an ensemble that's easy to make, easy to wear and easy to look at!

Pattern No. 8539 comes in sizes 11, 12, 13, 14, 15, 16, 18 and 20. Size 12, short sleeves, requires 3¾ yards of 36 or 39 inch material.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Household Hints

If an enamel pan boils dry, do not plunge it from the hot range into cold water. Let it cool first, then soak before washing.

—•—

When wringer rolls begin to lose their grip, the glaze can be removed by roughening the rolls with coarse sandpaper. Wipe with a damp cloth. Use sandpaper with discretion, of course.

—•—

When you have a bottle or jar that is difficult to open, use a lighted match. Run this quickly around the edge of the bottle or jar and it will come open immediately.

—•—

When dyeing wearing apparel it is a good idea to run a few lengths of thread through an inside seam. When finished, these threads may be removed to furnish an exact match if repairs are needed.

—•—

With bottle brushes scarce, use waxed paper from bread to scour bottles. It does the job well.

—•—

Some types of artificial flowers may be renewed by placing them over steam for a few minutes.

RURAL WOMEN PLAN COUNTY MEETING FOR MARCH 27

An all day meeting of the county women's committee of the Family Living Program was held at [illegible] fourteen members present.

Mrs Harold Oxley, county chairman, states that plans were made for an afternoon program March 27 to be held at the I O O F hall. This will sum up the work of the program for the year and give a preview of events to come. It takes the place of what was formerly called, "Women's Achievement Day Program." All women of the county are invited.

An interesting speaker is being secured for this event.

Refreshments and a social period will close the program. Mark the date on your calendar, March 27.

Are you enjoying this Freedom?

It's the freedom from slaving over an old-fashioned cook stove. You can have this freedom if you use a range that burns SHELLANE, because there is still plenty of Shellane, the bottled gas that makes cooking a pleasure, heats water automaticaliy, refrigerates foods. Also, we are prepared to service your Shellane appliance, whether it be a gas range, automatic water heater or gas refrigerator.

To those who do *not* own labor-saving Shellane appliances we suggest that you plan now to modernize your kitchen after the war . . . free yourself from the slavery of working with old-fashioned appliances. Drop in and let us show you the many advantages of Shellane, the modern bottled gas.

AMROCKS TOOK STING OUT THE HAYFIELD HORNETS

e Klemme Shamrocks chalk- up two more wins here Thurs- evening, when they won both reserve and feature games by ating the Hayfield Hornets. e Little Shamrocks won their e 30 to 16, while the Sham- s annexed a hard fought vic- 34 to 28.

rinkman led the Shamrock at- by looping 7 field goals and a toss for 15 points. Formanek Hayfield scored 17 points.

Garner Cards Next

e Shamrocks go to Garner on ay night. In an early season the Cardinals defeated the rocks here, but the Klemme evened that one up by troun- Garner in the County Tourna- and put them clear out of the ing.

e Shamrocks would like to Garner another defeat—just sure.

Britt Eagles Coming

onday night the Britt Eagles to town and that should be a ball game. The Shamrocks are ging under that one point that cost them the county ship and they are going ck feathers out of those Britt if possible.

PROMOTED

LT. LYLE W. RUKA

Mr. and Mrs. Arthur Ruka of Goodell received word that their son, Lyle W. Ruka, has been promoted to first lieutenant and is first pilot on a B-17 Flying Fortress with the 8th Air Force based in England. Two oak leaf clusters have been added to his air medal. His wife, who lives in Iowa City, received from him a box containing a piece of his parachute and some burned and twisted pieces of his plane that crashed and burned some time ago.

Our Men In The Service

PVT. "BILL" GROSSHUESCH WON SPECIAL AWARD

Pvt. "Bill" Grosshuesch, son of Rev. and Mrs. Calvin Grosshuesch, recently completed a special course in radio at Ft. Benning, Georgia.

"Bill," who has been active in athletics at Ft Benning, and who is a regular on one of the Ft. Benning basketball teams, was presented with a $50 00 War Bond for being the most valauble and outstanding player on his team. His team came through a successful season, winning second place in the conference.

SEAMAN SCHAEFER WOULD LIKE TO SEE SOME SNOW!

UNITED STATES NAVY
The Lucky "K",
At Sea, Jan. 29, 1945

Hi Jergie:

Bet you're surprised to hear from me, but since your wife wrote to me I guess I'll answer it because I am in the mood tonight to write letters and I sure have enough to write.

I think I get more mail while I was home on furlough than I did while I was out on the water. But I am always glad to hear from the folks back in Iowa. I sure enjoyed being back there for Christmas and New Years. In fact, I wish I was still there, but who doesn't?

I suppose you know by my address I am still aboard ship. I guess I just wasn't lucky enough to get transferred. So I am still on the Lucky "K."

I have been trying to see my brother Donald, but it seems like we don't stay in one place long enough. I hope to see him soon.

Well, how is the snow in Iowa now days? I suppose just like always. I sure would like to see some snow out here, but that can never happen.

I must close now and drop a few lines to Keith Stille and some other shipmates of mine. Hope to hear from you again some time, and I hope this war is over soon.

So long now. Just a Klemme Sailor.

Calvin T. Schaefer, AMM3-c.

P. S. Receiving The Klemme Times O. K. It is always interesting to hear the news around Klemme, no matter how late it is.

AMERICAN HEROES

by JULIAN OLLENDORFF

War Bonds are appreciated when used to put machine guns into the hands of such heroes as Pfc. David Daily, U. S. Infantry, of Richmond, Texas. When the forward motion of two platoons was halted in a Pacific island attack, he stood up, draped an ammunition belt over his shoulder and opened fire from his hip, spraying enemy pillboxes. His action permitted fellow fighters to withdraw safely. He was cited for heroic action. Buy War Bonds. *U. S. Treasury Department*

Marjorie Richards, Alexander, Howard Schoenwetter, Wed

Alexander—The G. R. Richards home at Alexander was the scene of a wedding Feb. 3 when Miss Marjorie E. Richards, daughter of Mr. and Mrs. G. R. Richards, and Howard K. Schoenwetter, son of Mr. and Mrs George W Schoenwetter of near Klemme, were married by the Rev Joseph Carswell, pastor of the United Church.

Preceding the ceremony, Marlene Weisbrod, niece of the bridegroom, Bessie Boelinger, and Paul Ludeke sang, accompanied by Phyllis Nicholson of Iowa City. Virginia Schorling lit the tapers. Charlotte Johnson and Muriel Ladd, former Cornell college roommates of the bride, attended her.

Serving the bridegroom as bestman was George Richards, brother of the bride, while Stanley Ludeke, cousin of the bridegroom, acted as attendant.

A reception immediately followed the ceremony.

Mrs. Schoenwetter was graduated from the Alexander high school, attended Iowa State college where she pledged Kappa Delta sority and later Cornell college where she was a member of the Delta Phi social group.

Mr. Schoenwetter, a graduate of Klemme high school, attended the University of Georgia where he affiliated with Sigma Nu social fraternity, Sigma Pi Sigma honorary national physics society, Pi Mu Epsilon, honorary national mathematic society and is also a member of the Institute of Radio Engineers.

After a short wedding trip they will be at home at Iowa City where the bridegroom is doing government research work at the state university.

MR. AND MRS. HOWARD SCHOENWETTER

SCOUTS AND PARENTS HAD PICNIC SUPPER MONDAY

Troop 56, Klemme Boy Scouts, leaders and parents, met at the school house Monday evening to enjoy a picnic supper.

Dr. E. H. Philipps, district commissioner of Garner, was present and presented the new charter for the coming year. Dr. Philipps gave a very interesting talk in which he brought out the value of Scouting, and the part Scouts are taking in the war effort on the home front. He commended the Klemme Scouts and their Scoutmaster, H. D. Ramsay, for the good work they are doing on scrap paper salvage.

The Scouts then entertained the visitors with stunts and contests.

AMERICAN LEGION WOMEN PANNED PROJECTS

At the regular meeting of the American Legion and Auxiliary at the Community Hall last week the ladies planned projects for the near future.

They will pack a box to be sent to the Schick hospital at Clinton containing playing cards, stationery, rags for rugs, pint and quart fruit jars with lids, carpet warp, belt buckles for both men and women, felt hats, etc.

Anyone having any of the above articles to donate bring to the next meeting.

The Auxiliary voted to send $5 to the training car fund. This car has dual controls and Veterans who have had amputations are taught how to drive a car.

Pads have been sent to the Veterans' hospital at Des Moines. Several sick members were remembered with gifts.

Members of the American Legion served the lunch.

HELLO, FOLKS!

Mr. and Mrs. Ed. J. Thompson are the parents of a nine pound daughter born to them on Lincoln's birthday, Monday morning, February 12th, 1945.

The Thompsons now have two daughters in their family.

* * *

Staff Sergeant and Mrs. Alvin Lass are the proud parents of a 7 pound baby girl born to them at the Rust home in Garner on Wednesday, February 7th, 1945. The little girl has been named Dianne Louise. Her father has been overseas for about one month.

Floods Damaged Bridges In Hancock County Last June

MISSING IN ACTION

LT. HAROLD A. WICKS

Mrs. Harold Wicks of Klemme, received a telegram last Thursday from the War Department informing her that her husband, First Lieutenant Harold A. Wicks, is missing in action since Dece. 21, somewhere in the Pacific area. Lt. Wicks was a pilot of a P-38 pursuit plane and his work was that of a photo reconnaissance pilot. Lt. Wicks enlisted in the Army Air Forces on Nov. 15, 1942 and was presented his silver wings and commissioned a Second Lieutenant at Williams Field, Chandler, Ariz. on Oct. 1, 1943. He was then assigned to a tactical unit and went overseas in April of last year. He was promoted to the rank of First Lieutenant on Sept. 28, 1944. Lt. Wicks is the son of Mrs. Albert Kehl, Klemme, and is a graduate of the Klemme High School. Mrs. Wicks has been living at the home of her parents, Mr. and Mrs. Ed. C. Buntenbach, in Klemme. Mr. and Mrs. Albert Kehl live on their farm 2½ miles north of Klemme.

BRITT HEMP PLANT AGAIN OPERATING TO CAPACITY

Roy Schafer informs The Times that the Britt hemp mill resumed operation Monday morning after a shut-down of a few days due to shortage of cars to ship out the finished fibre, and also to do some repairing and altering on the mill machinery.

Since shortly before Christmas the mill has been running full capacity, both day and night, turning out an average of about 1,000 pounds of finished fibre per hour.

For the month of January the Britt mill was at the top of the list for production among the 11 plants operating in Iowa. Up to date no plans have been made to plant a crop of hemp in 1945 and it is expected that it will take about 4 more months to process the 1945 and balance of 1944 crop. Over 300 acres of hemp got snowed under last fall and this will be tied and gathered up as soon as weather conditions permit.

Nearly 150 men and women are now employed at the plant in addition to a group of German war prisoners from the Algona Prison Camp, who did the stacking and assist with other work around the plant.

In the fore part of December an explosion and fire in the boiler room necessitated a shut down of over two weeks.

METHODIST LADIES ATTEND MEETING AT BRITT

A number of ladies from Klemme and vicinity went to Britt on Thursday afternoon to attend a meeting and to hear Dr. Linquist.

Those from here who attended the meeting were Mrs. Lester Stille, Mrs. J. Al Chambers, Mrs. C. A. Arnold, Mrs. E. J. Arnold, Mrs. R. W. Elder, Mrs. Vivian Mace, Mrs. Ben Ridder and Rev. and Mrs. H E. Harvey.

ROAD NOTES

—By C. F. Merton,
County Engineer

The year of 1944 found the county restricted by lack of materials and war regulations so very little construction work could be done on Hancock County roads. The heavy rains of June 12 damaged roads and all over the county with the greatest damage in the Boone River Valley where three concrete bridges were destroyed, two wooden bridges were washed downstream approximately one half mile, and all other bridges were damaged. The destroyed wooden bridges have been replaced with new structures, and plans have been prepared for rebuilding the concrete bridges in the 1945 season and all other bridges have been repaired and are now serviceable.

The following list shows the cost of the various highway operations carried on by the county.

Construction Expenses

5 wooden bridges	$ 4,110.85
1 creosoted culvert	750.82
15 culverts (con. & steel)	4,107 00
Grading 4 mi. of roads	4,079.16
Right of way for Post War Construction	4,635 00
Gravel pits	8,000.00
Unused material and supplies	3,306.18
	$28,989.03

Maintenance Expenses

Repairing bridges and culverts	$ 4,941.07
Maintaining roads	30,133 78
Resurfacing roads	18 350 65
Snow Removal	8,085.00
Tiling and drainage assessments	2,325.58
Gravel Pits	4,200.60
Real Estate	515 80
Road Signs	81.?_
	$ 68,709.76
Supervision and Engineering	4,1?? 31
Grand Total Road Expenditures	$10?,8?5 18

The following are the more important items for which the county road money is spent. These things are included in the above costs but are listed in a different way:

Labor	$ 34,616.27
Gasoline	6,651.85
Diesel fuel	699 00
Oil and Grease	1,572.80
Equipment and Repairs	10,432 ?1
Lumber	? ?? ??
Piling	2,999 ?2

You have no doubt read of the Federal-Aid-Highway-Act of 194? whereby $500,000,000 will be appropriated for highway work in each of the first three years following the war. Hancock County's share of this fund for secondary road work will be approximately $40,000 per year. In order to secure our share of this fund it is necessary that we prepare complete and detailed plats and profiles of the roads we wish to grade, and the County Engineer force is now engaged in preparing these plans for post war road construction. The road selected by the board of Supervisors and the Highway Commission for the first year's work is the Kanawha-Goodell road.

Farewell party Held For Mr. and Mrs. Francis Buseman

A farewell party was held in honor of Mr. and Mrs. Francis Buseman at their home in Liberty township on Tuesday evening, February 8th. A moving picture was shown by Mr. and Mrs. Elmer Schaefer.

Nineteen neighborhood families were represented. Mr. and Mrs. Buseman were presented with a gift. A pleasant evening was enjoyed by all.

Mr. and Mrs. Buseman are moving to the Henry Buseman farm south of Klemme. Francis will assist his father in operating the home farm this year.

Lydia E. Pinkham's Vegetable Compound is *famous* to relieve period pain and accompanying nervous weak, tired-out feelings—when due to functional monthly disturbance.

Taken regularly—Pinkham's Compound helps build up resistance against such annoying symptoms.

Pinkham's Compound is made *especially for women—it helps nature* and that's the kind of medicine to buy! Follow label directions.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

WNU—N

That Nagging Backache

May Warn of Disordered Kidney Action

Modern life with its hurry and worry, irregular habits, improper eating and drinking—its risk of exposure and infection—throws heavy strain on the kidneys. They are apt to be overworked of the kidneys. They are apt to be over-taxed and fail to filter excess acids and other impurities from the life-giving blood.

You may suffer nagging backache, headache, dizziness, getting up nights, leg pains, swelling—feel constantly tired, nervous, all worn out. Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.

Try *Doan's Pills*. *Doan's* help the kidneys to pass off harmful excess waste. They have had more than a century of public approval. Are recommended by grateful users everywhere. *Ask your neighbor!*

DOAN'S PILLS

Dutch Designs for Painting, Stenciling

RIGHT designs in typical Dutch colorings are just the thing to decorate your kitchen cupboards, the chair or table you have just repainted or that old chest of drawers in the children's room. Never mind if you are not a free-hand artist, you can cut a

stencil for the most difficult parts or just trace outlines and then fill them in.

Here is a set of designs especially planned so that you will have no difficulty in using them either for stencils or tracing. Tulips, hearts, flowers, fruits, borders and other motifs large and small—even the dove of peace with an olive branch is included.

* * *

NOTE—Pattern 262 gives the 12 stenciling or painting designs described here, with complete directions and color guide. Patterns are 15 cents each postpaid and may be obtained by sending direct to:

Crown the Table With Unrationed Foods
(See Recipes Below)

Menu Makin's

Meal fixin's are a problem these days when foods are scarce or carry a high point value. Today all of us are going hunting for foods that are within easy reach, and easy to fix.

With no points to spare, no time to waste, today's housewife perches her thinking cap neatly on her head and goes right to work. If she can't have fancy foods—or even hearty substantial ones she's accustomed to having, she's going to take what's available, stir in a dash of her ready imagination and come forth with something that will do much better than just tide the family over.

The War Food administration urges her to fix fish, and since there are ways to prepare fish delectably, Our Mrs. America will do it. A scrap left over from the roast? She can disguise it so well, that even she will not know it's made over.

When you make use of these fish recipes which I've collected for you, you can serve good food at a point-saving:

Halibut a la King.
(Serves 6)

2 pounds boiled halibut
6 slices toast
5 tablespoons fat
½ teaspoon paprika
¼ cup sliced, stuffed olives
4 tablespoons flour
¾ teaspoon salt
2 cups milk
2 egg yolks
¼ teaspoon onion juice
1 teaspoon vinegar
½ teaspoon worcestershire sauce

Arrange mounds of finely flaked fish on toast and mask with the following sauce:

Melt 2 tablespoons of the fat and blend in flour and salt. Stir until frothy, add milk and stir until sauce boils. Set over hot water. Cream remaining fat with yolks of eggs which have been beaten, onion juice, vinegar, paprika, worcestershire sauce, and stir into hot mixture. Continue stirring until egg is set, then add olives, chopped. Pour sauce over fish and serve.

Baked Stuffed Fish.

1 medium sized fish (whitefish, haddock, carp, flounder, pike)
Salt and pepper
Flour
6 strips bacon
1 small can of tomato soup
1 cup water

Wash fish carefully in cold water, dry and sprinkle with salt and pepper. Stuff, sew up with twine and place in a pan. Dredge lightly with flour and place several strips of bacon over the top. Add enough water to keep from scorching, about ½ cupful. Baste frequently with water. Bake in a moderate (350-degree) oven for about 1 hour. Serve with tomato soup, thickened with a small amount of flour.

Lynn Says:

Ration Pointers: Baked stuffed heart is a rare treat. Make your favorite bread stuffing and sew it up in the cavity. Bake heart in tomato sauce for extra flavor.

Lamb patties are delicious and make a quick easy meal. Wrap the patties with bacon and broil until browned on both sides. Halves of fresh pears may be sprinkled with cinnamon and butter and broiled along with the patties.

Veal stew is a delicious supper dish. Make with plenty of colorful vegetables riding on top of the smooth gravy and top it off with some light, fluffy dumplings. When ready to serve, stir soured cream into the thickened gravy.

Pork liver is richest of all the liver in food value. It contains an excellent supply of thiamin.

Lamb tongues are tender and delicious. Serve them with a dinner of baked noodles and creamed spinach.

Lynn Chambers' Point-Saving Menu

*Baked Salmon with Eggs
Parsleyed Potatoes
Green Beans Carrots
Jellied Lime and Cottage Cheese Salad
Whole Wheat Rolls
Fruit Butter
Chocolate Cake Beverage
*Recipe given

*Baked Stuffed Eggs and Salmon.
(Serves 5)

10 hard-cooked eggs
1 can salmon
1 tablespoon melted butter
1 teaspoon chopped parsley
½ teaspoon salt
⅛ teaspoon pepper
2 raw egg yolks
1 cup sour cream

Remove shells from eggs. Cut off both ends and carefully remove the yolks from the rounded end. Chop finely the salmon, yolks and pieces of white that were cut off. Add the melted butter, one of the raw egg yolks, chopped parsley, salt, pepper and 2 tablespoons of sour cream. Mix all ingredients thoroughly and heap into egg white shells. Place eggs in buttered baking dish. Mix the remaining egg yolk and sour cream. Season to taste with salt and pepper. Pour sauce over the eggs and salmon. Bake in a moderate oven until sauce is firm, about 25 to 30 minutes.

There are some meats for which points will not have to be spent. Here are recipes for some of them:

Boiled Smoked Tongue.

1 smoked tongue
Cold water to cover
6 bay leaves
1 teaspoon whole pepper
1 teaspoon cloves
1 onion, sliced

Wash the tongue, and if salty, soak in cold water overnight. Place in kettle with seasonings and let simmer slowly until tender, from three to five hours, or until skin curls back. Then remove from the brine, pull off outer skin, cut off root and let cool in the brine. This may be served hot or cold with horseradish sauce.

Sweetbreads, Broiled.
(Serves 5)

1 pound sweetbreads
½ cup chili sauce
6 to 7 tablespoons bacon drippings
Celery, parsley, lemon and onion

Soak sweetbreads in water for 20 minutes. Cook in boiling, salted water for 20 minutes with a bit of celery, onion, parsley and lemon. Let cool in liquid. Drain; place in shallow pan and pour over melted drippings and chili sauce. Broil about 20 minutes, turning occasionally. Serve in a rice ring or with mushrooms, broiled, if desired.

Kidneys.
(Serves 4)

6 lamb kidneys or
4 veal kidneys
Salt and pepper
2 tablespoons fat or drippings
1 tablespoon onion, minced
Brown sauce

Plunge kidneys in boiling water, remove skins and soak in cold salted water for 20 minutes. Slice kidneys, remove tubes and tissue and season with salt and pepper. Heat fat and add onion. Add kidneys and let cook for 5 minutes. Serve with brown sauce.

SPEAKING OF CONVENTIONS

Washington has now put a ban on conventions, which strikes us as strictly okay. A convention is a rendezvous of agitated citizens whose wives will accept no other excuse for a week's absence from home.

—*—

It is a noisy gathering of middle-aged men who think that fighting for a hotel room is good for their morale.

—*—

It is a huddle in lobbies and banquet halls of let's-get-together once a year to see if the competitors have aged much.

—*—

It is a gandy-dance by men who think spending a week trying to get in and out of elevators comes under the head of business promotion.

—*—

The whole idea of conventions was started by the railroads and hotel people and perpetuated by the aspirin tablet industry. The theory is that a convention is good for whatever line the delegates are in. But nobody has ever returned from one in shape to be any help to the boss for 30 days.

—*—

And his back home discomforts are always added to by the discovery he lost his watch, packed a pillow case instead of his pajamas and can't remember the four fellows he had a fight with.

—*—

Conventions are a series of lost motions concerning matters that could all be better settled by mail. A delegate spends $25 a day doing nothing he couldn't do by postcard, except denounce the phone girl. By staying home he could have avoided fallen arches, acidosis, the scrap with the taxicab driver and those foolish words to the manicure girl.

—*—

We know men with national reputations for sagacity and solid sense who will travel 1,000 miles, spend a week in a bum hotel, get ptomaine poisoning, pay 40 cents for a soft-boiled egg and consider it all comes under the head of demonstrating routine business acumen.

—*—

And we can name gents famed for old-fashioned thrift who come to the big city and pay 25 cents just to get their own hat back.

—*—

A convention is a device for bringing to distant points men who think they can only develop bright ideas if their eyes are full of train cinders.

—*—

The only thing we can say in favor of a convention is that it gives a fellow a chance to slap on the back and say "Hello, J. D. How's tricks?" to an associate who otherwise refuses to be friendly except by letter.

—*—

You listen to 10 speeches, 18 lectures and 100 committee reports but you still go home without finding out why a glass of milk in a hotel should cost a half-dollar.

* * *

The Real New York

How silly the idea that the spirit of New York is found on Broadway! That is where millions of visitors concentrate, thinking they are seeing the real Gotham. But we took our semi-annual hike along the downtown water front a few days ago and know better. The great docks teeming with life, the countless freighters loading up with vital supplies, the tugs huffing and puffing around the bay, the coast guard ships (of all types and shapes), the sailors, soldiers and seamen from all ports of the world; and over it all an atmosphere of serious energy, hard work and accomplishment that makes the Times Square area look like a mere dizzy zone.

* * *

Super Gal

A wonder woman surely
Is Mrs. Esther Gramps:
She really can keep track of
Her good and no-good stamps.

* * *

Lift the Steins!

The navy department has ruled that the fleets may carry beer and ale for the sailors to drink ashore. But red tape being what it sometimes is in the services, we hope the boys don't get ashore with a few cases of beer and find Washington forget the "openers."

—*—

It came as a surprise to this department to learn that not since Josephus Daniels made the navy bone dry 25 years ago has an American warship carried anything but soft stuff. Restoration of beer will do more for naval morale than Leyte.

* * *

Summary

Hi diddle diddle,
The butch in the middle,
The cow jumps over the ceiling;
The customers just
Yell "Sirloin or bust!"
And it all leads to choice double-dealing.

* * *

The Barnum-Bailey circus announces that it will have metal circus seats next season. We know some use was bound to be found for those old razor blades.

SEWING CIRCLE PATTERNS

Figure-Slimming House Dress Basque Frock for Young Miss

Button-Front Frock

YOU'LL look pretty at your household tasks in this fitted button-front frock. The smooth lines and action back are designed for comfort and freedom.

* * *

Pattern No. 1244 comes in sizes 32, 34, 36, 38, 40, 42, 44 and 46. Size 34, short sleeves, requires 4½ yards of 35 or 39 inch material; ¼ yard contrasting material for collar.

Dress-Up Frock

AN ADORABLE little frock for the two-to-six miss. It has her favorite swinging skirt and long torso waist. It will be lovely for parties or "dress-up" in dainty floral print with lace edging—or for school or play in tiny checks or gay plaids with ric-rac trim.

Pattern No. 1270 comes in sizes **2, 3, 4, 5** and 6 years. Size 3, short sleeves, requires 1¾ yards of 35 or 39 inch fabric; plus 1½ yards lace to trim.

SEWING CIRCLE PATTERN DEPT.

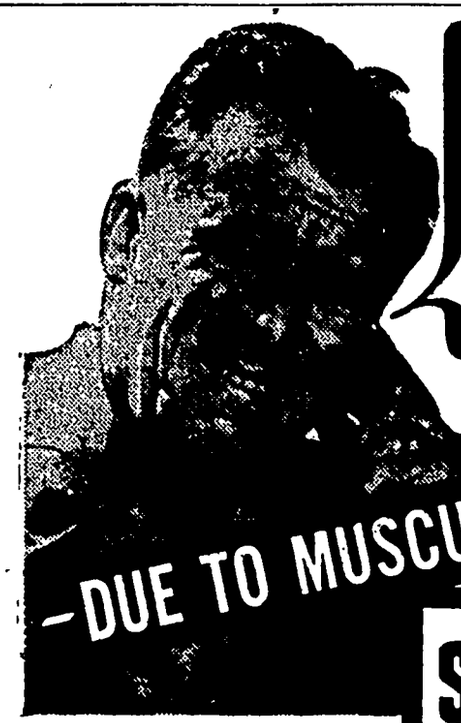
How To Relieve Bronchitis
Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm, and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Tell your druggist to sell you a bottle of Creomulsion with the understanding you must like the way it quickly allays the cough or you are to have your money back.
CREOMULSION
for Coughs, Chest Colds, Bronchitis

It's BALANCED... that's the answer
Balanced double action... for positive action in the mixing bowl... for gratifying results in the oven.
You'll be Surprised!
CLABBER GIRL
Baking Powder
HULMAN AND COMPANY TERRE HAUTE INDIANA



SORETONE
soothes fast with
COLD HEAT* ACTION
In cases of
MUSCULAR LUMBAGO OR BACKACHE due to fatigue or exposure
MUSCULAR PAINS due to colds
SORE MUSCLES due to overwork
MINOR SPRAINS

DON'T LET aching muscles keep you off the job—if SORETONE can help. Soretone Liniment contains methyl salicylate, a most effective pain-relieving agent. Soretone's *cold heat* action speeds blessed, comforting relief.

1. *Quickly Soretone acts to enhance local circulation.*
2. *Check muscular cramps.*
3. *Help reduce local swelling.*
4. *Dilate surface capillary blood vessels.*

For fastest action, *let dry, rub in again.* There's only one Soretone—insist on it for Soretone results. 50¢. A big bottle, only $1.

MONEY BACK—
IF SORETONE DOESN'T SATISFY

*Though applied cold, rubefacient ingredients in Soretone act like heat to increase the superficial supply of blood to the area and induce a glowing sense of warmth.

MONARCH FINER FOODS — C. A. LARSEN, PROP.

New Odorless Liquid Is Insect Repellent

There is comfort in the postwar prospect of a new insect repellent — successor to citronella — which the army has found far more effective than previous "fly dopes." The new repellent is described as a clear, nearly odorless liquid that for some unknown reason is highly offensive to mosquitoes, flies, fleas, gnats, sandflies and chiggers. It is partially effective against ticks. An added advantage is that it is not messy to use.

Instructions for application recommend that clothing be sprayed with two or three ounces of the liquid every five days. Garments may be sprayed while worn, although the eyes and mouth should be covered to avoid discomfort from a stinging sensation. When applied to the skin, the repellent gives protection for one to six hours.

The material, which is now on allocation, is not new to industrial chemistry but now finds a new use. It is derived from a compound which helped make the synthetic resin for enamels, used on refrigerators. Military demand for the repellent, now supplied to the army at the rate of many thousands of gallons monthly, is a major cause for the scarcity of synthetic resin enamels.

Vegetables Lose Some Vitamins in Processing

No processed vegetables are as good as the fresh and no cooked vegetables as good as the raw, according to Dr. Agnes Fay Morgan, professor of home economics of the University of California.

Summing up vitamin losses in a recent article, Dr. Morgan says that whenever vegetables are subjected to water or steam treatment the water-soluble vitamins are leached out to some extent. The loss varies with the process and with the vegetable, from 5 to 10 per cent for B-1 and B-2 in potatoes and tomatoes, to 75 to 85 per cent for vitamin C in snap beans and spinach. The carotene, provitamin A is not water-soluble and is usually not lost in this way.

In most cases canned vegetables lose about one-half their fresh value but the loss is reduced considerably if the liquid in the can is used. Cooked vegetables which have been preserved by freezing contain less than one-third their original vitamin value; when the cooking water is saved, about one-half. Cooked dehydrated vegetables also retain about one-half of their fresh value. Ordinary cooking in water to cover produces vitamin loss of about the same as in dehydrating.

Mahogany Harvesting

Mahogany harvesting is a notable folk technique in Honduras. The timber is usually felled in the rainy season, since the color of the wood is then richest, and in the light of the moon, since the cool of the night is the best working time for cutting the huge trees. Very likely Honduras has the greatest treasury of true mahogany in the world. Besides timber, Honduras has other notable exports such as rubber, coconuts, indigo, cattle, hides, citronella, silver and gold. In the future this list may be tremendously enlarged, for the resources of the nation are not yet fully tapped. Much of the soil is fabulously rich. Much of the rock teems with minerals. There are numerous mountain rivers with vast resources in undeveloped water power. Honduras is a republic of tremendous potential strength which will undoubtedly become an actuality in the postwar period.

Citrus Fruits

California leads in production of oranges and lemons; Florida, in tangerines and grapefruit. Other states leading in production of oranges, in descending order, are Florida, Texas and Arizona; of grapefruit, Texas, Arizona and California; no other states are important commercial producers of lemons and tangerines.

Four leading apple states are Washington, New York, California and Michigan; grape states: California, Michigan, New York and Ohio.

Truck crops, excluding potatoes and sweet potatoes, are produced in greatest quantities for market and processing in California, New York, Texas and Indiana. Leading potato producing states are Maine, Idaho, New York and Minnesota; sweet potatoes: Georgia, Louisiana, North Carolina and Alabama.

Differ in Quality

Variations in nutritional value and quality of various foods, such as meat, the cereals, leafy vegetables, fruits and so on are well-known. That variations within the same class, and even within the same plant variety may result from differences in soil and the manner in which crops are cultiyated is something that should have wider recognition, according to U. S. department of agriculture experts. Content of phosphorus, calcium, nickel, cobalt, iron, copper, or other elements in vegetables may be low with little, if any, outward sign. Where the crops were grown had much to do with the mineral values they offer, it is believed, and soil surveys are now under way to make definite determination of the relationship between soil and nutritional value of what is grown in that soil.

Noted Revolutionary Song Composed by Moderate

The Marseillaise, beloved anthem of France, has spread throughout the world the name of the great Mediterranean seaport of Marseille. Yet the song was not composed in Marseille but entirely across France in Strasbourg on the Rhine. In fact, the song was first named the "Battle Hymn of the Army of the Rhine."

A second paradox concerning this greatest revolutionary song ever written is that it was composed not by an ardent revolutionist but by a moderate republican, Claude Joseph Rouget de Lisle, a captain of engineers. The immortal notes were picked out on a harpsichord and the accompanying words set down on paper during the nights of April 24 and 25, 1792, while de Lisle, attached to the army of seething and only half-liberated France, was stationed at the French - German frontier to ward off threatened attack from beyond the Rhine.

The anthem was sung during the next four months at scattered places in France but was practically unknown in Paris. It first gained spectacular notice there when revolutionary soldiers from Marseille sang it lustily as they marched into the French capital and took part in the storming of the Tuileries Palace.

Reconditioning Programs Aid Patients' Recovery

Strides being made in the operation of the army reconditioning program will probably lead to radical changes in the civilian hospital of the future, Maj. Henry B. Gwynn of the reconditioning division of the office of the surgeon general, said.

Through the pioneering carried on by the army in this comparatively recent field, reconditioning is proving "as scientifically important in its way as the development of sulfa drugs and penicillin," Major Gwynn said.

Civilian hospitals, capitalizing on the progress made by the army's reconditioning program, will probably include motion picture theaters, gymnasiums, public address systems and areas for physical and occupational therapy in their buildings of tomorrow, according to the speaker.

Anticipating the objection of increased costs in such a program, the speaker pointed out that the army is finding hospitalization time is curtailed from 10 to 33⅓ per cent as a result of reconditioning.

Nylon Fabrics

Development of woven nylon fabrics was undertaken before the war in a limited way and all work of this kind was stopped as soon as nylon was needed for military purposes The early studies were carried far enough in the development of fabrics for underwear, slips, panties, gowns and foundation garments to indicate that nylon contributed a great deal toward lessening the weight of garments, and its advantages in easy washing and quick drying were found particularly valuable.

Experimental work before the war also indicated that properly constructed fabrics of nylon could be permanently "set" to minimize wrinkling and that they might possess advantages in washability. This work gave definite indications that good nylon neckwear could be manufactured, that nylon in velvets and other pile fabrics could be made crushproof, that the curtain stretcher as a result might "become a thing of the past" and that permanent ruffles and pleats might be "set" so as to be unaffected by cleaning and even washing.

Artificial Breeding Tests

The first survey of the results of artificial breeding of dairy cows in New Jersey shows that the first 120 artificially bred daughters studied produced 14 per cent more butterfat and 9.3 per cent more milk than their dams. As two-year-olds on two times a day milking, these cows averaged 8,557 pounds of milk and 329.9 pounds of fat in a lactation of 10 months. Their dams at the same age in the same herds averaged 7,823 pounds of milk and 287.7 pounds of fat, or 734 pounds of milk and 42.2 pounds of fat less than their daughters. There were no records of dams for some of the daughters. All told, the average production for the first 280 artificial two-year-olds was 8,125 pounds of milk and 324.3 pounds of fat. The records were made by Holsteins and Guernseys, the first two breeds to enter the program.

Soil Replenishment

Soil specialists pointed out that commerical sources of nitrogen cannot begin to supply all the needs. We are fortunate, however, in having the kind of agriculture that supplies nitrogen needs on the farm itself through legume-grass mixtures for hay and some 18 million tons of manure from livestock each year. But from the manure, probably not more than 45,000 tons of nitrogen ever reach the roots of crops. Altogether, about 115,000 tons of nitrogen are put into the soil each year, or 35,000 tons less than is removed by crops. Losses by leaching and washing are unmeasured, but if we made full use of the fertilizer value of manure and of legumes we could balance the nitrogen budget.

POTATOES—PLANT MORE THAN IN FORTY-FOUR

The Hancock County AAA office has called attention to the importance of reaching our 1945 potato goal, and to the fact that it should be planted with the best seed available. The supply of seed potatoes is one of the largest on record, but these stocks of seed must get into the hands of potato growers if we are to plant the 1945 potato goal with good seed.

Due to the high price of commercial stocks, many of these seed potatoes may be disposed of for table use. It would, therefore, be good business to encourage farmers to secure good quality seed potatoes at an early date in order to insure the best possible crop for 1945.

HEARING DATE IS SET

The Hancock County Board of Supervisors set April 9th as a date for hearing on the establishment of dramage district No. 140 petitioned for by Abe Mezvinsky in Madison township. The board previously had appointed C. F. Merten as engineer to investigate the feasibility of the establishment of a district and his report was tentatively approved by the board. Merten's report recommended the establishment of the district.

MRS. GEO. ALBERS HONORED ON 72ND BIRTHDAY

Miss Helen Albers entertained her brothers and sisters and their families, Sunday, February 11th to a two ccurse dinner in honor of her mother's 72nd birthday.

Three decorated angel food cakes were part of the table decorations.

Mrs. Albers received many nice birthday cards and several gifts.

Those who helped celebrate the occasion were Mr. and Mrs. Wm. Reuben and daughters of Kanawha; Mr. and Mrs. John Albers and sons; Mr. and Mrs. Ted Albers and children of Swaledale; Mr. and Mrs. George Albers and children, Clear Lake; Mr. and Mrs. Menno Albers; Mr. and Mrs Edgar Buss; Mr. and Mrs. Fred Pringnitz; Mr. and Mrs. Lubbe Albers and daughter Phyllis; Mr. and Mrs. Walter Lauster and Ruth Ann, and Miss Helen Albers.

About half the natives of the Philippines can read and write at least a little of one of the major anguages.

HISTORY'S TIME TABLE

The miracle of America's "time-table war" in the Pacific will brighten the pages of history for many generations of future, free Americans. They will read of the incredible regularity and precision with which our glorious armed forces... all working together in one great offensive... conquered time, distance *and* the Japanese.

It is understandable that the management and the employees of a western railroad, like the ROCK ISLAND LINES, should feel a share of the pride in this tremendous, coordinated achievement. For a military offensive is only as powerful as its supply lines are dependable.

This time-table of history has been, and still is, our most important time-table, too. Since the beginning of the war, millions of tons of war freight and hundreds of thousands of fighting men have been transported over the rails of the ROCK ISLAND... *on schedule*. The men and women of our railroad dared not fail... and they did not fail.

Until the war ends victoriously for America, our most important business, and the business of our 24,000 patriotic employees, will be the most dependable war transportation service we know how to provide.

KINDERGARTEN, FIRST AND SECOND GRADE NEWS

The Kindergarten children made scrapbooks this week We brought pictures from home and pasted them in the scrapbooks. We like to look at our picture books.

The First and Second Grade children decorated their valentine box with red hearts and other original designs. It is a very pretty box.

ANNIVERSARY

MR. AND MRS. HAMO BEEK HONORED AT DINNER

Mr and Mrs Hamo Beek, who reside on a farm southeast of Klemme, observed their fortieth wedding anniversary on Sunday, February 11.

In honor of the event their children and families had a dinner for them at their home and the following were present:

Mr. and Mrs. John Trampel and sons; Mrs. Catherine Howell, Klemme; Mr and Mrs. John Van Osten and son, Ardell; Mr. and Mrs Bill Wessels and Shirley of Clarion; and Mr and Mrs John Beek and sons of Clear Lake.

Mr. and Mrs. Beek were presented with a beautiful rug in remembrance of the occasion.

Mr and Mrs. Beek and family have resided in this community for over 25 years.

Good Repair Shop Is Essential to Farmer

All farm machinery should be protected from the winter weather and it's a good time to plan a farm shop where machines and tools may be repaired for next year's operations. Since there is no standard type shop, a corner of the barn, a part of the machine shed or garage, or a separate building can be developed into a farm shop which provides a place for every wrench and bolt.

If large machines are to be repaired, it will be well to make the shop about 18 by 20 feet, with an entrance door at least 12 feet wide. A concrete floor and windows that provide plenty of light are needed. If electricity is available, the shop should be wired. This will provide cheap power for the operation of a number of handy tools and will help with night repair jobs.

A stove is essential for the repair shop. There are any number of exceptionally cold days in winter that can be devoted to the repair of machinery so as to be ready for the spring rush. The ideal location for a shop is one partitioned off the machine shed where all of the machinery may be checked, repaired and thoroughly greased. Such a shop is one of the best investments that any grower can make.

Brazil's 'Tree of Life' Yields Many Products

Brazil has a tree which produces the most important vegetable wax in the world, flourishes in drought when other vegetation withers, yields food, fruit, medicine, and materials for building, paper manufacture and other useful arts.

The tree is the carnauba wax palm, known as the "Tree of Life." It has defied not only the greatest scientists to produce it synthetically, but also other nations to grow it successfully.

Cattle can live on the shoots of the young carnauba palms which emerge from the baked earth. The tender hearts of the palm become a green vegetable or salad. The tree bears long clusters of edible fruit not unlike a date. The seed is crushed and a cooking oil is extracted. The shell around the nut is roasted and a coffeelike beverage is brewed.

The pith of the tree contains a high starch content, and a food similar to farina is made. The roots yield an extract and medicine for illness. The wood is burned and the ashes yield an alkali for home soap making.

Animal Retreat

The entire countryside around the park of Kagera (Belgian Africa) and the park itself is a favorite retreat for heavy game. As a matter of fact, lions and leopards abound, antelopes scamper out from all sides, and it is a feast for the eyes to meet a flock of "impalas," those handsome beasts with coat of bronze and tall, lyre-shaped horns. While running they are so light and fleet they seem ready to fly away. As for the equally numerous zebras, their reputation for swiftness is not exaggerated! They rush down the hills in a blur of black and white, and their eyes glow like lighthouses. All this country becomes extraordinarily alive at night. Carnivorous animals on the hunt sow terror among zebras and antelopes, and at nightfall the few natives, after having driven their cattle into an enclosure well-fenced off by a hedge of spurges, can hear the distant roaring of the lions in search of prey.

Farm Ponds

For many years conservationists have urged the value of developing farm ponds, and stocking them with fish which provide food, sport for fishermen and keep the waters in good condition. U. S. department of agriculture experts have suggested a few simple rules for handling such ponds to produce fish of good size and quality, and in sufficient numbers. These rules are:

1. Stock properly—with the right proportion of plant-eating fish and the food fish that prey on them; 2. Harvest the crop — by fishing out each year enough of the larger fish so that those left will have food to make good growth; 3. Fertilize the pond—to keep up the supply of food plants for the fish; 4. Prevent silting — fish do not thrive in muddy water, and continued silting fills the pond, reduces the volume of water, and cuts down possibilities for a fish harvest.

Fowl Typhoid

Fowl typhoid, a poultry disease known to be caused by a germ, was generally associated with unsanitary conditions but now the disease is occurring in the best managed flocks. There is no known treatment for the disease but it is thought that it is related to inadequate nutrition.

Research men believe that a lack of yellow corn in the grain mixture may result in a vitamin A deficiency and that this deficiency may result in the birds becoming more susceptible to the fowl typhoid disease. It is believed that the use of white corn rather than yellow corn in the grain mixtures and mashes has helped to bring about the increase in fowl typhoid. The feeding program in many cases has not been as good as formerly and this has probably caused the birds to be more susceptible to the disease.

W. S. C. S. WORK CIRLCE MEETS THURSDAY P. M.

The Work Circle of the Methodist W. S. C. S. meets Thursday afternoon at the church.

The hostesses are Mrs. Levi Ridder and Mrs. Mary Waterman.

----MRS. THADA ENTERTAINED U-DELT-EM CLUB LADIES

Mrs. Edna Thada was hostess to the U.Delt-Em bridge club at her home last Thursday afternoon.

Mrs. Fred J. Arnold won high score, Mrs. Art Kudje, second, and Mrs. Geo. Lawhorn, third.

RED CROSS LADIES MEET AGAIN TUESDAY P. M.

The Red Cross women will meet again next Tuesday afternoon at the Klemme school house. Bring your crochet hooks.

For Hometown News

Sgt. Phillip Cronin of Decorah, now stationed on Leyte Island, bought some cigars with a can of sardines, but it wasn't the cigars Phillip wanted. The native from whom Phillip bought the cigars was selling them wrapped in a newspaper. When Sgt. Cronin unwrapped the first cigar he found part of the November issue of the Decorah Journal. All the cigars belonging to the native were all wrapped in the same paper, so the sergeant purchased all of them and pieced the paper together in order to catch up on his hometown news.

Learns Young

Tommy Towe, six-year-old Dysart boy, has learned that you can easily break a bone by falling thru a floor register. Tommy removed a register in his home, then fell through the opening to the first floor. He received a badly fractured arm.

COW COMFORT DURING MILKING
Pays BIG DIVIDENDS
By adjusting vacuum precisely to the needs of each teat, the Perfection MILK-MASTER achieves the utmost in comfortable milking.
PERFECTION MILK-MASTER

Milk "let-down" must be maintained throughout the milking period. Cow comfort is important. Avoid any unusual disturbances. Milking with the Perfection MILK-MASTER, after the cow is properly prepared to induce "let-down", keeps her comfortable and contented, because the MILK-MASTER automatically adjusts the vacuum for each teat according to the need. No other milker has this feature.

The proper preparation to stimulate the "let-down" of milk is to wash the teats and lower part of udder with warm water then squeeze a squirt or two of milk from each teat. One minute later, attach the teat cups. Remove teat cups as soon as milk stops flowing. After a little training most cows will milk out in 2½ to 4 minutes.

Faster milking with the MILK-MASTER promotes udder health and increased production, besides saving time.

Let us tell you more about the MILK-MASTER way.

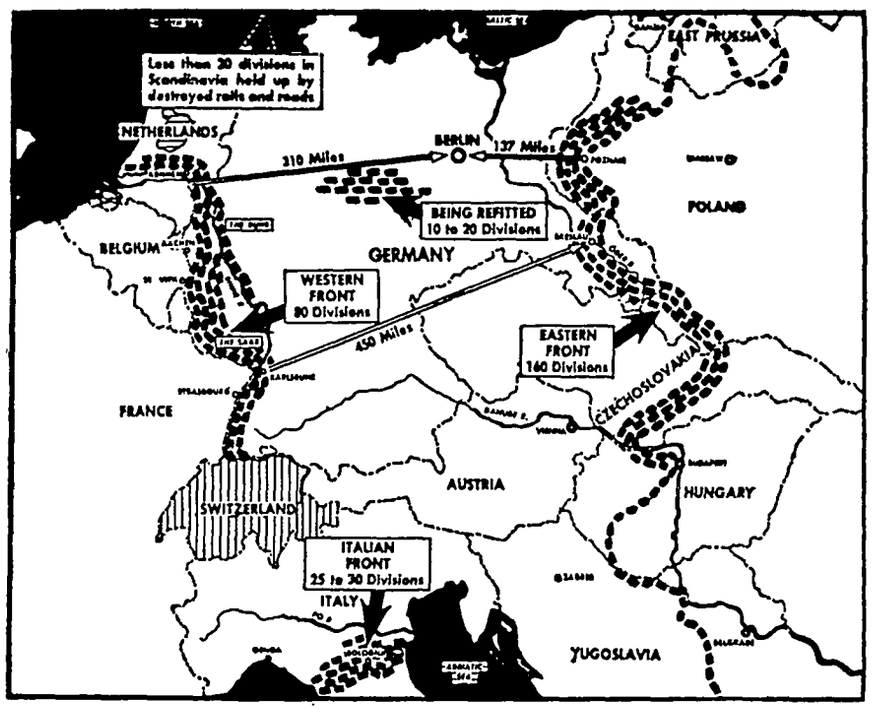
WEEKLY NEWS ANALYSIS

Nazis Put Homeland to Torch As Russians Sweep into Reich; Yanks Gain in Drive on Manila

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)



As huge Allied pincer squeezes Germany from three directions, map indicates disposition of Nazi troops, with majority concentrated in East.

EUROPE:
Reach Reich

Having severed the rich agricultural province of East Prussia from Germany, the Red tidal wave of upwards of 4,000,000 men rolled clear up to the eastern border of the Reich itself, with the Nazis desperately trying to check the drive.

Biggest threat to the Reich lay in the Russian advance on Silesia, the "little Ruhr" of southeastern Germany, where Red columns closed in on the rich coal, zinc and iron resources and the industrial centers built around them. Once able to produce about 700,000,000 tons of coal annually during the height of her conquests, defeats in both the west and east, coupled with severe aerial bombardment, are said to have reduced Germany's output to around 200,000,000 tons.

From Silesia northward, the Germans fell behind the flat, forested banks of the Oder river in an effort to check the Russian tide, relying on defenses reportedly in the making as far back as two years ago, when the Nazis foresaw the probability of being forced to fight alone. Reaching the river, the Russians boldly exploited their initiative, throwing armor across its frozen expanse, and bitter fighting raged as the Germans attempted to contain their bridgeheads.

Fanatical Resistance

Having given no quarter during their invasion of Russia, the Germans asked none as the Red tidal wave swept onto their own soil, with the army putting their own villages and factories to the torch to deny the Reds the use of any facilities.

Himmler

Meanwhile, thousands of German refugees streamed back toward the Reich from East Prussia and Warthegau province, which Hitler took from Poland after the latter's fall in 1939, further straining the already burdened transport system. As the German army fell back, women and children were hoisted onto tanks and other military vehicles and carted to the rear.

Rushing to the eastern sector, Home Front Commander Heinrich Himmler was given sweeping powers to complete the organization of the "people's army" (the volkssturm) for military as well as labor service, evacuate civilians and industrial facilities, and confiscate or dispose of personal property.

Hold in West

Despite the seriousness of the Russian attack, the Germans continued to resist Allied pressure in the west in strength as they once again found their backs to the important industrial Rhineland.

As the enemy pulled back into the Siegfried Line, reconnaissance showed extensive Nazi troop movements inland, with conjecture that the high command was sending reinforcements to the east. But even as the shifts were being made, the Germans themselves expressed concern over a new Allied drive in the west, with claims that General Eisenhower was massing troops above Aachen.

Meanwhile the British maintained their pressure against German lines above Aachen, while the U. S. 1st and 3rd armies, having ironed out the Belgium bulge, proceeded to punch to the Reich border. In Alsace to the southeast, the Germans continued to harass General Patch's 7th army, extended by the original withdrawal of elements of the 3rd from this sector to relieve the threat of the enemy's Belgium breakthrough.

PACIFIC:
Sight Bataan

With mountainous Bataan hovering ahead in the distant haze, U. S. motorized elements, followed by the 40th division, swarmed onto Clark Field's airdrome, 40 miles above Manila.

Eager to avenge the gallant Yanks who stood their ground so steadfastly on Bataan in the early weeks of the war, the advancing U. S. troops encountered but little stiff opposition, but farther to the north, on their left flank, their comrades faced strenuous enemy resistance.

It was here that the Japs continued to put up their stiffest fight from entrenched mountain positions, in an effort to check the Yanks' drive to cut off their forces on the northeastern neck of Luzon. As the Americans creeped forward against the embattled Japs, U. S. warships were called upon to train their big guns on the enemy fortifications, also being heavily pounded by field artillery.

MANPOWER:
Channel Workers

"Even as congress considered "work or fight" legislation for 18,800,000 men in the 18 to 44 year age group, the War Manpower commission tested a new voluntary plan for channeling employees from unessential to essential industries in Pennsylvania, New Jersey and Delaware.

Under the WMC's new plan, the number of workers unessential plants can retain is reduced, with men released then offered suitable jobs in essential industry. If they refuse to accept, the United States Employment service will not give them a referral card, necessary for obtaining work elsewhere.

Under the work-or-fight legislation shaped by congress, workers in less essential jobs would be asked to shift to more critical employment by their local draft boards, with the latter then ordering them to transfer if they failed to act voluntarily. Physically fit men violating the order would be inducted into the army while the physically unfit would be liable to fine and imprisonment.

CLOTHING:
Shape Controls

In an effort to increase the output of more essential apparel like work clothes, children's wear and underwear, the War Production board revealed that it would grant priority assistance to manufacturers producing such goods from cotton, wool and rayon.

At the same time, the Office of Price Administration announced plans for reducing present clothing prices from 6 to 7 per cent by fixing costs at the average level of the first half of 1943. In reporting its plans, OPA said that better than 100 per cent rise in the nation's clothing bill from 1939 to 1943 threatened the whole anti-inflation program.

Although the effect of the WPB's program will eliminate luxury clothing, medium-priced apparel, along with essential grade, will continue to be made, it was said. Quality of cheaper garments will be controlled to provide maximum serviceability.

ON THE FARM:
Not All Profit

Although U. S. net farm income for 1944 is officially estimated at about 12.4 billion dollars, figures nearly double that amount have appeared labeled as farm income.

A farmer's real farm income is not the total value of his sales of crop and animal products plus the value of things used from the farm but only what is left after business expenses, economists point out.

Dairy Outlook

Because of the absence of seasonal adjustments in ceiling prices, prices received by dairy farmers for the next few months probably will decline less than usual. But dairy production payments will continue at record levels, at least during the first quarter of 1945 for which period payments have been announced.

Milk production during the first part of 1945 is expected to continue at the record rate of 120 billion pounds in October and November.

CABINET CHANGE:
Wallace Bucked

When President Roosevelt asked Jesse Jones for his resignation as Secretary of Commerce to make way for the appointment of Henry Wallace, he precipitated a political turmoil, which saw the senate first take up consideration of a proposal to divorce all of the multi-billion dollar lending operations from the department before considering the confirmation of the ex-vice president.

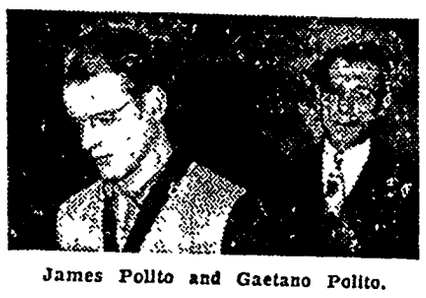
Long at the head of the Reconstruction Finance corporation and it many subsidiaries before its incorporation into the commerce department in 1942, bluff, big-businessman Mr. Jones made no bones about the fact that he thought only an experienced businessman with traditional American ideals of free enterprise should be entrusted with the handling of billions of dollars of government funds available for credit, and its huge investments in factories, facilities, etc.

Upon being apprized of his nomination, lank Mr. Wallace, long the bellwether of New Deal liberalism and favorite of the CIO, declared: ". . . The Department of Commerce and federal loan agency provide an opportunity . . . for intelligent work in behalf of the producing and consuming public. Roughly, the job is to promote a maximum of national employment by private business. Government must accept the duty of seeing that all men in health have jobs . . ."

RATION COUPONS:
Find Fakes

Breaking into a west side apartment in Chicago, Ill., early in the morning, government agents found 50,000,000 fake red meat coupons worth 500,000,000 points, distribution of which would have thrown the whole rationing program out of kilter and necessitated the issuance of new books.

Valued at $2,500,000 at the prices at which they were being sold to meat markets and restaurants in Chicago and elsewhere, the coupons



James Polito and Gaetano Polito.

were but a part of a total with an estimated worth of 2,000,000,000 points in the possession of a nation-wide ring of counterfeiters, OPA officials said.

Held on $25,000 bail apiece were alien Gaetano Polito and his wife, in whose apartment the fake coupons were found, and sons James, 22, and Gaetano Jr., 19, both medically discharged war veterans. Twice convicted for operating a still, the elder Polito, who said he was a cook at a north side cafe, has a minor police record.

WAR FREIGHT:
Emergency Control

With severe winter weather continuing in the northeast, with temperatures in many parts of New York and adjacent states down to 32 degrees below zero and blizzards piling up snowdrifts, temporary stringent regulations were maintained on rail traffic in 10 states both east and south of the Great Lakes in an effort to move war freight.

Although originally permitted to move into the congested area, live stock and poultry, fresh and frozen meat, coal and coke were later temporarily barred from shipment along with less essential civilian freight. Passenger service also was curtailed in the original regulation.

Requested by the Office of Defense Transportation, and voluntarily complied with by the railroads, the restrictions were expected to serve as a model for future regulation of rail traffic in emergencies to provide for the movement of goods for overseas shipment and necessary material to vital industrial plants.

JOB PLAN:
Full Employment Goal

In the first legislative proposal to provide full employment in the post-war period, four Democratic senators introduced a bill under which the President would be empowered to furnish full employment if private industry failed in the goal.

Sponsored by Senators Murray (Mont.), Wagner (N. Y.), Thomas (Utah) and O'Mahoney (Wyo.), the bill would require the President to estimate possible employment by government and industry each year, and then institute measures for taking up any slack.

According to provisions of the bill, these measures could include proposals for encouraging private investment, or a federal spending program, primarily consisting of the construction of public works.

ROCKET BOMBS:
Developed in U. S.

Examination of a German rocket bomb, V-2, which fell into the hands of the Allies in Belgium, discloses that this supposedly mysterious vengeance weapon, which is believed to have been fired more than 60 miles above the earth to fall in England, is similar to rockets developed in the United States before the war, by Dr. Robert H. Goddard, in experiments begun in 1910.

Ernie Pyle's Slant on the War:

Navy Lands Troops on Sicily According to Plans

Some Anxious Moments Were Experienced by Convoy Crew

By Ernie Pyle

(Editor's Note): This dispatch was written and first published when Pyle was with the G.I.s landing on Sicily. He is now on his way to cover the boys in the Pacific war zones.

WITH THE U. S. NAVY ON WAY TO SICILY.—As long as this ship of ours sails the high seas, even after every member of the present crew has been transferred away, I'm sure the story of the searchlights will linger on in the wardroom and forecastle like a written legend.

It is the story of a few minutes when the fate of this ship hung upon the whim of the enemy. For some reason which we probably will never know the command to obliterate us was never given.

Ernie Pyle

Our great, bad moment occurred just as we had ended our long invasion voyage from North Africa and stopped at our designated place off the south coast of Sicily. Our ship was about three and a half miles from shore, which in the world of big guns is practically hanging in the cannon muzzle. Two or three smaller ships were in closer than we but the bulk of our invasion fleet stood far out to sea behind us. Our Admiral had the reputation of always getting up close where he could have a hand in the shooting, and he certainly ran true to form throughout this invasion.

* * *

We'd been stopped only a minute when big searchlights blinked on from the shore and began to search the waters. Apparently the watchers ashore had heard some sounds at sea. The lights swept back and forth across the dark water and after a few exploratory sweeps one of them centered dead upon us and stopped. Then as we held our breaths the searchlights, one by one, came down with their beams upon our ship. They had found their mark.

Caught By Lights.

All five of them stretching out over a shore line of several miles pinioned us in their white shafts as we sat there as naked as babies and just as scared. I would have been glad to bawl like one if it would have helped for this searchlight business meant the enemy had us on the block. We not only were discovered, we were caught in a funnel from which there was no escaping.

We couldn't possibly move fast enough to run out of their beams. We were within simple and easy gunning distance. We were a sitting duck. We were stuck on the end of five merciless poles of light. We were utterly helpless.

"When that fifth searchlight stopped on us all my children became orphans," one of the officers said later.

Another one said, "The straw that broke my back was when the anchor went down."

A third one said, "The fellow standing next to me was breathing so hard I couldn't hear the anchor go down. Then I realized there wasn't anybody standing next to me."

We got all set to shoot at the lights but then we waited. Our Admiral decided there was some possibility they couldn't see us through the slight haze, although he was at a loss to explain why all five lights stopped on us if they couldn't see us.

We had three alternatives—to start shooting and thus compel return fire; to up anchor and run for it; or to sit quiet like a mouse and wait in terror. We did the latter.

I don't know how long the five lights were on us. It seemed like hours. It may have been five minutes. At any rate at the end of some unbelievably long time one of them suddenly blinked out. Then one by one, seemingly erratically and with no purpose in mind, the others went out, too. The last one held us a long time as though playing with us. Then it too went out and we were once again alone in the blessed darkness. Not a shot had been fired.

Assault Boats Land.

Assault boats had been speeding past us all the time and a few minutes later they hit the beach. The searchlights flashed on again but from then on they were busy fanning the beach itself. It didn't take our attacking troops long to shoot the lights out from close range.

I'm not sure some of them weren't just turned out and left off for good. We've never yet found out for sure why the Italian big guns on the shore didn't let us have it. Several of us inquired around when we got ashore after daylight. We never found the searchlight men themselves, but from other Italian soldiers and citizens of the town we learned that the people ashore were so scared at whatever was about to attack them from out there in the water that they were afraid to start anything.

I guess I'm always going to have to love the Italians, for anybody else behind those searchlights and guns that night and we of this ship would be telling our searchlight yarn to St. Peter by now.

* * *

Before closing this series about the navy I want to tell you of one member of our ship's crew who didn't make the invasion trip with us. She was the ship's dog, and this is the story of her and her master.

He is a regular navy man, a chief petty officer of many years' service. He is tattooed, windburned, a bachelor, and quietly profane. His officers say he is an excellent worker. I'm not giving his name because the story concerns his getting drunk.

It seems that several months ago some sailors from our ship picked up a German shepherd puppy. She belonged to the whole crew, but the puppy took to our friend and he took to it, and sort of by acclamation she became recognized as his dog.

The puppy grew into a beautiful dog, smart, alert and sweet. But when hot weather came along she got the mange. Our friend doctored it with everything he could find, and other sailors helped him with the doctoring, but still the mange got worse. They finally clipped her hair close so they could get medicine to her skin more thoroughly, but nothing did any good.

When they hit the last port before leaving Africa my friend told me he went ashore and searched the country for a French or American army veterinary, but couldn't find any.

True Dog Story.

When I came aboard ship this beautiful dog was frisky and alert but the sailors had given up all hope of curing her. Something had to be done. The other sailors left it up to our friend. Whatever he chose to do had their approval. He told me later that you couldn't just put her ashore, for she had grown up aboard ship and wouldn't know how to take care of herself on land.

So our friend solved it in his own way, the morning after I came aboard. He didn't ask anybody to help him, or tell anybody what he was going to do. He just tied a weight around her neck and let her down into the water. That was her end—in the tradition of the sea.

I heard about it a few hours later, and stopped by the rail to tell our friend I was sorry. He couldn't talk about it. He just said "Let's go below and have a cup of coffee."

A few hours after that I saw that he had started having something else.

In the mid-afternoon I saw one of the ship's officers talking to him very seriously. It didn't look too good. Drinking aboard ship just doesn't go. The next day our friend was called before the mast and given a light suspension of privileges.

At lunch the boys were kidding him about it and he said, well hell, he wasn't sore about it, for obviously they had to do something to him.

That evening I happened to be sitting with the officer who had sentenced our friend, and just to make conversation I mentioned that it was sad about the dog being gone. He sat up and said, "What!"

I said yes, the dog was gone.

He said, "My God!" and then he said:

"He's one of the best men on the ship, and I knew something was wrong, but I tried for half an hour to get it out of him and he wouldn't tell me."

The officer sat there looking as though he was sick, and again he said, "So that was it! My God!"

Navy's Landing Job at Sicily Finished

By the end of the first week after the Sicilian invasion there was almost no indication of warfare along our beach front. The German radio told us every night that we were getting bombed, but actually a stultifying peace had settled over us.

Hour by hour we could feel the ship slide back into her normal ways. The watches were dropped down to "Condition Three," which is almost the peacetime regime. The wearing of white hats became optional once more. The men went swimming over the side, and fished with rod and reel from the forecastle head. The captain had time on his hands and played gin rummy with me when I got worn out with writing. Finally liberty parties were let ashore for sightseeing.

SNAPPY FACTS ABOUT RUBBER

The day is not far distant when packages of fruit, vegetables, other foods and perishable materials will be sealed with flexible materials in the form of lacquers, adhesives and plastics.

Few sources of substitutes for natural rubber have been overlooked by U. S. scientists. In 1943 more than 2,000 varieties of plants were tested for their rubber possibilities.

Rubber-tired vehicles have been mainly responsible for the development of America's 3,000,000 miles of roads and highways—the largest and finest highway system in the world.

This specially trained girl makes some adjustments on the nose assembly of a P-39 Airacobra. There is scarcely any task in aviation manufacture that women have not mastered.

looking for factory operatives turned to women.

The factories, located with a view to available power and future marketing, soon developed communities, and these attracted other workers in various lines of activity. As towns grew in size, many of the older household occupations became impossible.

The entrance of women into wage-earning occupations was tremendously speeded up by the Civil war and World War I. Of the role women played during the first World war, we have a dramatic picture. The war itself wrenched the whole industrial machine. In the quick shift from peace to war, women as well as men were rapidly absorbed by the iron and steel mills, metal factories and foundries; they were practically drafted to make munitions and other war supplies. Aerial warfare created a new industry, in which women were indispensable, and it expanded the industries that made the material necessary for aircraft manufacture. Meanwhile the army of 4,000,000 men had to be fed and clothed, and in addition the nation's industries had to continue to supply the needs of the people at home.

There are striking parallels between the first World war and the present one in regard to women workers. In steadily increasing numbers, then as now, women entered fields which had been regarded as men's exclusive province—although thousands of women carried on in traditionally feminine food and fabric industries. Experienced women who were already in manufacturing in 1917 were utilized largely for munitions making. They helped to train new groups formerly otherwise employed, such as school teachers, who joined their ranks, as well as the large numbers of inexperienced women never before in the labor force. Growing numbers of women were hired in such industries as iron, steel, lumber, transportation equipment, chemicals, metal and metal products and others.

The Women's Bureau had recorded World War I experience in the use of women labor, so it was natural that the bureau should be recognized as the official agency for all matters relating to women's employment in the present war effort. On March 15, 1941, the Undersecretary of War indicated that he would take measures to see that the War department take up all matters of concern to women workers with the Women's Bureau, and there has been close cooperation since that date. Cooperative relationships have been established with the Navy Department, with other Government departments, and with state organizations and war contractors.

Can Do Any Job If Trained.

The peacetime work women were doing on punch presses, drilling machines, milling machines, lathes, grinders, and polishers, as well as their high record of achievement in inspection, assembly, filing and other bench work in metal and electrical industries was well known to the bureau. The extent to which these developed skills would be useful to war-implemented industries was easily demonstrated. In the last war women had proved themselves able in an emergency to make good on any job if adequately trained.

The transfer of vast numbers of agricultural workers to the war industries, as well as the rapid induction of others into the armed forces, resulted in a growing demand for the employment of women in agricultural work. In interesting women in such work, the bureau cooperated with other government agencies concerned, and in addition formulated and helped put into practice standards for women's employment on farms.

Today, women are being utilized in three broad categories of jobs:

1. Those that women have always done, now multiplied by the demands of war.

2. Those where they have been used as substitutes for men, either as replacements or in expanding industries.

3. Those that are new processes never performed by either sex (some of these are the result of subdivision of skilled operations to facilitate mass production, while others are the result of manufacture of new kinds of equipment).

Though men are still found in most of the top and highly skilled industrial jobs, women to an increasing degree are doing the more skilled, difficult and disagreeable jobs, as well as certain dangerous and sometimes inappropriate types of work.

During World War I the question was: Would women remain as workers when the war ended? Many people thought this question would be answered by the return of women to their homes or their old occupations. This time the question is: How may we best organize and carry out the shift from wartime to peacetime employment?

Three Million Will Quit.

The Women's Bureau believes that at least 3 million women will voluntarily withdraw from the labor market—young girls will go back to school; older women at retirement age or past, will retire; many of the 3,710,000 housewives who joined the labor force for the duration only, will be glad to take over full time homemaking duties. This will leave a force of about 15 million women workers for the immediate postwar period.

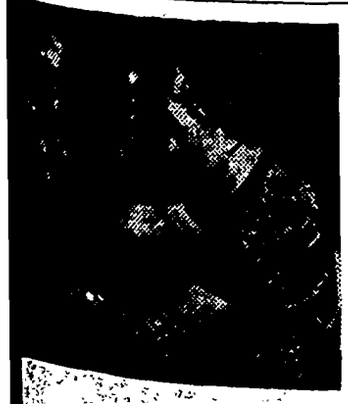
Miss Frieda S. Miller, who became Director of the Women's Bureau on August 17, 1944, believes the shift to peacetime jobs is a manageable thing, if we are both forehanded and farsighted as to planning. She believes this planning must begin at local levels, and provide for advisory counsels for all groups, and facilities for training and retraining of war workers for peacetime employment.

After the last war, the Assistant Secretary of War, acting as the Director of Munitions at that time, paid this tribute to women.

"For the successful carrying out of our program for the production of vast quantities of explosives and propellants, as well as shell loading, the women of America must be given credit on account of the highly important part they took in this phase of helping to win the war. Fully 50 per cent of the number of employees in our explosive plants were women, who braved the dangers connected with this line of work, to which they had been, of course, entirely unaccustomed, but whose perils were not unknown to them."

Miss Miller believes that women's contribution has been much more extensive in World War II. In the postwar world, she says, "Let us dovetail the skills and experiences of men and women workers so as to produce all the varied and numerous goods and services needed for a well-balanced economy and well-rounded living for all our people."

With the war still far from being won, women of America give every indication of surpassing all previous goals in war production.



Both young and old find there is a place for them in war production. At left a middle-aged woman drills parts for Flying Fortresses in a Seattle, Wash., factory. Center picture shows Miss Nita Carlin of Weehawkin, N. J., inspecting a high-power radio transmitting tube. Miss Carlin, who is only 21 years old, is a graduate of Hunter college in New York city, where she majored in physics. She is being trained in factory engineering, and is the first girl ever to be hired for this work.

IMPROVED UNIFORM INTERNATIONAL

SUNDAY SCHOOL Lesson

BY HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for February 18

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

TREASURES OF THE KINGDOM

LESSON TEXT—Matthew 13:44-46; 14:13-21.

GOLDEN TEXT—Every good gift and every perfect gift is from above, and cometh down from the Father of lights, with whom is no variableness, neither shadow of turning.—James 1:17.

Hidden treasure!—there is something about it that catches our imaginations and stirs our expectancy of discovering great riches. Men are constantly going on expeditions to seek out lost treasure. Others are engaged in study and research to bring out new treasures in nature or in the realm of learning or art.

Why not stir up a little excitement about the unbelievably rich treasures which are hid in Christ and in the life of faith in Him? It is not hidden, except to the eye of unbelief, but it is greatly neglected and all but forgotten by many.

The Scripture portions assigned for our lesson are not as well adapted to it as one could wish, but we may make good use of them. We learn here:

I. The Cost of Redemption (13:44-46).

Undoubtedly the lesson committee had in mind the usual interpretation of these parables, which presents the sinner as the one seeking the treasure and giving up all that he may have Christ.

While it is true that our redemption is worth more than anything else in all the world and that the Christian would gladly set aside (or would he?) everything for Christ's sake, yet that does not fulfill the thought of this parable. After all, what has a sinner (whose own righteousness is described in Scripture as "filthy rags") to sell in order to obtain redemption? And is it for sale? (See Eph. 2:8).

Obviously, we here have the Saviour with His all-seeing eye and loving heart noting in fallen humanity the pearl of great price, His own Church. He then gives up all the glory He had with the Father, comes to the earth, and even becomes sin for us that He may bring us to God.

Salvation in Christ is no little thing, not something which was purchased with gold or silver, but with the precious blood of Christ. We ought to value it highly, and because we are bought with such a price we ought always to glorify God (I Cor. 6:28).

II. The Heart of Compassion (14:13-16).

The One who was willing to die that men might have eternal life was not unmindful of their need of His mercy and grace for their daily problems. Jesus not only died that we might have redemption from sin, but He lived (yes, and lives now!) with tender-hearted compassion toward those in need.

He who is the living Bread was not willing that men should hunger for their daily bread. The disciples saw only one solution—to send them away, but Jesus said, "They need not depart."

One is fearful that the church has been all too quick about sending the needy away to some social agency or community charity, when it should have won their confidence by its compassion, and then brought them to Christ.

Little is much when God is in it, and by the divine touch of Jesus the multitude was fed. Could we not do far more for Christ if we would only use the little we have, with His blessing, for the help of our fellow men?

III. The Miracle of Provision (14:17-21).

We pray, "Give us this day our daily bread," and it is only as God provides it that we have it. He gives life to the seed, and multiplies it in rich harvest, and we eat, we trust, with thankful hearts.

That is a miracle—so oft repeated that we have lost a bit of the wonder and glory of it. Here in the story of the feeding of the five thousand and more (v. 21) with five loaves and two fishes, we have such a miracle of provision taking the little and making it enough for the multitude.

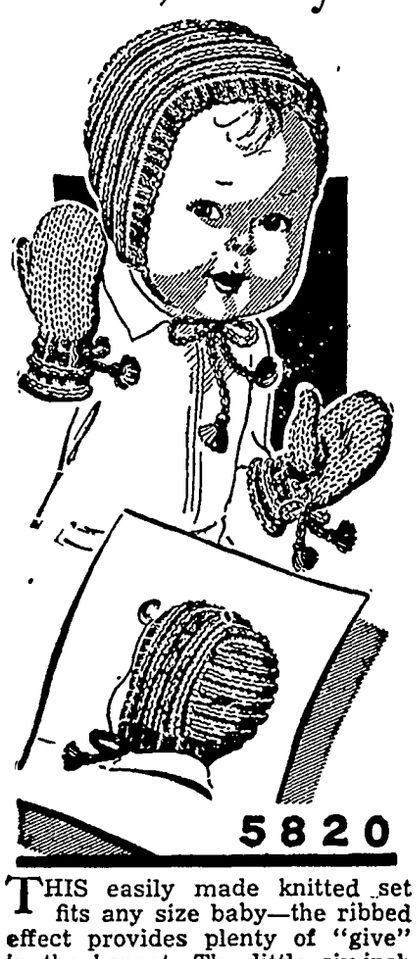
The Lord may not work in exactly the same way today, but do not God's servants see Him multiply their meager store as they give it out in His name? That is true whether the gift be of material or spiritual things. God can and does bless those who trust Him. Letting what we have pass through the hands of Christ results in transformation and multiplication. Try it!

Men and women are value-conscious in our day. While money is plentiful, goods of real quality are scarce, and one must look for that which has durability and worth. The treasures which Christ offers are enduring. He says, "Lay up for yourselves treasures in heaven, where neither moth nor rust doth corrupt, and where thieves do not break through nor steal" (Matt. 6:20).

By contrast, "the things Satan offers are temporary. In a few years most earthly honors and wealth must be laid aside. But the treasures of the kingdom are treasures which God intends that we should possess forever.

SEWING CIRCLE NEEDLEWORK

Warm, Pretty Knitted Baby Set



THIS easily made knitted set fits any size baby—the ribbed effect provides plenty of "give" in the bonnet. The little six-inch mittens are as pretty as they are warm. Use soft pink, pale blue or white baby wool for the set.

To obtain complete knitting instructions for the ribbed bonnet and mittens (Pattern No 5820) send 16 cents in coin, your name, address and the pattern number.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Send your order to:

Variety in Movements

No parts of a mechanism ever varied so greatly in rate of movement as two of the 93 dials of a clock completed in Belgium about 1936.

Although both are six inches in diameter and controlled by the same master movement, the needle of one requires 26,000 years to make a complete revolution, while the needle of the other moves around once a second, or 820 billion times faster.

This Home-Mixed Cough Syrup Is Most Effective

Easily Mixed. Needs No Cooking.

Cough medicines usually contain a large quantity of plain syrup—a good ingredient, but one which you can easily make at home. Take 2 cups of granulated sugar and 1 cup of water, and stir a few moments until dissolved. Or use corn syrup or liquid honey, instead of sugar syrup.

Then get from any druggist 2½ ounces of Pinex, pour it into a pint bottle, and add your syrup. This gives you a full pint of wonderful medicine for coughs due to colds. It makes a real saving because it gives you about four times as much for your money. It never spoils, and tastes fine.

This is actually a surprisingly effective, quick-acting cough relief. Promptly, you feel it taking hold. It loosens the phlegm, soothes the irritated membranes and makes breathing easy. You've never seen anything better for prompt and pleasing results.

Pinex is a special compound of proven ingredients, in concentrated form, a most reliable soothing agent for throat and bronchial membranes. Money refunded if it doesn't please you in every way.

Gas on Stomach

Relieved in 5 minutes or double money back

When excess stomach acid causes painful, suffocating gas, sour stomach and heartburn, doctors usually prescribe the fastest-acting medicines known for symptomatic relief—medicines like those in Bell-ans Tablets. No laxative. Bell-ans brings comfort in a jiffy or double your money back on return of bottle to us. 25c at all druggists.

HINTS FOR HOME BAKERS

Whole-Wheat Rolls in Jiq Time!

Make them with Fleischmann's yellow label Yeast—the only yeast with those EXTRA vitamins

SPEEDY WHEAT ROLLS

2 cups milk
2 tablespoons molasses or dark brown sugar
1½ teaspoons salt
1 cake Fleischmann's Yeast
5 cups whole-wheat flour (Graham)
1 cup sifted white flour
4 tablespoons melted shortening

Scald milk; add molasses or sugar and salt; cool until lukewarm. Crumble in yeast and stir until dissolved. Add half the flour and beat until smooth. Add melted shortening and remaining flour, or enough to make an easily handled dough. Knead thoroughly, keeping dough soft. Place dough in greased bowl, cover and let rise in warm place, free from draft, until doubled in bulk (about 1½ hours). When light, shape into rolls and place in well-greased pans. Cover and let rise again until light (about 1 hour). Bake in hot oven at 425°F. about 20 minutes. Makes 2½ dozen.

Klemme Shamrocks Even Up Score With Britt

BRITT EAGLES LOST SOME TAIL FEATHERS HERE MONDAY NIGHT

The Britt Eagles came to Klemme Monday night intending to pick for themselves a nice bouquet of Shamrocks, but instead, went back home with some tail feathers missing and their plumage generally ruffed up a bit.

The Britt-Klemme basketball encounter Monday night was one of the "hottest" games played on the Klemme floor this season. The game was close all the way, and in the last quarter the crowd was on their feet most of the time as the outcome hung in the balance.

In the curtain riser the Little Shamrocks took the small end of a 23 to 16 drubbing. It was their second defeat of the season.

In the feature game the Eagles jumped into a lead in the first few minutes but the Shamrocks closed the gap and were in front 10 to 9 at the end of the initial quarter. Everything was all tied up 17-17 at the half

Britt stepped into a one point lead to close the third quarter and the fourth quarter was a see-saw affair However, the Shamrocks came from behind to go into a five point lead when "Red" Buntenbach found the range and looped in three buckets from the floor. Britt again made it interesting with a couple of quick ones and stepped one ahead when Brinkman smacked in another with only seconds left to play to push the Shamrocks into a one point lead The Eagles lost a chance to tie the game when they missed a free throw. The Shamrocks froze onto the ball for the remaining three seconds to win 34 to 33.

Hughes paced the Britt Eagles with 14 points, while "Red" Buntenbach piled up 12 for the Shamrocks; Brinkman, 9; Jacobs 6, Ewald Grosshuesch 5 and Peck 2.

Neighbors Held Farewell Party For Mr. And Mrs. Geo. Schoenwetter

Nineteen families of the neighborhood held a farewell party for Mr. and Mrs. George Schoenwetter at their home in Liberty township Friday evening.

The evening was spent in visiting and movies shown by Mr. and Mrs Elmer Schaefer were also enjoyed.

At a late hour refreshments were served and Mr. and Mrs. Schoenwetter were presented with a gift.

Mr. and Mrs Schoenwetter are retiring from their farm and will move to the Paul Mueller house in Klemme, which they purchased.

Merle Schoenwetter, a nephew of Mr. and Mrs. Schoenwetter, will farm the place this coming year.

Merle and his bride will move to the farm March 1st.

Mrs. Lyle Wilcox Hostess To Fifty-Fifty Sunday School Class

Mrs. Lyle Wilcox entertained the Fifty Fifty Class of the Methodist Sunday school at the home of her parents, Mr. and Mrs. C. G. Waterman, Monday evening.

After a short business meeting games were played and later Mrs. Wilcox served a nice lunch.

Mrs. Norman Lau was a guest. Sixteen members were present.

Wedding Ceremony Held At Garner Church, Feb. 14th

PROMOTED

LT. LYLE WILCOX

Lt. Lyle W. Wilcox, son of George Wilcox of Minneapolis, who is with the General Service Engineers of the U. S. Army on the Western Front, was promoted from 2nd to a First Lieutenant on February 7th, 1945, according to a letter received by his wife who is making her home with her parents, Mr. and Mrs. C. G. Waterman of Klemme. Lt. Wilcox entered the service in May, 1942, and graduated from the Officers' Training school at Ft. Benning, Ga., in March 1943, and has been overseas since July, 1943. He was employed in the clerical department of Decker's packing plant in Mason City before entering the army.

CONSERVATION LEAGUE ORGANIZED FOR HANCOCK COURT

Each Community Will Have Two Directors On Board

A large crowd attended the organization meeting of the Hancock County Conservation league which was held at the Memorial hall in Britt. Herschel Morris of Kanawha was elected president of the county league, and Charles Clapsaddle of Corwith, secretary and treasurer.

Local chapters will be formed in all communities in the county and each local chapter will have 2 directors, one from the town and one from the rural district.

As soon as local chapters have been organized another county meeting will be held to map plans for the activity of the league.

Club Organized Here

A few years ago a club was organized by the farmers and sportsmen of Klemme and Goodell and vicinity and Harry Trumbell is the president of this club, known as the South-east Hancock County Conservation Club.

Mr. Trumbell expects to call a meeting of the club to name directors on the Hancock county conservation board.

SWAN TO HEAD HANCOCK COUNTY SALVAGE CAMPAIGN

M. E. Swan, manager of the Standard oil bulk station at Britt, has been named salvage chairman for Hancock county to succeed A. E. Beye of Britt who resigned recently.

Under Mr. Swan's direction, with the assistance of Mrs. R. E. Disselhorst, county chairwoman of Britt, the following local chairmen are active in towns in Hancock county: J. I. Overholt, Klemme; P. J. Kirkpatrick, Crystal Lake; A. E. Rasmussen, Garner; Clifford Schaper, Britt; Guy Judd, Kanawha; and Mrs. Edwin Bock, Garner.

DATE SET FOR ANNUAL COUNTY SPELLING CONTEST

County Supt. Charles S. Whitney announces that the annual Hancock County spelling contest will be held in the Garner high school auditorium Saturday, March 24, beginning at 9:30 a. m.

EUNICE SCHROER BRIDE OF MERLE SCHOENWETTER

Couple Will Reside On Farm In Liberty Township March 1

Miss Eunice Schroer, daughter of Mr. and Mrs. Otto C Schroer of Garner, was married to Merle Schoenwetter, son of Mr and Mrs Edward Schoenwetter of southwest of Klemme, at the Peace Reformed church in Garner on Wednesday, February 14th. The Rev. O H. Schroer of Tipton, brother of the bride, had invocation and a short sermon, with the Rev. R bt Stuebbe performing the ceremony.

Nuptial music was played by Miriam Huenemann who also accompanied the Rev. and Mrs O. H. Schroer who sang. Donald Woiwood, cousin of the bride and Raymond Schoenwetter, cousin of the bridegroom, lighted the candles.

Miss Leona Schroer, sister of the bride, was matron of honor an Miss Wava Schoenwetter, sister of the bridegroom, was bridesmaid. Wayne Schoenwetter, brother of the bridegroom, and Melvern Schoenwetter, cousin of the bridegroom, attended the bridegroom Raymond Schoenwetter, Donald and Vincent Woiwood served as ushers.

A reception for about 100 guests was held in the church basement following the ceremony. Doris Pringnitz, LaVohn Katter, Verna Pringnitz, Naomi Nieman, LuElla Katter and LaVera Lemke assisted in serving.

The bride is a graduate of Hayfield high school and has been employed by the Northwestern Bell Telephone company for the past year and a half. The bridegroom attended school at Klemme and has been assisting at home on the farm. The couple will reside on the Geo. Schoenwetter farm west of Klemme after March 1st.

LOCAL RED CROSS ELECTED OFFICERS FOR COMING YEAR

Members of the Klemme American Red Cross met at the home of Mrs Sumner Trumbell Saturday afternoon and elected officers for the coming year, as follows:

Chairman, Mrs. Sumner Trumbell; vice chairman, Mrs. R A Jorgenson; Mrs. Geo. Lawhorn., treasurer; Mrs. C. G. Waterman, secretary.

Board of Trustees: Mrs. Nash Bock, Mrs. W. F. Missman, Mrs. C A. Larsen.

Finance: C. G. Waterman, chairman, Sumner Trumbell, R. A Jorgenson, Ira Overholt.

Roll Call Chairman: Mrs. George Lawhorn.

Publicity Chairman, R. A. Jorgenson

Home Service: Sumner Trumbell, chairman; Ed. Jacobs, R. A. Jorgenson.

Disaster, Preparation and Relief Chairman, Ed. Thompson, Mevlin Neuberger, Mrs. Aug. Baack, Mrs. Ed. Jacobs.

Nursing: Chairman, Mrs. W. F. Missman.

First Aid: Rev. Calvin Grosshuesch, Chairman, C. G. Waterman, R. A. Jorgenson.

Junior Red Cross: Chairman, Mrs. R. A. Jorgenson.

FINAL O. K. GIVEN ON SCHOOL BUSES FOR KLEMME

The Klemme school board have received an official O. K. from the Chief of the Allocation Section, Highway Transport Department, Office of Defense Transportation, Washington, D. C. for the purchase of two International K-5 chassis to be equipped with latest model 42-passenger Wayne bodies.

The order or the two buses is now being processed and the board expects to get the new equipment late this spring.

The two buses will be used to bring rural students to the Klemme schools.

SNAPPY FACTS ABOUT RUBBER
The first use of motor trucks—and that means rubber tires—by the U. S. Army in active campaign occurred during the Punitive Expedition Into Mexico in 1916. About 800 motor vehicles were in use on the Mexican border.
B. F. Goodrich's latest analysis of the rubber situation shows that after the war annual potential rubber production of the world should be 2,800,000 long tons. This is more than twice the amount of rubber used by the entire world in 1941, the record year, when consumption totaled 1,300,000 long tons.

Watch Your Kidneys!

Help Them Cleanse the Blood of Harmful Body Waste

Your kidneys are constantly filtering waste matter from the blood stream. But kidneys sometimes lag in their work—do not act as Nature intended—fail to re- ove impurities that, if retained, may oison the system and upset the whole ody machinery.

Symptoms may be nagging backache, ersistent headache, attacks of dizziness, tting up nights, swelling, puffiness nder the eyes—a feeling of nervous xiety and loss of pep and strength. Other signs of kidney or bladder dis- der are sometimes burning, scanty or o frequent urination.

There should be no doubt that prompt eatment is wiser than neglect. Use an's Pills. Doan's have been winning ng friends for more than forty years. ey have a nation-wide reputation. recommended by grateful people the ry over. Ask your neighbor!

DOAN'S PILLS

THE NAZI OLYMPICS

("The German minister of propaganda declared that the German idea of a good world was one where the Olympic games provided the only conflict among men." —News Item.)

100 yard dash—All Nazis to get a head start of 99 yards.

200 yard dash—For pure blondes only.

Quarter mile relay—Germans of pure strain to have wind at backs.

Half mile relay—Open to disgruntled paperhangers, postcard painters and revengeful corporals only.

High jump—All contestants other than Germans must concede that the Germans, however high they may jump, have really jumped two feet higher.

Pole vault—Herrinvolk to have first choice of poles. No figures to be official until passed on by a committee made up exclusively of Prussian military officers. (Note. No poles to be permitted for Jews, Negroes, English or American pole vaulters.)

Javelin hurling—Javelins for use by Germans to be of special design. Practice in streets crowded with little children to be compulsory.

Discus throw—All contestants other than Germans to throw left-handed, using sidewheel delivery.

Running broad jump—Germans to jump down hill with Gestapo at backs. (Anybody jumping higher or farther than a German to be disqualified for impertinence.)

Shot put—This event to be limited to contestants named Fritz, Adolf, Heinrich or Otto.

Marathon—All contestants other than those officially approved by Berlin committee on sportsmanship to wear pig lead in running shoes. Special watches to be used to time German runners.

Hurdle Races—Those of pure German bloodlines may compete at any time they may wish; others must compete immediately after a full meal.

—*—

Swimming Events

Fifty yard dash—Outboard motors for Nazis compulsory.

100 yards—Nazis to swim in regular tanks; other nationalities to swim in hot oil.

Under water swim—(All contestants other than pure Germans will come up at their peril.)

Water polo events—Opponents of Nazis to swim on backs. German players to consider spiked shoes as proper equipment.

—*—

The laying of mine fields on all tracks after Germans have concluded their part in the event shall be legal.

All cups given as prizes may have booby traps attached. No further notice of this shall be necessary.

Experiments with new jet bombs and other horror weapons shall be conducted on all parts of the field except when Germans are competing.

All cash prizes shall be paid in wooden money.

* * *

YE GOODE OLDE FILMS

Once in a while an old film is re-shown, and it is surprising how often they seem far ahead of the later ones in humor, drama and general interest! Such a picture is "If I Had a Million," first shown over a decade ago, relating, with gorgeous fun, what a half dozen ordinary people do when they are left a million by a gooney millionaire. We have seen few funnier pictures since and lost no time making for the theater that was showing it again.

—*—

What a bunch of stars in one comedy! Charles Laughton, W. C. Fields, Charles Ruggles, the late Richard Bennett, Jack Oakie, George Raft, Gary Cooper, May Robson and a half dozen others! There has never been a more side-splitting episode in pictures than the one where Fields, his brand new car just wrecked by a careless driver, buys a flock of cars with his suddenly acquired dough and devotes the day to smashing into roadhogs.

—*—

Incidentally, Gary Cooper and George Raft, not then famous, were just attracting attention at the time, and it was Charlie Laughton's first American picture bit.

* * *

Do You Remember Away Back When—

The envelopes fitted the stationery?

You could count on seeing the same bartender?

You could remember the name of the cigarette you're smoking?

* * *

It Helps

Fifteen thousand dollars was paid at auction the other night for a Frans Hals painting "Portrait of a Laughing Boy." It goes to show what it means to have anybody around the house who seems to feel pleasant these days.

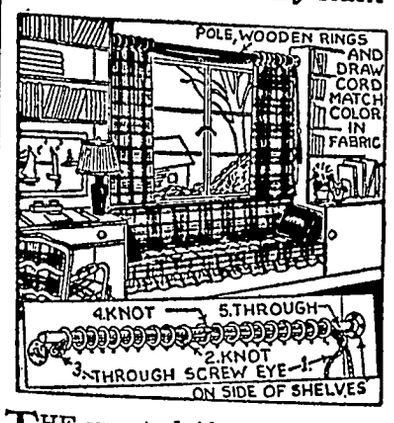
Muddled meat? That's a new name for modern hamburgers, we assume.

Making That Problem Window Fit Perfectly Into the Room Setting

By Ruth Wyeth Spears



THE smart plaid curtains shown herewith match the window seat and several slip covers, and the wooden curtain pole, rings and draw cord match the dominant color in the plaid repeating the color of small cushions and lamp base. The window lets in the maximum of light and you would never guess that originally it looked like a postage stamp in the middle of a blank wall. At first it seemed impossible to curtain it because fixtures could not be screwed to metal casements or the plaster.

The built-in book shelves helped that. A space a foot wide was allowed at each side of the window so that the curtains could hang over the wall, and the painted wooden pole was then screwed to the sides of the shelves. The diagram shows this and how the draw cord was knotted so that the curtains could be pulled back and forth.

* * *

NOTE: These curtains are from the 32-page booklet "Make Your Own Curtains" which Mrs. Spears has prepared for readers. To get a copy send 15 cents with name and address direct to:

Largest Curtain Arranged In Thousands of Patterns

The largest and the most complex theatrical curtain ever made is in Radio City Music hall in New York, says Collier's. Thirteen steel cables, sewn vertically into the material nearly seven feet apart and raised and lowered by their own individual motors, make possible the arrangement of the curtain in thousands of contour patterns.

ASK ME ANOTHER ?

A General Quiz

The Questions

1. In what year did the Capitol in Washington, D. C., burn?
2. Through which country in South America does the equator run?
3. Which is wider at its widest point, North America or South America?
4. What was the nationality of the man who devised the universal language, Esperanto?
5. What is a limited edition of a book?
6. What did Sarah Bernhardt use as her motto?

The Answers

1. In 1814 (during the War of 1812).
2. Colombia.
3. South America.
4. Russian (Dr. L. Zamenhof).
5. An edition of which the publisher guarantees there will be no more copies printed after the first stipulated and comparatively small amount.
6. Quand meme (In spite of all).

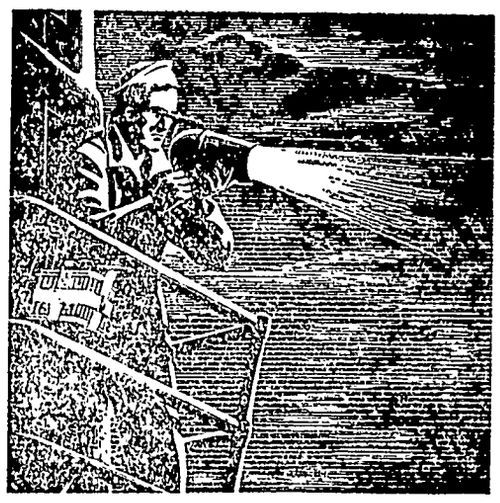
Meet the Men

WHO USE YOUR BATTERIES!



The Navy and Merchant Marine send rapid ship-to-ship messages by battery-powered flasher signal lights when radio communication might give a ship's position to the enemy.

It's difficult to locate men drifting in the sea! Water-tight battery lights on buoyant lifesaver suits have meant the difference between life and death for many Merchant seamen.

For emergency communication by voice, the Merchant Marine uses a portable megaphone to broadcast orders and instructions. Dry batteries give necessary power to the megaphone.

Two men and a bazooka make a winning team! But it takes large quantities of ammunition and dry battery power to keep these portable, hard-hitting weapons firing at the enemy.

Deadly flamethrowers are blazing the road to Victory! Dry batteries help to create the spark that sends these efficient weapons into instant, flaming action against the enemy.

The Signal Corps man with a Walkie-Talkie has freedom of speech as long as he has plenty of dry batteries! Handie-Talkies also use thousands of war batteries to power vital communications.

When they come Home—Burgess Batteries will be back again, too [. . . powering flashlights, radios, telephones, instruments and controls for millions of homes, farms and industries throughout America.

Around Iowa

Long And Short

The John Jennings Post of the American Legion at Belle Plaine is willing to challenge any post in Iowa to a long-short contest The Belle Plaine post believes it can win with their tall member, John Lahn, and their shortest member, William G. Mecklenburg.

From The "Wilds" Of Alaska

F D. Snook of Iowa Falls will believe most anything now. Recently, he received a shipment of clothing from the J. W. Thompson family of Nenana, Alaska. A note accompanying the order requested Mr Snook to clean the clothes and send them back to Alaska. Needless to say it was the first order from Alaska for Mr. Snook.

Equipped For Snow

Harrison Barth and his sons, Jessie and Raymond, of near Decorah, have a car ready for all emergencies They have equipped a Ford with a caterpillar-drive plus an attachment of metal runners in front.

Fathers

Arthur Becker of Waverly was recently ordained as a Lutheran minister at that place. During the services his father, Rev. C. H. Becker, and his wife's father, Dr. M Wiederaenders, assisted in the ceremony.

Students Remember

For 20 years, Dr. Clair Francis Littell has been an instructor at Cornell college As a tribute to the influence of Dr. Littell in helping students "make the right choices," Rev. Peter Palches, class of '27 presented him with a bound volume of letters written to Dr. Littell by major students and other professors of the college.

Beef Went Up

Bill Henry of near Pleasantville had quite a problem on his hands one day when he found his bull in the haymow. After building a runway of baled hay and with some considerable persuassion, the animal descended to terra firma.

Editor's note: Mr. Henry fails to say how the bull got into his haymow, so we think this story is a lot of "bull."

Time To Retire

W. K. Colburn of Harlan submitted his resignation as secretary-treasurer of an insurance firm after having held that office for 45 years. January 14, was the date of Mr. Colburn's 90th birthday. He has been at his office each day, driving his own car to and from his home.

To Far Places

Egg graders at an Elk Horn concern have received letters from many parts of the world as a result of having affixed their names to eggs being processed at their plant. One of the eggs found its way to a troop transport where Fireman First Class Laverne Hanses serves. He wrote his sister, Viola, bookkeeper at the produce station, that he had found one of the eggs from Elk Horn, with the signature of "Helen Peterson, Elk Horn, Iowa," written on it.

Training Opposums

Arthur Ellingson of Decorah captured two opposums that were found feeding with his chickens Arthur now is attempting to train the animals to show at the 1945 fair in Decorah. Mr. Ellingson is president of the Winneshiek county fair board.

Basketball Player

June Dust, a guard on the Norwalk basketball team, was the tallest guard among competing teams at the Warren county basketball tournament. She is 6 feet, 7½ inches tall and is the third girl in the family to play on Norwalk basketball teams in the past 12 years.

Squirrel Was Knocking

Mr and Mrs. Tom Moser of Guttenberg were awakened one night by a rapping they thought was on the front door. It wasn't, and a fifteen minute search located the noise. A flying squirrel was inside the kitchen range making the sounds in its efforts to escape. Apparently the animal had come on down the chimney. Upon being released, it flew against a wall, falling on the floor where the Moser cat made short work of it.

Saved For Personal Use

Investigation of ruins left when a fire wrecked a Marion clothing store, revealed one interesting item. One of the proprietors discovered in his overcoat pocket a pack of cigarettes, unharmed. The coat had been damaged, but the cigarettes which were intended to be burned were undamaged, much to the proprietor's delight.

Didn't Do It

Friends of Harry Mason, Clear Lake, were very much surprised when he appeared at a Chamber of Commerce meeting recently. The story had somehow gotten started that Mason had fallen off a ladder, broke his neck and died of injuries. The odd part of it was, Harry said nothing outstanding had happened to him at all. Another man, R. R. Schultz of LeMars also put down rumors that he had been killed. Schultz was mistakenly reported killed by a switching box car at Sioux City He reported to his friends, "there's nothing to it."

News Gets Around

Joe Patrice, owner of a grocery store in Winterset, last week reported that he had received an order from a Washington, D. C. resident for bacon squares. Cash accompanied the order, with a note from the out-of-towner saying he had seen an advertisement in a Winterset newspaper stating bacon squares were available.

1881 In Emmetsburg

An artist's sketch of Emmetsburg back in '81, was found in the attic of the home of William Dick-Peddie, Sr. Some of the landmarks on the sketch are unchanged at the present time They are the courthouse, two or three railroad lines, the Tobin building and others. The year 1881 was quite an eventful one for Emmetsburg That year 2 railroads raced to complete their parallel and competing lines as far as Estherville Following completion of the two lines, a daily race between the two trains, to reach a crossing ensued.

GIRL SCOUT NEWS

—Scribe, Irene

The White Rose Patrol held their meeting at Mrs. Trumbell's house Saturday, February 17, 1945.

We held an election of officers with the following results: Maralee, president; LaNelle, vice-president; Irene, scribe; Jo Ann, treasurer.

We have been working on the Homemaking Badge and have it nearly completed.

We gave the Girl Scout Promise and Laws, and for our game we played "Fruit Basket Upset."

Wednesday night we had a Valentine and surprise party in honor of De Vera Wilson, who is leaving us the 1st of March. We gave her a variety of gifts.

At the close of our meeting we sang our Hike Song, Petticoat Lane and Three Blind Mice.

SCHOOL NEWS

SENIOR CLASS NEWS

—By Pat Kudje.

Last Monday, Febr. 12th, we Seniors had a big day when we had our pictures taken. It took all morning after we got there to be "shot," discuss folders, etc. We all went to the show together in the afternoon and then ate at the Covered Wagon. Some of the boys were afraid of breaking the camera (so they said, they just didn't want to brag) but everything turned out for the best. Most of us were ready for bed when we got home. It was kind of strenuous, and different, after being used to school.

We then went to Hamilton's Business School and were shown many interesting things, among them, how to use a dictaphone.

We have had two of our six weeks tests already. We will be starting new units so the teacher wanted to finish the old ones first. These tests were in American History and Bookkeeping.

* * *

SOPHOMORE NEWS

This week will end another six weeks of school, so it is therefore the week of our six weeks tests. Our tests are scheduled so that we have only one test each day which will make it much easier.

In Geometry we are on the chapter "Tangents and Secants," which we will finish this week. It is interesting and very different from what we had been having.

The World History Class has finished the 17th Century and are now studying the 18th Century. We have discovered that many wars were fought during this period.

In English II we are studying the structure of a sentence. We are learning how to identify and use the noun, adverb, and adjective clauses of a sentence.

Our Biology Class has finished the chapter on "Body Glands" and has started a new unit on "The Unlearned Responses of Plants and Animals."

* * *

JUNIOR HIGH SCHOOL NEWS

—Willis Bock, Reporter

In Seventh Grade Geography we have been making reports on National Parks of the United States and on our possessions.

The boys in the 7th, 8th, and 9th grades had a basketball game at Goodell Thursday afternoon. The score was 35 to 18.

Next Friday we will have a Spelling Contest in our room to select the five best spellers in each grade.

* * *

FIFTH AND SIXTH GRADE NEWS

—Mrs H. G. Voetberg, Teacher.

Audra Jones returned to school Tuesday after being absent because of illness.

Wednesday afternoon shortly before school was out we had a Valentine party. Each boy and girl received many lovely valentines. At the close of the party, treats were passed.

In Sixth Grade History this week we had some very interesting original stories. On Wednesday our topic was "An Imaginary Visit To a Castle," and on Thursday it was "My Experiences in Becoming a Knight." The Fifth Grade listened to our stories.

We want to thank Mrs. Ronald Barz for staying with us a while Wednesday afternoon while Mrs. Voetberg went to Garner to attend a funeral.

* * *

THIRD AND FOURTH GRADE NEWS

—Miss M. J. Holmes, Teacher.

The boys and girls in the Third and Fourth Grades were given treats on Tuesday of last week by Dennis Ridder. The occasion was his 9th birthday.

On Wednesday Gaylon Bridges visited our room. He came for the opening of the Valentine box and the party which followed. All of the boys and girls received many pretty Valentines. Eric Meyer treated the other boys and girls in the class.

Ronald Karsjens has been absent the last part of the week due to illness.

* * *

KINDERGARTEN, FIRST AND SECOND GRADE NEWS

—Miss Arlene Bugh, Teacher.

This week we made Valentines for our mothers and daddies. We thought it was lots of fun to make them.

On Wednesday afternoon we had our Valentine Party. Those who drew to be Postmen were Robert Arnold, Adeline Medaus, Lois Heginger, Margaret Medaus, and Janice Stokesbary. Everyone received many pretty Valentines.

Hancock County Ministerial Meeting Held Monday

The Hancock County Ministerial Association meeting was held at Britt Monday morning with Rev. H. E. Harvey giving the devotions. Rev. Leo Wilson presented a paper on "The Problems of the Races."

The next meeting will be held at Corwith the latter part of March.

RABBIT SEASON CLOSES MARCH 1 IN IOWA

The season on cottontail and jack rabbits closes March 1 after one of the most successful hunting seasons in recent years. Rabbits, the most popular game animal in the United States, were numerous in every section and abundant in some localities. The cottontail has been on the increase since 1939, when there was a low in the rabbit cycle, and they are expected to reach a peak within the next year or two.

Tularemia, or rabbit fever, has decreased during this period, and only three cases of the disease were reported between August 1 and the present date, compared to 168 cases in 1939.

Issued Marriage License

County Clerk Elmer Raw issued a marriage license to Merle Schoenwetter, 24, Goodell and Eunice A. Schroer, 20, Garner on Feb. 12.

It's the "LET-DOWN" that is important
To promote "let-down" wash the udder with warm water.
After one minute attach MILK-MASTER and milk will flow freely
PERFECTION MILK-MASTER

Unless the cow cooperates during milking by "letting down" her milk part of it remains in the udder Much milk is lost . . . the cow tends to dry up . . and udder troubles are more frequent.

The most effective way, according to dairy scientis s, to stimulate complete "let down" is to wash the teats and bottom of udder with warm water, then draw one or two squirts from each teat

Then, one minute later, let the MILK-MASTER do the milking. Its gentle action, with suction automatically adjusted for each teat according to need, insures that the "let-down" lasts throughout milking period. There is no discomfort to interfere with "let-down".

This automatic suction control is an exclusive feature of the Perfection MILK-MASTER.

Come in and let us tell you more about this "different" milker. Ask for a copy of Perfection Co's. bulletin about faster milking.

Relief At Last For Your Cough

Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm, and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Tell your druggist to sell you a bottle of Creomulsion with the understanding you must like the way it quickly allays the cough or you are to have your money back.

CREOMULSION
for Coughs, Chest Colds, Bronchitis

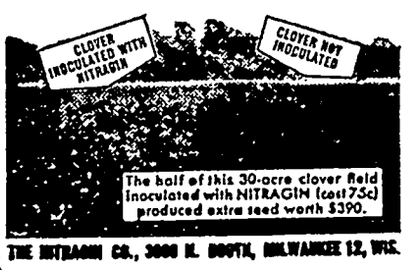
PAYS BIG

Help alfalfa, clovers and soybeans make greater profits. Inoculate the seed with NITRAGIN. You give these crops more vigor to grow faster, fight weeds and drought, and make bigger yields of rich feed. You help build soil fertility. Without inoculation, legumes may be soil robbers and their growth stunted.

INOCULATE ALL ALFALFA, CLOVERS, SOYBEANS, LESPEDEZA WITH NITRAGIN

NITRAGIN costs about 10 cents an acre, takes a few minutes to use. It's the oldest inoculant . . . widely used by farmers for 45 years. Produced by trained scientists in a modern laboratory. Get NITRAGIN, in the yellow can, from your seed dealer.

FREE booklets tell how to grow better cash, feed and soil building legumes. Write to address below.



CLOVER INOCULATED WITH NITRAGIN
CLOVER NOT INOCULATED
The half of this 30-acre clover field inoculated with NITRAGIN (cost 75c) produced extra seed worth $390.

THE NITRAGIN CO., 3000 N. BOOTH, MILWAUKEE 12, WIS.

Accident Hazards

Farmers who spend some time during the winter months finding and correcting accident hazards may prevent painful injuries and loss of time during the busy season next year. Do some housecleaning and set things in order. A good place to start the farm safety project is in the barn.

Follow the important safety rule, "a place for everything and everything in its place." If alleyways and work areas in the barn are obstructed with feed, harness, tools and other equipment, find a place for these things. Falls and falling objects cause a large portion of accidents which occur in barns. Avoid storing loose material overhead on the rafters, and see that forks, scrapers, and other farm equipment are kept where they will not cause accidents.

Many barns filled with hay, feed and valuable equipment are destroyed each year by fire. Farmers should not smoke or strike matches in the barn. Light the lantern before entering the barn and fix hooks to hang the lantern on, so that it won't get knocked over and start a fire. While checking the fire hazards, check to make sure that the lightning rods are grounded properly and to make sure that no gasoline and kerosene are stored in the barn.

Washing Care Needed For Woolen Socks

Pure wool naturally tends to shrink a little, so it is a good idea to buy wool socks half a size larger than usual; but even at that, proper washing care is necessary. Never rub wool socks. Just press the suds through them, keeping to the same lukewarm temperature for washing and rinsing.

Another precaution is to dry the socks on forms which can be bought ready-made or can be cut out of wood or cardboard. Covering the forms with bath-towelling will help speed the drying. If you do not use forms, smooth the socks into shape, pull them out to original size, and lay them out flat to dry or hang them with the feet about half over the line.

Many women, to save time and soap, have developed the habit of rinsing out their menfolk's socks right along with their own stockings in the bathroom washbowl each night.

Visual Acuity

When you apply for an automobile driver's license in many states, you will be asked to read the letters on an eye chart. Your ability to read the various lines of letters indicates the distance efficiency of your eyes, says the Better Vision institute. The charts were designed so that a person with sight considered normal can read easily at a distance of 20 feet a letter which makes a picture of standard size upon the retina of the eyes. If you can see only the "30 line" it means your eyes must have a larger picture on the retina and that, according to estimates by experts, you have a visual acuity of only 91.4 per cent of standard. If the "40 line" is the smallest that you can distinguish clearly, then your sight is only 83 6 per cent of standard.

Sponge Bank:

Tuck soap scraps into a sponge slit at the top so that you can put soap pieces into the cloth lining. When wet it is pliable and full of soft suds. You'll find a host of uses for this sponge bank. "Soap" the dishes with it when you're doing a quick dishwashing job. Keep a special one for bathing the dog or scrubbing floors. But since the soap is inside you can't rinse surfaces with it. Or prepare a jelly from remnants of soap bars. To make a jelly dissolve small pieces of soap in hot water, using ½ cup soap to 1 quart water. Then cool and set aside to jell. You can use this jelly in place of flakes for any laundering. Use up the ends of your bar soap this way.

Remove Pesky Stains

Here are some of the usual stains, and what can be done about them:

Fruit and berry stains: Stretch over a bowl, then pour boiling water from a height; dry in the sun to bleach. If the stain has "set," and the cloth is white cotton or linen, follow the boiling water with a chlorine bleach and rinse promptly and thoroughly.

Coffee, chocolate and cocoa stains: First, soak in cold water for several hours, then pour boiling water through from a height, and wash as usual. If the stains have become "set," apply a paste of borax and cold water. Rub in well, rinse, and wash in warm suds.

Wine stains: Sprinkle at once with salt. Afterwards, pour boiling water through the stained portion and wash as usual.

Mustard stains: Rub lightly with thick soapsuds before the cloth is washed.

Candle wax: Scrape off the surface wax with a blunt knife. Place a piece of white blotting paper or brown wrapping paper over the spots and press with a hot iron, moving the paper frequently.

Bamboo Serves Many Purposes in Orient

There is not a category of human needs which cannot be supplied by some form or product of bamboo. Food, weapons, shelter, implements, clothes, furniture, baskets and containers, bridges, conduction pipes, paper, cable, ornaments, and many very specialized articles are made from it.

Bamboo has figured largely in the past history of Asiatic and many tropical peoples and has been the subject of artistic rendering in all the arts. The famous Bamboo Books, containing more than 100,000 seal characters, comprising 15 different works dealing with the history of China for 2,200 years, were written on tablets made of bamboo which were strung together like a fan.

To bring the uses of bamboo up to date, a bamboo basket has been designed and used by the Chinese to protect their most important buildings from Japanese air raiders. The Chinese construct a three-story bamboo framework atop buildings and load all three floors with cut bamboo. When a bomb hits, it is harmlessly detonated before it reaches the building itself.

Many States Exempt Uncle Sam From Taxation

United States property is specifically exempted from taxation by 36 states, while three states—Kentucky, Louisiana and Minnesota—exempt "public property" from taxation but do not expressly refer to United States property, the Council of State Governments reported.

Five states—Florida, Idaho, Iowa, Texas and Wisconsin—propose to tax the property of the United States, whether real or personal, as soon as the federal congress permits such taxation. All the five states except Idaho took steps in 1943 to prepare for taxation of federal property upon consent of congress; in Idaho, the question went before the voters on November 7 as a constitutional amendment and was approved.

In Alabama, U. S. property is taxable except where it is barred by constitutional provision. Georgia, North Carolina and Pennsylvania—the remaining three states—impose taxes on certain forms of property owned by the federal government, according to the council's report.

Plasticize Porkers

Traditional hog-scalding to remove the hair in butchering may soon be "out," replaced by a new scientific method. In the new process porkers are plasticized and peeled.

The dead hog is submerged in a tank of liquid plastic, then pulled out coated with the sticky stuff. When properly cooled, the plastic is stripped off, taking all the hair with it. The process is quick, clean, thorough and economical.

IMPROVED UNIFORM INTERNATIONAL

SUNDAY SCHOOL Lesson

BY HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for February 25

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

JESUS, THE SON OF GOD

LESSON TEXT—Matthew 16:13-17; 17:1-9.
GOLDEN TEXT — Whosoever therefore shall confess me before men, him will I confess also before my Father which is in heaven.—Matthew 10:32.

"What think ye of Christ?"

There is a question that every human being must answer. Jesus asked it (Matt. 22:42), and each of us makes some kind of reply.

It is the touchstone that tries men, and churches, organizations and movements. The answer to it is of deep importance, for it determines character, condition, and destiny for time and eternity.

Jesus, the Christ, the Son of the living God, is the center of the entire lesson.

I. Jesus Confessed (16:13-17).

With His crucifixion now only six months away, our Lord in preparation for it is about to make a more definite claim to Messiahship, and thus to establish the truth in the minds of His disciples. He therefore asks this all-important question about Himself.

First, it is a general query, "Whom do men say that I am?" The answer (v. 14) indicates that the common opinion concerning Christ was a very high one. He had made an impression on the people of His time, and this has been true down through the ages. Even those who do not believe on Him admit that He was "the ideal representative and guide to humanity," or the person before whom "everyone would kneel." But beautiful tributes to His character and leadership are worse than meaningless unless they lead to a personal confession of Him as Lord and Saviour.

The question becomes personal as He asks, "Whom do ye say that I am?" That question no one can escape. We cannot refuse to answer. Neutrality is impossible. Whatever we do or say, or do not do or say, is a decision.

Peter's answer is really the sum and substance of Christian doctrine. He recognized Him as the Messiah, the fulfillment of all Hebrew prophecy, and as the Son of the living God, the Redeemer and Saviour of men, the One in whom centers all Christian faith.

II. Jesus Transfigured (17:1-3).

As His amazed disciples looked on, the eternal, divine glory of the Son of God could no longer be hidden by the human body and the humble garments of our Lord, and "His face did shine as the sun and His raiment was white as light."

They saw their beloved Master now for what He really was, the Son of God. The testimony of Peter was no longer mere words, although ever so blessed. His speech had been confirmed by sight and they knew their Master as the Lord of glory.

It is essential in both the life and service of a Christian that he clearly understand the truth about Christ, His person and His work. When that understanding is tied up with a personal vision of His glory, there is assurance and power.

The want of such a vision explains the lack of zeal for soul-winning, the ineffectiveness of witness, the unwillingness to suffer or sacrifice for Christ's sake. "Where there is no vision, the people perish" (Prov. 29:18) for want of a witness concerning the Saviour.

III. Jesus Triumphant (17:4-6).

The crowning point of the transfiguration came when the voice spoke out of the bright cloud and gave not only the Father's unqualified approval of Christ, but also His command that men should listen to Him and heed His message of redemption.

Note how this word of the Father completed the transfiguration. In itself it might have been likened to that which happened to Moses (Ex. 34:29, 30). We say likened to, because the glory which showed forth in Jesus was from within, not just a reflected glow.

But the words from heaven provide the conclusive and final witness. They so impressed Peter that he talked of them as a cherished memory and a transforming power in his life, even when he was an old man (II Pet. 1:16-18).

How do they impress you? Are you ready to acknowledge Jesus as the Christ, the Son of God, and take Him as your Saviour?

IV. Jesus Only (17:7-9).

Having seen Him in His glory, they now saw Him alone. True, the others had gone, but is there not also the thought that He, the blessed God, now filled the vision of their souls?

Surely we find it right at hand to make that application to our own lives. When we really see Him as He is, then He fills our vision, and when He does that, we have reached real satisfaction of life.

"Jesus only" is more than a motto or a theme for a song. It is the epitome of a life worth while. It makes one want to ask everyone, "Do you know Him?" Well, do you? If not, will you take Him as your Saviour right now? Christian, will you let Him fill your life?

SEWING CIRCLE PATTERNS

Pretty, Practical Apron-Pinafore Tot's Frock for School or Play

Play Frock

LITTLE daughter will feel quite grown-up in her apron pinafore to match mother's. The gay over-shoulder ruffles and sweetheart neck are edged in bright binding. Ideal for school or play.

* * *

Pattern No. 8741 is designed for sizes 2, 3, 4, 5 and 6 years. Size 3, with sleeves, requires 2⅜ yards of 35 or 39-inch material; 3 yards trimming for ruffles and neck.

Apron-Pinafore

A CURRENTLY popular style is the mother-and-daughter theme. This attractive house frock for mother buttons at the shoulder and waist in back and is marvelously simple to do up.

* * *

Pattern No. 1272 comes in sizes 14, 16, 18, 20; 40 and 42. Size 16, with sleeves, requires 4⅞ yards of 35 or 39-inch material; 4 yards of rick rick to trim.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Household Hints

A temperature of from 60 to 65 degrees F. is suitable for most plants.

—•—

To prevent corks from sticking in bottles containing glue or polishes, coat the cork with vaseline.

—•—

Add a bit of vinegar to the dishwater to cut the grease.

—•—

To flatten rug corners that curl and slip on the floor, cut out L-shaped pieces of cardboard, and glue to the underside of the rug at the corners.

—•—

Cover the top of your bedspring with oil cloth. This will be a good protection for your mattress and will make it easier to turn your mattress.

—•—

Use the top of a lipstick container over the ends of your curtain rods when pushing them through freshly starched curtains.

—•—

Put a few rubber bands around the handle of your bath brush to insure a firm grip upon it.

MANY MEN are persecuted by lumbago or other nagging muscle pains—especially after exposure to cold or dampness. If every sufferer could only know about SORETONE Liniment! In addition to methyl salicylate—a most effective pain-relieving agent. Soretone acts like *cold heat* to speed relief:—

1. *Quickly Soretone acts to enhance local circulation.*
2. *Check muscular cramps.*
3. *Help reduce local swelling.*
4. *Dilate surface capillary blood vessels.*

For fastest action, *let dry, rub in again.* There's only one Soretone—insist on it for Soretone results. 50¢. Big bottle, only $1.

MONEY BACK— IF SORETONE DOESN'T SATISFY

"and McKesson makes it"

*Though applied cold, rubefacient ingredients in Soretone act like heat to increase the superficial supply of blood to the area and induce a glowing sense of warmth.

Simplified Rules Given to Aid in Making Out the 1944 Tax Returns on New Forms

Answers to Puzzlers Found in Filling Out Income Blanks

EDITOR'S NOTE: The article below is prepared as a service to the readers of this newspaper in an effort to assist in the filing of income tax returns as required by law. While the forms have been simplified, it is urged that returns be filed as far in advance of March 15 as possible.)

Released by Western Newspaper Union.

REMEMBER all that talk last year about abolishing income tax returns? We hope you didn't believe it, because the treasury reminds us that the law requires an income tax return not later than March 15th from every person (even children) who had $500 or more income in 1944.

The truth is that congress and the treasury simplified the income tax forms quite a bit, but will insist on the annual March 15 accounting between you and Uncle Sam.

Altogether, the treasury figures that about 50,000,000 Americans must file 1944 returns. A few million, including many farmers, have already got the chore out of the way by filing their returns January 1. Those early-birds filed early so as to combine the filing of their "returns" with the filing of their "Declarations of Estimated Tax," thus ending up all their 1944 income tax chores. But most of us still have our returns to fill out and file between now and March 15.

Here are the answers to some of your inevitable questions about the law:

Q. What kinds of forms or blanks do we use?

A. There are two forms. One is the withholding receipt, officially called Form W-2 (Rev.), which your employer gives you if you have been working for wages from which income tax was withheld. The other blank, the standard Form 1040, is not being mailed out generally this year, but copies should be easily obtainable from local collectors' offices, banks, post offices, and employers.

Q. I hear there are three ways of making a return this year. Is that true?

A. Yes. You can use Form 1040 for either a short-form or a long-form return. That makes two methods of filing. The third method, which is one of the major simplifications in the new law, is to use the withholding receipt.

Q. Do we have to fill out both the withholding receipt and Form 1040?

A. No. If you are eligible to use the withholding receipt as your return and desire to do so, forget about Form 1040. If you fill out Form 1040, attach your withholding receipts to the form, but do not fill out the receipts.

Q. Is this standard allowance exactly 10 per cent?

A. The tax on a withholding receipt or a short-form is taken from a table in which the tax and deductions are averaged for income brackets, such as from $2,000 to $2,025, from $2,025 to $2,050, etc. The 10 per cent allowance and the tax are figured in the middle of each bracket.

Q. Who is allowed to use a withholding receipt as a return?

A. Any wage earner whose total income was less than $5,000, provided not more than $100 of his income came from dividends, interest and wages from which no tax was withheld, and all the remainder of his income was from wages from which tax was withheld. However, in the so-called community property states of Arizona, California, Idaho, Louisiana, Nevada, New Mexico, Texas and Washington, a withholding receipt cannot be used by a husband or wife alone. In those states, married couples can use the withholding receipt only as a "combined return." In those and all other states, moreover, a combined return can be made on a withholding receipt only if their **combined** income is within the limits mentioned at the beginning of this paragraph. If husband and wife file a combined return on a withholding receipt, their tax will be figured either on a separate or joint basis, whichever is to their advantage.

Aid Will Be Given Taxpayer.

Q. Who can use the short-form Form 1040?

A. Anyone whose income was less than $5,000.

Q. Who uses the long-form Form 1040?

A. The long-form must be used by anyone whose income in 1944 was $5,000 or more, and by anyone who claims more deductions (for charities, etc.) than the standard allowance of about 10 per cent which is given automatically to taxpayers filing withholding receipts or the short-form.

Q. Can I save money by using the long-form instead of the other forms?

A. That depends on your deductions. If you use the withholding receipt or the short-form, you cannot take any deductions for non-business items such as charitable contributions, interest, taxes, medical expenses, and casualty losses, but receive instead a standard allowance equal to about 10 per cent of your income. For instance, if your income last year was $4,425, and you use your withholding receipt or a short-form, your tax is automatically figured as if you had $442.50 of deductions. Now, in this example, if your actual deductions were less than $442.50, it would save you money to use your withholding receipt or a short-form. If your actual deductions were more than $442.50, it would save you money to make a long-form return on Form 1040.

Q. How do I fill out a withholding receipt?

A. Simply answer the few questions about your income and exemptions which are printed on the front and back of the receipt. Be sure to correct any mistake in your name and address which your employer has already written on your receipt. Sign the receipt. If you have more than one receipt, fill out only the last one but be sure to attach the others. Then mail the receipt or receipts to the collector of internal revenue in your district. That's all. Don't send any money if you file this way, because the collector will figure your tax, give you credit for amounts already paid, and then either send you a bill if you owe more or a refund check if you have overpaid.

Q. How do I fill out a short-form?

A. Get a copy of Form 1040. If all your income was from wages, dividends and interest, you write only on page 1, and find your tax from the table on page 2. If you had other income (for instance, from a farm, a business, rental property, annuities, etc.) you also fill in part of page 3. Page 3 is printed on the back of page 1, so you can tear off and throw away the other half of the form. That's why it is called a short-form. When you file Form 1040, and find (in item 8, page 1) that you still owe some tax, you must pay that amount in full at the same time you file your return.

Q. What do you mean by the word "income"?

A. As used in the income tax blanks, income means all kinds of income, including wages, (or salaries), dividends, interest, business profits, rental profits, and profits on selling or trading securities or other property. For tax purposes, however, "income" does NOT include certain items specifically exempted by law, such as the first $1,500 of active service pay for members of the armed forces and their mustering-out payment when discharged. Also exempted is the government's contribution to monthly family allowances to relatives of servicemen, social security benefits, gifts, bequests and inheritances, and amounts received as the beneficiary of a life insurance policy by reason of the death of the insured person.

Q. What kind of taxes do we pay?

A. The 1944 income tax is made up of two kinds of tax. There is a "normal tax" (formerly called "victory tax") at the rate of 3 per cent, and a "surtax" (formerly called "income tax") at rates ranging from 20 to 91 per cent.

Q. What kind of exemptions do we get from these taxes?

A. For normal tax, a taxpayer filing a separate return is allowed only a flat exemption of $500. If husband and wife file a joint return and each had at least $500 income, they receive a joint normal-tax exemption of $1,000. If they file a joint return, and one of them had less than $500 income, the joint normal-tax exemption would be $500 plus the actual amount of the smaller income. For normal tax, there is no exemption for dependents.

For surtax, you may get exemptions of $500 for yourself, plus $500 for your wife (or husband), plus $500 for each of your dependents. However, you can claim an exemption for your wife (or husband) only if you file a joint return with her (or him), or if she (or he) had no taxable income and was not a dependent of another taxpayer.

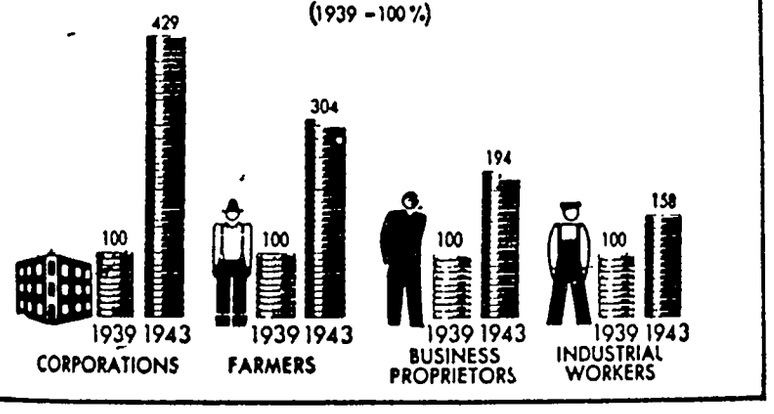
Q. What are the rules for claiming exemptions for dependents?

A. You are entitled to an exemption for any close relative, provided you furnished more than one-half of his or her support during 1944, and provided he or she did not have $500 or more income of his or her own. A dependent must also be a citizen of the United States or a resident of the U. S., Canada or Mexico.

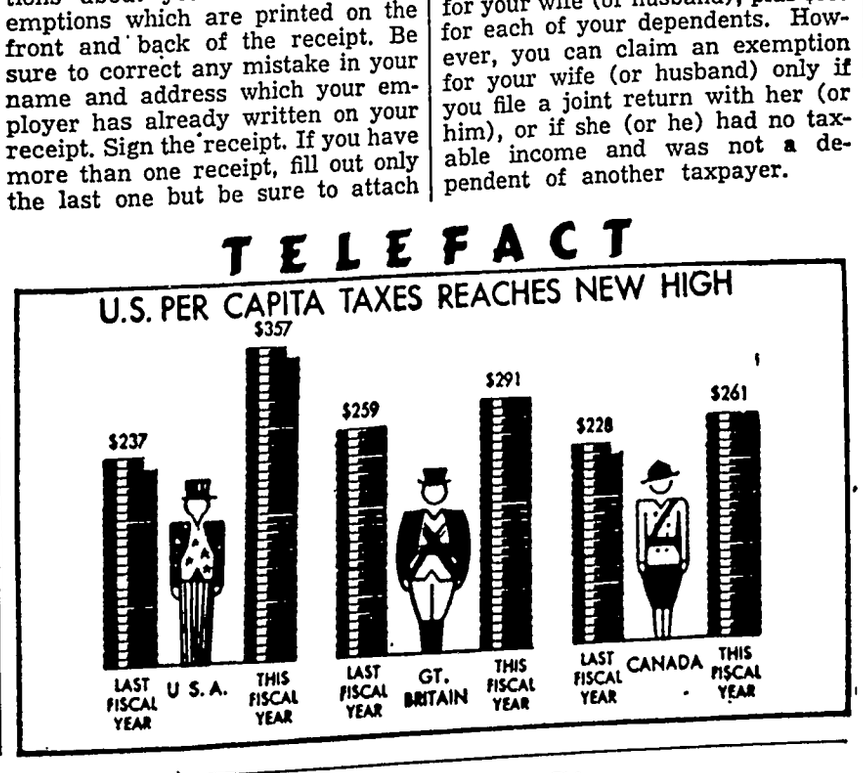
Q. What should be done by a person whose income totaled less than $500?

A. If single and the income included wages from which tax was withheld, he should file a separate return to get a refund of the tax withheld. If married, it will usually be to the family's advantage to file a joint return with his wife (or husband). At any rate it will pay to file returns.

TELEFACT



TELEFACT



More Helpful Information to Taxpayer Given

Q. Can the wife of a military man claim an exemption for him?

A. Usually, she can. Since the first $1,500 of military pay is exempt from tax and since most men earn less than that amount in the armed forces, they are considered to have no income, as far as the tax laws are concerned. Therefore, their wives can claim exemptions for them unless their army pay exceeds $1500.

Sun's Weather Studied in Relation to That of Earth

Since 1941, a unique study to determine whether there is any connection between the weather of the sun and that of the earth has been carried on at Harvard's observatory near Climax, Colo., says Collier's. As photographs of the solar corona taken during a natural eclipse could not be used, a special movie camera had to be developed.

Called the coronagraph, it creates an artificial eclipse with masking screens, and automatically takes a picture in color every 10 seconds.

For Joyful Cough Relief, Try This Home Mixture

Saves Big Dollars. No Cooking.

This splendid recipe is used by millions every year, because it makes such a dependable, effective medicine for coughs due to colds. It is so easy to mix—a child could do it.

From any druggist, get 2½ ounces of Pinex, a special compound of proven ingredients, in concentrated form, well-known for its soothing effect on throat and bronchial membranes.

Then make a syrup by stirring two cups of granulated sugar and one cup of water a few moments, until dissolved. No cooking needed. Or you can use corn syrup or liquid honey, instead of sugar syrup.

Put the Pinex into a pint bottle and add your syrup. This gives you a full pint of cough medicine, very effective and quick-acting, and you get about four times as much for your money. It never spoils, and is very pleasant—children love it.

You'll be amazed by the way it takes hold of coughs, giving quick relief. It loosens the phlegm, soothes the irritated membranes, and helps clear the air passages. Money refunded if it doesn't please in every way.

Measure of a Good Kitchen

Planning is important in kitchens. So are storage space, disposal facilities and a score of other factors. Yet none is more vital than the range. For upon the range depends the success of the meal. Round Oak, builder of fine cooking and heating equipment for 74 years, will help equip America's post-war homes with the range best suited to their needs whether gas, electric or solid fuel. After the war as before, the measure of a good kitchen will be the name on the range.

"TOMORROW'S HOME WILL BE A BETTER HOME IF EQUIPPED WITH ROUND OAK PRODUCTS"

LETTERS FROM OUR READERS

Marion, Iowa,
February 7, 1945.

Dear Editor:

In the Feb. 7 issue of the Times we read the item stating that only two court houses in the U. S. are built on islands: at Mantes, N. C. and Key West, Fla.

These may be the only two built on islands in the sea, but the Linn County court house here at Cedar Rapids is built on May's Island in the Cedar River, as are also the City Hall and the Coliseum. This island is connected with the city by three bridges.

Iowa has items of interest, too!

Truly.
Mrs. Earl Schuettpelz.

Methodist W. S. C. S. Will Meet Thursday, March 1st

Youth Fellowship Rally:
Methodist Youth Fellowship Rally at Belmond Sunday afternoon and evening for all young people. Leave the church at 3:15 p. m.

A. G. Lau informs us that Mr. Byron Sweely, 78, died at his home near Tracy, Minnesota. The Sweely family resided on the farm now occupied by the George Christie family, west of town. Mr. Sweely was well known in this community. They moved to Minnesota in 1911.

Charles Gibbs has been ill with pneumonia at the home of his sister, Miss Anna Gibbs the past week. Mrs. Gibbs, who had been away visiting with her sister, returned to Klemme Wednesday evening to care for her husband.

ddinghams Celebrated 40th edding Anniversary Sunday

ME COUPLE SURPRISED T DINNER HELD AT THE COMMUNITY HALL

And Mrs. Wm. Waddingham cd On Same Farm 39 Years

the Methodist parsonage in me on February 28, 1905, oc- d the marriage of Miss Louise e, daughter of Mr. and Mrs. Jahnke and J. W. Wadding- son of Mr and Mrs. George ingham They were united in age by the pastor, Rev. C. B. ell.

ey were attended by Miss Em- Waddingham, sister of the groom, and Mr. Frank Jahn- rother of the bride.

Waddingham took his bride s farm home southeast of me, where they resided con- usly for 39 years. A year ago purchased a comfortable home lemme and retired from ac- farm duties. This is where now live.

and Mrs. Waddingham are arents of seven children: Bell, Martin Karsjens) John, both lemme, Roy of Forest City, (Mrs. Tony Tebbins) of Cor- Virgil on the home farm and e (Mrs. Harm Dirks) of Gar- Robert, the baby, died at the f four years.

and Mrs. Waddingham have ing grandchildren. One, little l Waddingham, passed away fall of 1944.

Waddingham children and families decided to celebrate parents' 40th anniversary as prise, and on Sunday, Febru- 5th, they took well filled bas- to the Klemme Community and prepared a dinner.

en Mr and Mrs. Waddingham ed from church they were to the Hall and were asked n in the family dinner in hon- their 40th wedding anniver-

s. Waddingham was escorted table by her son John, who nted her with a corsage, a to- rom her children. Mr. Wadd- n was escorted by Mrs. John ingham who pinned a white tion on his coat lapel.

table decorations consisted o vases filled with assorted lowers and a 3-tiered angel- cake, baked and decorated by daughter-in-law, Mrs. John ingham.

er guests at the dinner were Waddingham's sister, Mrs. Neuberger, and her brother Henry Jahnke; Mr. John Neu- and daughters, Ruth and

the afternoon Rev. and Mrs. huesch and other guests ar- to spend the afternoon visit- nd offer congratulations.

er in the afternoon Doris ens and Richard Tebbins es- their grandparents to the hall where they cut their ng cake and a delicious lunch erved to the afternoon guests. of their children and their es were present and gave parents a lovely Chenille spread which was presented their little granddaughters, and Janice Waddingham.

and Mrs. Waddingham re- many nice gift cards and from relatives and friends hope they will have the priv- of celebrating their Golden ing day.

Our Men In The Service

KLEMME BROTHERS MEET ON A PACIFIC ISLAND

Donald and Calvin Shaefer, sons of Mr. and Mrs Roy I Schaefer of Klemme and brother of Mrs. Emory Weaver of Garner Route 4, had not seen each other for over two years until they met on an island somewhere in the Pacific on February 18th.

Both young men are in the U S. Navy and each is serving on an aircraft carrier.

In a letter which Mrs. Weaver received Monday from Donald he said he was eating a lunch at a canteen when his brother Calvin walked and slapped him on the shoulder. The boys had a lot to talk about and visited for two hours before they had to return to their ship.

CAPT. RAY JORGENSON, JR. SLATED FOR B-29 BOMBERS

Transferred To Hobbs, New Mexico For Special Training

Capt. Ray A. Jorgenson, Jr, son of Mr. and Mrs R. A. Jorgenson, telephoned his parents Saturday evening that he had received transfer orders to report at Hobbs, New Mexico for special training

Capt Jorgenson has been stationed at Dodge City, Kansas for nearly two years where he was a B-26 bomber pilot instructor for a year and a half and last fall was promoted to Commander of a section of the field.

Capt. Jorgenson expects to be stationed at Hobbs for 6 weeks where he will fly the B-17 Flying Fortress after which he will be assigned to a B-29 field to fly the army's largest bomber, the Super-Fortress.

Mrs Ray Jorgenson, Jr. and little daughter, Judy, are staying with her parents at Amherst, Texas for the present.

Former Klemme Shamrock Star Now Overseas With Army

Rev. and Mrs. Calvin Grosshuesch last week received word that their son, Pfc. Calvin (Bill) Grosshuesch had left for service overseas.

For the past several weeks Pfc Grosshuesch received special training in radio at Ft. Benning, Ga

Verne Greiman, S 2-c, youngest son of Mr. and Mrs. Ben F. Greiman of near Klemme, has completed his boot training at Great Lakes, Ill. and was home last week on a furlough. Verne will continue his studies and will specialize in radio in the amphibious forces.

Cadet Nurse Gertrude Grosshuesch came Friday to spend a few days visiting with her parents, Rev. Calvin Grosshuesch and family. Cadet Nurse Grosshuesch is taking her training at Deaconess Hospital at Marshalltown.

Billy Zabilka writes from England to Klemme friends that he had a visit with Pvt. Aaron Wille, who was wounded recently and is being cared for in a hospital in England.

Seaman Eugene Kluckhohn and family returned to the east coast Sunday evening after visiting for a couple of weeks with Klemme relatives.

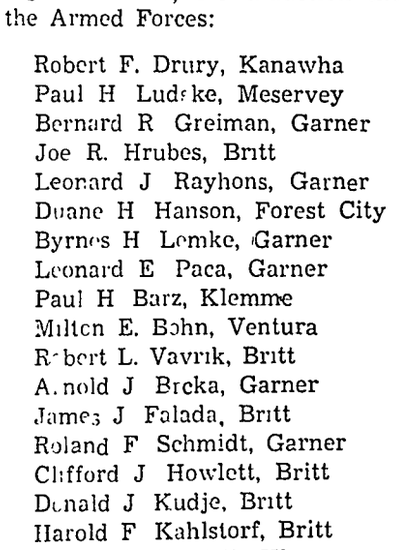
Double Four Bridge Club Met With Mrs. Buntenbach

Mrs. E C Buntenbach was hostess to the Double Four bridge club at her home last Wednesday afternoon.

Bonds Over America



DEVIL'S TOWER

The first national monument, Devil's Tower in Wyoming, stands as a sturdy emblem to this nation's policy of creating parks for the free enjoyment of citizens. The purchase of War Bonds keeps supplied the fighting forces engaged in protecting this land of ours and its glories. More than 20 million years old, the "lava blister" rises 865 feet above surrounding terrain. Its diameter at the base is about 1,000 feet. Sagebrush, ferns and grass flourish on the summit. Will Rogers and his wife, natives of the vicinity, climbed it in 1893.

U. S. Treasury Department

HONORED

TWO FAMILIES HONORED AT FAREWELL PARTY MONDAY

Neighbors of Mr. and Mrs. Donald Neuberger and sons, and Mr. and Mrs. Ernest Helps had a farewell party for them Monday evening at Ell Center school.

The Neubergers are moving to a farm near Clear Lake, and Mr. and Mrs Ernest Helps are retiring and moving to Garner where they have purchased a home.

Miss Helen Albers, teacher, and her pupils presented a program.

The evening was then spent in playing cards after which a nice lunch was served. The Helps' and the Neubergers were then presented with a gift from their community friends.

Donald Neuberger displayed his unusual talents when he composed a poem at the time and which was read by Mrs. Menno Albers:

* * *

Our Neighbors

"We are leaving our neighbors so good and so kind,
The kind of neighbors that's hard to find.
A neighbor that's willing to help in our plight,
Yes, they are willing to help us both day and night.
For the things you've done for us in the past
Will be a memory we will treasure until our very last.
And if in our parting, good neighbors we find,
They can never be better than the ones we are leaving behind."

* * *

Those present included: Mr. and Mrs. Donald Neuberger and sons; Mr. and Mrs. Ernest Helps; Mr. and Mrs. Paul Goll and daughter, Beulah; Mr. and Mrs. Ewald Josten and sons; Mr. and Mrs. August Josten and family; Mr. and Mrs. Menno Albers; Mr. and Mrs. Oris Lundy and daughter, Madalyn; Mr. and Mrs. Howard Standly and children; Mr. and Mrs. Les Hartbeck and family; Albert and Mary Swanson; Mr. and Mrs. Wm. Jurgameyer; and the Misses Helen Albers, Mildred Meinders and Donna Mae Heviland.

GIRL SCOUT NEWS

The White Rose Patrol held their meeting at Mrs. Trumbell's home February 26, 1945.

We gave the Girl Scout Promise, Laws, Motto, and Slogan.

The Girl Scout sash was explained.

Some of our books on the Cook Badge were looked over.

We chose our new badges which we want to work on. There were a variety of badges chosen. Those chosen were then explained.

Annual Red Cross Roll Call Set For March 1 To 31

PROMOTED

KLEMME SOLDIER PROMOTED WHILE IN BELGUIM

Mr. and Mrs. Levi Klotzbach received word that their son, Walter, was recently promoted to Staff Sergeant while on the Belgium front.

Sgt. Klotzbach has seen a lot of service and was in the African and Italian campaigns and then assigned to the European theatre. He has the Purple Heart decoration for wounds received in France.

Another son of the Klotzbach's, Pvt. Louis Klotzbach, recently left for overseas.

HANCOCK COUNTY FARMERS ASKED TO RAISE MORE FLAX

Hancock County farmers who haven't already worked out a flaxseed goal for their farms should get in touch with the County AAA Committee right away, Alfred V. Josten, AAA Chairman, announced today. For best results flax should be seeded in this area by early spring

The special program under which growers can earn $5 for each acre planted to flaxseed up to the farm goal highlights the urgent need for a large flaxseed production this year. Linseed oil obtained from flaxseed is used for paint and varnish, for coated fabrics, for leather and textile processing, and in the construction of ships and weapons of war.

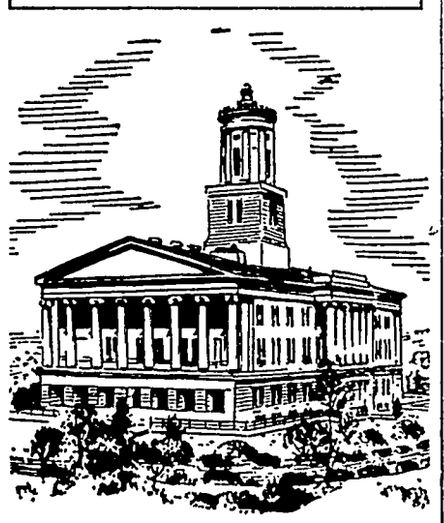
The national flaxseed goal for 1945 has been set at 5 million acres, which is 64 per cent more than was planted last year. The goal for Iowa this year is 200,000 acres. Since production of flaxseed is fairly well concentrated within certain states, including Iowa, this means that every farmer with land adapted to the crop must plant his goal if minimum U. S. requirements for linseed oil, seed, and feed are to be met.

Cooperating farmers will report flaxseed acreage on their regular performance report on AAA practices. If the crop is owned by more than one person the flaxseed payment will be divided according to the interest of each in the crop.

The flaxseed goal for Hancock County is 2,800 acres.

Use of sound motion pictures in classwork increased student knowledge 38 per cent more than lecture courses, according to tests made among thousands of grade and high school students.

Bonds Over America



TENNESSEE'S CAPITOL

America's devotion to freedom, which the purchase of War Bonds directly helps to maintain, nowhere has a more exemplary shrine than the State Capitol at Nashville. The $1,500,000 building memorializes years of struggles of sturdy folk. Tennessee's first Legislature met at Kingston and adjourned to Knoxville. Later it met at Nashville and Murfreesboro. Nashville became the permanent capital and the cornerstone of the present building was laid in 1845. It took 14 years to complete. The same love of freedom that inspired those early legislators in selecting a seat of government motivates the state's 186,000 men now in the U. S. armed forces.

U. S. Treasury Department

NEED FOR FUNDS LARGER THAN FOR LAST YEAR'S

Mrs. George Lawhorn Is Chairman For Drive In Klemme

The annual Red Cross drive for funds throughout the nation for the year 1945 will start on March 1st and will continue until March 31

No doubt Klemme and the whole of Hancock County will oversubscribe its quota as in the past but this year the quota is larger all over the nation because of the increased burden put upon the Red Cross in this war. Every day the Red Cross is working harder as war casualties increased with the stepped up campaigns in Europe and the Pacific.

In times of Peace the Red Cross comes to the stricken in time of disaster or distress, but in time of war, the demand upon the Red Cross is increased many fold.

The men at the fighting fronts testify to the great work being done by the Red Cross, and prisoners of war have a special reason to feel grateful toward this humanitarian organization. The Red Cross provides our only contact with prisoners of war.

This year lets not think in terms of "quotas," but lets double what we gave last year. Last year the goal for Klemme was $5 00 per family, and Klemme "went over the top." Our boys on the fighting front don't fight for a certain "quota," they have a complete job to do and are doing it. We who are on the home front have a complete job to do, and let's do it in this coming Red Cross Drive.

The goal for the nation is $200,000,000.

MYSTERY FIRE AT BRITT HEMP MILL FRIDAY A. M.

Roy Schafer informs the Times that the Britt hemp mill did operate last Thursday afternoon due to a break-down in the baling department. The Thursday night shift was also called off.

At about 4:00 o'clock Friday morning, just a few minutes after the night guard made his regular round of inspection, fire was discovered in a pile of hemp bundles in the mill room, but by prompt action the fire was put out before any damage was done and the Friday morning day shift went on duty as usual.

However, fresh tracks in the snow leading to and from the building caused considerable suspicion.

Legion And Auxiliary Will Meet Tuesday Eve., March 6th

The Klemme American Legion and the Auxiliary Unit will meet at the Community Hall on Tuesday evening, March 6th.

Miss Marie Blank, Miss Lydia Bock and Mrs. W. F. Pavey will serve lunch.

Nebraska was admitted as a state in 1867.

HELLO, FOLKS!

Mr. and Mrs. Verner Priebe are the parents of a 9 lbs. 4 oz. baby daughter born to them on Tuesday February 20, 1945, at the Mercy hospital in Mason City.

* * *

Mr. and Mrs. William Green southeast of Klemme are the parents of a baby boy born to them the Mercy hospital on Sunday, February 25th.

This event makes Mr. and Mrs. Dan Green grand parents a air. They now have 22 grand children, and 3 great grand children.

It's New! *A Post Cereal*

SNAPPY FACTS ABOUT RUBBER

Rubber does not enter into the making of tents, yet the demand for military tents has reduced the manufacture of passenger car tires. Tire cord and yarn for tent duck are made with the same machinery.

Assuming that the trees are in reasonably good condition when the Far East rubber plantations are reoccupied, experts anticipate that within two years some 1,600,000 tons of natural rubber will be made available, enough to fill one year's estimated needs. That is why B. F. Goodrich officials believe civilians will still have to depend upon synthetic rubber tonnage in addition to that required for natural security.

Jerry Shaw

To relieve distress of MONTHLY Female Weakness

(Also Fine Stomachic Tonic)

Lydia E. Pinkham's Vegetable Compound is *famous* to relieve periodic pain and accompanying nervous, weak, tired-out feelings—when due to functional monthly disturbances.

Taken regularly—Pinkham's Compound helps build up resistance against such annoying symptoms.

Pinkham's Compound is made *especially for women—it helps nature* and that's the kind of medicine to buy! Follow label directions.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

When Your Back Hurts -

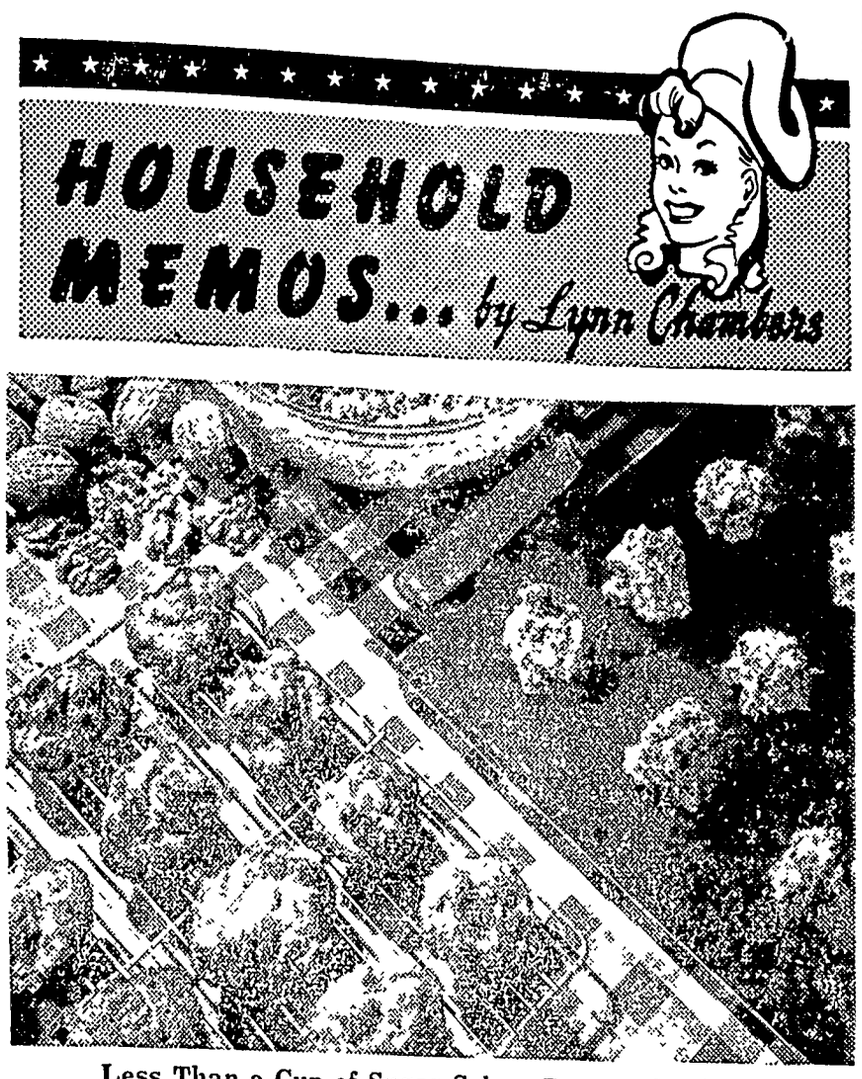
And Your Strength and Energy Is Below Par

It may be caused by disorder of kidney function that permits poisonous waste to accumulate. For truly many people feel tired, weak and miserable when the kidneys fail to remove excess acids and other waste matter from the blood.

You may suffer nagging backache, rheumatic pains, headaches, dizziness, getting up nights, leg pains, swelling. Sometimes frequent and scanty urination with smarting and burning is another sign that something is wrong with the kidneys or bladder.

There should be no doubt that prompt treatment is wiser than neglect. Use Doan's Pills. It is better to rely on a medicine that has won countrywide approval than on something less favorably known. Doan's have been tried and tested many years. Are at all drug stores. Get Doan's today.

DOAN'S PILLS



Less Than a Cup of Sugar Solves Dessert Problem
(See Recipes Below)

Dessert Fancies

When your tables aren't set with just exactly the meat you'd like to serve, or when meals tend to become monotonous then give your family a dessert that's really elegant. It'll make up for a lot of omissions in the easiest way.

No, I'm not going to give you a lot of recipes calling for sugar or high-point canned fruits. I'm going to tell you of simple but fanciful desserts that will make it seem like you're splurging.

A bit of the right tang in a pudding, a colorful cake with an unusual icing or a sweet tidbit like marmalade scones are some of the sweets I'm recommending. They'll keep the sugar budget in trim condition and still satisfy sweet-seekers:

***Pudding Princess.**
(Serves 5-6)

3 egg yolks
1 teaspoon grated lemon peel
⅔ cup sugar
1 tablespoon unflavored gelatin
2 tablespoons cold water
¼ cup lemon juice
3 stiffly beaten egg whites

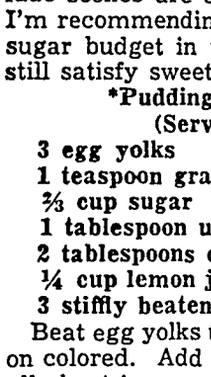
Beat egg yolks until thick and lemon colored. Add lemon peel; gradually beat in sugar. Soften gelatin in cold water. Add lemon juice and gelatin to egg yolk mixture. Fold in whites. Pour into an oiled mold. Chill. Unmold, and serve with stewed dried fruits or stirred custard sauce.

Sponge cake with two eggs? Baked in 30 minutes? Yes, it's possible if you'll follow this recipe. It doesn't have to be iced but you'll like it with the simple baked-on icing:

Lightning Sponge Cake.

2 eggs
¾ cup sugar
1 cup sifted flour
⅛ teaspoon salt
1 teaspoon baking powder
1 tablespoon butter
½ cup hot milk

Beat eggs until thick and light. Slowly add sugar and beat with a spoon for five minutes. Fold sifted dry ingredients into egg and sugar mixture all at once. Melt butter in hot milk and add all at once. The folding of the milk and dry ingredients should take only about 1 minute. Bake in a waxed-paper-lined 8-inch square pan in a moderate (350-degree) oven for 30 minutes.



Baked-On Frosting.

1 egg white, beaten stiff
¼ teaspoon baking powder
¼ cup brown sugar or honey
¼ cup chopped nutmeats

Add baking powder to the egg white which has been beaten. Add the sugar or syrup gradually, blending in gradually, then spread over cake while it is still hot. Sprinkle with ½ cup nutmeats. Bake in a moderate oven until lightly browned.

Minimum is the description of ingredients for these delectable scones made into a whirl. A coffee cake dressed up like this one will go nicely for dessert:

Lynn Says:

Colorful Combinations: Salmon steaks with egg sauce, home-canned string beans, hashed brown potatoes, jellied tomato aspic, apricot strip pie, beverage.

Spaghetti in tomato sauce, salad of mixed greens, tray of radishes, pickles and dark olives, dark rye bread or bread sticks, and stewed plums.

Kidneys in rice-parsley ring, brown sauce, green peas and celery, cabbage, apple and orange salad, pudding princess with sieved, sweetened apricots.

Marmalade Scone Whirl.
(Makes 1 10-inch coffee cake)

2 cups sifted flour
3 teaspoons baking powder
1 teaspoon salt
1 tablespoon sugar
¼ cup shortening
1 egg
¾ cup milk
1½ cups citrus marmalade

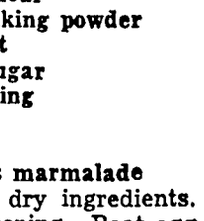
Sift together all dry ingredients. Cut or rub in shortening. Beat egg and add milk. Add to flour mixture. Stir only enough to moisten. Spread dough into greased 10-inch pan. With fingertips press dough down in grooves an inch wide, making a circular pattern. Make first groove one inch from edge of pan and second 1½ inches from first. Fill grooves with citrus marmalade. Bake in a moderately hot (400-degree) oven 20 minutes.

In a recent survey among homemakers, it was discovered that the biggest leftover problem was that of stale bread. Combined with healthful eggs and milk, this leftover bread can make a delectable pudding:

Bread Pudding.
(Serves 8)

2 cups dry bread cubes
4 cups milk scalded
1 tablespoon butter
¼ teaspoon salt
¾ cup sugar
4 slightly beaten eggs
1 teaspoon vanilla extract

Soak bread in milk for 5 minutes. Add butter, salt and sugar. Pour slowly over eggs; add vanilla extract and mix well. Pour into a greased baking dish. Bake in a pan of hot water in a moderate (350-degree) oven until firm, about 50 minutes.



Variations of Bread Pudding.

Raisin Pudding: Add ½ cup seeded raisins before baking. Serve with lemon sauce.

Butterscotch Bread Pudding: Substitute brown sugar for white.

Chocolate Bread Pudding: Melt 1 ounce unsweetened chocolate in hot milk before adding bread. Serve with butter or foamy sauce.

Lemon Sauce.

½ cup sugar
1 tablespoon cornstarch
⅛ teaspoon salt
⅛ teaspoon nutmeg
1 cup boiling water
2 tablespoons butter or substitute
1½ teaspoons lemon juice

Mix dry ingredients in order given. Gradually add water and cook over low heat until thick and clear. Add butter and lemon juice and blend thoroughly.

Victory Cookies.

1½ cups sifted flour
1 teaspoon baking powder
½ teaspoon baking soda
½ teaspoon salt
1 teaspoon cinnamon
¼ teaspoon cloves
2 cups broken walnuts
1½ cups each, pitted dates and raisins
⅔ cup shortening
½ cup brown sugar firmly packed
2 eggs

Mix and sift dry ingredients. Toss together with fruits and nuts. Cream shortening; beat in sugar, then eggs and flour mixture. Drop by spoonfuls on greased sheet and bake in a moderate (350-degree) oven for 12 minutes. These cookies become soft after several days.

SEWING CIRCLE NEEDLEWORK

Nebraska Oak Leaf Heirloom Quilt

Heirloom Quilt.

To obtain complete cutting pattern and finishing directions for the Nebraska Oak Leaf Quilt (Pattern No. 5830), with amounts of materials specified, send 16 cents in coin, your name, address and the pattern number.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Send your order to:

SEWING CIRCLE NEEDLEWORK
530 South Wells St. Chicago 7, Ill.

Enclose 16 cents for Pattern

No._____
Name_____
Address_____

THIS handsome quilt belonged to Mary Gregg McCollum who lived in Kearney, Nebraska, sixty or more years ago. Faded to a soft pink on white, it was doubtless a bright turkey red "oak leaf" when as a bride she went from Berea, Kentucky, to Nebraska. The twenty-inch block is put together in four separate sections—the leaf itself is 7 inches.

Bartholdi's Mother Was Statue of Liberty's Model

The Statue of Liberty standing on Bedloe (Liberty) island in New York harbor is the tallest in the world. The height of the statue to the tip of the torch is 151 feet. The height of the pedestal upon which it stands is 150 feet from water level. The Statue of Liberty is more than a symbol of freedom. It is a tribute by its sculptor, Auguste Bartholdi, to his mother, Charlotte Beysser, a patriotic French woman, who posed for the first sketch.

Two hundred copies of the first statue, about four feet high, were made in terra cotta and sold in France to supplement school children's contributions for financing the work. American contributions paid for the pedestal.

Expensive Ore

Between 1939 and 1944, the price of wolfram, or tungsten ore, increased from $300 to $20,000 a ton in Spain and Portugal, through the bids of Allied agents who were instructed to pay any price for this indispensable war material to keep it out of the hands of Germany.

To Relieve Bad Cough, Mix This Recipe, at Home

Big Saving. No Cooking. So Easy.

You'll be surprised how quickly and easily you can relieve coughs due to colds, when you try this splendid recipe. It gives you about four times as much cough medicine for your money, and you'll find it truly wonderful.

Make a syrup by stirring 2 cups of granulated sugar and one cup of water a few moments, until dissolved. No cooking needed—it's no trouble at all. (Or you can use corn syrup or liquid honey, instead of sugar syrup.) Then put 2½ ounces of Pinex (obtained from any druggist) into a pint bottle. Add your syrup and you have a full pint of medicine that will amaze you by its quick action. It never spoils, and tastes fine.

This simple mixture takes right hold of a cough. For real results, you've never seen anything better. It loosens the phlegm, soothes the irritated membranes, and eases the soreness.

Pinex is a special compound of proven ingredients, in concentrated form, well-known for its prompt action in coughs and bronchial irritations. Money refunded if it doesn't please you in every way.

PENN ECKELS, Chairman

FRED C. MISSAL, County Auditor

THIRD ADJOURNED JANUARY MEETING

Garner, Iowa, Feb. 7, 1945

The Hancock County, Iowa, Board of Supervisors met in session on above date with F J Schoun, Penn Eckels and John Chambers, present.

The minutes of the last meeting were read and approved as read

On motion and second Ray Hunsley, is reappointed Weed Commissioner for the year 1945

On motion and second the bonds of Charles F Merten, engineer on DD No. 140, DD No. 141 and DD No. 142 are approved

On motion and second the bond of George J. Urich, treasurer of the Hancock County Farm bureau, is approved.

Supervisor Eckels is appointed a committee to investigate and cause repairs to be made in DD No. 38.

On motion and second Wm. Henschen is appointed engineer to investigate and report on the repair petitioned for on the main of DD No. 7, section 5, petitioned for by Casper Pannhoff et al.

On motion and second Mr. and Mrs. Howard Cook are hereby placed on the Hancock County Home payroll and their salary is hereby fixed at $150.00 per month

On motion and second the semi-annual settlement with the County Treasurer is approved.

In the matter of a letting on the leasing of the SE¼, section 27, Township 96, range 26 for the year 1945

Chairman Penn Eckels is hereby authorized and ordered to execute said lease in behalf of Hancock County, Iowa.

On motion and second the County Auditor is hereby ordered to publish notice of letting on medical care and medicine for the Hancock County Home for the period of one year ending April 1, 1946 Said letting to be held at the Courthouse in Garner at 1 p m. March 5, 1945.

On motion and second the county Auditor be and he is hereby ordered to advertise a letting on the printing of 350 copies of the 1944 financial report of Hancock County, Iowa Said report to be printed in booklet form Said letting to be held at 1 p m on the 5th day of March A D. 1945

In the matter of the petition of Abe Mezinsky for the establishment of drainage district No. 140, a sub district of DD No. 1 and 2, Hancock County, Iowa, in sections 7, 17 and 18, Township 97, North, range 24 west, which petition was filed on November 1, A D 1944

WHEREAS, Charles Merten was appointed Engineer on November 2, A. D. 1944, as commanded in Section 7432, Code of Iowa 1939 and laws amendatory thereto, to make a survey, investigation and report on the feasibility of the establishment of said proposed drainage district and said Engineer did file his report on February 5, A D., 1945, which report states that he has surveyed the lands of the petitioner and the lands in the water shed of the proposed district and in his opinion the proposed establishment as prayed in the petition will be conducive to public health and welfare and will be of greater benefit than the cost thereof and recommends that said district be established.

BE IT THEREFORE RESOLVED, by the Board of Supervisors of Hancock County, Iowa, acting for and in behalf of the proposed drainage district petitioned for by Abe Mezvinsky, that the report of the Engineer be approved as a tentative plan and said report and plan shall come on for further hearing at the Courthouse in Garner, Iowa, at 2:30 p. m. on the 9th day of April, A D., 1945.

The County Auditor be and he is hereby directed to cause notice of hearing on said petition and the report of the Engineer to be published in the Garner Leader and Signal, a newspaper of general circulation published at Garner, Iowa, advising all owners, occupants and lienholders, and encumbrancers of record in the proposed district of the pendency and the prayer of the petition, the favorable report of the engineer thereon, the approval by the Hancock County Board of Supervisors as a tentative plan that same may be amended before final action thereon and that all claims for damages and all objections to such proposed establishment shall be in writing and must be filed with the County Auditor at or before the time set for hearing thereon.

The foregoing resolution was offered and read by Supervisor Schoun who moved its adoption, was seconded by Supervisor John Chambers, whereupon the chairman placed the motion of its adoption and upon roll call the vote thereon is F, J, Schoun, Penn Eckels and John Chambers, aye. Nays, none. Whereupon the chairman declared the resolution duly adopted

BE IT RESOLVED that text book claim in the sum of $196 36 as shown on the report of County Supt Charles S. Whitney, be allowed and the Auditor be and he is hereby directed to draw warrant in payment thereof

BE IT RESOLVED that the claims hereinafter set out be allowed in amounts designated theron and the County Auditor be and he is hereby authorized to draw warrants on the several funds of Hancock County, Iowa in payment of such claims in amounts set opposite each claim

SCHOOL NEWS

JUNIOR CLASS NEWS
—By Jeanne Trumbell.

We took semester tests this week.

In Typing, we had a productive test rather than a speed test.

We took a test issued by the American Institute of Business. Those who received Progress Award Certificates from A. I. B. were Ruth Bell and Pat Kudje, who received two.

We read the Reader's Digest in English Literature this week. Next week we we will work in our Vocabulary Quiz.

We are now reading our News Reviews in American Government.

* * *

FRESHMAN NEWS
—By Helen Pringnitz.

This week's Algebra Class has ...en very interesting as we started ... a new unit in Factoring.

In English we are studying the ...nses of the verb.

We took our English test Fri...y and we are holding our breath ...til we get our grades.

We have started a new unit in ...cience over the origin and forma... ...n of our planet.

We have started on Luncheon ...enus in Home Economics Class ...hich is very interesting. We have ...ade cream soups and they taste ...ery good.

JUNIOR HIGH SCHOOL NEWS
Mrs. Clara Smith,
Teacher.

Friday we had our room Spelling Contest to decide on the five winners in each grade. In the Seventh Grade the winners were Luella Priebe, Jerry Finders, De Vera Wilson, Merlin Brinkman and Willis Bock

We had an absence in the Eighth Grade which made it necessary to postpone the contest for them.

We have studied about Postal Money Orders, Registered Mail, Traveler's Checks, and other safe ways of sending or carrying money, in our Seventh Grade Arithmetic this week.

In Eighth Grade History we are studying about the Industrial Revolution in our country.

Jerry Finders, Marjorie Lau and Alice Meyer have been neither absent nor tardy thus far.

* * *

FIFTH AND SIXTH GRADE NEWS
—Mrs H G Voetberg,
Teacher.

Friday ended the first 6 weeks period of the second semester. We have been taking six weeks tests this week.

Friday afternoon we had the Spelling Contest in our room. The last Five in the Fifth Grade were Lucille Priebe, Delores Thieman, Maralee Ridder, Iris Schaefer and ...laxine Barz.

The last five in the Sixth Grade were Harley Barz, Jo Ann Carpenter, LaNelle Harvey, Darlene Bachman and Audra Jones.

These people will spell again on next Friday afternoon. The best speller from the contest will represent the Klemme School at the County Contest in Garner the last of March.

Honor Roll

Those neither absent or tardy in the Fifth Grade this six weeks were

Maralee Ridder
Richard Tiggerman

Those neither absent or tardy in the Sixth Grade this past six weeks were:

Delores Karsjens
Beverly Pringnitz

* * *

THIRD AND FOURTH GRADE NEWS
—Miss M. J. Holmes,
Teacher.

Friday ended our fourth 6 weeks period.

Honor Roll

We had one boy who did not miss any Spelling words throughout the entire six weeks. He is Roger Terhufen.

The following people were neither absent nor tardy during the six weeks:

Roger Terhufen
Thomas Waddingham
Sharon Bridges
Lu Verne Heginger.

* * *

KINDERGARTEN, FIRST AND SECOND GRADE NEWS
—Miss Arlene Bugh,
Teacher.

The Kindergarten children are working in a workbook called "Before We Read." We like it very much.

In Art, the First and Second Grades have been painting with water colors. Some very good pictures have been made.

We read in our Weekly Reader about the work of the Red Cross and the Junior Red Cross. We learned about the many ways in which they are helping the soldiers in the hospitals and at the front.

USE GROUND CORN COBS FOR POULTRY LITTER

Farmers who have a supply of dry corn cobs can profitably grind them for both brooder house and laying house litter, according to Paul Henderson, Hancock County Extension Director.

Coarsely ground cobs absorb the moisture and make about the best substitute for straw in either house. A 1¼ inch screen on a hammer mill does a good job of grinding the cobs without leaving too much powdery material.

Henderson says that cobs from last year's corn crop may contain too much moisture for suitable litter.

The ladies had a good attendance at Red Cross Tuesday and the following were present: Mrs. Wm. Waddingham, Mrs. J. A. Chambers, Mrs Fred Becker, Mrs. Peter Josten, Miss Rosie Becker, Mrs. Mary Waterman, Mrs. Antonio Keraus, Mrs. Norman Lau, Mrs. Aug. Lau, Mrs. C. G. Waterman, Mrs. Naska Bock, Mrs. R. A. Jorgenson and Mrs. Sumner Trumbell. The ladies are doing a fine job and deserve a lot of praise for their part in the war effort.

Vaccinations Cut Lockjaw Incidence in Services

Tetanus, or lockjaw, a serious and often fatal disease that is likely to attack men who suffer battle wounds or other injuries, has been virtually eliminated in the American armed forces as a result of compulsory immunization of all officers and men.

Not a single case of tetanus has been reported among completely vaccinated troops. There has been a handful of cases throughout the entire army, but these occurred only when the immunization process had not been completed. In some instances men developed tetanus before they had been vaccinated.

The navy, which also requires tetanus immunization, has had no cases of the disease among sailors or marines wounded in combat up to September 15, 1944, according to the navy bureau of medicine and surgery.

The bacillus that causes the disease is found in soil, particularly that polluted by animal manure. In this stage it is dormant in the form of a spore. It becomes active again when released in an open wound. As the bacillus develops it excretes a poison which attacks the nervous system and results in paralysis. The spores may live for years in the soil. Thus the disease is an ever-present menace.

Old Yankee Clipper Ships Famed for Speed

The clipper was, beyond doubt, the most beautiful sailing ship ever made, distinctively American and characterized by fine, clean lines. They were used, largely, on long routes, notably the "tea" trade. It was felt at the time that a long sea voyage would destroy the delicate flavor of tea, consequently, the ships were constructed for speed.

In Canton, China, the clippers virtually had a corner on the tea trade. British ships reduced their tariff rates from over two shillings a cubic foot to about a shilling. American clipper owners asked and received 70 cents a cubic foot or nearly three shillings. We were able to earn the higher rate because our clippers could make the trip from Canton to England in three months as compared with the six months taken by British sailing ships.

The discovery of gold in California further stimulated shipping. Clippers were ideal for the California run. Potatoes sold for $16 a bushel in California and eggs commanded a price of $10 a dozen—which gives a rough idea of the freight rates charged by the clippers. Often a single trip paid for the cost of construction of the ship!

Prevents Thaws

A mulch which is applied to the ground after it has been frozen will prevent unseasonable thaws and thus serve to reduce heaving, dampness and standing water. But the nature of the mulch should vary according to the plants protected. There are some plants which do not die down to the ground when winter sets in, but retain a crown above the surface which should live through. Foxgloves and canterbury bells are examples. Any perennial which on examination after freezing weather is seen to have top growth still alive belongs in this class. It is important that such plants shall not be smothered by a mulch which shuts out air, since this will usually result in rotting and death. In such cases a mulch of corn stalks, evergreen boughs, pruned stems of shrubs, or even an upturned basket —any material which will shade the ground without shutting out the air, should be chosen. Plants of this class should be in the high spots of the border where surface water drains quickly.

Good Jelly

Fruits containing both pectin and acid, such as crab apples, tart apples, grapes, quinces and plums, are best for jellies. Some of the fruit used should be ripe to impart flavor, and some underripe to furnish extra pectin. Overripe fruit does not make good jelly. To test for pectin, add 1 tablespoon of juice to 1 tablespoon of denatured alcohol. If a solid jelly-like mass forms, the juice is rich in pectin; if it is jelly-like but soft, the juice is moderately pectin rich, and if there are only small particles of the jelly-like substance, insufficient pectin is present. Fruits lacking pectin may be combined with other pectin-rich fruits, or commercial pectin may be added. To test for acid, compare the taste of the juice with a mixture of 1 teaspoon of lemon juice and 8 teaspoons water. If the juice is lacking in acid, add 1 tablespoon strained lemon juice for each cup fruit juice.

Tannin Material

Tannin bark is a phrase familiar to many Americans, and we all know that the tanning of cattle hides is a vital and essential factor in the production of most leather goods. Divi-divi is another source of tannin material, most of our supply coming from Cuba. In general its habitat fronts the waters of the Caribbean from Mexico to Venezuela. Divi-divi is a small tree, rarely more than 30 feet in height, but it bears a plump seed pod with a tannin content of approximately 40 per cent. Thus this tree of the Caribbean coastline becomes one of the most readily available of all tannin harvests, with prices averaging in the vicinity of five cents per pound.

WEEKLY NEWS ANALYSIS

Allied Armies Squeeze Nazis As Big Three Map Knockout Drive; AFL, Industry Buck Labor Draft

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)

With one member carrying cumbersome anti-tank weapon, Berlin home-guarders mobilize for action as Russ march on capital.

EUROPE:
Plan Knockout

As Swedish reports played up a big shakeup in the German government in an effort to form a more respectable regime for approaching the Allies for peace, the Big Three conference continued in the Black Sea area, with Messrs. Roosevelt, Churchill and Stalin announcing completion of plans for the knockout of the Nazi military machine.

Although Hitler would remain as the head of the German state under the reported shakeup, actual power would pass into the hands of wily Fritz von Papen, ace diplomat and Reich chancellor before the Fuehrer's ascension to dominance. Although a conservative in tone, Von Papen, reports had it, would have as Finance Minister Hjalmar Schacht, who devised the Reich's

Chieftains Stalin, Roosevelt and Churchill in confab.

complex prewar barter system, by which the Reich attempted to do business without formal exchange.

In agreement on military plans, the Big Three also were reportedly in harmony on postwar occupation of Germany, with Britain taking over the northwest, the U. S. the southwest and Russia the east.

Twin Thrusts

While the Russians drove in from the east, the U. S. and British undertook a large-scale offensive in the west, with Field Marshal Bernard Montgomery's Tommies attempting to outflank the Siegfried line terminal of Kleve on the northern end of the front and move down the Ruhr valley.

Following 11 hours of intensive aerial and artillery bombardment, Montgomery's forces, paced by tanks and flame throwers, fought deep into the Reichwald forest screening Kleve, while the Germans rushed up reinforcements in an effort to curb the offensive. Not only would a British break-through imperil the industrial Ruhr valley, but it would place the Tommies at the rear of Nazi troops holding a line against the U. S. First and Third armies farther south.

While Montgomery's offensive mounted, the First and Third armies continued to chew deeply into the once formidable Siegfried line, with the battering Yanks encountering new earthwork defenses beyond the west wall's concrete bunkers, pill-boxes and tank-traps. Strongpoint after strongpoint in the Siegfried line fell as the Nazis appeared to be falling back into the earthwork system, stretching as far back as the Rhine in some places.

Attack in West

While a great battle raged for the battered Prussian stronghold of Berlin, another great and equally important fight flared for Silesia's interior industrial district.

In pressing their great offensives along the sprawling eastern front, the Reds threw numerous bridgeheads across the Oder river, whose ice-packs were thawed by warm winds. With artillery laying down heavy barrages, Red armored columns, backed by waves of infantry, pressed into the fortified zones before Berlin.

Farther to the south, the Russians headed for Silesia's interior industrial district around Schwiednitz and Wuenschelburg, nestled deep in the shadow of the towering Sudeten mountains rimming Czechoslovakia. Capture of this region would add to the conquest of the eastern Silesian industrial district and further impair Nazi industry.

WORK OR FIGHT:
Bill Bucked

Still strongly opposed by labor and industry, the administration's "work or fight" bill forcing men between 18 and 45 to accept essential jobs or face induction or fine and imprisonment received close senate consideration after house passage.

As the solons took up the bill, the AFL's executive council meeting in Miami, Fla., declared that no actual manpower shortage existed, but that some plants were hoarding labor to keep up production costs and allow them a greater percentage of profit, and contracts were being let in tight labor areas while establishments were forced to lay off help in others. The AFL recommended a substitute under which hoarded labor would be drafted.

Claiming that only 150,000 workers were needed, the National Association of Manufacturers said that voluntary cooperative efforts of industry, labor and government had largely been successful in recruiting needed help, and said that lower employment ceilings in unessential plants could "flush out" surplus workers. Reductions in absenteeism, elimination of wasteful labor practices and shifting of skilled help would serve to draw the most from available manpower, the NAM said.

PACIFIC:
Manila in Flames

Overwhelmed by American forces moving from the north, and squeezed by other U. S. units moving in from the south, Jap defenders of Manila destroyed all bridges over the Pasig river dividing the city in two and put the business district to the torch.

As the Manila business district's reinforced concrete, streamlined and air conditioned buildings billowed in flame, winds blowing in from the bay spread the fire, forcing the removal of freed prisoners and internees by truck to outlying suburbs. As U. S. troops worked their way through the barricaded streets, they came under heavy sniper gunfire.

The general, it seems, does all the talking for the MacArthurs!

When Mrs. MacArthur was asked to comment on her reaction to the fall of Manila, her aide said she couldn't alter her policy of public silence without permission from general headquarters — meaning MacArthur himself.

In telling his troops that they " . . . have redeemed a country's pledge to recapture its lost land, . . ." General MacArthur said that the conquest of Manila marked the end of one phase of the war and the opening of another. Declaring that his command was ready to carry on the campaign against the Japs, in what was interpreted as his bid for continued leadership of Allied forces in the Pacific, MacArthur proclaimed:

"On to Tokyo."

It's Home, Sweet Home, for Vets

The first problem which will face the returning serviceman and one which is a necessary first step before he embarks on his postwar career, is a decision on the place in which he is to live. To this question, the great majority of the men have given the answer "We're going back home," according to a report of the army service forces.

The survey shows that eight out of every ten white enlisted men expect to return not only to the same region, but also to the same state in which they lived before the war. Only one in ten anticipates moving to another state; the remainder are still undecided. Negro enlisted personnel tend to be somewhat more migratory. Only about two-thirds expect to go back to the same state in which they lived in civilian life.

SURPLUS GOODS:
Investigate Sales

With congress announcing its intention to go into the whole question of surplus property disposal now to develop fair practices rather than to wait until most of the goods had been sold, the senate war investigating committee ranged over the whole matter, with emphasis on operations of an auctioneering firm allegedly soliciting business through high officials.

During the course of the committee's inquiry, it was learned that purchasers bought surplus materials at bargain prices and then resold them to the government at big profits, and that test tubes, stopper corks and surgical dressings were being classed as surplus while factories worked around the clock turning out more of the same items.

In investigating the affairs of Surplus Liquidators, Inc., it was brought out that Herbert Bayard Swope, consultant to Secretary of War Henry Stimson, had written to Jesse Jones, former secretary of commerce, asking for the latter's consideration of the firm's plans for disposal of surplus goods. There not only was pre-arranged bidding at Surplus Liquidators' auctions, it was charged, but sales were made without any competitive bidding at all, and in some cases buyers later were asked to pay higher prices for goods they had previously bought.

COURT-MARTIAL:
Stirs Nation

In a case that stirred nation-wide interest and created a flurry on the floor of the U. S. senate, the army's sentencing of Pvt. Henry Weber, 27, of Vancouver, Wash., to hanging for refusal to bear arms in a drill was changed to life imprisonment at hard labor.

Henry Weber

As Weber's wife said that his deep personal conviction against killing in war should have entitled him to consideration as a conscientious objector before his induction, he, himself, declared: "I am interested in a world in which all men can live peaceably. To be a good soldier you have to learn to hate and to kill. I am willing to do anything I can to get the war over as long as I do not have to kill other people."

Exclaiming " . . . It is inconceivable to me that army officers would sentence a man to death because he refused to drill," Senator Wheeler (Mont.) threatened to press a congressional inquiry into the case when it was first announced. "Whoever sentenced that boy to hanging ought to be discharged," he said.

CANADA:
Draft Trouble

Reaffirming its traditional privileges of self-government under the British North America act (the Canadian constitution), French-speaking Quebec's 22nd legislature convened in the same week as English-speaking voters in the Grey North district of Ontario repudiated the dominion government's compromise overseas draft policy.

Strongly opposed to an overseas draft, the Quebec legislature's firm declaration of self-government, coupled with the assertion that the minority's interest in any change in the dominion's constitution should be respected, indicated that French-Canadians aimed to maintain their position on conscription.

Meanwhile, repudiation of the government's compromise overseas draft policy to avoid a head-on collision with Quebec meant that Premier King may be compelled to call a general election to thrash out the question publicly and strengthen an administration's hand on dealing with the touchy problem.

RAIL TRAFFIC:
Car Shortage

One great artery linking the nation into a whole, the U. S. railroad system's operations in one section must strongly affect activities in another as the recent heavy snowstorms and frigid weather in the northeast have proved.

Because of the delay in returning rolling stock from the storm area, and the necessity of giving important military freight the right of way, an acute shortage of box cars has developed in the middle west, it was said. The situation has been all the more complicated by the fact that terminal mills and grain elevators have made a heavy demand for box cars in the face of a record 1944 harvest and a large carry-over.

Freight difficulties have been equally matched by passenger service troubles, it was also said, what with the severe winter weather delaying the arrival of many trains in midwest terminals and resulting in travelers missing connections on lines leaving for the west.

Income Drops

Class I railroads of the United States in the year ended December 31, 1944, had an estimated net income, after interest and rentals, of $660,000,000 according to reports filed by the carriers. The decrease in net railway operating income in 1944 compared with 1943 was 18.6 per cent, with the drop ascribed to increased wages growing out of adjustments made in 1943 but in some cases not effective until 1944, and higher prices of fuel, materials and supplies.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

JESUS TEACHES FORGIVENESS

LESSON TEXT—Matthew 18:21-35.

GOLDEN TEXT—If ye forgive men their trespasses, your heavenly Father will also forgive you. But if ye forgive not men their trespasses, neither will your Father forgive your trespasses.—Matthew 6:14, 15.

Forgiveness is the very essence of Christianity. In Christianity only do we find an adequate and proper dealing with sin, leading to forgiveness. In Christ alone do we find that forgiveness, cleansing and regeneration.

Since God has so willingly and wonderfully provided for our forgiveness, it would seem that we would need no urging to make us forgiving in spirit toward one another.

Yet it is indeed "a melancholy fact that there are few Christian duties so little practiced as that of forgiveness. It is sad to see how much bitterness, unmercifulness, spite, harshness and unkindness there is among men" (J. C. Ryle).

I. The Extent of Forgiveness (vv. 21, 22).

"How long do I have to stand it?" is the question of the human heart, especially if untouched by the spirit of Christ. The injustices of life, the offenses of our fellow men against us, all seem to pile up until the burden is about to crush us. What is the answer to man's question?

The Jews had an answer. He said three times is enough. Forgive once, yes. Again, yes. But the third time, no. Peter was bighearted enough to more than double that allowance of mercy. He was willing to forgive not just two or three times, but seven times.

The spirit of Christ swept all of that aside. He said that one should forgive 70 times seven. In other words, Christian forgiveness is to be untiring, unlimited, to know no weariness and have no boundaries. If one really forgives, it is because he has a forgiving spirit, and that spirit is not exhausted by use, but rather grows by exercise.

A word of caution is in order at this point. Let no one suppose that our Lord's instruction means that offenses against the law of the land or against the good order of society are to be overlooked and condoned.

It relates rather to the cultivation of a personal spirit of forgiveness, the laying aside of revenge, of malice, of retaliation which do not become the Christian.

II. The Motive of Forgiveness (vv. 23-34).

Two motives are given. The first is that since we ourselves are daily and hourly in need of forgiveness at the merciful hand of God, we should in turn be merciful toward those who sin against us. Compared with our offenses against the law of God, we know that the misdeeds of our neighbors against us are usually mere trifles. Remember what God has done for you, when you are tempted to be hard and ungracious with your brother.

The second motive is the remembrance that a day of judgment is to come. There is always a time of reckoning ahead, even as was the case with these servants. Remember not only what God has done for you and is doing for you, but what you must yet expect Him to do in that day of judgment. It will make you merciful and gracious in your judgment of others.

Forgiveness has a fine quality which commends itself to others. Note the sorrow of the fellow servants (v. 31). There is, then, a social value in true forgiveness.

III. The Importance of Forgiveness (v. 35).

A man dealing with his fellow man is apt to think that it is merely a matter between man and man. We are not dealing with a straight line between ourselves and our brother (that was Peter's error), but with a triangle at whose apex is God Himself.

If I expect God to forgive me, I must let my forgiveness flow out to my brother. If I deal with him as though God had nothing to do with the matter, then I must not try to count God's forgiveness into the picture when I stand indebted before Him.

God does not play favorites. He is no respecter of persons. He is as interested in the other man as He is in me. The Christian should have the same spirit.

Here we need a word of explanation. Let no one suppose that our redemption in Christ is contingent upon what we do toward our brethren. "For by grace are ye saved through faith; and that not of yourselves: it is the gift of God; not of works, lest any man should boast" (Eph. 2:8, 9).

Nor does the truth of our lesson mean that we are somehow going to bargain with God, trading a bit of our forgiveness toward others for His forgiveness of us. God is not interested in such transactions. But it does mean that if you cannot or will not forgive, you may well consider whether you are a Christian at all, for it is Christlike to forgive.

SEWING CIRCLE PATTERNS

Well-Fitting Afternoon Frock Add Bolero to Sun-Back Dress

Afternoon Frock.

THE sort of dress every woman likes—with its soft, graceful skirt, nice shoulder detail and flattering sweetheart neck edged in ruffling. Especially designed to give you a poised, well-groomed feeling.

* * *

Pattern No. 1292 comes in sizes 36, 38, 40, 42, 44, 46, 48, 50 and 52. Size 38, three-quarter sleeves, requires 3¾ yards of 39-inch material; 1 yard edging for neck trim.

Sunback Dress.

THIS smart sunback frock gay over-shoulder ruffles give it a jaunty air. A "cover bolero is included in the pa which adds up to an ideal summer outfit. Make it in p dots or bright checked cotto

* * *

Pattern No. 1983 comes in sizes 14, 16, 18 and 20. Size 12, with requires 3½ yards of 35 or 39-inch 7 yards rick rack to trim ruffles and plain dress, 3½ yards, bolero 1¼

Due to an unusually large demand current war conditions, slightly more is required in filling orders for the most popular pattern numbers.

Household Hints

To make screws penetrate hard wood more easily place a little ordinary household soap on the thread.

—•—

When a light bulb breaks off, leaving the top screw part in the socket, first be sure that the current is turned off. Then insert a cork into the socket and turn to remove the cap.

—•—

If a newspaper becomes stuck to a varnished table top, apply olive oil. Let soak thoroughly, then paper can be removed.

—•—

Corn flakes or rolled oats are excellent substitute for breadcrumbs.

—•—

Baste velvets with silk thread. This leaves no mark of the bastings.

—•—

Use the cardboard from your husband's shirts between your linens to keep them in order and easy to remove when only one piece is desired.

Army and Navy Turn to Rocket Weapons As Answer to Need for More Fire Power

Munitions Schedule Greatly Stepped Up To Meet Demands

War rockets are not new. The Chinese used crude projectiles in 1232 against the Tartars; the British fired them at American troops in the War of 1812, during the battle of Blandensburg, when they routed Stansbury's American brigade, and then marched on Washington. Francis Scott Key, going aboard a British prison ship in the Chesapeake to discover the fate of a friend, was obliged to stay aboard during the British rocket ship attack on Fort McHenry. On the basis of this experience, he wrote the rocket references in the American national anthen:

"And the rockets' red glare,
The bombs bursting in air."

Rockets, however, were never used before in 20th century warfare. In this war these projectiles have become important and destructive weapons. Their considerable use in combat is one of the principal weapon innovations of this war.

Amazing expansion of use and production of American rockets, since the bazooka was invented in 1941, has been reported by the army, the navy and the Office of Scientific Research and Development.

The increase in rocket production, of course, based on increased requirements for rockets to use in combat, is shown by these facts:

In November, 1944, the navy's bureau of ordnance reported that by the end of the first quarter or early in the second quarter of 1945, the navy would be spending approximately $100,000,000 per month on rocket ammunition alone, which is as much as is now being spent per month on all types of naval ammunition.

In December, 1944, however, the navy's bureau of ordnance said that in a few months navy rocket production would be stepped up by nearly 300 per cent.

The army, which placed its first rocket orders of this war in 1941, had approximately $1,000,000 in rocket contracts during 1942. During 1943, the expanding rocket production program had shot up by 2,400 per cent over that of 1942. And in 1944 the program was further increased by another 400 per cent over 1943 production, according to the army ordnance department.

During 1945 the army will be spending approximately $12,000,000 per month on rocket ammunition alone, while the navy will produce rockets for all branches of the armed forces and will be responsible for loading and testing the projectiles. The army will be responsible for the manufacture of a rocket propellant charge that will not dissolve in ordinary solvents, such as water, and of rockets of sizes not produced by the navy.

New Types More Powerful.

Rockets used by the American armed forces today, including the navy's latest type airplane rocket and the latest plane type used by the army air forces, are even more potent weapons than the bazooka, which was the army's anti-tank rocket first put into production in 1941, and first used in combat in the North African invasions. According to the National Defense Research committee, rockets are accurate weapons when fired from high speed aircraft. And the navy reports that rockets fired from planes can be pinpointed on the target.

In this war American rockets are fired from naval craft, aircraft, and from the ground or from ground vehicles. Similar in principle to the Fourth of July skyrocket, these new rockets are artillery type weapons, with the rockets being equivalent to shells and the launching devices equivalent to guns. Fired from tubes that vary in length and diameter according to the type of rocket, the weapons have warheads carrying explosives, or smoke, or incendiary chemicals. The tube that extends to the rear of the warhead contains the propellant, a material that, after being electrically ignited, generates expanding gas. The gas, pushing against the head, forces the rocket forward.

The M-8 rocket, that was developed after the bazooka, is a 4.5 inch projectile that equals in firepower the 105-mm. medium artillery gun. The M-8 rocket weighs only 38 pounds. The M-8's launcher, M-12, weighs 35 to 40 pounds, while a 105-mm. gun weighs approximately 12 tons. The M-12 launcher costs only $104, while a 105-mm. gun complete costs $8,406.

M-8s Clear the Way.

The navy put M-8 rockets to their first real test in the Pacific amphibious operations. By the time the European theater invasions began, rocket-firing craft had become essential equipment for landings on hostile beaches. On the China-Burma-India theater M-8 rockets, fired by army air force P-51 Mustang fighter planes, carrying six rockets each, destroyed in 290 rounds of firing six large warehouses, 12 medium-sized warehouses, one foundry, four locomotives, 10 Japanese aircraft, two river boats and four native shacks; and damaged two medium-sized warehouses, five medium-sized buildings, one locomotive, and 13 Japanese aircraft.

P-38 Lightnings, P-39 Airacobras, P-40 Warhawks, P-47 Thunderbolts, as well as the Mustangs, are the fighter planes equipped with rockets by the army air forces. Grumman Avenger torpedo planes and such lighter navy fighter planes as Hellcats have been armed with rockets. Navy carrier task forces are using rockets in ever-increasing quantity.

Army air force fighter planes, carrying rockets slung in underwing mounts, have combined rocket fire with bombing to destroy concentrations of armored vehicles, rail lines, rolling stock, trucks and troop convoys, light field fortifications such as bunkers, pillboxes, artillery emplacements, radio installations, and light naval and cargo craft, both in Europe and in the China-Burma-India theater of war.

For more than two years the navy has been using a type of rocket weapon against Axis submarines. Now standard for all navy amphibious operations is the rocket weapon that was used successfully in the invasions of North Africa, Sicily, Italy, and France, in the landings on Arawe and subsequent landings in the Pacific.

Blast Shore Installations.

LCIs (landing craft, infantry) attacked with rockets at Kwajalein, Eniwetok, Guam. Several thousand rockets were hurled at Japanese shore installations by LCIs on Guam. These rockets were fired by electrical control from multiple banks of launchers that had been welded to forward well decks.

Operational and tactical reports of rocket successes from field commanders and in various theaters of war have increased markedly over 1942. After analyzing the wide destruction of enemy ground targets by rocket-firing P-47s of the Ninth air force, the operational research section of the force recommended more extensive use of airborne rockets.

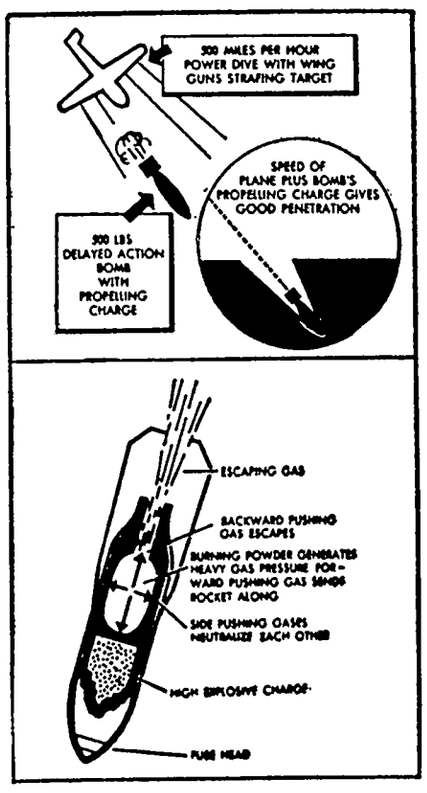
Since 1941 American rocket research and development have been forwarded by the war and navy departments, working with scientists of the Office of Scientific Research and Development. The latter is responsible, among other things, for initiating and supporting scientific research on weapons of war. The air technical service command technicians, the army ordnance department, and civilian scientists of the N.D.R.C. group, developed airborne rockets for tactical use in the war after only two years of research at Wright Field, Dayton, Ohio, and other proving grounds.

While rockets have great fire power and mobility, and may be fired without recoil, which increases their adaptability for use where guns cannot be employed, only when fired from high speed aircraft are they of pinpoint accuracy. Ground forces' rockets have great possibilities as a barrage weapon. Rocket launchers, as compared with guns, are relatively simple and cheap to manufacture in mass production, according to the National Defense Research council and the army and navy.

Most all pursuit planes are now being equipped with bazookas. This P-47 has six tubes, mounted under the wings. The rocket projectiles are fired electrically by the pilot. The picture shows a ground crewman loading one of the bazookas. Three of the big rockets are standing on end in front of one of the wheels in the foreground. This plane is also armed with eight .50-caliber machine guns.

Two men with a bazooka can blast a hole in a medium tank. This strange weapon, nevertheless, is light to carry and easy to handle. The forward man holds the tube and aims it, while the rear man loads the rocket missile. There is no recoil, since the tube is open at both ends. The rocket pushes against the air instead of a breech block.

Rocket Bombs

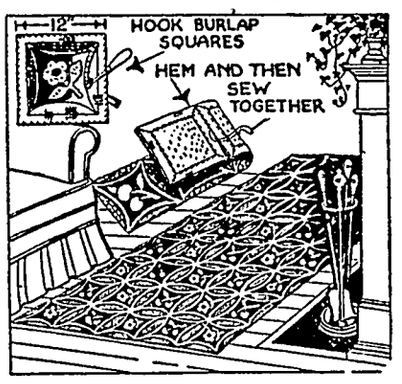


500 MILES PER HOUR POWER DIVE WITH WING GUNS STRAFING TARGET
SPEED OF PLANE PLUS BOMB'S PROPELLING CHARGE GIVES GOOD PENETRATION
500 LBS DELAYED ACTION BOMB WITH PROPELLING CHARGE
ESCAPING GAS
BACKWARD PUSHING GAS ESCAPES
BURNING POWDER GENERATES HEAVY GAS PRESSURE FORWARD PUSHING GAS SENDS ROCKET ALONG
SIDE PUSHING GASES NEUTRALIZE EACH OTHER
HIGH EXPLOSIVE CHARGE
FUSE HEAD

For greater penetration, as well as more accuracy, a rocket bomb has been developed. A propelling charge is set off just as the bomb leaves the dive bomber. This added impulse speeds up the missile's descent and consequently its impact with the target is more forceful.

You Can Add Square a Time to This Rug, in Flower and Cherry Design

By Ruth Wyeth Spears



WOOLEN strips from worn out coats, suits and dresses are used for the background of this rug, and the turquoise flowers and red cherries in alternate squares are from dyed pieces of an old cream colored blanket.

The burlap or canvas foundation is cut in twelve-inch squares. Each square is hooked separatcly and, when sewn together, they form this fascinating design. No large frame is needed and your hooking is easy to carry with you or to use for pick-up work.

* * *

NOTE—Pattern 201 gives actual-size design for this rug with color guide and complete directions for preparing materials and hooking. Ask for pattern by number and enclose 15 cents with name and address direct to:

MRS. RUTH WYETH SPEARS

Black Markets and Paper Shortage During Civil War

Hoarders, black markets and paper shortage were matters of concern during the Civil war, even as they are today. In some cities newsprint supplies were completely exhausted and several newspapers printed abbreviated editions on the backs of wallpaper. One of them was the Vicksburg Daily Citizen. Of the hoarders and black markets the Citizen had this to say editorially:

"We are satisfied there are numerous persons within our city who have breadstuffs and are doling it out at the most exorbitant figures to those who had not the foresight or means at their command to provide for the exigency now upon us . . . Let it be seared into their very brain, that humanity may scorn and shun them as they would the portals of hell itself."

REALLY S-O-O-T-H-ING
because they're really medicated

F&F
COUGH LOZENGES

Soothe your throat all the way down—*far below the gargle line.* Each F & F Lozenge gives your throat a 15 minute soothing, comforting treatment. Used by millions for coughs, throat irritations or hoarseness resulting from colds or smoking. Only 10¢ box.

Upset Stomach
Relieved in 5 minutes or double money back

When excess stomach acid causes painful, suffocating gas, sour stomach and heartburn, doctors usually prescribe the fastest-acting medicines known for symptomatic relief—medicines like those in Bell-ans Tablets. No laxative. Bell-ans brings comfort in a jiffy or double your money back on return of bottle to us. 25c at all druggists.

THIS IS WHAT I DREAMED ABOUT!

BILL: Gosh, Mom, hot rolls! Now I know I'm really home! And they're even better than I remembered!

MOM: Help yourself, son. I made 'em specially, right after I got your call—with a grand, quick recipe using Fleischmann's *yellow label* Yeast, the kind with *extra vitamins!*

THERE'S ALSO MILD BEN GAY FOR CHILDREN

Air Corps Will Use Jet-Propelled Fighters on Japanese Front

The jet-propelled fighter plane, now constituting a rapidly growing segment of the aircraft production in this country, will displace "to a great degree" the standard type of fighter-escort craft in the war against Japan, according to war production officials.

Scheduled increases in the output for this year are described as "terrific" and by 1946, it was stated, production of the new plane may make it the largest single item in the wide range of United States aircraft types.

The Germans are using a jet-propelled plane on the western front in combat against Allied bombers and their fighter escorts. It is acknowledged to have as principal advantage the speed with which it can attack and then elude conventional American fighter planes.

American aircraft designers and engineers are trying to eliminate what appears to be the chief disadvantage of the jet-plane, its short range. Because of its prodigious consumption of fuel, it is necessary that the plane be close to its base for frequent refueling. Until the range is lengthened, its use as a bomber escort will be confined to raids against targets reasonably close to sources of fuel supply, experts point out. They add confidently, however, that the short range will not always be an obstacle to extensive use of the plane.

SHAMROCKS CLOSED SEASON BY BEATING SWALEDALE

The Klemme Shamrocks closed a successful basketball season on the home floor Friday night by walloping Swaledale 42 to 27.

Brinkman was high scorer with 13 points, Jacobs 12, Buntenbach 8 and Peck 4.

Lost In First Round At F. C.

The Shamrocks are out of the tournament at Forest City, losing on the first night to Joice, 22 to 24.

It was another case of the Shamrocks out-scoring the opponent on the floor, only to lose the game by missing too many free throws.

4-H LIBERTY BUSY BEES HELD MEETING FEBR. 17

The 4-H Liberty Busy Bees club met at the home of Neva Kropp on February 17th.

In the absence of the president, Betty Lou Griffen presided. An interesting and instructive demonstration on "A Day's Meals For The Family," was given by Dorothy Moll. A talk on "How To Be Happy Though Rationed" was given by Darlene Schultz. She pointed out some real problems in connection with the use of the red ration tokens. In addition to club members, Mrs. Aaron Stromer, club leader; Mrs. Roger Schlawin, Assistant leader; and Miss Hazel Grimes were present.

Group singing, using their new songbooks was enjoyed by the group and a game planned by Betty Lou Griffen.

Lunch was served by Mrs. Kropp assisted by her daughter, Mrs. Leon Kropp.

Entertained At Contract Bridge Party Saturday Afternoon

Mrs. Sumner Trumbell and Mrs. E. C. Buntenbach entertained several ladies at three tables of contract bridge at the Buntenbach home Saturday afternoon.

High prizes were awarded at each table and were won by Mrs. Art Kudje, Mrs. Donald Turgasen, and Mrs H. R. Ramsay.

Lunch was served following the games.

Out-of-town guests were Mrs. Rheim and Mrs. Verle Keraus of Garner, and Miss Jacqueline Kudje of Kanawha.

Mrs. John Clements and Jimmy, Mrs Gerald Koerner and Mrs. W. F. Pavey were Garner callers last Friday.

Mr. and Mrs. Emil Beier and Mr. and Mrs Ira Overholt were dinner guests Sunday at the home of Rev. and Mrs. Herschel E. Harvey.

Mrs. Art Wellemeyer and John Griewe drove to Thompson Friday to help Mr. and Mrs. Don Bacon who were having a public sale of livestock.

Mr. and Mrs. Verner Christie of near Goodell moved Friday into the Clrae West house in the southeast part of Klemme, which they purchased some time ago

Miss Novella Bredbenner, who teaches in Des Moines, spent the week end in Klemme visiting with her mother, Mrs. Martha Bredbenner.

Pvt. Otho Keraus of the Sioux City Army Air Base, and his wife of Minneapolis, spent the week end in Klemme visiting at the parental W. C. Keraus home.

John Johnson is still seriously ill at his home east of Klemme.

Mrs. Walter Rosendahl has been ill the past two weeks at her home southeast of Klemme

Mr. and Mrs Tony Tebbins and family of Corwith were here Sunday to attend the 40th wedding anniversary dinner for Mr and Mrs. J. W. Waddingham.

Sharon Lee and Larry Lemke, children of Mr. and Mrs. Wayne Lemke, came Saturday evening and visited over Sunday with their grandparents, Mr. and Mrs. Otto Lemke while their parents were in Minnesota.

Ronald Barz, Seaman First Class arrived home Friday for a visit until March 8th with his family here and his parents, Mr and Mrs. Fred Barz. Seaman Barz has been on active duty in the Pacific theatre of operations.

Lt. and Mrs. "Pat" Patterson were supper guests at the A. L. Kingery home Tuesday night. Lt. Patterson was enjoying a leave. The former Klemme coach expects to leave soon for overseas duty.

Mr. and Mrs Louis Weaver of north of Klemme are enjoying a vacation before spring farm work begins. On February 1st they left for Phoenix, Arizona to spend a couple of weeks visiting with their son Wiley and family. They are now enjoying the sights in California. They expect to return home about March 15th.

BREDLOWS CELEBRATED THIRTIETH ANNIVERSARY

About fifty relatives, neighbors and friends held a surprise party on Mr. and Mrs. Frank Bredlow at their home in Liberty township on Sunday afternoon, in honor of their thirtieth wedding anniversary.

A short program was given, including a mock wedding. Rev. H. E. Harvey sang a solo.

Mr. and Mrs. Bredlow were presented with a purse of money in remembrance of the happy occasion.

Mr. and Mrs. Bredlow are the parents of seven children: Glen, who was killed in the European theatre of war, Marvin, Le Roy, Lorraine, Roland, Marjorie and Sheryl.

Before her marriage Mrs. Bredlow was Julia Borchers, daughter of Mr. and Mrs. Bert Borchers. They were married at the Borchers home on the old Wellemeyer place in Liberty township.

Lloyd Sherwood was at Forest City on business Tuesday morning.

Mrs. Rose Lewis and son Duard entertained to a six o'clock dinner Friday evening Seaman Eugene Kluckohn, wife and baby daughter, Shannon, and Mr. and Mrs. C. E. Kluckhohn.

Mrs Herbert Webner and Dennis, and Mrs Dan Webner returned home from Ardmore, Oklahoma after spending a few days with Pfc. Herbert Webner and Cpl Willard Palmer.

Mr. and Mrs. R. A. Jorgenson entertained to dinner Sunday evening Mr and Mrs. C. G. Waterman and daughter, Mrs Lyle Wilcox, Mrs. Mary Waterman and Mrs. Antonio Keraus.

Pvt. Rudy Hefte and family left Friday evening for Amarilla, Tex., after visiting with relatives here for a couple of weeks. Mrs. Hefte is a daughter of Mrs. Daisy Lemke.

Mr. and Mrs. Emil Barz, who have been living in Texas for several months, are back in Iowa and will live at Cedar Rapids. They were visiting in Klemme Sunday and the fore part of the week.

The Editor was "off the job" for a few days the latter part of the week The editor came out second best in a tussle with the dentist. No, that puffed up effect on the starboard side was not the mumps! X marks the spot where they used to be a darn good tooth, now conspicuous by its absence.

A Maniac Who Hates Pretty Legs is prowling the streets of North London, cutting at shapely calves with a whip. The police hope they catch him before he falls into the hands of angry fathers, brothers and sweethearts of his comely victims. Read this unusual story of crime in The American Weekly, the magazine distributed with this Sunday's (March 4) Chicago Herald-American. 1tc

Mr. and Mrs. Bill Reinhart of Alleman visited in the parental J. J. Cook home near Klemme last week. Mr. Reinhart will leave for the armed forces on March 1st. Mrs. Reinhart teaches music in the Alleman school.

Use the Times Want Ads.

Mrs. Willard Palmer and daughters Beverly and Dottie, returned to the Dan Webner home from Ardmore, Oklahoma, after spending several months with Cpl. Palmer. Cpl. Palmer is being transferred to another camp.

* * *

and Mrs. Francis Buseman, farmed the Edw. Schaefer in Liberty township, have to the Henry Buseman farm of Klemme. Francis will as- is father in operating the an farm. Mr. and Mrs. Er- lank, who were married re- will begin farming on the er farm vacated by Francis an.

* * *

and Mrs. Ernest Helps who lived on one of Albert Kehl's northeast of Klemme for l years, have retired and are living in Garner, having pur- d an acreage there in the west part of town. Mike Mal- ho has been employed at the t Kehl farm north of Klem- n Highway 69, moved to the farm vacated by Mr. and Mrs. Helps.

* * *

Bill Wilson and family, who have been living for a couple of years in Klemme in the Gebeli house in the northwest part of town, now owned by Bill Johnson, moved to a farm in Twin Lakes township near Goodell Verne Bis m and family of Fort Dodge will move int the Johnson house vacated by the Wilson family. Mr Bsom recently purchas d Tom Roths' trucking business

* * *

Harold Johnson and family who farmed the Fred Bachman place southeast of Klemme, moved to the Elmer Howard farm ab ut 5½ miles northeast of Klemme Mr. and Mrs Paul Lau, who were on the Harry Carpenter farm west of Goodell, moved to the farm vacated by Harold Johson

* * *

The Verner Christie family who lived 2 miles north of Goodell have moved to Klemme and reside in the Clare West house which they purchased, in the southeast part of Klemme Aaron Knetlows, who lived on the Nate Church farm near Goodell, moved to the farm vacated by the Christies Mr. Christie will operate an automobile repair shop in Klemme and expects to put up a new building on the lot across and west of the Wellemeyer building.

* * *

Mr. and Mrs. E. J Schneider moved a few months ago from a farm five miles east of Klemme to the Fred Becker farm 1½ miles east of Klemme. Arn Tyler and family from Ellsworth moved to the farm vacated by Schneiders

Kenneth Zwalds Entertained The Liberty Home Builders

The Liberty Home Builders met Sunday evening at the home of Mr. and Mrs. Kenneth Zwald The attendance was good.

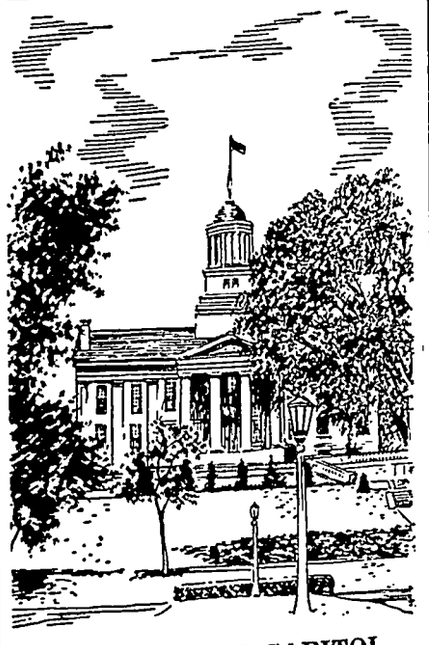
Guests were Mr. and Mrs Dale Greiman, and Seaman Carol Brager who is home from service in the Pacific.

After a program in charge of Mrs. Wilbur Haefner, a delicious lunch was served by the hostess and enjoyed by all.

NOTICE TO OUR READERS

The paper is late this week and much material has been left out as the publisher is ill and it is impossible to procure help. We will try to publish next week if at all possible.

Bonds Over America



IOWA'S FIRST CAPITOL

Among the important shrines that American youths are battling to protect is the Administration Building of the University of Iowa, Iowa City, constructed in 1840 as the first State Capitol. In 1857 the government moved to Des Moines and the building was turned over to the University. People on the home front buy War Bonds to equip service men who are guarding such institutions as this one in Iowa, which began with 75 students and now numbers 10,000.

Over One Hundred Sheep Killed In Raid By Dogs Saturday Night

ED. BUNTENBACH HAS HEAVY SHEEP LOSS ON FARM HERE

Over One Hundred Killed, Many Others Damaged By Raiders

Dogs raided the Ed Buntenbach farm, 2½ miles east of Klemme Saturday night or early Sunday morning, killing over one hundred fat lambs weighing around 115 pounds, and badly injuring around 75 more, many of which have since died of the wounds inflicted by the night prowling dogs. Mr. Buntenbach said the loss would run over $2,000 00

Mr Orris Lundy, who lives on the farm, discovered the terrible looking sight when he did chores Sunday morning

A Times reporter went out to the farm and counted 104 dead sheep in the long sheep shed; several other dead animals layed in the feed yard Many other sheep were badly cut and slashed, some with broken legs, and several more in the flock were then dying.

Mr Buntenbach had a total of six hundred sheep in the flock and had planned to market them soon.

Supervisor Chambers was called to the farm to make an investigation and look over the loss.

This was probably the biggest loss of sheep killed by dogs ever to occur in Hancock County.

There have also been several other large losses of a like nature in the county the past year.

FUNERAL SERVICES FRIDAY FOR ROSA M. TANNER

Funeral services will be held on Friday afternoon at 2:00 o'clock for Rosa M Tanner, 72, at the Liberty Methodist Church.

Mrs. Tanner died suddenly Tuesday afternoon.

The obituary will be printed in the next issue.

Card Of Thanks

I wish to take this means in which to thank my neighbors, relatives and friends and the Liberty Methodist Sunday school who were so kind and thoughtful to me and my family during my 7 weeks stay in the hospital. Words cannot express our gratitude.—Henry Wade. 1tp.

Card Of Thanks

I wish to thank my relatives and friends for their visits and those from whom I received cards, letters and gifts while I was in the hospital and during the time I was convalescing at home. It was all deeply appreciated.

(1tp) —W. J. Barz, Garner.

There were only 4,000 newspapers and magazines in the world 100 years ago. Today there are 94,000.

REV. WM. T. BAUR

Next Tuesday, March 13th, at 8:00 o'clock p. m, the Rev. William T Baur, furloughed missionary from India, will be the guest speaker at the Klemme Evangelical and Reformed Church.

Missionary Baur has had many rich and varied experiences during his 18 years as a missionary pastor and evangelist, treasurer of the Missionary Conference, and superintendent of the Chankhuri Leper Asylum, the second largest leper home in India.

For a number of years the Evangelical and Reformed Church thru its Board of International Missions loaned his services to the United Church of Canada Mission in Mandleeshwar, Central India.

The work of Missionary Baur and his associates has received high commendation from the members of the armed forces in India. In a letter to his friends, Capt. Tom Clare, a chaplain stated recently, "If I wasn't an enthusiastic proponent of foreign missions before I came to India, I am now . . . I came to India convinced that India must be lifted socially before she could be uplifted religiously. After 3 months of it, from one end to another, I am convinced that religious rebirth is the key to India . . . Our missionaries are doing an admirable piece of work and they deserve our complete support. What tales of heroism and sacrifice!"

Missionary Baur was born in Rochester, N.Y. and educated in the Elmhurst College, Elmhurst, Ill., Eden Thealogical Seminary and Washington University, St. Louis, Mo. The Baurs have made their home in St. Louis while on furlough.

Card Of Thanks

I want to thank my relatives and friends for the cards, letters and gifts sent me while I was ill in Des Moines. They were greatly appreciated.

1tp —La Vonne Schlawin.

Funeral Services Held Tuesday For John A. Johnson, 78

HAD BEEN A RESIDENT OF THIS COMMUNITY FOR 43 YEARS

Died Sunday Morning Following A Short Illness

Funeral services were held Tuesday afternoon beginning at 2:00 o'clock at the Klemme Methodist Church for Mr John Agard Johnson, 78, Klemme farmer and resident of this community for the past forty-three years. Rev. Herbert E. Harvey, pastor, preached the sermon and special music was arranged by the music department of the church.

Interment was in the Ell Township cemetery near Klemme and Mr. Johnson was carried to his final resting place by neighbors and friends: Verner Lewis, Dan Webner, C. J. Wille, Edmund K. Josten, Edward Becker and Roy Swanson.

Funeral arrangements were in charge of the Wellemeyer Funeral Service of Klemme.

The obituary which was given at the church service is printed elsewhere in this issue of The Times.

MARCH OF DIMES TOTALED $763.60 FOR COUNTY

Over $300 More In Contributions Than Last Year's Drive

The Infantile Paralysis Executive Board of Hancock County met at the Avery theatre in Garner on Saturday, March 3rd with Chairman G. B. Kirchner to check over the March of Dimes contributions which totaled $763.60.

To this amount will later be added contributions received from the theatres at Garner, Britt and Kanawha. Funds collected at these theatres has already been sent to Washington, D. C., but half of the money will be returned for use in Hancock County.

The March of Dimes letters were mailed out from each town and the letters returned are credited to the mailing address of the sender:

Garner	$229.65
Britt	172.75
Klemme	126.80
Kanawha	54.20
Corwith	43.90
Woden	31.55
Goodell	29.35
Hayfield	20.30
Forest City	18.59
Wesley	13.05
Crystal Lake	10.50
Meservey	7.00
Ventura	2.00
Goldfield	1.00
Belmond	1.00
	$761.64
No Names	1.96
Total	**$763.60**

We want to thank all who sent back letters with donations to this worthy cause.

G B. Kirchner, Chairman.
Mrs. R. A. Jorgenson, Sec.

Last year the total contributions in Hancock County was $411.55 This year that amount was exceeded by over $300. Contributions with Klemme addresses last year was $56.60, while this year the contributions jumped to $126.80.

The Times will publish the entire county contribution list, but this week we are publishing only the contributions with Klemme addresses, as folows:

Klemme Contributions

Harry Gibbs 50c; Lewis Radio Shop $1; Adna Ward $1; C. A. Larsen $2; W. C. Blumer $1; Harlow Helps $1; Robert Loock $1; James Vrba $1; Clara Smith $1; William Green $1; W. L. Haberkamp $1.

Gruis $1; Verner Lewis $1; Mrs. C. A. Arnold $1; Paul Goll $2; A. L. Kingery $1; John A Johnson $1; Cecil B. Katter $1; C. G. Waterman $1; Fred Becker $2; Erwin Priebe $1; Alvin Schlichting $1; Julius Priebe $1; Russell Medin $1; Melvin Neuberger 40c; Arlene Bugh 25c; Tom Blank and Marie $1; Wm. F. Greiman 50c; Pringnitz Brothers $5; No name 30c; Lester Stille $1; Mrs. Dick Swalve 50c; Edw. Thieman $4; Mrs. Anna Langlitz 30c; Jacob Hess 50c; V A Stroe $1; Emil Beier $1; Verner Nelson $1; Emil W. Lau $1; H R Strom $1; Le Roy Johnson $3; Miss Lyde Bock 35c; Raymond Barz $1; T. C. Buntenbach$ 1; Dale Schlei 50c; Maurice Murray $1; Joe Schuldt $1; J. E. Stille $1; Carl Wille 50c; Mrs. Gretchen Schlawin 10c; Mrs. John Clements 50c; Mrs. Martin Barz 50c; Wesley Lau $1; R. A. Jorgenson $1; Wm. Keraus $1; A. J. Kudje $1; Herman Schmidt $1.

More lists will be published next week.

MARJORIE LAU CHAMPION SPELLER, EIGHTH GRADE

Will Represent Klemme School In Annual County Contest

A local spelling contest was held in the Klemme grades Friday afternoon to pick the champion speller to represent the Klemme school at the county spelling contest.

Marjorie Lau, daughter of Mr. and Mrs Wesley Lau, won both the eighth grade spelling bee and was champion over all the grades, and was declared the Klemme Champion with the right to compete in the county spelling contest. Marjorie also accumulated some War Stamps for winning.

Isabelle Gibbs was second high in the 8th grade.

Luella Priebe was high in the 7th grade and Jerry Finders, second.

Audra Jones was winner in the 6th grade, and LaNelle Harvey won second place.

Maxine Barz won high in the 5th grade and Lucille Preibe was next high

Elaine Neuberger was high in the 4th grade, with Miriam Preibe second high.

Dennis Ridder took the honors in the 3rd grade, and Janice Swanson was second.

First place winners were all awarded 25c War Stamps and the second place winners received a 10 cent War Stamp.

Marjorie Lau was awarded two stamps: a 25 cent stamp for the championship, and a 25 cent stamp for first place winner in her grade

Isabelle Gibbs was second highest; while Maxie Barz, a 5th grade pupil stayed in line to win third place.

Married 17 Years

Mr. and Mrs. Orville Bridges observed their 17th wedding anniversary Thursday, March 1. They celebrated the event by taking in a show that evening with Mrs. Herman Bridges as their guest

WEEKLY NEWS ANALYSIS

Harmony Note of Big Three Meet; Mighty U.S. Aerial Blows Carry War to Heart of Jap Homeland

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

Freed by daring U. S. Ranger attack on Cabanatuan prison camp, liberated Yanks joyfully make their way back to American lines for transfer to evacuation hospital in Philippines.

EUROPE:
Postwar Pattern

Their historic conference at Yalta having ended in agreement, the Big Three departed from the balmy Crimean watering resort determined to maintain equal harmony on the implementation of the new course they struck for trodden Europe, envisaging the return of democratic government and obliteration of Nazism and Fascism.

Thorniest problem in Allied relations before the conference, the Polish question was met by U. S. and British recognition to Russian annexation of part of eastern Poland, and the agreement to include independent democratic leaders into the Red-sponsored provisional government until the people themselves can name their own regime in a free and open election.

In respect to free elections, guaranteeing the people of all the liberated countries the right to pick their own governments, the Big Three pledged their support to assist any nation in measures designed to bring about such polls.

With agreement on the vexatious Polish problem and restoration of democratic government in the new

Declaring that the Big Three's terms for Germany released its people from all moral scruples of warfare, Nazi propagandists said: "Every enemy will be met by fanatical men, women and children, who know what treatment is in store for them, and, therefore, wish to kill, murder and poison all who attempt to oppress them. . . ."

Europe, the Big Three also moved toward maintenance of such an order by further discussion of steps on a postwar international security organization, with the talks at Yalta designed to meet Russian objections to the Dumbarton Oaks plans for prohibiting any nation charged with aggression from voting on measures to bring it in line.

Overwhelming agreement was reached on treatment for a defeated Reich, with Messrs. Roosevelt, Churchill and Stalin determined to crush German militarism by dissolution of the wehrmacht, breakup of its general staff, elimination of all industry that could be used for war production, and complete eradication of all Nazi and Junker influences in the nation's life.

Further, Germany would be made to pay for war damage, with an Allied commission set up in Moscow determining on the extent of reparations, probably in terms of manpower and goods.

Allies Advance

With their hopes of an Allied division blasted at Yalta, and with the combined weight of the U. S., Britain and Russia drawn up against them, the Germans maneuvered in both the west and east for a last-ditch struggle.

In the east, so-called "alarm units" and the "people's army" were thrown into breaches to hold open avenues of retreat for German forces falling back from Silesia to Saxony as the Russians drove on this all-important Nazi industrial district. As the Reds pushed ahead, one wing of this offensive nosed northwestward toward Berlin, sorely pressed by a frontal assault of Marshal Zhukov's forces.

In the west, the Germans fought hard to thwart the Canadian and British attempt to turn their far northern flank, drive into the industrial Ruhr and trap Nazi forces guarding the Rhineland from the rear.

WAR COSTS

With this war costing the world some $200 billions a year, or more than $500 millions a day, in direct military expenditures alone, the annual expenditure is roughly equal to the whole direct cost of the First World war, estimated at $208 billions by the Carnegie Endowment for International Peace.

Staggering though these figures are, they do not include indirect costs of war, such as the value of human life lost, property destruction, etc.

PACIFIC:
Mighty Strike

To Tokyo's 8,000,000 terrified residents, it was as if the whole host of demons themselves had swooped from the skies; to American aviators and sailors, it offered the supreme satisfaction of slapping a vicious enemy in his own backyard, and to millions of people at home, it represented the opening of the battle for Japan itself.

Thus shaped Vice Adm. Marc A. Mitscher's mighty strike against Tokyo and the home island of Hon-

Leading daring liberation of 511 Yanks from Luzon prison camp by Rangers who overpowered Jap guards were (left to right) Captain Prince of Seattle, Wash.; Lt. Col. H. A. Mucci, Bridgeport, Conn.; and Sgt. T. R. Richardson, Dallas, Texas.

shu, with 1,500 Hellcats, Helldivers and Avenger planes taking off from about 15 to 20 carriers of the 27,000-ton class, escorted by a formidable screen of fast battleships, cruisers and destroyers. Though meeting strong opposition, the aircraft shot up enemy planes, cratered airdromes and pulverized other military installations around the Jap capital.

While the major attack roared on, with the once vaunted, since battered Jap imperial fleet failing to challenge Mitscher's force riding 300 miles off of Honshu shores, other American warships and army planes hammered the Volcano and Bonin islands, 600 miles to the south.

WAR PRODUCTION:
Schedules Increase

With emphasis on more bombers and engine parts, the government increased its war contracts in recent weeks, indicating that the rapid pace of the conflict is forcing readjustment of needs.

Besides the boost in the bomber and engine parts program, it was revealed, ground troops were scheduled to get 21.9 per cent more ammunition, heavy artillery and tanks.

To meet a critical emergency of engine parts in battle zones, the government has undertaken a 50 million dollar expansion of the industry, and established special panels, or committees, in the seven major plants for speeding up of output.

Labor Relations

Supplementing its previous policy of plant seizures to back up War Labor board rulings designed to settle industrial disputes, the U. S. drew a new weapon to force compliance through cancellation of a firm's government contracts.

In following such a course of action against the E. A. Laboratories of Brooklyn, N. Y., Economic Stabilization Director Vinson said that the U. S.'s procedure was legal, insofar as the courts have frequently held that no business has an automatic right to getting a government contract.

Despite the U. S.'s power to influence compliance with WLB orders through plant seizures and withholding of priorities, in addition to contract cancellations, OES Chieftain Vinson said that still more effective action could be obtained through legislation furnishing non-compliance.

G.I.s Long for Civvies

Discharged G.I.s are so anxious to get back into civilian clothes, a survey of the Northwestern National Life Insurance company showed, that they want alterations on their new suits "done in the next ten minutes"; they shun cheap clothing and buy good quality suits—averaging about $45 in price; they don't shop around, but go to one store and buy as nearly a complete outfit as the store can supply; they usually pay cash, even when they could "charge it," and they seldom shop alone.

CONGRESS:
Busy Session

Solons were putting in a busy session on capitol hill, engrossed in semi-political, financial and insurance legislation.

Wallace Curb

Passed by the senate, the bill removing the Reconstruction Finance corporation, with its vast loaning powers, from the U. S. department of commerce and Liberal Henry A. Wallace's reach if appointed secretary of that office, went up before the house.

In addition to stripping Wallace of authority over RFC funds, which conservatives feared he might use for promotion of plans for government spending to provide "full employment," house Republicans sought to remove the secretary of commerce from the board of the 700 million dollar export-import bank, used to finance foreign business.

World Finance

Up prominently for congressional consideration was the administration-backed Bretton Woods postwar world financial agreement, under which the U. S. would contribute about 6 billion dollars for two funds: (1) to provide countries with foreign exchange at par rather than open-market value to stimulate their purchasing powers, and (2) to guarantee private loans made to countries to help build up their economies.

In asking for congressional approval of the Bretton Woods agreements, President Roosevelt said they were the first step in a broad program for international economic cooperation, also including an Allied food and agriculture organization, expansion of the reciprocal trade act of 1934, reduction of trade barriers and orderly marketing of certain world surpluses.

Insurance

Continued state supervision of insurance companies, but with stricter control in harmony with federal anti-trust laws, was promised in congressional approval of legislation postponing antimonopoly prosecution against such businesses for three years and allowing states that time to set up tighter reulations.

Brought to a head by a recent Supreme court decision declaring insurance companies subject to anti-trust laws, the question of federal control over the business drew little support from congress, with legislators contending that the individual states were best qualified to regulate the matter according to their particular requirements.

Farm Credit Standing High

By WALTER A. SHEAD
WNU Staff Correspondent

WASHINGTON.—For every dollar farmers borrowed in 1944, they repaid $3.50 on loans made prior to that year, reducing the farm mortgage debt to the lowest point in 30 years, according to a report of the Federal Land Bank system.

For the year the volume of farm loans outstanding was reduced 17 per cent. The total volume of land bank and commissioner loans made in 1944 amounted to $105,292,000. During the year a uniform 4 per cent interest rate was established on most outstanding land bank loans.

Farm mortgage loans in good standing reached a new high at the year's end with 93.6 per cent of all Federal land bank and 91.7 per cent of commissioner loans current on all payments of principal and interest.

NEW INSTRUMENT:
Aids B-29s

One of the war's most remarkable scientific achievements — an "air position indicator" — has been playing an important role in charting the long skyroads to Tokyo for navigators of America's B-29 super-fortresses, the army revealed.

Developed by engineers of Bendix Aviation corporation in cooperation with the army and navy, the indicator records continuously and automatically the exact "air position" of a huge super-fort in flight on a single dial giving the navigator an instantaneous reading of his longitude and latitude and saving hours of complex calculations.

No larger than a quart milk bottle, the computing device not only shows "air position in degrees of longitude and latitude," but also gives the navigator a continuous record of air miles flown from the take-off point and indicates the correct compass heading of the airplane, engineers explained. From these readings, plus a check of wind drift, the B-29 navigator can continuously plot his ship's "air position" on the map and keep his plane more accurately on the bomber route to Japan and return.

SOIL CONSERVATION

With the year marked by wider understanding and use of the U. S. Soil Conservation service's land classification specifying the best employment of tracts on the basis of slope, soil, degree of erosion, previous use and other factors, more than 65,000,000 acres were producing under the soil conservation system in 1944, SCS Chieftain Dr. H. H. Bennett reported. This compared with the figure of 37,500,000 acres for the year 1941.

Ernie Pyle With the Navy:

Fame Prevents G.I. Joes' Biographer From Resting

Visits to Old Friends and Places Keep War Correspondent on Go

By Ernie Pyle

Ernie Pyle is with the navy in the Pacific. Pending receipt of his dispatches from that war theater this newspaper is publishing a few articles he wrote before his take-off from San Francisco, of which the following is one.

SAN FRANCISCO.—Some of you oldtime readers who've hung on faithfully to this column for years, might like to know how some of my personal affairs are getting along, since I've always worn all the family intimacies on my sleeve.

Take "That Girl," whom you used to read so much about before the war, and who, for all those long years of peacetime traveling, rode beside me.

Ernie Pyle

I haven't written much about her in recent years, because I haven't seen much of her. The war has done the same thing to us that it has to millions of others. In the last four years, we have been together only on these little excursion trips to America.

She has kept the hearth in Albuquerque—kept it under difficulties. She has been burdened by recurring illnesses, and has had to revolve between home and hospital. But she has succeeded in keeping the little white house just as it always was, which she knew is what I would want.

She is back there now, trying to cope with the prospect of another year alone. She is still, by remote control, my guiding star. She thinks everything I do is wonderful. She even thinks I'm beautiful, which is the only flaw in her judgment.

She lives only for the day when the war is over and we can have a life together again. And that's what I live for too, for life to a man isn't much good without "his woman," and after 20 years that's what "That Girl" still is to me. I hope we both last through until the sun shines in the world again.

VISITED INDIANA

And my folks in Indiana—I visited them twice on this furlough in America, both visits all too short, but better than none.

My father and my Aunt Mary are still on the farm, three miles outside the little town of Dana. They have repapered the house and rearranged the furniture, and they are very comfortable.

My father still limps from his hip fracture of a year ago. And his eyes are very bad now, and he can't see to read. But he gets around all right, and even drives the car to town now and then. We think he shouldn't be driving, but every time Aunt Mary mentions that, he goes out and gets in the car and drives to town, so she's stopped mentioning it.

My Dad listens a lot to the radio, and helps with the dishes, and Aunt Mary reads to him at night, and last summer he even helped some with the harvesting when the neighbors were hard up for help. He raises a few chickens. Outside of that, life is without duties or energy for him.

Aunt Mary is almost 79, and her spirit is boundless. She goes all day long, like a 16-year-old. She cooks the meals, cleans the house, works in the garden, does the washing for two or three families, goes to her club meetings and to church, does things for the neighbors, and never finds time to sit down.

I was amused at a letter that came from her the other day. One of our neighbors, Mrs. Howard Gocame down with a violent rheumatism. So Aunt Mary drove over and put hot cloths on her for several hours, got noontime dinner for the farm hands, did the weekly washing and then got supper ready for them before she came home for her own evening chores.

Next day a blizzard was on. The ice was so slick she didn't dare take the car out of the garage. The snow on the roads was two feet deep and it was bitter cold.

So what did Aunt Mary do? She just bundled up and walked three-quarters of a mile over to Goforths, worked all day, and then walked back in the evening through the snow. She sure doesn't take after her nephew.

* * *

VACATION WITHOUT REST

These four months of furlough in America, away from the war, have gone like the wind. They have been full to overflowing. So full, in fact, that hardly anything has happened that I had hoped would happen.

There has been no rest. There has been no time for composure.

No day has been long enough to finish the things required in that day.

I've had the one magnificent privilege of being away from the war, but aside from that I've had more duties and worked harder here at home on "vacation" than most of the time at the front.

Normal life for me has disappeared. The bulk of my time is now given to other people. It's almost impossible to count on a single hour alone. To get half a day uninterrupted with my own family I have to plan it days ahead and then bar the gates.

If the intrusions were by mere publicity-seekers, then I could get tough. But the pressure upon me is not from the publicity-seekers or the curious.

Ninety per cent of the people who phone, write, visit or stop me in public places have legitimate reasons for doing so They are people who have done kind little things for me. They are people who just want to tell me, in complete sincerity, that they think I've done a good job—and a fellow never gets tired of hearing that.

They are people whose sons I've known overseas; they are people who write to tell me their sons are dead; they are people who want help in something they're doing for the war; people who have a part in this pattern of war that has grown up around me.

Yes, 90 per cent of the destruction of my private life is from pure goodness and sincerity in people, and from unavoidable duties that have become as much a part of my job as the job itself.

I have never aspired to be famous. If I had, then I could say to myself, "All right, brother, you made your own bed, now lie in it."

But this thing just happened. It came without planning or aspiration. I guess it comes in the category of an Act of God, like a blizzard or slipping on a banana peel.

You have to adjust yourself to this new condition, or else you're lost. You can't fight it, you can't ignore it, you can't run away from it. You've got to accept it. I do accept it as graciously as I can, but I feel sad about it.

I feel sad because it has given me the big things of life, and taken away the precious little things.

It has given me money, yet I dread to hear the telephone ring.

It has brought me a measure of renown, yet made me afraid to go into a restaurant because people whisper and stare, and I feel self-conscious.

It has put my book at the top of the best-seller list, but robbed me of the time to read other people's books.

It has put me on easy terms with the great, but forbidden me the privilege of sitting alone with my old true friends.

It has made my homely face familiar throughout America, but taken away that saving gift of serenity of mind and soul. My life now, day and night, is a frenzy. There is no mental leisure in it; never the freedom to sit down and let your mind go blank.

I like people. I always have and I still do. And so it hurts me to have to shut off phone calls in a hotel. It hurts to turn letters over to a secretary. It hurts to have to hide and cower like a criminal to get just an hour or two to myself.

But that's the way it is. I don't resent it, and I don't blame anybody. I'm grateful for the respect of such a great portion of America. I'm trying to take the bad things with the good, and get along the best I can.

Sometimes I feel like sitting down and crying because my old life is gone. But most of the time I see what is behind it, and realize that a man is blessed who is publicly obsessed by the goodness of people, instead of the bad.

* * *

Out in California we've teamed along with my boss and best friend from Washington, Lee Miller, of the Scripps-Howard newspapers.

Finds Little Time to Read Best Books

Instead of reading 50 books while I was home, and getting caught up on those lost years of literature, I've actually read only five books in these past four months.

They were—(1) "A Walk in the Sun," a wonderful little story about the emotions of men in half-a-day's fighting in Italy; (2) "Lost Island," James Norman Hall's story of what war, which means nothing to them, can do to the people of a little gem island in the Pacific; (3) "Can Do," the story of the Seabees, about whom I hope to write a lot before this trip is over; (4) "Cannery Row," and (5) "Daybreak for Our Carrier." I thought all of them were excellent.

I tried to reread "All Quiet on the Western Front" when I first came home.

r Bonds Are Your Safest Investment; Buy All You Can, Hold What You Have

ors Whispering Repudiation Are cious Propaganda

WALTER A. SHEAD
U Staff Correspondent.

oximately 85,000,000 an citizens have bought nds. That number is al- vice as many as the total rs in the last national n. And that, it seems to he best answer to the sub- propaganda that the ment might repudiate nt of war bonds.

e best answer from a prac- tandpoint, because repudi- ust be voted by the congress congress in its right political ould vote to nullify the 41- dollar holdings of 85 million ans who have purchased 750,- individual and separate war hrough January 1, 1945.

to this 41 billion dollars in nds approximately 137 billion worth sold in other govern- bonds and securities over the eriod of time to banks, cor- ns, insurance companies and arge investors, and you have r added and compelling rea- y no congress will ever vote ation of these governmental ions sold to aid in financing r.

e war bonds and other govern- securities have behind them curity, the faith and the integ- the United States government xactly the same guarantee of nt as a dollar bill. And if your nds should become worthless, your dollar bill will become as worthless. And we have war bonds a tradition and of the United States govern- of never having repudiated an tion in the 165 years of its ex- e.

right here let's spike the fal- n the minds of some people ar bonds are being cashed in alarming rate. They are not redeemed in any such nts. When someone sees a line ple at a postoffice window or bank counter cashing in war the story is immediately d that people are cashing in bonds at an unprecedented

Only 12 Per Cent Cashed.

en the treasury department shes its statements, for in- e, as last October when sales d $695,000,000 and redemptions d $400,000,000, the story was diately broadcast that people cashing in their war bonds at io almost equalling sales. As atter of fact, the redemptions October were only 1.16 per cent e total bonds outstanding.

October redemptions were un- ly heavy for the reason that it the first month in which banks authorized to redeem bonds the counter direct, and many ons had the mistaken idea that reasury was inviting these re- ptions because it was made so enient. When this impression dispelled, redemptions steadily ned. November redemptions 1.08 per cent; December, .98, January redemptions went down 0 per cent.

tal cumulative redemptions of bonds, that is the series E, F G bonds, as of January 1, 1945, unt to 12.04 per cent of the l bonds sold.

means that out of the 41 billion ars in war bonds sold, about 36 on is still in the hands of the ple who bought them. Or in oth- words about 12 cents out of each ar spent for war bonds has been eemed.

Money for Taxes Needed.

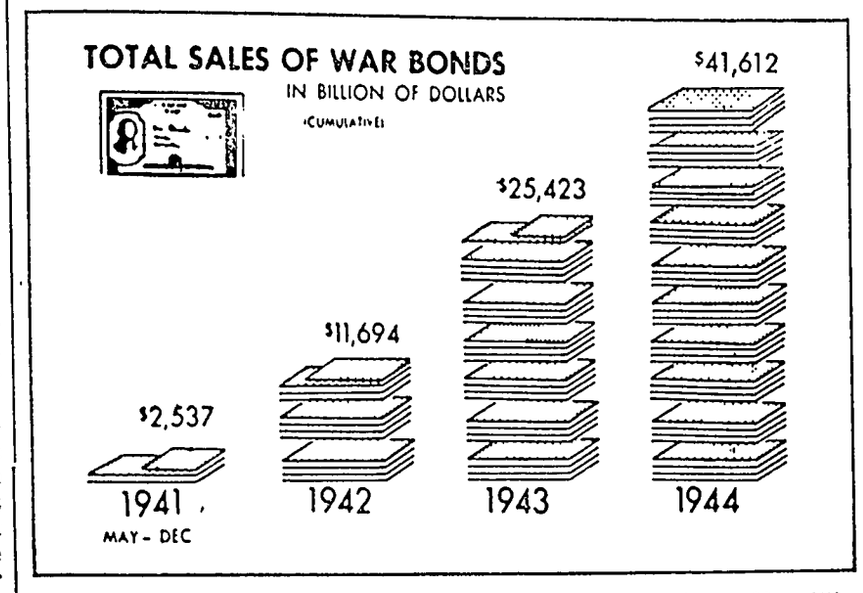
ertain months of the year, such the taxpaying months, always w a heavier redemption percent- than other months. The treas- policy from the inception of war d sales has been that the whole

Remember this . . . anyone who tells you that your government is likely to repudiate one dollar's worth of these bonds, or that the American people are cashing them in faster than they are buying them, is passing along propaganda inspired in Berlin or Tokyo!

financing program should be voluntary and that persons wishing to buy war bonds should be able to buy them conveniently. Hence war bonds may be purchased at banks, post offices, theaters, retail stores, and at scores of other places.

Then, the treasury reasoned, it should be equally convenient to redeem war bonds for emergency purposes, so all banks who desired, were authorized to redeem the bonds over the counter, instead of the former longer, more complicated method of sending the bond to the nearest Federal Reserve bank.

Who are the war bond redeemers . . . the men and women who cash in these 12 cents out of the dollar? Almost invariably they are families whose only saving has been the war bonds they bought, and, thus, when an emergency arose their war bonds were their only recourse. The war bond redeemer is in the low income bracket, has an income probably less than $3,000 per year, and a larger than average family. The chances are he buys his war bonds through a payroll savings plan at his place of employment. Chances are, too, that he over-bought according to his income, since being patriotic, he wanted to do just as much as his fellows.



Investigation shows that many men and women in these families forced to redeem their war bonds were, ten years ago, on WPA or the recipient of some community welfare program. They were not on that program willingly, and neither are they at the bank window cashing in their bonds willingly today. These bonds are their only liquid asset when an emergency comes . . . death, child birth, hospitalization, and temporary unemployment.

The treasury also has learned that the redeemer of war bonds does not necessarily cash in all his bonds, nor does he close out his payroll savings account . . . he keeps on buying. And this is proved conclusively by the fact that war bonds purchased through payroll savings since the first war loan in 1942 have steadily increased each month from 307 million dollars in December, 1942, to more than $500,000,000 per month today. Every war loan has been marked by a rise in the regular allotment of workers for war bonds, as well as a steadily increasing rise in the national level of payroll savings as against total payroll.

Savings Up 56% in Year.

During 1944 the withdrawals of deposits in savings accounts in the banks of the nation by individuals amounted to approximately 20 per cent and at the same time these savings accounts showed a net gain of approximately 56 per cent. War bonds, although showing an 8 per cent gain in redemptions over 1943, at the same time show an 85 per cent increase in sales. While the cumulative rate of redemption to the amount of bonds outstanding is 12.04 per cent, the average redemption rate over the four-year period, 1941 through 1944, amounts to slightly less than 10 per cent per year.

Let's take one year of war bond redemptions and compare them to insurance policy lapses. In 1943, for instance, total redemptions of war bonds to amount of bonds outstanding at the end of the year was 6.3 per cent. In 1940 for all legal reserve life insurance companies the dollar amount of policy surrenders and lapses was 6 per cent of the insurance in force at the end of the year. In 1942 the ratio was 4 per cent.

This tremendous voluntary program of war financing, so vast in its ramifications, is not only the greatest financing record in all history, it has brought about the greatest pool of savings in liquid assets in the history of any people.

The six war loan drives in themselves produced more than 109 billions of dollars from the sale of all government securities offered, 28 billions more than the combined goals set for these drives. The sixth war loan, in itself, exceeded the entire finance program of World War I. Four Liberty loan drives and one Victory drive in World War I grossed $21,432,924,700. There were an estiated 66 million subscribers but most of this sum was raised by individuals, banks and business firms able to buy $10,000 and upwards in Liberty bonds. In this war more than 21 billion dollars, from 66 million persons were obtained in the sixth war loan drive alone!

People Pay 60 Per Cent of War Cost.

How has this voluntary program of war financing been used toward paying the cost of the war? Here are a few figures.

From May 1, 1941, the start of the war finance program, through December 31, 1944, the government spent 261 billion dollars. Of this amount 21 billions was used for non-war expenditures, including the interest on the public debt, leaving 240 billion spent on the cost of the war.

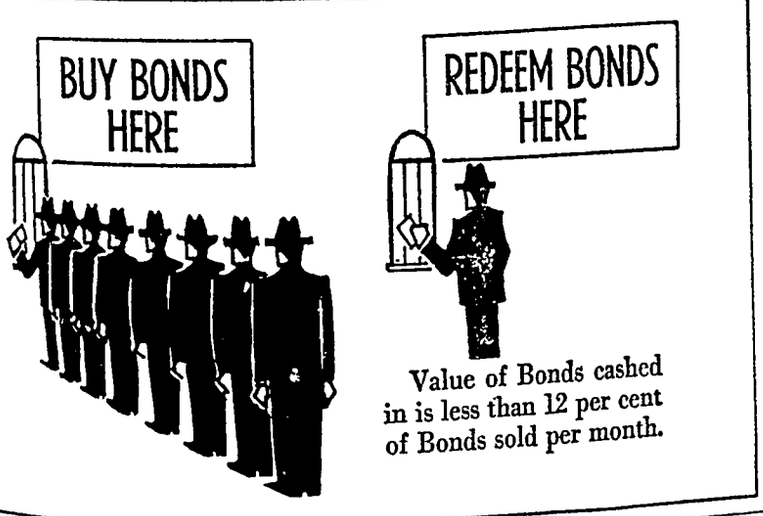
Out of this 261 billions, 101 billions, or 38.7 per cent of the total, has been raised through net receipts of taxes, so the excess of spending over tax receipts from May 1, 1941, to January 1, 1945, has been 160 billions of dollars.

During this same period the government has borrowed 178 billions of dollars through sale of governmental securities. This equals the 41 billion sold in war bonds and the 137 billion in other securities. Of this 178 billion, 75 billions have been borrowed directly or indirectly from banks. The rest, 103 billions, or 57.9 per cent, has come from non-banking sources, 42 billions of it from individual citizens.

The net of all this is that the American people are buying war bonds and that almost 60 per cent of the amount borrowed for the war cost has been paid by individuals and non-bankingg sources . . . they are buying bonds and holding $88 out of every $100 they buy, and the record indicates that they will keep on buying them so long as they are offered for sale, or so long as the nation needs their money to help finance this war.

It is a pretty safe bet that the treasury department, as a result of its experience with baby bonds before the war, and with war bonds since May 1, 1941, will continue in the bond business after the war is over. People have the habit of buying government bonds and there is no indication now that there will be any concerted rush to the banks to cash in these bonds when the war is over.

The very great majority of them will be held to maturity. And today bond buying is on a 24-hour basis, not only on the home front, but on every battle front where Americans are fighting to maintain the freedom and integrity of a government and a way of life of which these bonds are a symbol.



Value of Bonds cashed in is less than 12 per cent of Bonds sold per month.

Limit on Public Debt Will Have to Be Raised Again for 7th Loan

The ceiling on the public debt will ve to be raised again, treasury ficials say, to make room for e seventh war loan. This next big rive will open in May or June. ongress will be asked to push up e limit once more. The boost the easury wants is from the present 0 billion dollars to 300 billions.

The public debt outstanding now, maturity value, is $241,019,830,- 53. Thus there is margin of only 8,980,169,147 before the 260 billion dollar limit is reached. Considerably more than 19 billion dollars worth of bonds (maturity value) must be sold in the seventh loan.

In the sixth loan more than 28 billion dollars worth of bonds were sold figuring them again at maturity value. Since a large part of these were sold on the "three dollars will get you four in ten years" basis, the government realized about 21 billion dollars from the sale.

In his budget message on January 3, President Roosevelt stated that a further increase in the debt limit would be necessary before the end of the next fiscal year, which would be on June 30, 1946. Financial commentators expect that two boosts will be required before that date, since the President estimated that the public debt would stand at 292 billion dollars by the middle of 1946. At maturity valuation, this would mean considerably more than 300 billion dollars.

THE COST OF DISCIPLESHIP

LESSON TEXT—Matthew 19:16-26, 29.

GOLDEN TEXT—If any man will come after me, let him deny himself, and take up his cross, and follow me.—Matthew 16:24.

What you have is not your own. In fact, if you are a Christian, both you and your possessions belong to God (see I Cor. 6:20; 7:23). To be His disciple involves the recognition of the fact that life is essentially a stewardship, holding our property and our persons in trust for Him.

The cost of discipleship is one which should be candidly faced. It is far more than the cost of joining a church or subscribing to a creed. That may and often does mean little or nothing, but to be a follower of Christ calls for thinking and living in accordance with His standards. We must—

I. Think Right About God (vv. 16, 17).

The picture of this rich, intelligent young man, a leader in his community, coming to Christ with his eager quest for eternal life is a most attractive one. He recognized Jesus as a master in Israel and a good man.

His thinking about our Lord did not go far enough, and Jesus corrected him at once. He pointed out that if he recognized Him as good, then He must be God. Far from disclaiming divinity, Jesus declared here that everyone who thinks right about Him must agree that He is God.

It is of the highest importance that the follower of Christ be clear that his master is God. Otherwise, his attitude toward Him will reflect his defective viewpoint, and his witness concerning Him will lead men astray instead of aright. Correct doctrine is vitally important as the foundation of real discipleship.

The one who thinks right about God will—

II. Live Right With Others (vv. 18-20).

The commandments to which Jesus referred were those which concerned a man's relationship to his fellow man. There is to be no violence to another person, no deceit or trickery, no dishonoring of confidence, but an active interest and love for one's neighbor as well as one's family.

The disciple of Christ cannot effectively serve Him in this world without a proper attitude toward others. He must not sin against them, that is clear; but what is more, he must be known as one who loves them.

Note that this young man could honestly say that he had kept these commandments. Few of us could make such a claim, but he did. And Jesus did not question it or rebuke him. In fact, He loved him for it (see Mark 10:21).

What a fine character this young man had, what limitless possibilities for usefulness, what promise for the future! But something was lacking, something stood in his way. Jesus went directly to the heart of his trouble and told him that he must—

III. Act Right About Money (vv. 21-26).

Toward persons, his life was rightly related, but toward his possessions—ah, that was another matter. He was rich and his money stood between him and God, between him and a life of service and spirituality.

When a man has money and uses it for God's glory and the good of his fellow man, it is a blessing to him and to others. But when money lays hold of a man, and it has him instead of his having it, spiritual disaster is ahead, and not far away.

It is proper to be prudent, thrifty, and ambitious, but when the gathering of wealth becomes the uppermost thing, even these worthy qualities become the enemies of a man's soul.

Note the astonishment of the disciples (v. 25). They, too, though they had little or nothing, had been smitten with the awe for riches.

Do not miss the glorious assurance of verse 26. Nothing is impossible with God. He can even save a rich man, and does it!

Now there is more to discipleship than sacrifice. God has a recompense for His children. Let us

IV. Expect the Right Reward (v. 29).

No one has ever lost anything by serving the Lord. He gives liberally and makes a hundredfold return for every sacrifice we make. Christian workers can testify that God has literally fulfilled this promise to them.

But the greatest reward of all waits beyond the end of this earthly life. Over yonder there awaits us the prospect of eternal fellowship with the Lord we love and serve, and with all those who share with us the place of being disciples, followers, and servants of Christ.

This life brings many precious moments of joy and satisfaction. There is friendship and comradeship in labor. There are a thousand blessings even here, but the greatest of all is the prospect of being forever with the Lord.

An Old-Fashioned Patchwork Quilt Aglow With Color in Today's Setting

By Ruth Wyeth Spears

AN OLD-FASHIONED crazy-patch quilt aglow with color and quaint stitchery makes a decorative slumber throw for the sofa in today's living room. It picks up and repeats all the room colors and the hit-and-miss pattern harmonizes with furnishings old and new.

In Victorian days great grandfather's cravats were the source of many a rich piece of silk for these quilts. Why not look over the old ties that G.I. Joe left behind with an eye to the same purpose? The ends are always good no matter how worn the center part may be. Collecting bits of bright silk, ribbon and embroidery thread will be an exciting hobby and it costs nothing.

* * *

NOTE—BOOK 2 of the series of 32-page booklets offered with these articles gives complete directions for making crazypatch quilts with dozens of diagrams showing the old-fashioned embroidery stitches used. Copy of BOOK 2 will be sent postpaid upon receipt of 15 cents with name and address. Write to:

MRS. RUTH WYETH SPEARS

Household Hints

For a grease spot on wallpaper, try making a paste of cornstarch and water. Apply this to the spot and allow to dry. Then brush it off, and the spot will be gone.

—•—

To rewind the spring in the roller of a window shade, insert the flattened end in the lower part of a keyhole.

—•—

Real bed comfort depends largely upon the under sheet being tucked in so firmly it will remain smooth and tight. Miter each corner, then tuck under the sheet.

—•—

Use an old toothbrush handle to remove dried grease from plated parts on your car. It will not scratch the metal and it can be shaped to clean the grooves.

—•—

Instead of rooting and digging among the family's clothes to find the soiled ones for Monday's wash, give each member of the family a laundry bag or basket and have him bring his own clothes to the laundry room.

—•—

Thoroughly and frequently massage any reddened areas you notice on a sick person whom you are caring for at home. Keep pressure off such spots with a slightly inflated rubber ring or small soft pillows.

—•—

You can loosen the soil on white shirt collars and cuffs by scrubbing them with a small stiff vegetable brush that has been dipped in diluted bleach water and then rubbed on a cake of naphtha soap.

POST'S *Raisin* BRAN

GOLDEN FLAKES OF WHEAT AND BRAN COMBINED WITH SUGAR-SWEET TENDER RAISINS

delicious *NEW* breakfast idea

● A magic combination! Crisp Post's 40% Bran Flakes—plus tender, chewy seedless raisins...right in the same package. Delicious—nutritious—that's Post's Raisin Bran! Don't miss this wonderful new flavor sensation. Ask your grocer for *Post's* Raisin Bran, today!

It's New! *A Post Cereal*

"HOARSE for SENSE!" for COUGHS due to COLDS

really soothing because they're really medicated

F&F COUGH LOZENGES

Millions use F & F Lozenges to give their throat a 15 minute soothing, comforting treatment that reaches *all the way down.* For coughs, throat irritations or hoarseness resulting from colds or smoking, soothe with F & F. Box, only 10¢.

DUE TO MUSCULAR PAINS!

YOU BET you show it when those cruel pains shoot through arms, neck, back or legs. *Do something.* Rub on SORETONE Liniment. Get the blessed relief of Soretone's *cold heat* action. Quickly Soretone acts to:

1. *Dilate surface capillary blood vessels.*
2. *Check muscular cramps.*
3. *Enhance local circulation.*
4. *Help reduce local swelling.*

Developed by the famous McKesson Laboratories, Soretone is a unique formula. Soretone contains methyl salicylate, a most effective pain-relieving agent. For fastest action, *let dry, rub in again.* There's only one Soretone—insist on it for Soretone results. 50¢. Big, long-lasting bottle. $1.

MONEY BACK— IF SORETONE DOESN'T SATISFY

"and McKesson makes it"

SORETONE
soothes fast with
COLD HEAT* ACTION
in cases of
MUSCULAR LUMBAGO OR BACKACHE
due to fatigue or exposure
MUSCULAR PAINS
due to colds
SORE MUSCLES

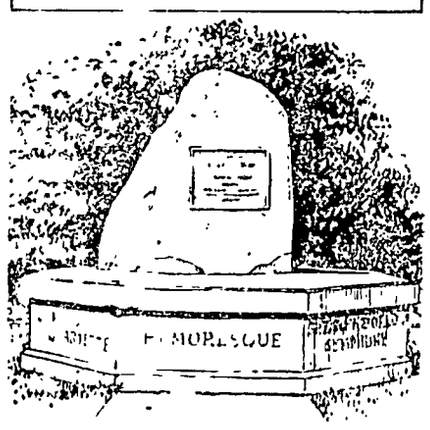
Bonds Over America



DVORAK MEMORIAL

Antonin Dvorak Bohemian composer, whose melodies which were recorded as String Quartette in F Major' Opus 96, in tiny Spillville Iowa, in 1893. The composition consumed only 12 days. Later Dvorak wrote "Theme With Variations," part of which, rearranged by Violinist Fritz Kreisler, became known as "Indian Lament." So that the spirit of freedom which inspires men and women to create masterpieces of artistic forms shall endure forever, U. S. men are suffering and dying. Home folks can at least lighten their trials by buying War Bonds to furnish them with munitions, food and medical supplies.

U. S. Treasury Department

Railroad Saves Paper By Thinning Tickets

CHICAGO. — To aid in the paper salvage campaign, a Chicago road is using thinned tickets.

By cutting down the weight of cardboard tickets from six ply to two ply, the Chicago & Eastern Illinois railroad reduced its paper ticket consumption by two-thirds, says J. L. Pilering, purchasing agent.

He said because of the difference in weight it has been necessary to caution ticket agents against passing out two tickets instead of one.

Wilhelmina Is Given British Order of Garter

LONDON. — Queen Wilhelmina of the Netherlands was invested with the Order of the Garter, the highest British order, by King George VI in a private ceremony, the Netherlands news agency Aneta reported recently. The Netherlands Queen thus became the only reigning foreign queen admitted since the order was founded by King Edward III in 1348.

Lifers Guinea Pigs In Plague Battle

Convicts Used in Fight on Tropical Diseases.

TRENTON, N. J.—Behind the gray walls of the sprawling state prison here, 200 convicts are paying off a debt to society by risking possible death in a grim, patriotic fight to unearth a preventive against tropical diseases. Most are lifers and all are long-time prisoners.

If they win, and their 1,000 fellow inmates are praying that they do, their only reward will be the knowledge that they helped the war effort by wiping out plagues which menace the health of fighting men on nearly all fronts.

Seventy of the 200 volunteers already have suffered intensely in the experiments undertaken by the army service forces and the Rockefeller institute for medical research.

The results of the research in the three-city-block prison are a closely guarded secret. But prison officials make no bones of their pride in the men. Only a few years ago bloody revolts and escapades rocked the prison's 10 buildings. But the setting was different when the army called for volunteers from among the lifers and other long-termers, and these men volunteered.

Then Dr. John Paul, professor of medicine at Yale university, and Maj. Albert B. Sabin, of the army service forces, and their staffs went to work on the human "guinea pigs."

Their aim was not a cure for the diseases. The army wanted its men immunized against the maladies which reduce ranks, put soldiers in beds, retard campaigns and sometimes lose wars.

These men were reputedly shot with malaria and dysentery germs. They were subjected to projects so secret that neither Warden Ellis nor the researchers would talk about experiments, results and progress.

Ellis admitted nearly all the volunteers suffered intensely, but they smiled through their ordeals. Many spent 10 agonizing days in bed, wracked by disease, and now are convalescing satisfactorily.

Chiggers, We Are Told, Also Prefer Blondes

LINCOLN, NEB. — The ubiquitous chigger, like gentlemen of two decades ago, prefers blondes, and has an unerring ability to locate same.

The pesky bugs seek and find thin-skinned victims, according to Extension Entymologist Don B. Whelan of the state agricultural college, and their keen sense of location leads them directly to the most likely source of food.

The majority of people fail to realize they have provided feeding ground until several hours after the unhappy event, he said, when small, red, itchy spots appear.

Whelan suggested a film of sulphur dust around the ankles, on the clothing, and at all likely points of contact to discourage the foragers' appetites. After exposure to the tiny tormentors, a drop of fly-spray on each bite will tend to kill the chiggers and soothe the itching, he said.

A warm, soapy bath was next on the entymologist's list of recommendations for scratching sufferers.

"If they have used sulphur on their skins, they'll need it," he commented, "and if they haven't, they'll need it even more."

Scoops Tree Leaves to Be Used as Luck Tokens

WITH ALLIED AIR FORCES ATTACKING SOUTHERN FRANCE.—Flying Frenchmen of the famous Lafayette escadrille and sister squadrons unleashed their Thunderbolts over their native land, supporting the Allied sea and air borne invasion which struck France's southern shore.

Each pilot of the P-47s with Tricolors painted on the tails carried a leaf from a tree in France next to his heart as he flew.

The French major who commands a fighter-bomber group supplied the leaves. He was strafing a train over France not long ago and swept so low he hit a tree. But the powerful Thunderbolt plowed on through and brought him back—with a big bunch of leaves decorating his plane. He divided them among his fellow pilots.

Bumper Rice Crop Bans Danger of Bengal Famine

CALCUTTA. — Crop prospects in the lush green rice fields of Bengal indicate that there will be no repetition of last year's famine. Calcutta a year ago was crowded with hungry hordes estimated at more than 250,000 men, women and children, while in other parts of Bengal thousands were dying of hunger and disease.

Yank Beats British Expert at Own Game

LONDON. — Sgt. Jerry Psycyolkowski of Philadelphia, a cook, has at last proved to the British that a dart in the hand of a U. S. soldier is a dangerous weapon. In the finals of a pub tournament, the sergeant beat a Royal air force expert, who claimed to have never before been defeated.

Simple Emulsion Removes Stubborn Grease Spots

For stubborn, greasy spots on painted or enameled woodwork that resist ordinary suds and water, home management specialists suggest a kerosene emulsion which can be easily prepared at home.

Excellent as a cleaner for painted, enameled and varnished wood surfaces, this emulsion works quickly and efficiently. To make the solution, dissolve one teaspoon of trisodium phosphate in a quart of hot water, 120 to 130 degrees Fahrenheit.

Melt three to four ounces of beeswax in an aluminum utensil. Remove utensil from the stove, and add two-thirds of a cup of kerosene. Slowly add the hot water solution to the melted wax-kerosene solution, stirring rapidly.

With a soft cloth, apply a small amount of the emulsion to the soiled woodwork, and rub dry, using a clean cloth. You'll be amazed at the speed with which it works—cleaning and polishing at the same time. The emulsion may separate while standing, in which case simply shake well before using again.

Moderate Climate

Despite the northern latitude, Finland's climate is moderate. Coastal waters temper extremes. Winter rules about four months in the south; seven months in the north. Average winter temperatures range from 25 degrees Fahrenheit in the south to 12 degrees in the north. Regional summer averages are 63 degrees and 53 degrees, respectively. Northern Finland has its midnight sun in summer and even in the south during the summer season there are only a few hours of darkness in the 24.

From the low southern and western coasts the land rises to central heights of 300 feet to 700 feet. The Koli mountains, near the eastern boundary, top 1,000 feet. Finland's highest peak, Haltia, lifts its summit 4,300 feet in the extreme northwest. Rivers are numerous and swift. Power from rapids has been used to a considerable extent for industries.

Different Species

A plum is a prune and vice versa since they belong to the same species, whatever the average consumer may think about the matter, say horticulturists. The two words were originally used for the same fruit, plum being the Anglo-Saxon and prune the French, although modern usage differentiates between the fresh fruit from standard plum trees and a particular type of the dried fruit and its fresh equivalent.

How or when prune came to mean the dried plum is not known, says the U. S. department of agriculture. Most plums ferment in the process if dried with the pit left in. Prunes dry successfully because they contain more sugar, firmer flesh and often more acid.

Today a prune is a plum with these particular characteristics, whether it is fresh, dried or canned. When plums are dried after the pits are removed they are called "dried plums," not prunes.

Mighty Palm

The carnauba palm increases in its productivity of wax and is said to reach its maximum at 50 to 60 years. Unlike most palms, the carnauba has a long life span and it is not uncommon for it to live 200 years. It grows to heights of from 50 to 60 feet. The palm requires plenty of sunshine and air and dwarfs the other vegetation around it. It prefers to grow along the banks of rivers and lakes, but it is also found in small isolated groves from the damp lowlands along the Brazilian coast to the forests of the interior. It is found on dry, sandy ground and resists the floods which sweep the countryside during the rainy season.

Oldest German City Dotted With Roman Ruins

Trier, German frontier town near Luxembourg, in the vicinity of which American forces made their first major penetration into German territory, is believed to be the oldest city in all Germany. It was established under the Roman Emperor Augustus and has had a colorful history for nearly 2,000 years.

Visitors to peacetime Trier were constantly confronted with the contrast between the old and the new: the ancient Roman ruins that are everywhere, and the comparatively modern city houses and buildings. Trier might be compared to a modern print whose golden frame has tarnished with age.

The city's modern tree-shaded, flower-bordered square, like that of most German cities, often witnessed the gathering of its citizens for summer concerts, winter sports, or autumn festivals. Since Trier was the center of the Moselle valley wine industry, the autumn grape-harvesting festivals were particularly colorful, some of the pageants incorporating old Roman customs.

The greatest architectural treasure is the Porta Nigra (Black Gate), reputedly built in the fourth century and considered by some antiquarians the finest Roman ruin north of the Alps. On the narrow crooked streets of the old town, this three-storied fortified Roman gate still stands. With its two entrances and well-built foundations, it recalls the early periods when the city had to defend itself against its foes.

Less than five families out of 100 in the United States today employ a fulltime servant.

Santa Fe, N. M., originally an Indian pueblo, claims the title as the oldest town in the country.

Star of German Films Blackballed in Sweden

STOCKHOLM. — Zarah Leander, Swedish actress of the German film industry, announced today she would not appear in the Karl Gerhard revue in Stockholm this fall because of the strong protests of Danish and Norwegian refugee artists in Sweden.

She had already signed a contract with Gerhard, noted Swedish producer and notably pro-Allied.

Beauteous Zarah even got in trouble with the Nazis after she signed the contract—they banned all her recordings from Germany.

'Thought Capsules' Are Now Aiding Alcoholics

NEW YORK. — "Thought capsules" are contributing to rehabilitation of alcoholics, says Edward McGodrick, director of the bureau of alcoholic therapy.

Of the 17 "thought capsules" this is typical:

"I know I must abstain from alcohol, not merely for the sake of others, but first and foremost for my own self-esteem. . . . An alcoholic is made, not born. . . . I do not need alcohol. . . . I know from my own personal experience that drinking never solved a problem for me."

GI Art Professor Will Help Restore Cassino

ST. PAUL, MINN. — After the war, Pvt. Frank Kacmarcick, 25, of North St. Paul, hopes to take a hand toward restoration of masterpieces of Beuron liturgical art, destroyed in the bombing of Monte Cassino.

Private Kacmarcick is a graduate of Minneapolis school of art, and expects to return after the war to St. John's university, Collegeville, Minn., where he taught art for five years. He has specialized in the study of Beuron art, so called because it originated in the Beuron Benedictine abbey in Germany.

The earliest exporers of New Mexico were Spaniards who long held possession of the region.

The name Nebraska is of Indian origin and signifies "shallow water."

Obituary Of John Johnson

JOHN AGARD JOHNSON was born Feb. 13, 1867 in Nottja, Sweden, the second of a family of four children born to his parents, C. M. and Ingrid Johnson.

Mr. Johnson attended the public schools of Sweden, and became a member of the Swedish Lutheran Church at Nottja, by confirmation.

At the age of 13, Mr. Johnson, together with his parents, his brother Joseph and his sister Hulda moved to America. The family made their home in Seneca, Illinois, in 1880.

In the year 1900 John A. Johnson and Hilma C. Arvidson were married in Milwaukee, Wisconsin. This union was blessed with six children, five of whom survive.

In 1902 they moved to Klemme and have been a part of our community for 43 years. Mr. Johnson was a farmer all of this time except for six years during which time the family lived in the town of Klemme.

In 1914 Mr. and Mrs. Johnson and their children went to Sweden for a visit with friends and relatives, after which they purchased a farm a mile east of Klemme and built their present home.

Mr. Johnson was kind and cooperative ... his neighbors, hence he had many friends. ... Johnson was sick a few months, but bed... only two weeks; the end came Sunday mo... ing, March 4, 1945. He reached the age of ... years and 19 days.

He was preceded in death by his sister H... da in 1904; his brother Oscar in 1901; and ... his son Fridolph who died at the age of ... months.

He leaves to mourn his passing his w... Mrs. Hilma Johnson; one brother, Joseph ... Johnson of Klemme; five children: Han... Bertha and Doris of Klemme; Ruth, now ... Donald Carson of Des Moines; Ethel, ... Truls Steffens of Waterloo; five grandchildr... Jacqualea, Judith and James Steffens, ... Roger and Larry Johnson.

"They are not dead. They have but passe...
Beyond the mists that blind us here,
Into the new and large life
On that serener sphere."

HINTS FOR HOME BAKERS

...hole-Wheat Rolls in Jiq Time!

...lake them with Fleischmann's yellow label Yeast— the only yeast with those EXTRA vitamins

SPEEDY WHEAT ROLLS

...cups milk
...tablespoons molasses or dark brown sugar
...½ teaspoons salt
1 cake Fleischmann's Yeast
5 cups whole-wheat flour (Graham)
1 cup sifted white flour
4 tablespoons melted shortening

Scald milk; add molasses or sugar and salt; cool until lukewarm. Crumble in yeast and stir until dissolved. Add half the flour and beat until smooth. Add melted shortening and remaining flour, or enough to make an easily handled dough. Knead thoroughly, keeping dough soft. Place dough in greased bowl, cover and let rise in warm place, free from draft, until doubled in bulk (about 1½ hours). When light, shape into rolls and place in well-greased pans. Cover and let rise again until light (about 1 hour). Bake in hot oven at 400°F. about 20 minutes. Makes 2½ dozen.

FREE!
Fleischmann's Famous Recipe Book in New Wartime Edition!

Find Penicillin Aids in Skin Grafting on Burns

Penicillin appears to be the solution to one of the chief problems involved in early skin grafting of burned areas, John Winslow Hirshfeld, M.D; Matthew A. Pilling, M.D.; Charles Wesley Buggs, Ph.D, and William E. Abbott, M D., Detroit, report in the Journal of the American Medical association

They report that from their experience with 17 patients to whom penicillin was administered at the time of skin grafting they believe that the use of the drug permits early grafting and also appears to prevent the loss of skin from infection that ordinarily occurs in about one-third of the cases in which split thickness grafts are placed on contaminated recipient sites Nineteen split thickness grafts were performed on the 17 patients With one exception, from 90 to 100 per cent of the transplanted skin took in every instance, the exception occurring in an uncooperative alcoholic addict on whom 80 per cent of the grafts took.

"Before penicillin was available," they say, "we performed over a hundred grafts on patients with third degree burns Although many excellent takes were obtained, in about one-third of the cases 25 per cent or more of the graft was lost because of the occurrence of infection. Therefore the consistency with which excellent takes were obtained in this series of 19 grafts has been very impressive to us. . . ."

Panning Helps Retain Fresh Vegetable Flavor

Homemakers will save food value and flavor of their fresh garden vegetables by panning them. A heavy pan with a tight-fitting cover should be used so that vegetables can be cooked in their own juices with just enough fat to season Prepare vegetable for cooking and allow about two tablespoons of fat for each quart of vegetable.

Melt fat in the pan, add vegetable and cover to hold in steam Cook vegetable slowly until just tender but not mushy Stir vegetable occasionally or shake pan to prevent sticking When ready to serve, season with salt and pepper Many August vegetables are just right for panning Thinly sliced green beans shredded cabbage diced summer squash, spinach, kale and sliced okra lend themselves to pan cooking

Homemakers can add a few extra touches to vary the flavor Chopped chives, onion or parsley may be panned with the vegetable or added just before vegetable is tender Snappy cheese or crisp bits of meat also may be sprinkled over vegetable just before serving. Adding milk or cream slightly thickened gives another variation Sift flour lightly over cooked vegetable and blend well Add milk or cream and simmer until thickened, stirring to prevent sticking

Made Thicker

Pipe and fittings are made thicker than is required to sustain water pressure This is to guard against corrosion and the strains caused by cutting threading, and joining pipes and by the expansion and contraction of pipe lines All waters and soils corrode the action being particularly noticeable at threaded joints in wrought pipe The results are "red water," reduced capacity and shortened life Sometimes the bore is clogged or closed with a rusty coating or deposit long before the pipe wall is destroyed.

Ordinarily, small black wrought pipe in the ground should last 10 to 20 years, galvanized steel, 15 to 30 years, galvanized wrought iron, 20 to 40 years, lead and cast iron, 40 to 75 years It is, however, not uncommon to find lead and cast-iron pipes sound after 80 to 100 years, and, except for slight external corrosion, cement-lined black wrought pipe has been found in excellent condition after 40 to 60 years in the ground

Dangerous Speeds

A car traveling 40 miles per hour is moving as fast as if it had fallen from the top of a four-story building—and if it hits something solid the effect is just as bad It should be remembered, too that a car can be stopped in about 75 feet when traveling at 30 miles per hour, but it takes 25 feet to stop at 60 miles per hour. A mile-a-minute speed is equivalent to 88 feet per second, which means that in an emergency the car will travel 50 feet or more before the driver can move his foot to the brake pedal. If the driver will always choose his speed so that he can control his vehicle in any emergency, it is not probable that there will be any emergency.

Black Walnuts

Choose a half-bushel or so of good-sized black walnuts, knock off the outer green husks, and drop them along three inches apart in a furrow two inches deep, and cover them. Next spring, if the squirrels do not discover this cache, a fine row of black walnut seedlings should develop They will be ready to set out in a permanent location as one-year-old seedlings Once established in good soil, black walnut will increase in diameter at the rate of one inch in five years for a half century or more, if the crown is kept free.

Bonds Over America

CAESAR RODNEY

After a ride that rivals Paul Revere's, Caesar Rodney broke a tie vote in Delaware's delegation to the Continental Congress at Philadelphia on Lee's resolution for independence. Late on July 1, 1776, he arrived home after quelling a revolt in Sussex County where he received an urgent summons to Philadelphia. Mounting a horse, he rode through the night and arrived in the northern city in time to place Delaware with the other colonies backing the resolution. That spirit of service animates Delaware people in buying War Bonds today to insure liberty for future generations.

U. S. Treasury Department

Flea Development Is Similar to Other Insects

Fleas have four stages in their development similar to many other insects. However, people seldom realize this fact. The immature stages of the flea are spent in dry loose soil, similar to that found in cracks in the floor or under the porch of a house. The young flea or larva feeds on organic matter and doesn't bite or feed on fresh blood. In fact, it doesn't look anything like an adult flea. It is about one-fourth of an inch long, very slender, with a brown head and white body.

Fleas may be controlled in the yard with one part of 40 per cent nicotine sulphate in 150 parts of water to which has been added enough soap to cloud the water. They may also be controlled by sprinkling creosote, crude petroleum or used oil about the areas in which they are breeding. Fleas in the home may be controlled by closing the doors and windows in the infested room and spraying liberally with a household fly spray.

New Mechanical Brain Directs Pilots' Gunfire

A new "mechanical brain" gunsight which directs the machine-gun fire of combat planes is giving Allied pilots greatly increased shooting efficiency in the European theatre. The pilot "dials" the type of plane his enemy is flying, the range, and other factors, and the gunsight electrically directs his accurate, hard-hitting fire from there on.

The instrument is an electrical-gyro computing mechanism consisting principally of a sighting head through which the pilot sees the target. Superimposed on the target, he sees a circle of illuminated dots produced by the sight mechanism. The pilot's task is to keep the enemy target within the gyro-controlled circle.

As he goes in to attack, the pilot makes a few simple adjustments. He turns a lever to "inform" the sight of the wing span of the plane he is attacking by another device. He adjusts the circle of dots to circumscribe the varying size of the plane as it approaches or recedes. This combination of adjustments on the pilot's part furnishes the necessary information so the sight can compute the target's range. The pilot also adjusts other controls that provide the sight with air-speed and altitude data.

Paper Most Widely Used Of American Commodities

The per capita consumption of paper in the United States is greater than that of any other commodity, with the exception of water and milk, and is more than twice that of meat, Dr. Martin Williams of the University of Alabama says in a survey of "Economics of the Kraft Paper Industry."

In 1941, when the per capita consumption of paper was 300 pounds, the consumption by classes was as follows: paperboard, 123 pounds; newsprint, 59; wrapping paper, 40; book paper, 30; fine paper, 11; tissue paper, 14; and all other kinds, 22.

"This annual consumption is expected to increase for several years with the largest expected increase in boards, wrapping and bag papers, for which a large part of the present kraft production is now used," according to Dr. Williams.

"The use of kraft pulp in the manufacture of all other types of paper is also expected to increase and it is possible that the total annual kraft pulp capacity in the United States will reach 7,000,000 tons by 1950, a 33 per cent increase over 1943."

Dried Foods

Drying is one of the many ways to save surplus foods. Though it should not take the place of freezing, canning, or storing, drying can supplement the stores of preserved foods and add variety to winter eating. For years, corn and apples have been dried satisfactorily. A wide variety of other fruits and vegetables may be dried, but before starting an extensive program, one should know whether the family likes dried foods, which foods are suitable for drying, and whether good procedures can be followed. In winter the dried foods need to be supplemented with fresh ones to assure the family of a palatable and nutritious diet.

Iron Boats

Britain turned experimentally to iron in shipbuilding largely because her supply of shipbuilding timber had become very scarce and expensive. Canal boats of iron were used as early as 1788. As time passed, larger ships were constructed and one, "Ironsides," a sailing vessel, actually sailed across the Atlantic in 1839. A few iron steamers were built, and showed interesting possibilities. The ironmasters of England shrewdly sensed industry possibilities in the trend, formed a trade association for the sole purpose of promoting the use of iron for shipbuilding and to cooperate in the solution of the engineering problems.

New Tests

As a result of recent developments in chemical methods for the determination of vitamins in foods and pharmaceutical products, the use of test animals such as rats, guinea pigs, etc., for estimating these nutrients, has decreased markedly. The chemical methods are far more precise and rapid than the biological technics and less costly. However, the chemical procedures for liberating the vitamins from the materials to be tested are not exactly duplicated in the human digestive system. Thus all of the vitamin found in a product by chemical analysis may not be completely available to the body, the unavailable portion being of no nutritional value.

Paint Roads

In a normal year, approximately five million gallons of traffic marking paint are used on this country's roads and streets. Such paints are applied by states, counties, cities and towns. The traffic requirements of some states alone will run as high as one hundred thousand gallons annually, says this estimate. It is commented that only formulas characterized by extreme toughness of film and outstanding weathering properties have any chance of survival in meeting the requirements for road marking.

One of the most sensitive explosives in the world is nitrogen ...dine. It will explode if touched lightly with a feather.

Tobaco growing is forbidden by law in Egypt. Turkey grows most of the tobacco used in "Egyptian" cigarettes.

Japanese ladies visit beauty parlors regularly, to have their ears cleaned.

Chinese women bear an average of nine children each.

More white flowers are grown by nature than flowers of any color.

Kidneys Must Work Well

For You To Feel Well

24 hours every day, 7 days a week, never stopping, the kidneys filter waste matter from the blood.

If more people were aware of how kidneys must constantly remove plus fluid, excess acids and other waste matter that cannot stay in the blood without injury to health, there would be better understanding of why the whole system is upset when kidneys fail to function properly.

Burning, scanty or too frequent urination sometimes warns that something is wrong. You may suffer nagging backache, headaches, dizziness, rheumatic pains, getting up at nights, swelling.

Why not try *Doan's Pills*? You will be using a medicine recommended the country over. *Doan's* stimulate the function of the kidneys and help them flush out poisonous waste from the blood. They contain nothing but Get *Doan's* today. Use with confidence. At all drug stores.

SNAPPY FACTS ABOUT RUBBER

During at least the first three years following the end of the war, experts believe that 70 million tires will be needed annually in the U. S. alone. The peak year, 1941, saw a production of 62 million tires in this country.

Greater use of mechanical farm implements in post-war years is expected to make agriculture one of the largest consumers of rubber.

Despite the Far East war, the Foreign Economic Administration expects that 73,100 tons of natural rubber will be shipped to the U. S. from Ceylon and India during 1944.

Brazilian Cooperatives Showing Rapid Growth

Brazil's cooperatives, organized by private initiative and actively aided and encouraged by the government, have become such an important factor in the country's economy that many competent observers believe that they will influence Brazilian trade after the war.

The growth of cooperatives has been so rapid in recent years in Brazil that accurate computations of their number and membership have been difficult. The most authoritative estimates, however, place their present number at approximately 1,800, and their membership at about 300,000, with the states of Sao Paulo and Rio Grande do Sul taking the leadership in cooperative activity.

In fact, the history of the Cooperative Central Agricola of Sao Paulo might well be called synonymous with the history of the state's rural economy. Organized in March, 1943, the CCA now has 31 cooperatives and 28,000 members, representing some 120,000 rural workers. Aided by credits from the Bank of Brazil and from the Carteira Rural of the Sao Paulo State bank, it has organized a sales division to improve sales facilities and stabilize prices, an orientation section for members, and cooperative social services which include hospitals, pharmacies and experimental schools. At present, it is taking steps to acquire machinery and supplies to meet the demands of its steadily growing membership.

Bread Stuffings Good Way to Stretch Meat

Bread stuffings is a de luxe method of stretching the family meat dish, homemakers say. Less expensive cuts of meat can be made a special treat by serving a stuffing with them. Servings of meat may be smaller in size when supplemented with a well-seasoned tasty dressing.

Some of the meats which take to stuffing are veal or beef birds, shoulder or breast of lamb, spareribs, flank steaks, roasts of all kinds and a variety of other meat dishes. Even hamburger can be dressed up by spreading a layer of meat in a greased pan, covering with a layer of stuffing, topping it off with another layer of meat, and then baking in a hot oven.

There are only two main types of stuffing, wet and dry. In dry stuffing the only moisture is fat, while the wet type has milk, water or broth added. With the wet type, caution is taken not to add too much liquid because the stuffing will absorb juices during cooking. For the base of the stuffing use enriched white or whole wheat bread, corn bread or other whole grain bread. A wide variety of stuffings is made possible by adding such ingredients as mushrooms, oysters, sausage meat, crisp bacon, diced salt pork, raisins, nuts, apples, etc.

Find 19 Different Types of Storage Needed in Homes

Roughly, 19 different types of storage space are needed for the family-type home. Space should be allotted for wraps for children and grown-ups; for vehicles, outdoor games, indoor interests, correspondence, clothing in daily use, and for sewing and mending.

You will also want to measure for kitchen equipment and materials and for food reserves, including canned and frozen foods and root vegetables. General storage for articles in seasonal use, such as porch furniture, screens and storm windows, and an air-tight space for woolens and furs must be considered.

Also to be included in your planning is space for luggage, bedding, linen and towels; china, glass, vases, candle-holders, silver, trays and electrical equipment; medicine, first aid and toilet supplies; cleaning utensils, laundry supplies and equipment; fuel for furnace and fireplace; garden tools, stepladder, lawn mower and hose, and refuse and waste.

U. S. Opened Jap Door To Foreign Commerce

Japan was first known to Europeans through Marco Polo, who heard of it from the Chinese, at the end of the 13th century; but the country was not visited by any European until it was found by the Portuguese adventurer Mendez Pinto in 1542. Christianity was introduced into Japan by St. Francis Xavier, who landed at Kagoshima in 1549.

Early in the 17th century the first visit of English and Dutch to Japan took place; the Dutch concluded a commercial treaty, but the English would not accept the conditions under which trade would be allowed by the Japanese, and intercourse between the last two countries soon ceased. In 1854 Commodore M. C. Perry negotiated a treaty for the United States with Japan, which virtually opened the country to foreign commerce, as soon after, Great Britain, France, Russia and Prussia also concluded treaties with Japan.

The long chain of islands, which together with the peninsula of Chosen (Korea) comprises the empire of Japan, extends from south to north along the east coast of the continent of Asia. Kiushu, Shikoku, Honshu and Hokushu (Hokkaido or Yezo), which constitute the central group, are usually known as Japan proper, while north of Hokushu lies the Chishima Retto and Karafuto, the southern part of Sakhalin island, and south of Kiushu lie the Nansei Shoto and Taiwan (Formosa). The islands of the empire extend for about 2,100 miles with a width of 200 miles at their widest part, containing an area of 175,476 square miles, about 15 per cent of this total area being taken up by Taiwan and Karafuto. Japan proper contains 147,652 square miles. Of this central group Honshu takes up 86,772 square miles; Hokushu, the next largest, has an area of 29,977 square miles; Kiushu is 15,587 and Shikoku 7,031 square miles in area.

Ornamental Plants Grow Well in Shady Places

Ornamental plants for shady places are not so rare as some people seem to think, and some are among our most attractive flowers.

The columbine, one of the attractive perennials, prefers the sun not more than half the day. Plants grow four feet high and the flowers are large. Among the perennial phlox, the white variety, Mia Ruys, does very well in shade, according to the floriculturist. All of the plantain lilies are shade lovers. Hosta sieboldiana and Hosta plantaginea grandiflora are large-flowered sorts whose bold foliage masses add a fine contrast to the delicacy of columbines.

The large-flowered forms of clematis are good for trellises in the shade. This is especially true of such delicately colored forms as Ramona and the very large-flowered white, Henryi.

All these flowers are fine for the north side of a house. Where the shade is caused by trees or shrubs, it must be remembered that there is a shortage of water and nutrients as well as light. Frequent waterings and occasional applications of commercial fertilizers will enable the gardener to grow these shade plants even in the difficult location under trees.

Neat Pleat

To press a neat pleat in wool or rayon skirts so the fold will not leave an imprint or shiny mark that shows when the pleat swings open, take a tip from the tailor and use a strip of lightweight cardboard or heavy paper. Cut the strip from an old suit box or the cardboard stiffening in shirts returned from the laundry. Have the strip the length of the longest pleat and three or four inches wide. The strip must be wide enough to slip into the inside fold of the pleat and also extend several inches past the outside fold. Insert the cardboard and press. Remove just before finishing the press job. A cardboard strip is also helpful in pressing facings or seam edges that are likely to mark through.

McGOOFEY'S FIRST READER

This is a steer.
Where is the steer?
The steer is on the ranch.
Will the steer leave the ranch?
We hope so.

—*—

What are those things on the steer's head?
Horns.
Are they **necessary?**
Well, you have to use something in hamburgers!

—*—

Oh, see the steer's tail!
Yes, it is a long tail.
What is the tail good for?
If the war lasts long much longer you will find out.

—*—

The steer looks nervous.
You would look nervous, too, if you were a steer.
What makes the steer nervous?
The Government, Chester Bowles, the Black Market, the Rancher, the Ultimate Consumer, etc.
Why do they make the steer nervous?
The steer knows that he would get better protection under the rules of bullfighting.

—*—

The steer looks round-shouldered.
Yes, and so would you if you were in its place.
What makes the steer round-shouldered?
He gets that way standing under the ceiling.
Does the steer have to stand under a ceiling?
Come, come, don't you ever read the papers?

—*—

Why does the steer stand under a ceiling?
To get across the street.
What street?
Pennsylvania avenue.

—*—

Oh, look!
What's happened?
The ceiling seems to be changing.
Yeah.
It seems to be going up?
It is going up about four dollars.
Why are they giving the steer a new ceiling?
It seems there was agitation.

—*—

Who agitated?
The butcher, the OPA and the people who were tired of mutton and pork.
Do people eat ceilings?
No; the beefstews only taste that way.

—*—

Now that the ceiling is higher will the steer cease to be round-shouldered?
Round or flat you'll be glad to get it. You can depend on one thing.
What is that?
The consumer will become round-shouldered.
Why?
Looking for a meat market where ceilings make any difference.
(End of Lesson)

* * *

THE CLOTHING INQUIRY

Washington is getting after the clothing situation. It is out to roll back the prices of shirts, drawers, rompers, suits, dresses and what not.

—*—

It's about time. It has been thinking too much about beef and not enough about shorts.

* * *

What is important to the average American, more hamburgers or more underwear?

—*—

There hasn't been as much of a public howl over the high costs of dressing because the uneven distribution hasn't been so glaring. It is not easy to tell when one man is getting the best shirts. Or whether Mrs. Beemish is able to buy the choicest cuts of undies while Mrs. Mooney hasn't been able to get anything but the roughest lingerie in a year.

—*—

Unlike the situation in the meat crisis, you have not been able in a clothes shortage to go down to Joe's place and get all the apparel you wanted.

—*—

If down to your last pair of pants, you couldn't go to a smart restaurant and get them in all styles and colors at a price.

—*—

We haven't heard of a "black pants market." But it may come soon.

—*—

It may take points to get a pair of socks, a pair of pajamas or a vest before long.

* * *

Mrs. Whitney said the shortage of women in Alaska was accompanied by an "absence of other things—there are no insects, no rodents, no dust, no poison ivy."—Newspaper item.

—*—

Is that putting it nicely?

* * *

General Homma of Japan says, "It is assumed that the Japanese Grand Fleet will now abandon its passiveness." What the general means is, "Come Out, Come Out, Come Out Wherever You Are."

SEWING CIRCLE PATTERNS

Shirtwaisters Are Top Favorites Buttons and a Bow for Accent

Smart Shirtwaister

SHIRTWAIST frocks have won a favored spot in every wardrobe. They're versatile, smart and a boon to the busy homemaker. This button-front model has a set-in belt and graceful figure-molding skirt.

* * *

Pattern No. 1280 is designed for sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36, three-quarter or short sleeves, requires 3⅞ yards of 35 or 39-inch material; 2⅝ yards of 54-inch material.

Frock for Tot

FOR a young miss, a dainty long-waisted frock she's sure to love. The Peter Pan collar and cuffs are edged in gay ric rac, and the bodice boasts a parade of buttons. One of the prettiest frocks for a tot you'll see.

* * *

Pattern No. 1279 is designed for sizes 2, 3, 4, 5 and 6 years. Size 3 requires 1½ yards of 35 or 39-inch material; ¼ yard for contrasting collar; 1⅝ yards ric rac to trim.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

KINDERGARTEN, FIRST AND SECOND GRADE NEWS

—Miss Arlene Bugh, Teacher

The following children had a perfect attendance during the last six weeks:

Honor Roll

Berleen Bridges
Martin Brinkman
Janice Stokesbary
Barbara Thompson
Dennis Wilson
Roger Bachman
Jimmy Karsjens
Adeline Medaus

Spelling Honor Roll

In Spelling Graydon Barz had a perfect record.

In Art, we made Easter Rabbits and Easter baskets from construction paper They are very pretty above our blackboards.

ANNUAL SCHOOL ELECTION NEXT MONDAY, MARCH 12

Three Directors Have Filed; Two Are To Be Elected

The regular annual school election will be held at the Community Building in Klemme next Monday, March 12th to choose two directors, each for a three year term, and one treasurer for a two year term.

The polls will open at 12 o'clock noon and will close at 7:00 p. m.

Candidates for school directors for the Klemme Independent District are: Ed. J. Thompson, Harvey E. Barz and Henry F. Jost.

F. A. Arnold is the only candidate for the office of treasurer.

Two Candiates At Goodell

At Goodell E. C. Kienenberger and Ralph Larson are the two candidates filed, two to be elected.

BUNTENBACH BOUGHT FARM NEAR GARNER LAST WEEK

Last week E. C. Buntenbach of Klemme purchased the Sprole farm about one mile southwest of Garner This is one of the best improved farms near Garner.

Mr. Buntenbach says he intends to farm the land himself this coming season.

Local Happenings

Klemme and Vicinity

Mr. and Mrs. Fred Barz were Mason City visitors Thursday.

Mr. and Mrs. John A. Chambers were at Mason City on business last Thursday.

Mrs. Rose Lewis and son Duard, were supper guests at the Verner Lewis home Thursday evening.

Mrs. Wm. J. Barz of Garner was visiting with Klemme relatives last Thursday.

Kermit Stille and family of Thornton and Mrs. J. J. Stille visited at the Virgil Stille home Sunday evening.

Dr. Earl Burgess of Algona, district superintendent, preached at the Klemme and Liberty Methodist churches Sunday morning.

Mr. and Mrs. August Lau, and their daughter-in-law, Mrs. Norman Lau, were Mason City visitors Thursday.

Editor and Mrs. A. M. Cox of Ayrshire, Iowa, came Thursday and visited until Friday at the home of Mr. and Mrs. Leith

Seaman Leo Blumer came home last week from Great Lakes on a furlough visiting his parents, Mr. and Mrs. Walter Blumer and family.

Mrs. Kermit Schlei has been assisting at Marie's Beauty Shop the past week as Miss Blank was unable to work because of a felon on her thumb.

Frank Ward has resigned his position as fireman at the Belmond soy bean aplnt because of a heart ailment. Frank says the doctor advised him to do outdoor work

Charles Gibbs, who has been ill with pneumonia at the home of his sister, Miss Anna Gibbs, is now reported to be much better and is able to be up each day.

Jimmie Posz and Richard Millington of Mason City, spent the week end visiting with Francis Sherwood at the home of his parents, Mr. and Mrs Lloyd Sherwood

Mrs. A. L. Kingery is recovering from her illness and was able to go up town for the first time the latter part of the week since early in December. Mrs Kingery has been ill with heart trouble.

Mr. and Mrs Lee Anderson and daughter, Linda Lee, of Charles City came Saturday evening and spent Sunday at the home of Mr and Mrs. Lester Stille. Mrs. Anderson is Mr. Stille's sister.

Miss Eunice Larsen, who is a student at Iowa University, Iowa City, came Friday morning and visited until Sunday evening with her parents, Mr. and Mrs. C. A Larsen and son, Junior.

Mr. and Mrs. George Wilcox and grandson Roger, of Minneapolis. Mr. and Mrs. Connie Krug and Mrs Art Costello of Mason City, visited with Mrs Lyle Wilcox at the C. G. Waterman home Sunday evening.

Mr ad Mrs. Wilson Sandry moved a small house into town Friday to one of Mrs. Ernest Schuldt's lots in the southeast part of town. We understand Wilson expects to be called into the service soon and his family will live in town for the duration .

Sunday dinner guests at the home of Mr. and Mrs. Lloyd Sherwood were his mother, Mrs. Nellie Sherwood and his two sisters, Opal and Ena May; and Mr. and Mrs. A. L. Norris and daughter Phyllis; Jimmie Posz and Richard Millington, all of Mason City.

Mr. and Mrs. Geo. Schoenwetter received a long distance telephone call Friday evening from their son Sgt. Homer Schoenwetter, who is now stationed at Kearney, Nebraska Sgt. Schoenwetter stated that he expected to leave soon for overseas duty. He is a mechanic in the air corps.

Mrs. Harold Wicks received further information from the War Department regarding her husband, Lt. Wicks who was reported missing in action over the Pacific. Lt. Wicks was co-pilot on a B-25 bomber at the time and was not flying alone in a P-38, which had been his previous duty.

Mrs. Hod Lawhorn of Garner, spent Tuesday visiting at the Geo. Lawhorn home.

Mrs Max Mace has been ill and is staying with her sister in the country.

Mr and Mrs John Micklick and two children of Hanlontown were six o'clock dinner guests at the A. L. Kingery home Sunday.

August Lau became ill Tuesday and was taken to the Mercy hospital.

Mrs. Conrad Quandt left Wednesday for Wichita, Kansas for a visit with her son-in-law and daughter, Mr. and Mrs. Ernest Gerardi and daughter, Gracka.

La Vonne Schlawin, who has been ill or a few weeks at Des Moines, came home Tuesday. Mrs. Schlawin, who had been with her, also came home.

John N Day left early this Wednesday morning for El Segunda, California, for a visit with his son Dorance and family. Mrs. Day has been there for several weeks and will return home with her husband in a few weeks W. C. Keraus is assisting Franklyn Kluckhohn at the post office during Postmaster Day's absence.

Klemme relatives have received word that Mrs Herman Stille of De Ridder, Louisiana, recently fell and fractured her hip and is now confined to her bed. Mr. and Mrs. Stille are living with their son Paul and family at De Ridder Klemme friends may write to Mrs Herman Stille, care of Paul Stille, at De Ridder, La.

Mr and Mrs Herman Paul moved Tuesday ito the Mrs. Emaa Medaus house which had been occupied by the Cliff Adair family The Adairs moved to the Stille house in south Klemme where the Arnett Waddingham family resided the past year. The Waddinghams moved to the Schwichtenberg farm southwest of Klemme which was purchased some time ago by Dr. D. P Anderson.

Birthday Celebrated

Mrs Martin Barz and Mrs Walter Drake entertained a number of ladies at the Barz home last Thursday afternoon in honor of Mrs Margaret Drake, who was observing her 73rd birthday that day.

The guests were served a delicious supper, which included homemade ice cream and cake.

Mrs. Drake received a variety of gifts.

W. J. Barz returned to his home at Garner Saturday from the Lutheran hospital at Hampton where he had undergone a major operation. Mr. Barz is making a good recovery.

A trucker from Marshalltown suffered a painful accident while loading cattle at the Bellamy farm Monday night. When cracking a whip to urge the cattle, the whip caught in an overhead wire, snapping it and the recoil of the wire snapped back and cut him in the eye. We did not learn of the man's name. He received medical treatment in Klemme.

Frank Sandry has been ill several weeks and is still confined to his bed, but is improving, according to reports.

CITY CREEK MONUMENT

Orson Platt and Erastus Snow emerged from the East Canyon the morning of July 21, 1847, and marvelled at the beauty of the Great Salt Lake Valley, Utah. Later Brigham Young, suffering from "mountain fever," arrived with the rear guard of settlers. They "gazed with admiration upon the vast valley with the waters of the Great Salt Lake glistening in the sun." War Bonds furnish funds to keep supplies going to U. S. fighting forces that keep enemies far from this region where a monument memorializes the sacrifices of settlers who made possible today's enterprising state.

Our Men In The Service

SEAMAN KEITH STILLE SAFE, BACK IN STATES AGAIN

Seaman Keith Stille who was on one of our aircraft carriers which was sunk December 6th in the big naval battle in the China Sea, is safe, and arrived in California on Tuesday, March 13th. In a telegram Keith said he would be given a furlough beginning March 15th

His uncle, Lester Stille, was at the depot at the time the telegram arrived here.

A great many lives were lost when the carrier was hit and relatives were very anxious as they had not heard from Keith for 3½ months. Keith's mother, Mrs Blanche Fredricks, is in California at this time and so will get to see her son in a few days.

Clive Ruka Back In States After Two Years Over Seas

Mr. and Mrs. Earl Ruka received a telegram Tuesday from their son Clive, stating that he had arrived in New Jersey and would soon be home.

Clive has been over seas for over two years, most of the time in India.

FARMERS AND SPORTSMEN INVITED TO MEETING HERE

Harry Trumbell, president of the South Hancock County Conservation League, has called a meeting of members, friends, farmers and sportsmen to be held at the Community Hall in Klemme this week Thursday evening, March 15th at 7:30 P. M.

The club will be re-organized, and two directors named on the County Conservation Board.

This meeting is open to everyone interested in hunting and fishing, as well as conservation of not only fish and game, but soil as well.

One tenth of the world's crops are destroyed annually by insects.

POSTHUMOUSLY a Silver Star was awarded to Pvt. Willis V. McFarland, St. Louis, Mo. When attempting to establish a beachhead on the Rapido River, Italy, Pvt. McFarland's unit was halted by enemy artillery fire. Dropping to the ground, he crawled over the shell-blasted shore to cut barbed wire, discharging his automatic rifle as he went. Thus he advanced through barbed wire entanglements until severely wounded. He gave his life fighting to free Italy, and the purchase of War Bonds will help continue that fight until all of the world is liberated from the Axis yoke.

CLIFF MONTGOMERY'S MOTHER DIED OF BURNS SUNDAY

His Parents House Burned To The Ground, Father In Hospital

When Mr and Mrs Cliff Montgomery came home from church Sunday a long distance telephone call awaited them and brought the sad news that Cliffords parents' home at Motley, Minnesota burned to the ground, and both of his parents were seriously burned and had been taken to a hospital

Clifford's mother died before he reached Motley, and his father was in a serious condition A younger brother of Clifford's jumped from an upstairs window and saved himself Clifford has another brother with the U S. Army now in Germany

The Montgomery children are staying at the Owen Nuehring and Clarence Bachman homes while their parents are at Motley.

STORY ABOUT KLEMME MAN ON RADIO THURSDAY EVE

Klemme residents will want to hear "We, The Editors," on radio station KRNT, Des Moines, Thursday evening, March 15th at 7:00 o'clock.

An editorial which appeared in The Klemme Times a few weeks ago is being featured on the broadcast. It is a story about one of our townsmen.

Bonds Over America

GOVERNOR'S MANSION

South Carolina's governor's mansion at Columbia is clothed in history and romance that links the old and the new Souths. Built in 1855, it was originally the officers' barracks of the Arsenal Academy. It escaped the fire that swept part of the city that year and came through the War Between the States unscathed. Simple in construction, it is cooled by dense foliage of the beautiful trees snuggling close. War Bonds have maintained a defense against injury to this historic gem and will guard it safely to peace.

BARZ AND THOMPSON WIN IN SCHOOL ELECTION

F. A. Arnold Re-elected Treasurer For Two-Year Term

One hundred and seven ballots were cast in Monday's school election here, which was the best turn out of voters in several years.

One spoiled ballot was recorded among the 107 cast.

Harvey E. Barz, incumbent, received 87 votes; Ed. J. Thompson, a candidate for the first time, received 60 votes to defeat Henry F. Jost, who received 54 votes. Mr. Jost had been on the school board for many years and was the president.

F. A. Arnold, who was unopposed, received 75 votes for treasurer.

Barz and Thompson were elected to serve three years, and Arnold for two years.

The new board will now be composed of: C. G. Waterman, Harry Gibbs, Harvey Barz, Glen Bridges and Ed. J. Thompson, directors; F. A. Arnold, treasurer, and Art J Kudje, secretary.

Mrs. Don Christiance Was Hostess To Double Four Club

Mrs. Don Christiance entertained the ladies of the Double Four Club at her home Wednesday afternoon.

High score in bridge was won by Mrs. Orville Bridges, and the second high score by Mrs. Clarence Lemke.

Mrs. P. M. Wilson Entertained U-Delt-Em Club Thursday

Mrs. P. M. Wilson was hostess to the U-Delt-Em club at her home Thursday afternoon.

High score in contract bridge was won by Mrs. Geo Lawhorn, second by Mrs. Ed. Jacobs, and third high by Mrs. H. D. Ramsay.

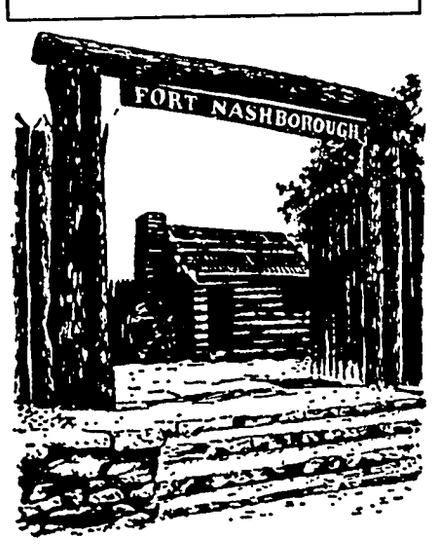
Mrs. Harvey Hostess To Study Group Of W. S. C. S.

Mrs. H. E. Harvey was hostess to the Study Group of the W. S. C. S. of the Methodist Church, last Thursday.

Mrs. Gerald Koerner led the devotions, using the theme "Christ's Secret of Happiness." Mrs. Lester Stille gave the first chapter of the new study, "The Indian in American Life."

After the meeting Mrs. Harvey served coffee, ice cream and wafers.

Bonds Over America



FORT NASHBOROUGH

The guns had scarcely grown cold after the Revolutionary War when James Robertson and a party of sturdy pioneers started west across the Blue Ridge Mountains through virgin woodland. Indians threatened to wreck their plans. In the vicinity of modern Nashville, Tenn., they realized a strong barricade around their homes was necessary. Thus Fort Nashborough arose in 1780. Reconstructed, the Fort stands as a monument to another area's indubitable will to win, to live and work free men. Descendants of those pioneers, are today fighting for the preservation of liberty. War Bond purchases will keep them supplied with the accoutrements of victory.

U. S. Treasury Department

MRS. ROSA TANNER DIED SUDDENLY LAST TUESDAY

Was Former School Teacher Before Settling On Farm

Funeral services for Mrs Rosa M. Tanner were held at the Liberty Methodist Church on Friday afternoon, March 9th in charge of the Wellemeyer Funeral Service of Klemme. Rev. Hersch.l E Harvey used as his theme in preaching the funeral sermon "They shall walk with me in white, for they are worthy," found in Revelations chapter 3, verse 4.

A double quartet provided special music, the singers being Mrs. Dale Greiman, Lola Gast, Lois Riemer, Lois Gast, Frank Bradlow Elmer Beier, L. J. Abele and Le Roy Bredlow, with Mrs. Lew Abele accompanying at the piano. The group sang "Ivory Palaces," and "That Will Be Glory for Me." Rev Harvey sang a solo, "Going Home."

Mr. and Mrs. Emil Blumer, Mrs. Albert Lange and Mrs. Ben Ridder had charge of the floral displays.

Interment was in the family lot in the Ell Township Cemetery and Mrs. Tanner was carried to her resting place by Emil G. Beier, Herman Gast, Arthur Knoke, Ed. Schoenwetter, Wesley G. Haefner and A J. Schoenwetter.

Obituary

Mrs. Rosa M. Tanner was born March 20, 1873, on a farm near Freeport, Illinois, the eighth of a family of nine children born to her parents, Frederick and Amalia Schaper.

There were seven brothers and two sisters in this Schaper family, and with the passing of Mrs. Tanner, all have now passed away, her only sister, Mrs. Edith Nuckolls of Pasadena, California, having preceded her in death in June 1944

After completing her rural school education, Mrs Tanner attended a college at Dixon, Ill. and became a public school teacher. She taught several years in Illinois, two years near Woden, Iowa, and one year at Liberty Township No. 8. Some of her former pupils are acting as pallbearers at her funeral today.

In February, 1904, Rosa M. Schaper and John G. Tanner were married. They commenced housekeeping on the Wm. Velau farm and two years later they purchased their present farm home where they have lived for 40 years. Six children came to gladden their home, four of whom survive: the husband and two sons having preceded Mrs Tanner in death.

Mrs. Tanner became a member of the German Methodist Church at Pearl City, Illinois, in her youth, and has been a steady church worker all her life She was an intelligent and helpful member of our church organization and a retired Sunday school teacher and for many years as president of the Women's Foreign Missionary Society.

Mrs Tanner had not been feeling too well for the last few weeks and the end came quite suddenly but peacefully, Tuesday afternoon, March 6, 1945. She reached the age of 71 years, 11 months and 14 days.

She leaves her immediate family, four children: Bernice I Tanner, J. Robert Tanner, Frances L. Tanner, all at home, and Florence L., now Mrs. Ernest Kalkwarf of Belmond, Iowa; also five grandchildren, and many more distant relatives and friends.

GIRL SCOUT NEWS

The White Rose Patrol held their meeting at Mrs. Trumbell's.

We answered roll call with the name of the town in which we were born.

Maralee and LaNelle had their Hostess Badge examined.

We sang "America" for our song.

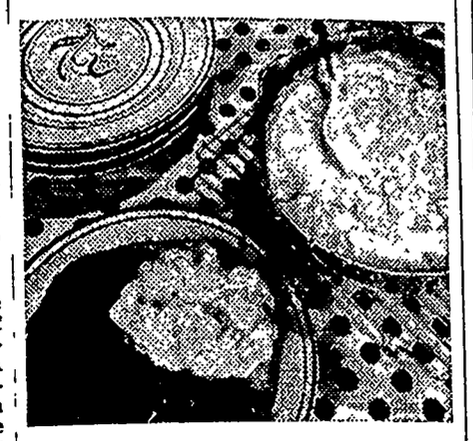
Now At Your Druggist's

Thrifty Lunches Use Vegetables, Noodles, Macaroni



Potatoes are easily creamed if they are cooked first, seasoned with onion and then blended together with smooth, tasty sour cream.

When points are low and luncheon presents itself, most of us are in a quandary. Are there foods to serve that are point-free and appetizing? Yes, there are, and I'm giving you several suggestions today which will make luncheons an easy matter to prepare.

I'd suggest that you make use of as many soups as possible for this mid-day meal. Use canned or dehydrated soups, if you're rushed for time. If you have bits of leftover vegetables, puree or dice them fine and add to a thin white sauce.

Hearty sandwiches go well with soups. You'll like cottage cheese, liver sausage, eggs and peanut butter combinations. A bit of crunchy celery will provide vitamins and minerals or crispy salads will add texture contrast to the bowl of soup and sandwich luncheon.

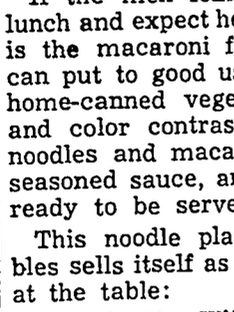
If the men folk come home for lunch and expect heartier fare, there is the macaroni family which you can put to good use. Use fresh or home-canned vegetables for flavor and color contrast with spaghetti, noodles and macaroni, add a well-seasoned sauce, and luncheon is all ready to be served.

This noodle platter with vegetables sells itself as soon as it arrives at the table:

Egg Noodles With Baked Onions and Lima Beans.
(Serves 6)

1 8-ounce package of egg noodles
8 to 10 small onions
1 can condensed tomato soup
2 cups lima beans, fresh cooked or canned
½ cup diced or grated American cheese
3 tablespoons drippings
Salt and pepper to taste

Parboil onions until tender, about 20 minutes. Arrange in shallow baking dish and cover with tomato soup that has been diluted. Add cheese. Bake in a moderately hot oven until soup is thoroughly heated and cheese melted. Cook egg noodles in boiling salted water until tender. Drain; add drippings and arrange on serving platter. Place baked onions around the mound of noodles and serve with tomato cheese sauce. Buttered lima beans are a colorful, tasty addition.



Macaroni and mushrooms are the basis for this flavorful dish:

Macaroni and Mushrooms.
(Serves 6)

½ pound boiled macaroni
1 tablespoon butter or substitute
1 small onion, cut fine
1 teaspoon flour
1 cup beef or chicken soup
1 pint stewed tomatoes
1 tablespoon dried mushrooms, soaked and heated
Salt and cayenne pepper
1 teaspoon parsley, chopped
3 tablespoons grated American or Parmesan cheese

After macaroni has boiled in salted water, place in colander and let cold water run over it. In the meantime, heat the butter and brown the onion. Blend in flour and soup stock, stirring until smooth and cook until thickened. Add tomatoes, strained, and let simmer 20 minutes. Add mushrooms, season with salt and cayenne pepper. Heat through, add parsley, place on platter and sprinkle cheese over top.

Spaghetti.
(Serves 6)

½ pound spaghetti
2 quarts boiling water
2 teaspoons salt
1 can tomato liquid
2 cloves garlic, cut fine
4 bay leaves
¼ teaspoon peppercorns
Salt to taste
¼ cup oil
¼ cup grated Parmesan cheese

Boil spaghetti in water to which salt has been added. Drain a can of tomatoes and place aside the liquid with garlic, bay leaves, peppercorns and oil. Cook until well seasoned, then pour over cooked spaghetti which has been drained, washed and warmed. Serve sprinkled with grated cheese.

An unusual but delicious combination is this one which uses baked potato with shrimps:

***Baked Potato Stuffed With Shrimp.**
(Serves 4)

1 cup cooked or canned shrimp, cleaned
2 large baked potatoes
1 tablespoon butter
¼ teaspoon salt
Dash of pepper
½ cup milk
1 teaspoon minced onion
1 teaspoon finely minced parsley

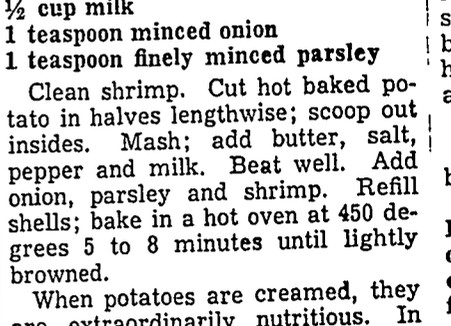
Clean shrimp. Cut hot baked potato in halves lengthwise; scoop out insides. Mash; add butter, salt, pepper and milk. Beat well. Add onion, parsley and shrimp. Refill shells; bake in a hot oven at 450 degrees 5 to 8 minutes until lightly browned.

When potatoes are creamed, they are extraordinarily nutritious. In this case, sour cream is used in place of white sauce, and it's a captivating combination:

Quick Creamed Potatoes.
(Serves 6 to 8)

3 cups Idaho potatoes, diced
1 small onion, cut fine
3 or 4 tablespoons thick sour cream
Salt and pepper to taste

Place diced potatoes and onion into a heavy skillet. Add enough water to cover the bottom of the pan, about ½ inch deep. Cover tightly and cook until potatoes are tender but not mushy. The water should be nearly all evaporated by this time. Add the sour cream and stir constantly until well blended. Season with salt and pepper and serve at once.



An easy-to-prepare meat dish with noodles uses as vegetables onions and lima beans. A tomato-cheese sauce adds nourishment and flavor.

Potatoes are again highlighted, this time with salmon in a casserole:

Scalloped Salmon and Potatoes.
(Serves 6)

½ pound salmon, steamed and flaked
3 medium-sized potatoes
½ teaspoon sliced onion
4 tablespoons flour
Salt and pepper
2 cups milk

Arrange layer of potatoes in greased casserole. Add half the salmon, onion, flour, salt and pepper. Make another layer of potatoes; add remaining salmon, onion, flour, salt and pepper. Cover with remaining potatoes. Pour on milk, and bake in a moderate oven at 350 degrees for 1¼ hours.

Get your sugar-saving recipes from Miss Lynn Chambers by writing to her in care of Western Newspaper Union, 210 South Desplaines Street, Chicago 6, Ill. Please send a stamped, self-addressed envelope for your reply.

Released by Western Newspaper Union.

Lynn Says:

Clothes Tips: To make clothes easy to iron, make sure the board is well padded with cloth and have the cover stretched tightly over it.

To keep clothes from freezing to the line, dip a cloth in a strong solution of salt and water and wipe line with it. Also, add a little salt to the last rinsing water for clothes.

To remove chewing gum from clothes, place the garments in the refrigerator and chill thoroughly. Then it scrapes off easily with a knife.

To remove grass stains from clothing, sponge with ammonia and water before washing.

'PLEASE PASS THE BUFFALO!'

Buffalo meat is being put on the market in a fairly big way this winter. No points are required. The meat is declared sweeter and just as tender as beef.

—*—

Maybe so, but we find it hard to work up an appetite for a buffalo, hungry as we are. This may be because the nearest thing to a buffalo we have ever had around the house was a buffalo robe which came down from Grandpa Gideon. It never looked as if it would taste good.

—*—

Then, too, we have a sentimental feeling about buffaloes. They look so nice in those Currier & Ives hunting prints! We never could work ourselves up to eating things out of Currier & Ives prints for fear the chef would get mixed up and cook us up a curry of sleigh or a fleet of Central Park bobsledders.

—*—

But Grandpa Gideon was different. He was a 100 per cent buffalo-steak man.

—*—

He preferred it over bear meat, but when hungry he would take a bear. He never cared for restaurant bear. Grandpa Gideon was of pioneer stock. He liked to go into the woods and get his own "b'ar meat."

—*—

He would put on his leather stockings, his horsehide pants, take a snorter and go right after the critter. He was a sportsman and always threw the small ones back. Grandpappy used to grease his arms and face so a bear's punches would slide off. His only weapons were a corncob pipe and a bottle.

—*—

He would go into a cave, light his pipe and keep taking a slug out of the bottle. He called this "smoking the b'ar out." He had a code of ethics and would never kill a b'ar in its own home. Once the animal had all the smoke it could stand and had started out of the cave, Grandpa would withdraw 10 yards, take his fighting stance and wait.

—*—

But buffalo was his real dish. There was more zest to getting one. He would ride out into the plains and shoot 'em with the bow and arrow, scorning the feather or metal lure. If the buffalo were running small he would hunt them from a bicycle. When he was 80 years old he attacked a herd by pogo stick and got three.

—*—

Grandpa had a great recipe for buffalo meat. It ran:

Use half a buffalo. Mince well. Put into a barrel and add 10 pounds of butter, the whites of 4 dozen eggs, 6 gallons of sour milk and a few slabs of salt pork. Beat with a paddle. Sprinkle with pepper, salt, cinnamon, rock candy and sea sand. Cover with a quart of brandy. Add 1 pound of raisins and a crate of Bermuda onions, diced. Flavor with snuff and a jigger of harness oil. Cook overnight. Leave the house around daybreak and find some place where they serve a good bacon and egg order.

* * *

Baseball Ruling

("The President said baseball could continue with certain 'ifs'."—News item.)

An "iffy" question baseball is,
With problems rather stiff;
Now only players can take part
When honestly "4-If."

* * *

Essential Men

Elmer Twitchell thinks ballplayers should find it simple to be classified in the new list of critical industries. He thinks the heavy hitters plainly come under the head of "providers of belting" for instance, and also "shellackers."

—*—

Twirlers will find under the "Petroleum Industry" a clause that "producers of pitches" must be deferred. And why can't catchers and twirlers both come under the exemption granted to "those making batteries."

—*—

Umpires are clearly deferred, he says, as "gatherers of gums and barks" as well as "men engaged in pest control."

* * *

Barefaced Bribery

"WANTED—Housekeeper; apartment, Locust Valley; one child; live in or out; salary includes package of cigarettes daily. Glen Cove 271-R."—Port Washington News.

—*—

The line forms on the right!

* * *

Sign for a flesh reduction establishment: Come in for a Battle of the Bulges.

* * *

Conventions are going to be curbed. Business is going from badge to worse.

* * *

Ain't It So?

Little children 'round the feet
Serve as mirrors hard to beat.

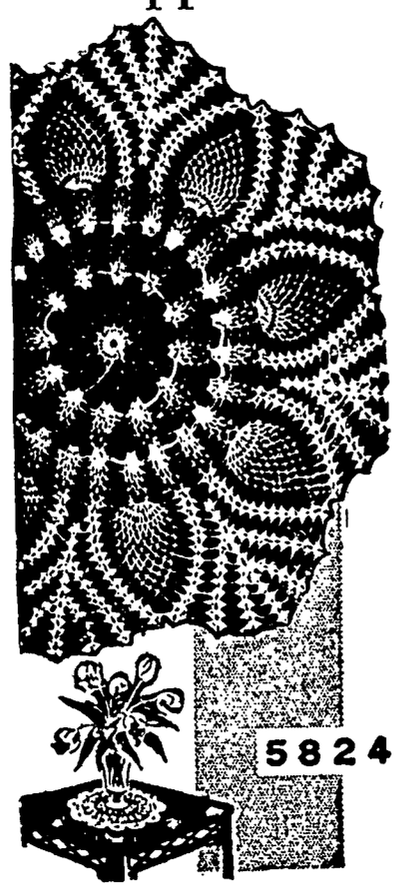
Manners, morals, children detect
But it's faults, children reflect.

Little children 'round the house
Make a man out of a louse.

—Sade Talbart.

SEWING CIRCLE NEEDLEWORK

'Pineapple' Pattern Centerpiece



'Pineapple' Doily.

THIS beautiful lacy "pineapple" doily was copied from a gift I received from Mrs. Charles Reynolds of Akron, Ohio. It is 23 inches in diameter and collectors of this pattern will like the four-inch pineapple motifs. Easy to crochet—its laciness makes a perfect centerpiece.

• • •

To obtain complete crocheting instructions for the Mrs. Reynolds Pineapple Doily (Pattern No. 5824) send 16 cents in coin, your name, address and the pattern number.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Send your order to:

EDITORIAL COMMENT

SPRING IS HERE?

It looks like all the signs of an early spring in North Iowa.

Robins arrived and hundreds are seen all over town and country The meadowlarks have also been noticeable in numbers the past week One farmer friend said the crows are even building nests, and to his way of thinking, that is a sure sign

When the boys and girls start kite flying in real earnest, that is our sure sign of spring In our boyhood days kite flying and playing marbles were the first outdoor sports in the spring.

DOES YOUR WIFE NEED A NEW DRESS?

The ladies on the farm will be the best dressed ladies this year unless we are badly mistaken

There seems to be a scarcity of nice material for dresses and aprons . but not for the lady on the farm.

All she has to do is convince her hubby to buy commercial feed in those brightly colored cloth bags that our feed dealers are featuring this spring

Yes, sir, those farm women and girls are going to be the envy of the town women and girls.

If the women and girls in town really want to look spiffy . . . let them raise chickens and get some of those pretty feed bags!

THANK YOU, FOLKS!

The Editor is more or less "on the job" again this week after being ill the past week, suffering from the effects of a hemorrhage. The Doc told us to "take it easy," but he just wasted words, as we felt like a licked pup and our ambition was several degrees below zero.

The shop was stacked full of printing jobs which are still untouched and we want to thank our customers for patiently waiting and saying, "No hurry," when we know well enough they need the printed forms and other items.

Our good friend the Doc also prescribed shorter working hours, and what pleased us most he said, "Jergie, you've got to go fishing a lot more this year."

Yep, he's a great guy, Doc is.

A GOOD STORE IN A GOOD TOWN KLEMME, IOWA

BOARD PROCEEDINGS

Garner, Iowa, March 5, 1945

The Hancock County, Iowa, Board of Supervisors met in session on above date with F. J. Schoun, Penn Eckels and John Chambers present.

The minutes of the last meeting were read and approved as read

On motion and second a cash allowance of $25 00 a month is hereby granted to Mrs Mike Kadlecik effective at once, the County Auditor is authorized to draw warrants on the poor fund of Hancock County in payment of such cash allowance

This being the 5th day of March A D. 1945, a date heretofor fixed for letting on medical care at the Hancock County Home for the year ending April 1 1946, the hour for said letting having arrived, said letting was held as scheduled, the chairman proceeded to open all bids on file and after duly considering all bids on file does find the bid of Dr. C. O Brewster of Britt, Iowa to be the lowest and best bid therefor

BE IT THEREFORE RESOLVED by the Board of Supervisors of Hancock County Iowa, that Dr. C. O Brewster be and he is hereby awarded a contract for medical care at the Hancock County Home for a term of one year from April 1, 1945, to April 1 1946. All other bids are hereby rejected

This being the 5th day of March A D 1945, a date heretofore set for a letting on the printing of 350 copies in booklet form of the 1944 Financial Report of Hancock County, Iowa, the hour for said letting having arrived, and the Board being fully advised, said letting was held as scheduled The Chairman of the Board proceeded to open all bids on file and does find the bid of the Klemme Times, Klemme, Iowa, to be the lowest and best bid therefor

BE IT THEREFORE RESOLVED by the Board of Supervisors of Hancock County Iowa, that the Klemme Times be and they are hereby awarded a contract for the printing of the 1944 Financial Report of Hancock County, Iowa, (350 copies in booklet form) all other bids are hereby rejected

On motion and second the bonds of Ben V. Greiman and Norman Hanson, Township Clerks are approved.

On motion and second the lease with Frank Gahan for the SE¼ of section 27-96-26, is hereby approved.

Supervisor F. J. Schoun is hereby appointed a committee to investigate and cause repairs to be made in D D. No. 37-39 Main, and lateral No. 11.

In the matter of a claim in the sum of $72.92 for care of Catherine Appelhons at the State Hospital at Cherokee, Iowa, it appearing that said claim cannot be collected and does create a cloud on the title to certain real estate, the property of John Appelhons, located in the town of Britt Iowa, and

WHEREAS it is deemed for the best interests of all concerned that said claim be released

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, against John Appelhons, Sr., for the care of Catherine Appelhons at the State Hospital at Cherokee, Iowa, in the sum of $72 92 be and the same is hereby released and held for naught all in accordance with and pursuant to section 3597, Code of Iowa, 1939, and laws amendatory thereto.

The foregoing resolution was offered and read by Supervisor Frank Schoun, who moved its adoption, was seconded by Supervisor John Chambers, whereupon the chairman placed the motion of its adoption and upon roll call the vote thereon is F. J Schoun, Penn Eckels, and John Chambers aye, Nays none.

Whereupon the chairman declared the resolution duly adopted

BE IT RESOLVED that the claims hereinafter set out be allowed in amounts designated thereon and the County Auditor be and he is hereby authorized and ordered to draw warrants on the several funds of Hancock County, Iowa, in payment of such claims in sums set opposite each claim.

Annual Meeting

TO THE MEMBERS OF THE KLEMME COOPERATIVE CREAMERY

You are hereby notified of the Annual Meeting of The Klemme Cooperative Creamery Company on:

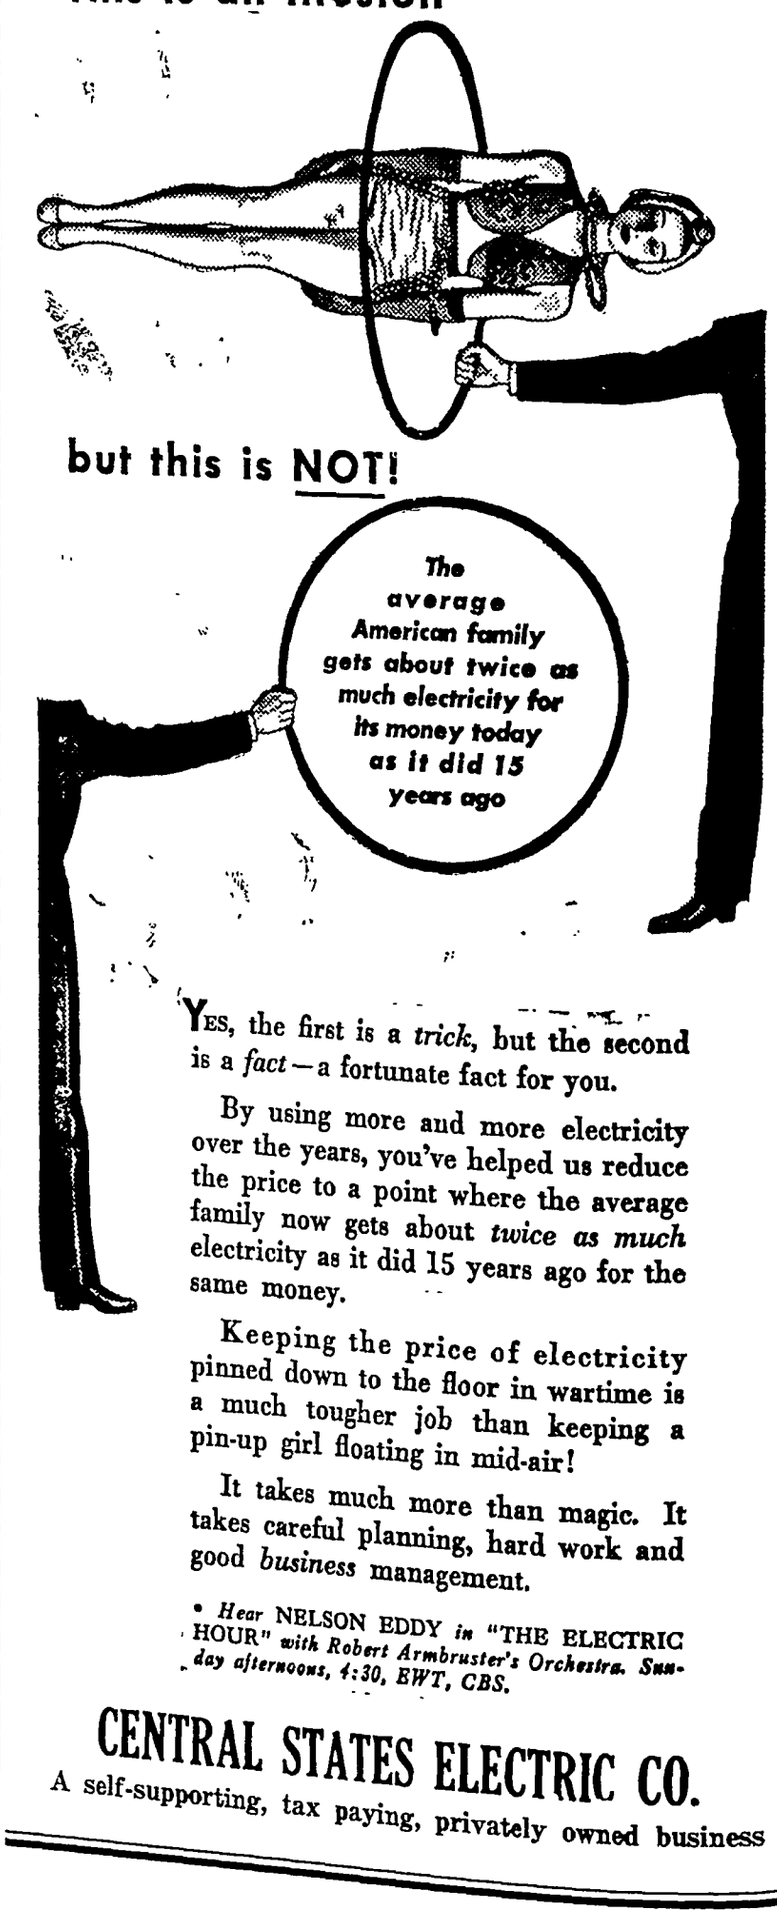
Wednesday, March 21

following noon lunch, for the election of two directors and other business which may properly come before the meeting.

Door prizes for both ladies and men.

GEO. SCHOENWETTER, Secretary,
Board of Directors.

This is an illusion



but this is NOT!
The average American family gets about twice as much electricity for its money today as it did 15 years ago

YES, the first is a *trick*, but the second is a *fact*—a fortunate fact for you.

By using more and more electricity over the years, you've helped us reduce the price to a point where the average family now gets about *twice as much* electricity as it did 15 years ago for the same money.

Keeping the price of electricity pinned down to the floor in wartime is a much tougher job than keeping a pin-up girl floating in mid-air!

It takes much more than magic. It takes careful planning, hard work and good *business* management.

SCHOOL NEWS

FRESHMAN NEWS

—Mary Lou Netland.

We have started our New Analysis on the story "The Snake Dance" by Corey Ford in English class.

In General Science we have finished the unit over the Earth and Sun and had a test Tuesday. We have started a new unit over Weather.

In Algebra Class we started solving story problems by Quadractics.

In Home Economics the girls have been preparing various main dishes for luncheons. Eunice Larsen and Corrine Merkel came Friday. We served them Salmon Souffle.

* * *

JUNIOR HIGH NEWS

—Marjory Lau.

We made Easter pictures in Art Friday.

Both grades are starting on units in Electricity and are keeping booklets with pictures.

We lost two Seventh Graders last week: John and De Vera Wilson who moved to a farm west of Woodell.

* * *

FIFTH AND SIXTH GRADE NEWS

—Mrs H. G Voetberg, Teacher.

In Sixth Grade Arithmetic we have been learning how to make change. We have some toy money. We've been making sales tickets, adding tax, and making change. All of us think it very important that we know how to make change.

The Fifth Grade Geography class has begun their unit on the New England States. When we've completed this we've studied each one of the 48 states. Throughout this year we've made many maps, graphs, and filled in study sheets We are going to put all of these in a notebook at the close of this unit

All of us, with the aid of the Third and Fourth Grades, have turned out to be "songsters" because we are practicing for an operetta "Mid Summner Eve," which is to be given the last of March. Some of us are Will-o-the-Wisps, Green Elves, and Flower Fairies.

What did the Will-o-the-Wisps do to Dorothy? Come to our operetta, "Mid-Summer Eve."

* * *

THIRD AND FOURTH GRADE NEWS

—Miss M J Holmes, Teacher

The Fourth Grade Geography class is studying the unit "The Dutch, Their Fight With the Sea." We have learned about their dikes and canals We were surprised to read that tulip raising is so important to the Dutch. An acre of tulips is worth much more than an acre of wheat, oats, rye, barley or vegetables.

The Third Grade Arithmetic class has started something new We are learning to divide. We like our new work, although it is hard.

The Third and Fourth Grades have been practicing with the Fifth and Sixth Grades for the operetta we are going to give the last part of March.

Why did Dorothy run away from home? You can find out by coming to our operetta "Mid Summer Eve."

* * *

KINDERGARTEN, FIRST AND SECOND GRADE NEWS

—Miss Arlene Bugh, Teacher

In our Weekly Readers, First Grade read about birds that are returning in the Spring We learned about the Grackle, the Song Sparrow, the Bluebird and the Robin.

The Second Grade read about animals that hibernate in Winter. They included the Chipmunk, the Raccoon, the Woodchuck and the bear. We also read about the signs of Spring— the birds returning, the flowers, the butterflies and the change in weather.

This week our Stamp Sale was greater than ever before. It was $26 05. We are very proud of our record.

CARD OF THANKS

We wish to take this means to thank relatives, friends and neighbors for their many kindnesses and beautiful floral offerings and other expressions of sympathy and help extended us in the loss of our mother.

Bernice, Robert and Frances Tanner,
Mr. and Mrs. Ernest Kalkwarf.
1tp

Warranty Deed. William Brozik and Pearl M. to E. A. Christensen. Date 2-23-45, $1.00. W½ NE¼ of section 10-96-24.

Shortage Of Help, No Night Shift At Britt Hemp Mill

The Britt hemp plant did not operate last Saturday due to some necessary repairing and remodeling but work was again resumed Monday morning.

The night shift was discontinued last Friday night due to a shortage of help.

CARD OF THANKS

We wish to thank the many relatives, friends and neighbors for their kindness, for all expressions of sympathy and for the lovely flowers extended to us during the illness and death of our beloved one.

Mrs. John A. Johnson,
(1tp) and Family.

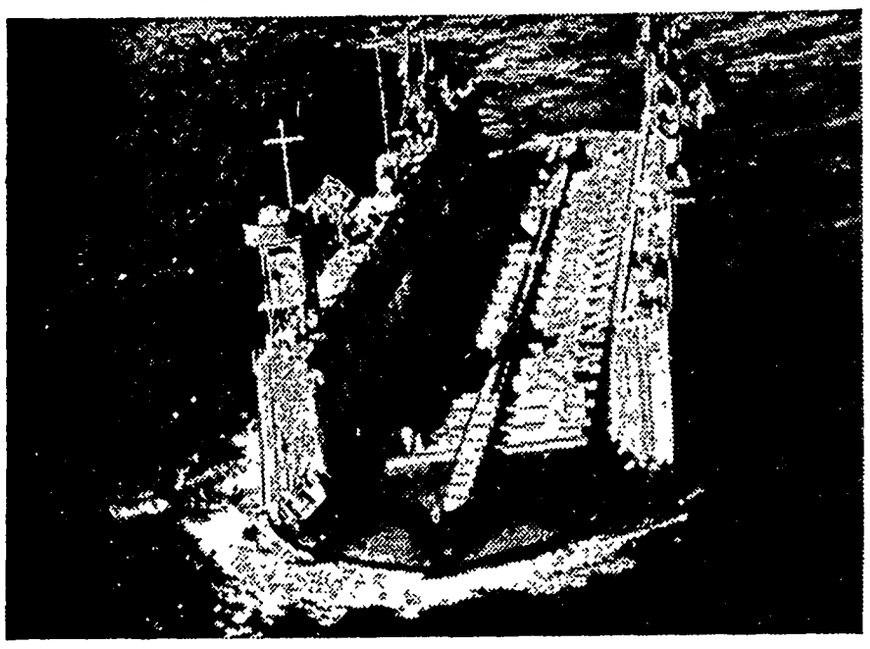
WEEKLY NEWS ANALYSIS

Japs Fight to the Last on Iwo; Lend-Lease Aids Russ Assault; 9,000 Planes Pace Push on Nazis

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)



Floated to wherever it is needed, this huge drydock submerges to permit entry of vessel, which is then secured to keel blocks. Upon rising, the drydock lifts the ship from water and allows workers to service the vessel.

PACIFIC:
To the Last Man

Entrenched in caves, well equipped with light and heavy guns and ordered to fight to the last man, Japan's 20,000 defenders of tiny Iwo Jima island put up a fanatical, though hopeless, fight for this tiny stepping-stone to Tokyo in the face of an overpowering marine assault supported by the thundering bombardment of U. S. naval vessels and aircraft.

Sgt. Roy E. Heinecke 1st Marine on Iwo

Far to the south, U. S. army troops, mopping up remnants of Japanese opposition in Manila, encountered equally fanatical resistance in bitter close-quarter fighting, typified by the wild action inside the Manila hotel, where Yanks shot it out up stairways, through corridors and in rooms to clean the enemy from the top floors.

Iwo Jima's airfields, from which the Japs threatened the advance U. S. base in the Marianas 800 miles away, were the prize objectives of the marine assault, which carried clear across the southern end of the island in the early fighting. Holed up in the rolling country, and wiped out only after intensive fire, the Japs exacted a heavy toll of the invaders, with losses far above those suffered at Tarawa.

Inside Japan

From inside Japan came reports of a lowering wartime living standard of a country noted for frugal accommodations in peace, and of a rigid civilian discipline.

With 20 per cent less food than before the war, each Jap has been restricted to monthly allotments of a half pound of sugar, four pounds of vegetables and 20 pounds of rice. Matches, medicine, gasoline, fuel and clothing are rationed, and the nation's women are asked to cut off their kimona sleeves and wear overalls to ease the apparel pinch.

All men between 12 and 60, and unmarried women between 12 and 40, must register for compulsory labor, and employees must report for work in war plants despite air raids.

WAGE BOOSTS:
Held Up

Inter-governmental wrangling complicated recent War Labor board decisions boosting worker incomes within the framework of the stabilization program pegging general wage increases to 15 per cent of January, 1941, levels.

In the cases involving 145,000 packing-house and 50,000 textile workers, WLB grants were held up until settlement of WLB's dispute with office of Economic Stabilizer Director Vinson over necessity of OPA to determine whether any pay boosts would require a markup in distributors' costs, thus affecting the price control program.

In passing on the packing-house workers case, WLB called upon the companies to bear the cost of employees' clothing, tools and upkeep of implements, and also directed that the guaranteed work week must be extended from 32 to 36 hours. In the case of the textile workers, the WLB increased the minimum wage from 50 to 55 cents an hour and granted a flat 5 cents an hour boost to preserve present geographical and job differentials.

News Curiosities...

Army records show that young men of the present generation are about two-thirds of an inch taller than their fathers who fought in World War I. In the age group 20 to 30 years, the proportion of men 5 feet, 10 inches or over is 27.5 per cent, as against 22.4 per cent in 1917. The proportion of six-footers today is 8.8 per cent, compared with 6.5 in the last war, it was found.

LEND-LEASE:
Over 35 Billion

With lend-lease reaching an all-time high in the first half of 1944 due to preparations for D-Day and the great Soviet winter offensive, such aid for the whole year reached almost 15½ billion dollars and a grand total of over 35 billion dollars since going into effect.

In recounting lend-lease aid, Foreign Economic Administrator Leo Crowley pointed out that the U. S. has shipped 362,000 motor vehicles alone to Russia, and that on some parts of the eastern front American trucks are carrying more than one-half the supplies for Red troops. In addition, Crowley said, Russia has received 12,000 planes.

Compared with Russia, Britain has received 80,000 vehicles and 8,500 planes, Crowley revealed, but other shipments have made the United Kingdom the largest recipient of lend-lease, with 43 per cent of the total. With the opening of the new supply road from India to China, the U. S. expects to materially boost deliveries to the latter, with plans calling for shipment of 15,000 trucks.

Mentioning that it took only 1¼ per cent of cigarette production, and less than 1 per cent of the beef supply, Crowley said that lend-lease was not a determining factor in civilian shortages.

EUROPE:
Air Help

Massing almost their entire strength, Allied air chieftains threw upwards of 9,000 fighters and bombers at Nazi targets on both the western and eastern fronts in support of ground troops hacking forward against subborn opposition.

Disruption of enemy communications feeding their embattled forces in the west and Italy was the objective of the 7,000 planes the U. S. and British sent out, with the heavies cascading tons of explosives on rail yards and the fighters swooping down out of the skies to shoot up locomotives, freight cars and motor vehicles.

Fortifications as well as communications were the targets of some 2,000 Russian planes in the east, concentrated against the enemy in East Prussia, where the Nazis put up a stiff fight to hold open the Baltic port of Pillau above besieged Koenigsberg.

In the ground fighting in the west, the whole front was aflame as the U. S. 9th and part of the 3rd armies drove for the Rhineland with its all important industry, while the other part of the 3rd and the 7th armies clamped a tightening vise on the Saar basin with its rich coal and iron deposits.

As the Yanks slugged forward, in stiff fighting, British and Canadian Tommies continued to make slow, but steady, progress at the far northern end of the Siegfried line, enveloping the vital road hub of Calcar, upon which German defenses turned for preventing a sweep to the rear of their whole Rhine land front.

In the east, German women, in furs and plain clothes, were put to work building barricades in Berlin as Marshal Ivan Konev's First Ukranian army drew up from the south on a line with Marshal Gregory Zhukov's First White Russian force for the grand assault on the Nazi capital. Meanwhile, the Reds continued to press their attacks against German forces threatening the flanks of Konev's and Zhukov's armies.

Valuable State

Saxony, which is feeling the pressure of Soviet might, is the western neighbor of Soviet-conquered Silesia. It is one of Germany's most valuable states, ranking third in population and sixth in area. It led the Reich in the production of textiles, used its farms and forests thriftily, profitably worked mines among the oldest in Germany, made Dresden china known throughout the civilized world.

Roughly triangular, Saxony is a little larger than Connecticut.

LABOR DRAFT:
Weaken Bill

With compulsory work legislation bitterly opposed by labor and industry alike, a weakened labor draft bill received careful senate consideration after hasty house passage of a sterner measure.

With the senate discarding the house measure under which local draft boards could order registrants from 18 to 45 into essential war jobs at the risk of induction or fine and imprisonment in case of refusal, it took up a substitute empowering the War Manpower commission to limit employment in establishments and channel excess workers into war industry.

Though milder in form than the house measure, even the substitute bill ran into strong opposition because of the stiff fines and imprisonment provided for violation of the WMC rulings. In helping draw up the bill for whole senate consideration, Kentucky's Senator "Happy" Chandler said he favored the incorporation of stiff punishment ". . . so any senator would be justified in voting against any manpower bill before the committee. . ."

Nurses Face Call

With recent recruitments falling below needs, the house moved to draft unmarried nurses from 20 to 44 years of age, with some members seeking to provide sufficient safeguards to maintain essential hospital services at home.

Under the bill's provisions, drafted nurses would be commissioned second lieutenants in the army and given comparable rank in other services, but they would be subject to duty in whatever kind of nursing most needed.

Of the nation's 240,000 registered nurses, approximately 60,000 are now in the services. There was recent need for an additional 20,000 to help meet needs occasioned by mounting casualty lists.

Late Delivery

Three hundred and seventy-five days after conception, 25-year-old Mrs. Beulah Hunter of Los Angeles, Calif., gave birth to 6 pounds, 15 ounce baby daughter in one of the most unusual cases in medical annals. The average period of gestation is 280 days.

Countering scoffers, Dr. Daniel Beltz, the attending physician, declared that careful examination had first indicated birth by last November. ". . . I am convinced there definitely was a stoppage of growth between the third and sixth month of pregnancy," he said.

Closest approach to the case in his records, Dr. Beltz said, was a pregnancy of 359 days.

CURB NIGHTERIES:
Seek Revision

As War Mobilization Director James F. Byrnes' order closing night clubs, saloons, road houses, theaters, dance halls and other places of entertainment to conserve fuel went into effect, operators planned a counter-proposal under which they would shut down on Sundays and keep open to 2 a. m. weekdays.

In pushing the proposal, operators claimed that it would not only accomplish the purpose of saving 25 hours a week of fuel use, but also permit them to keep their doors open by appealing to the late theater crowds and the merry-makers who sart spending money around midnight.

In anticipation of the shorter hours and smaller crowds, New York night clubs released 5,000 of their 50,000 employees as the order went into effect, and the famed Diamond Horseshoe proprietor, Billy Rose, wailed: "The way it stands now, this will put us all in bankruptcy."

OIL:
U. S. Reserves

While taking over 1½ billion barrels of oil out of the ground in 1944, the U. S. discovered reserves of 2 billion barrels during the year, the American Petroleum institute reported, to bring the country's known surplus pools of this vital mineral to over 20 billion barrels.

In discussing the reserve situation, the institute cautioned against trying to estimate the period of time known surplus pools would last, explaining: ". . . Known oil can be recovered only over a period of many years and at gradually declining rates. . . ."

Leader in 1944 production with an estimated 747,790,000 barrels, Texas also leads in reserves with 11,375,480,000, or half the total. Next in line is California, with output of 311,771,000 barrels and reserves of 3,344,552,000.

DAIRY OUTLOOK

Despite a probable slight increase in total milk production, supplies of dairy products available for civilians on a per capita basis during 1945 probably will be less than in 1944 but about the same as in 1943 on a whole milk equivalent basis. Per capita butter consumption is likely to be at a record low of about 10.5 pounds compared with 11.8 pounds in 1944 and a 16.7-pound prewar average. However, fluid milk and cream consumption probably will be at a record level.

Ernie Pyle With the Navy:

Quick Trip Over Pacific Brings One to New World

Changing Climate, Vast Distances, Different Attitude Is Confronted

By Ernie Pyle

HONOLULU.—The hour of leaving came at last.

Usually when starting overseas, you don't get away on the day the transportation people originally set for you. I remember when I first started going to war, how impatient at delay I would be, and how I would fret myself into a frenzy over every day of waiting. But time changes things like that.

This time also there was a delay of a few days. Every one of them I welcomed with a big embrace. I felt like saying to it "Ah, my love, you are the day of my dreams. You are my one more day of security — how I cherish you."

Ernie Pyle

But the final day came, and at last the hour. I put on my uniform again for a long, long time, and sent my civilian clothes to a friend in Los Angeles to keep for me.

It was night when we left San Francisco. We flew in a huge four-motored land plane, operated by the naval air transport service. In the navy they call it "NATS," as though it spelled a word.

The army's equivalent is the ATC. I've flown on both of them so much I feel like a stockholder. They fly all over the world on clock-like schedule, over all the oceans and all the continents, carrying wartime mail and cargo and passengers.

I've flown the Atlantic four times, but this was my first flight across the Pacific. You go non-stop from California to Hawaii. It's about the same distance as crossing the continent, yet it was as easy as flying from Albuquerque to Los Angeles.

We left shortly after suppertime, and were over Honolulu a little after daylight next morning. There was simply nothing unusual at all to report about it.

Shortly after we took off I got some blankets and lay down on the floor in the rear of the plane. When I woke up it was just getting daylight, and we had only an hour to go. That's the way I like to fly an ocean.

Served by Natives In Tropical Setting

All of us had left California in our woolen winter uniforms. But when we stepped out of the plane in Honolulu, those heavy clothes almost made us sick. By the time we got through the formalities and left the field, we were all dripping and swabbing ourselves.

In Honolulu I stayed in the home of a naval friend The first thing we did was take a shower bath, change to light khaki clothes, and eat a plateful of beautiful yellow papaya.

A naval houseboy named Flores, a native of Guam, took care of us. He washed our clothes and made our beds and fixed us fruit juice and papaya all day long.

A squat Hawaiian woman, in blue slacks and with a red bandana around her head, watered the lawn over and over and over again, very slowly.

The sun shone brightly and white clouds ran an embroidery over the ridges of the far green hills. Palm trees rustled like rain, and the deep whistles of departing ships came from the harbor below us. This, truly, was the Pacific.

* * *

The trip over had not exhausted me, but the change of climate did, and for a day I did nothing but loaf—and recover from America—and bask in being warm.

There is no rationing of anything in Honolulu, and no blackout any longer either. Rationing doesn't exist because practically everything here is considered military, and also because shipping space from the mainland is an automatic rationer.

The great number of uniforms on the streets and the 10 o'clock curfew are the most vivid reminders of the war in Honolulu. That and the vast growth and construction that has occurred since Pearl Harbor.

Otherwise the war seems far away. The grimness of Pearl Harbor Honolulu has gone. In many respects the newcomer, beguiled by the climate and the loveliness of everything, and the softness, feels more remote from the war than he did back home.

And so I treated my little Honolulu interlude as another reprieve. I sat with old friends; I made a sentimental visit to the little tropical apartment on Waikiki where "That Girl" and I lived for a winter seven years ago; I went to parties and listened almost tearfully to the sweet singing of Hawaiians.

I relished the short time here in complacency, and didn't even pretend that I was starting out to report the Pacific war. All that would come soon enough.

Distance Biggest Factor in Pacific

Covering this Pacific war is, for me, going to be like learning to live in a new city.

The methods of war, the attitude toward it, the homesickness, the distances, the climate—everything is different from what we have known in the European war.

Here in the beginning, I can't seem to get my mind around it, or get my fingers on it. I suspect it will take months to get adjusted and get the "feel" of this war.

Distance is the main thing. I don't mean distance from America so much, for our war in Europe is a long way from home too. I mean distances after you get right on the battlefield.

For the whole western Pacific is our battlefield now, and whereas distances in Europe are hundreds of miles at most, out here they are thousands. And there's nothing in between but water.

You can be on an island battlefield, and the next thing behind you is a thousand miles away. One soldier told me the worst sinking feeling he ever had was when they had landed on an island and were fighting, and on the morning of D-3 he looked out to sea and it was completely empty. Our entire convoy had unloaded and left for more, and boy, did it leave you with a lonesome and deserted feeling.

As one Admiral said, directing this war is like watching a slow-motion picture. You plan something for months, and then finally the great day comes when you launch your plans, and then it is days or weeks before the attack happens, because it takes that long to get there.

As an example of how they feel, the navy gives you a slick sheet of paper as you go through here, entitled "Airline Distances in Pacific." And at the bottom of it is printed "Our Enemy, Geography." Logistics out here is more than a word; it's a nightmare.

Here's another example of their attitude toward distances in the Pacific—

At Anzio in Italy just a year ago, the Third division set up a rest camp for its exhausted infantrymen. The rest camp was less than five miles from the front line, within constant enemy artillery range.

But in the Pacific, they bring men clear back from the western islands to Pearl Harbor to rest camps—the equivalent of bringing an Anzio beachhead fighter all the way back to Kansas City for his two-weeks rest.

It's 3,500 miles from Pearl Harbor to the Marianas, all over water, yet hundreds of people travel it daily by air as casually as you'd go to work in the morning.

* * *

And there is another enemy out here that we did not know so well in Europe—and that is monotony. Oh sure, war everywhere is monotonous in its dreadfulness. But out here even the niceness of life gets monotonous.

The days are warm and on our established island bases the food is good and the mail service is fast and there's little danger from the enemy and the days go by in their endless sameness and they drive you nuts. They sometimes call it going "pineapple crazy."

Our high rate of returning mental cases is discussed frankly in the island and service newspapers. A man doesn't have to be under fire in the front lines finally to have more than he can take without breaking.

He can, when isolated and homesick, have more than he can take of nothing but warmth and sunshine and good food and safety—when there's nothing else to go with it, and no prospect of anything else.

Has Hopes for 'Story of G.I. Joe'

And now about the movie which is being partly based on these columns from the war fronts over the last two years and which has been titled "The Story of G.I. Joe."

Well, the movie is finished at last. I mean the shooting is finished. But there are a lot of things we laymen don't know about the movies, and one of them is that a film isn't ready to show for about three months after they've finished shooting.

It is a movie about the Infantry. There isn't much of a story to it, and there's no conventional love interest running through it.

The war department cooperated, and furnished two companies of soldiers who were moved to Hollywood, plus lots of equipment such as trucks, tanks, guns and what not.

Large Assortment Given.

In advertising the products for sale treasury groups them under eight general heads as follows: furniture, general products, machinery, automotive, paper and office supplies, medical and surgical, textiles and wearing apparel, and hardware.

Furniture may include mattresses, bedsprings, household furniture, to office, shop, beauty parlor, barber shop, tables, stools and numerous other furniture supplies.

General products may include anything from live animals, lamps, water coolers, lighting fixtures, photographic goods, storage batteries and thousands of other items.

Machinery may include powered trucks, tractors, agricultural machinery and implements, farm trailers, farm service tires, wagons, dairymen's, poulterers' and apiarists' supplies.

Automotive includes all sorts of motor vehicles and trucks, automo-

Surplus army mattresses.

bile parts and accessories, tires, motorcycles and other automotive equipment.

One of the largest stocks is surgical and medical equipment including drugs.

Textiles and wearing apparel may include shoes, rubber goods, shirts, raincoats, sleeping bags, gloves, cots, pins, needles and dozens of other articles.

Other items include thousands of hardware articles such as kitchen supplies, wire, screens, nails, wheelbarrows, pushcarts, saddles, tableware, jewelry, musical instruments, small arms ammunition and others.

These lists merely give an idea of the thousands of different commodities which will be offered for sale on bids — and important to know—bids under ceiling prices which have been fixed by the OPA. On some occasions OPA has not fixed a ceiling until after the articles have been sold, so what happens then the treasury doesn't know.

Even dogs, trained in warfare, carrier pigeons and monkeys have been sold as surplus war property. A large number of monkeys have been sold to zoos after they have been used by the air corps to test altitude in compression tanks. Through these tests the lives of thousands of our aviators have been saved.

Some of the objectives of the regulations governing the sale of this tremendous volume of surplus war property as set out by the war properties board seek to foster wide distribution of surplus commodities to consumers at fair prices; to achieve prompt and full utilization of the property with due regard for the protection of free markets; to prevent dislocation of prices from uncontrolled dumping; to avoid dislocations of the domestic economy; to encourage and foster postwar employment opportunities; to assure the sale of surplus property in such quantitites and on such terms as will discourage disposal to speculators or for speculative purposes; to prevent insofar as possible unusual and excessive profits and to afford returning veterans an opportunity to establish themselves as proprietors of agricultural businesses.

This last objective brings up the regulations regarding the sale of lands by the RFC. All government owned land which is declared surplus will be offered for sale to the original owner, from whom it was purchased by the government at the price paid. If sale is not then made, it is offered to heirs or assigns. Then the property is divided into family sized plots and war veterans are given preference as buyers.

Thus farmers will have an opportunity to buy back their land and if they do not, war veterans are given preference. Although much of this land is farm land, hundreds of acres are included in suburban plots near or adjacent to cities and towns.

How Farmers Can Act.

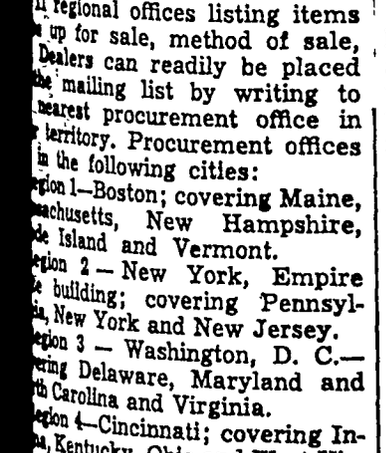
Procedure for farmers to obtain a military vehicle, either truck or automobile is as follows: Make application to your local triple A office. The farm transportation committee, WPB, PAW, or ODT regional offices are authorized to issue letters of certification to essential users. After the certificate of need has been obtained sales must be negotiated through a dealer who has purchased the vehicles from procurement. No trucks, autos or other vehicles will be sold direct to consumers. There has been some complaint from farmers about the indirect method of purchase, but the procedure outline is about as direct as possible under the regulations.

A trip through the sample room of the treasury procurement division in Washington is a revelation. It's the most amazing collection of commodities imaginable: overalls, khaki shirts, fleece-lined sleeping tents and blankets, rubber lifeboats for five people; rubber and leather overshoes; nurses' shoes; tarpaulins, all-steel tool boxes, table ware, kitchen ware of all descriptions; medical supplies; surgical and dental instruments; snow shoes, jungle knives, imitation rifles; hardware of all descriptions, such as nuts, bolts, chains, hooks, and metal gadgets; saddles, signal lights, flashlights, spotlights, all-steel boxes which would be suitable for mailboxes or for locking away valuable papers; all-rubber suits; woolen mittens, leather gloves, photographers' supplies, even cameras.

Patently, it is up to the dealers in the 15,000 small towns of 5,000 or under population throughout the country, if farmers are to be able to buy this surplus war property. The dealer who is alert and watches for the sales dates may be able to lay in a stock of commodities. Farm Cooperatives particularly, who deal in most everything the farmer needs, might well be able to stock up on surplus commodities at prices which would be favorable to their customers or members.

In an effort to further inform these dealers about prospective sales and commodities for sales, the procurement offices in each region notify newspapers of an impending sale through intermittent releases.

Surplus Planes Also Available to Public



Civilians who have been suffering from growing pains around the shoulder blades may now permit their wings to begin sprouting. And it's all with the blessing of the United States government, through its agency, the Civil Aeronautics administration. It is now in the process of unloading approximately a million surplus airplanes for which it is finding civilian buyers. These are being unloaded through auctions held at eight regional offices every Monday. An average of 50 planes are distributed to each office and a total of 400 a week are finding their way into the hands of happy owners through competitive bidding.

The airplanes thus sold are those which have been used by training centers and civilian flight schools in which army flyers have been trained. A listing of the planes on sale is mailed to all who request to be notified, and these invitations to bid list the type of airplane.

IMPROVED UNIFORM INTERNATIONAL

SUNDAY SCHOOL Lesson

BY HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for March 18

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

THE LAW OF LIFE

LESSON TEXT—Matthew 25:31-46.

GOLDEN TEXT—Thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy mind. This is the first and great commandment. And the second is like unto it, Thou shalt love thy neighbor as thyself.—Matthew 22:37-39.

Our lesson presents a great judgment scene—majestic, solemn, stirring. Many confuse it with the judgment of the Great White Throne in Revelation 20. But Matthew 25 is obviously the judgment of nations (v. 32) for their treatment of Christ's brethren (v. 40), a word referring primarily to Jews, but also spoken of in Matthew 12:48-50.

The lesson needs broader application, however, so we suggest that we allow the more general principles of judgment occupy our attention. We note that

I. Judgment Divides (vv. 31-33).

The nations, coming before Christ when He shall have appeared in all His glory, shall find themselves separated into two groups on the basis of their treatment of the brethren of Christ.

The fact that God has drawn a line of division down through all humanity and that each one of us is on one side or the other is not a doctrine which finds ready acceptance with modern thinking, but it is nonetheless a fact.

No man established that division —God Himself did it, and did it in love. To some it may seem to be a hard saying, but it is not, for it comes from the lips of the gentle, loving Jesus.

It is because He loved us enough to give Himself for us that any of us find ourselves on the side of that dividing line which assures us of eternal joy and blessedness.

They who stand on the other side of the line do so because they have not accepted God's proffered salvation in Christ. Reader, where do you stand?

II. Judgment Declares (vv. 34-45).

Our attitude toward God expresses itself in our attitude toward our fellow man. That which we do toward those about us is not a matter of indifference, but is the basis for God's judgment of our lives. Each of us must answer for the deeds done in the flesh whether they be good or evil. That is true even of the believer (II Cor. 5:10), whose salvation has already been determined by his faith in Christ.

Here in our lesson, however, the failure to do that which shows forth God's law of love is made the ground of eternal judgment. This is not because an act of kindness itself can be regarded as the ground of division, but because the failure to give it or do it reflects an attitude of heart toward our God and His Christ, which is in reality a rejection of His way of salvation.

Judgment is thus a revelation of the attitude of the heart, which marks a man or woman as being either saved or lost. It may be possible to so becloud the thinking of our friends and neighbors that we may go through life looking something like a Christian, but when Christ judges, it will all be revealed to us.

Notice the importance of a proper attitude toward those who need our kindness and help. All too often the only concern of men and women is to look out for "number one" and let the rest of the world shift for itself.

Observe also that the Lord identifies Himself with His brethren—what is done to and for them is counted as done to and for Him. Compare the experience of Samuel (I Sam. 8:7) and of Paul (Acts 9:5). Touch God's people and you touch Him. Fail them and you fail Him. Serve them and you serve Him.

III. Judgment Determines (v. 46).

Yes, God's judgment determines eternal destiny. Life eternal, or everlasting punishment, which shall it be? That is determined by God's final word of judgment, but remember that He judges in accordance with the attitude of heart and action of life on this side of the grave.

Now, for that matter, is a part of eternity, and it is consequently of great importance that we are right with both God and man now if we expect to be right throughout eternity.

We need to face this truth of judgment with complete candor and honest heart-searching. We agree with Dr. Douglass that "we must stand with awful concern before this solemn truth. Do not hesitate to teach this because it is contrary to the current of modern thinking or shocking to confront. It needs to be faced in a brave spirit of realism. (As a teacher) you will do your pupils a great disservice if you try to shield them from the grim implications of this truth."

Yes, and also if you keep from them the glorious prospect of eternal joy in the presence of God. The law of life is the law of love—love for God, and for Jesus Christ whom He hath sent to be our Redeemer, and love for His brethren. That law of love rules even in the day of judgment.

SEWING CIRCLE PATTERNS

Household Hints

Remember that rayon, cotton and linen yard goods shrink more lengthwise than crosswise.

Baste with dark thread on light materials and light thread on dark. The lines will be easier to follow.

To prevent apple skins from wrinkling during baking, slit the skins three or four places.

When liquid glue has hardened so that it is unfit for use, try softening it with some hot vinegar, just a little at a time.

When preparing dried fruits for stewing or dessert, let them soak in water overnight. This saves cooking time and gives the flavor a chance to develop in them.

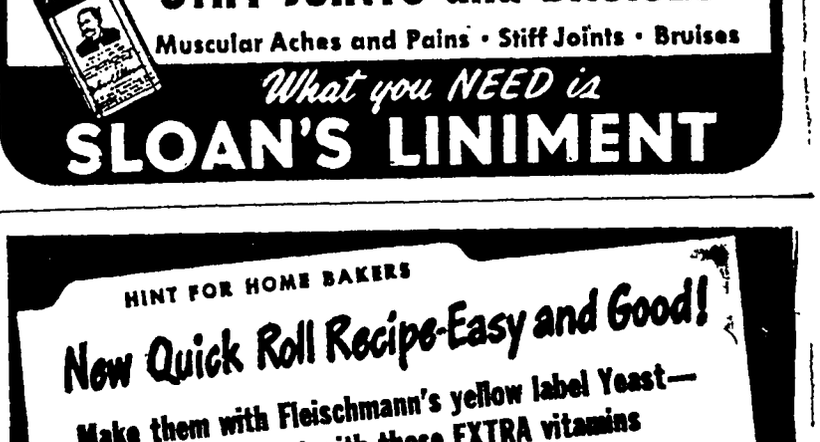
New Quick Roll Recipe-Easy and Good!

Make them with Fleischmann's yellow label Yeast—the only yeast with those EXTRA vitamins

QUICK ROLLS

½ cup milk
2 tablespoons sugar
1½ teaspoons salt
1 cake Fleischmann's Yeast
½ cup lukewarm water
3 cups sifted flour
3 tablespoons melted shortening

Scald milk, add sugar and salt; cool to lukewarm. Dissolve yeast in lukewarm water—and be sure it's Fleischmann's *yellow label,* the only fresh yeast with all those extra vitamins. Add to lukewarm milk. Add 1½ cups flour and beat until perfectly smooth. Add melted shortening and remaining flour, or enough to make an easily handled dough. Knead well. Shape into rolls and place in well-greased pan. Cover and let rise in warm place, free from draft, until doubled in bulk (about 1 hour). Bake in moderate oven at 400°F. about 20 minutes. Makes 12.



FREE!

New Revised Wartime Edition of Fleischmann's Famous Recipe Book!

ELECTRONICS . . .
are workin' on the railroad

"Train Three-One-One to yardmaster . . . Train Three-One-One to yardmaster . . ." Yes, radio communication has been tested, and it's working on the ROCK ISLAND LINES.

Almost a year ago, ROCK ISLAND was the first railroad to receive its own permit from the Federal Communications Commission to test radio in connection with the operation of its trains. Regular installations were made, engineer-to-conductor-to-flagman, train-to-yardmaster.

The ROCK ISLAND LINES established an Electronics Department. Experiments also include transmission of written messages in facsimile by radio, induction and radio telephone between engine and caboose and between stations and moving trains, portable short-wave radios that automatically bridge gaps in storm-damaged communication lines . . . and microwave-radar developments.

This is another practical example of the working of ROCK ISLAND LINES' Program of Planned Progress. *Yesterday's* planning provided a war-ready transportation system which is doing its wartime job with notable efficiency. *Today's* planning will provide finer, safer, swifter transportation . . . tomorrow!

THE KLEMME TIMES

E 50. KLEMME, IOWA, WEDNESDAY, MARCH 21, 1945 NUMBER 18.

And Mrs. Blank Celebrate Wedding Anniversary

FIRST CAME TO TOWN MOND IN 1886

ed In Klemme Continuous- Nearly Fifty Years

March 16th, was the 60th anniversary of Mr. and Taalkeus Blank of Klemme house was held and friends ghbors came to the Blank visit with them throughout and evening.

(Gracka, in English) Ruiborn December 8th, 1861 Ostfries'and, Germany, Holland border.

Blank was born May 4, at Boen, Germany. They were reared in Germany and the schools there. In telling the schools, Mr Blank that it was compulsory to and if a pupil did not go to the parents were fined. The were dismissed Wednesday urday afternoons for a holi- Blank has a picture of the where he went. It is a nice stone building

and Mrs. Blank were unitmarriage March 16th, 1885 in Germany In fact they got twice in the same day! At the law required that the of the Peace perform the y. Mr and Mrs. Blank deat they should be married minister, which they did. k says she wore the very yle in a beautiful black dress.

and Mrs. Blank lived in Gerfor a few years before Mr brother-in-law sent him to come to America. Mr landed in Belmond on Good April 23rd, 1886 His total was 12 cents.

had been wearing wooden but in being sent from one another and in hurrying to his right destination, he off his wooden shoes, threw the Hudson river and put her shoes which he had in gifts. He say the Brooklyn had already been built.

arrived at Belmond and beck for the Mason City & Ft railroad, now the Great He worked hard, saving so he could get enough to send for his wife and all children. Mrs. Blank and daughters arrived on Oct. at Brosklyn. Mrs. Blank how the voyage took two and that everyone wore an tion tag and their destinShe told many interesting ort customs inspections. Blanks lived at Belmond 4 then moved to Hayfield for and then came to Klemme they have lived continuousch will be 50 years this com-

Blank has been a railroader life here, and was at one held the position as road but Mrs. Blank did not leave Klemme as they all so well here.

Ten children blessed this home: Sena (Mrs. Will Lau) who died a few years ago; Agnes(Mrs. Anton Ahrenkeil); Ralph of Iowa Falls, Grace (Mrs. Conrad Quandt); Fred who died in infancy; Fred of West Bend; Casey, deceased; Gretchen, deceased; Minnie (Mrs Worthy Usher); and Marie.

Mr. and Mrs. Blank have sixteen grandchildren, and 12 great grandchildren. They have three grandchildren in the armed forces Lt Taalkeus Ahrenkeil, army air forces; Alfred Lau, Seaman First Class, Navy; and Cpl Fred Blank, Army.

Mr Blank has many hobbies which keep him busy His masterpiece is perhaps a Christmas tree, the most unique we have ever seen as it travels around, receiving its power from lighted candles. The children as well as the grown-ups enjoy seeing it every Christmas Mr Blank also makes fascinating animated windmills of all kinds, including a merry-go-round complete with horses and riders He makes a variety of bird houses each year

Mr. Blank also occupies a lot of his time caneing chairs and does a most beautiful job of it He is a very mechanically minded man

Mr Blank wants it understood that his real name is Taakeus. We around Klemme have always called him Tom In Germany he was known as Taaks He said he moved to America to get his name straightened out!

Mr. and Mrs. Blank always took a great interest in Klemme, in the churches, schools and the civic life Mr. Blank served 18 years on the Town Council, resigning because of deafness; was a member of the School Board for 15 years and the Superintendent of the Methodist Sunday School 4 years

Mr. Blank drew the plat for the present Klemme Park, and lined up the side walks and placed stakes for the trees.

While living in Belmond he helped lay the side tracks for the railroad in Klemme.

Mr. and Mrs Blank are highly respected citizens of our community; are members of the Methodist Church. The church sent them a beautiful bouquet of red roses for their anniversary.

They had many callers during the day and received many gifts and cards.

Editor Jorgenson and wife, Mr. and Mrs. C. G. Waterman and Mrs. Lyle Wilcox spent the evening visiting with them. Their daughter Mrs. Worthie Usher of Rowan and two sons came with a decorated wedding cake, and Miss Marie Blank and Mrs. Usher served a nice lunch.

Art Wellemeyer, who is quite a local historian, says this is the first time in the history of Klemme that a couple has celebrated their 60th wedding anniversary. Mr. and Mrs. Blank are in good health generally and both have very keen minds and recall events in Germany during their youth.

The whole community joins in wishing Mr. and Mrs. Blank continued good health and that they may have many more happy returns of the day.

SMALL TWISTER CAUSES LOT OF DAMAGE IN AND NEAR CORNER FRIDAY NIGHT

Heavy Wind Struck Klemme With Little Damage Reported

A terrific wind, rain and hailstorm which had all the elements of a tornado, struck Hancock county at 11:30 p m. Friday, damaging barn, blowing over windmills and poultryhouses, breaking windows, and putting electric power lines and telephone lines out of commission.

Most of the damage centered in Garner and a wide territory north of Garner Many trees in Garner were toppled over, shingles torn off of buildings and windows broken A large plate glass window in the C J Schneider store was and another in Marie's Lunch were shattered A large stained glass window in the Methodist church was blown in and several windows in the courthouse were damaged.

The storm appeared to strike hardest in the rural area north of Garner where nearly every windmill was blown down, many barns damaged and silos wrecked.

The barn was down at the Kenneth Grauman farm and on the Sam Wiede farm the henhouse was destroyed and the barn twisted

At the Ed Wenck farm the roof was blown off the barn and on the Rudy Gelnes farm the windmill was down and the barn twisted.

The hog house was destroyed and the windmill blown down at the Louis Dankbar farm

A barn was blown off the foundation at the R V. Upmeyer farm southwest of Garner.

Much other damagae was reported to brooder houses and flocks throughout the area

It was also reported that some damage was done around Kanawha but the worst area was just north of Garner

Around Klemme the worst damage was done at Harold Stromer's farm northwest of town, where a new barn, built 4 years ago was flattended to the ground and the windmill toppled over. Harold is with the U S. Army in Europe. Harold's father, H. R. Stromer has been farming the place.

Buildings were also reported to be badly damaged at the Verner Pringnitz farm west of Klemme.

CARD OF THANKS

We wish to take this means of expressing our thanks and appreciation to our friends and neighbors for the flowers, cards, letters and kind things done for us during our recent bereavement.

Mr and Mrs. Clifford Montgomery. 1tp

SURPRISE PARTY HELD ON ANGUST JOSTENS

Mr. and Mrs. August Josten of near Klemme, were pleasantly surprised on their tenth wedding anniversary Saturday evening when relatives, friends and neighobors came to their home and spent the evening playing 500.

At a late hour a delicious lunch was served, which had been prepared and was served by the surprisers.

Those present were Mr. and Mrs. Ewald Josten and Marvin; Mr. and Mrs. Francis Pearson; Mr. and Mrs. Donald Neuberger of Clear Lake; Mr. and Mrs. Orris Lundy and Madelyn; Mr. and Mrs. Don Stanley and children; Mr. and Mrs. Menno Albers; Mr. and Mrs. Howard Baack; Mr. and Mrs. Paul Goll and Beulah; Mr. and Mrs. Les Hartbeck, and Mr. and Mrs. Alfred Jurgameyer and Elaine.

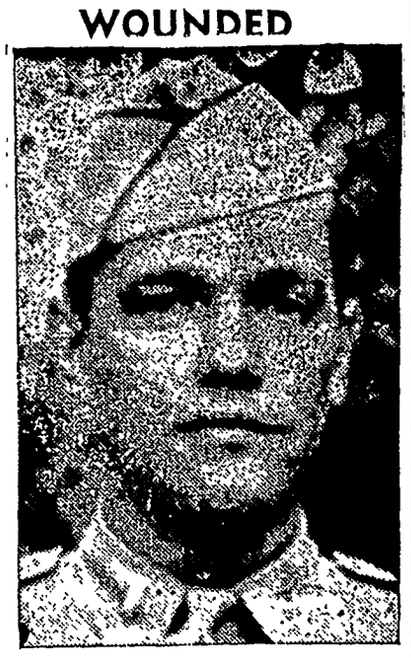
Mr. and Mrs. Josten were presented a gift of money from their friends.

FIFTEENTH WEDDING DAY IS CELEBRATED

Mr. and Mrs. Kenneth Schuldt of Liberty township were married 15 years on March 19th.

In honor of the event Mr. and Mrs Emil Patet entertained them to dinner Sunday and had as other guests Darlene Schuldt; Rev. and Mrs. Fred Griewe; and Mr. and Mrs. W. C. A. Gast.

WOUNDED



LT. LYNDEN KILGORE

First Lieutenant Lynden Kilgore, 26-year-old-infantry officer, was slightly wounded in Germany, on February 28, his parents Mr. and Mrs. C. C. Kilgore, now of Fort Dodge, received word in a war department telegram last week.

In a letter dated Feb. 16, Lt. Kilgore had written relatives that he had left Germany and was then in Belgium for a short rest period.

Lt. Kilgore, who is a graduate of the Klemme high school and was employed as a linotype operator at the Times Office, is with the First Army and has been overseas since last fall.

He is a brother of Mrs. Joe Burgess of Avery township.

DOGS RAVAGE FLOCK— This is a scene on the Lubach farm east of Klemme where dogs recently entered a sheep shed, killing 109, crippling 38 others. In addition to those in the picture, taken by the Klemme Times,, others were strewn about the feed lot. The loss was over $2,500.

MORE HOUSES SOLD HERE THE PAST WEEK

During the past week two more residential properties changed ownerships in Klemme the past week.

Mr. and Mrs. N. G. Moberly sold their property in the north part of town to Mr. and Mrs. Russel L. Medin. The Medin family are now living in an apartment in the Art Wellemeyer building.

Mr. and Mrs. Ira Overholt sold their residence in the south part of Klemme to Mr. and Mrs. David Schwichtenberg. The Oveholts will continue to reside in their home until about January 1st.

MORE RED CROSS DONATIONS

The following names are to be added to the Klemme Red Cross Roll Call:

Herman Baack	$5.00
Lydia Bock	$1.00
Bertha Schlei	$5.00
Cen. Ia. Tel Co.	$4.00
L. V. Perkins	$5.00

This brings the total up to $796-40. Mrs. George Lawhorn, Roll Call Chairman is anxious to have Klemme go over the $800 mark in this campaign. Who will boost the total to over $800.00?

Reformed Church Womens Guild Will Meet Wednesday, Mar. 28

The Womens Guild of the Klemme Evangelical and Reformed Church will meet at the church on Wednesday, March 28 at 2:00 p.m.

Mrs. Harvey Barz and Mrs. Alfred Merkel are the hostesses.

(1tp.) The Riemer Children.

Resident Of Hancock County 56 Years Buried Saturday

GARNER WOMAN DIED LAST THURSDAY MORNING

Funeral Services Held Saturday For Mrs. Augusta Riemer

Augusta Riemer 87, widow of Albert Riemer, long time resident of Liberty township and Garner, died at the home of her son, Ben Riemer in Liberty township Thursday morning.

Funeral services were held Saturday afternoon at 2 o'clock at the Methodist Church in Garner, conducted by the Rev. E. F. Broberg, pastor, assisted by Rev. H. E. Harvey of Klemme.

Pallbearers were Will Gast, Will Kraus, Emil Haes, Louis Klinge Will Meckstroth and Art Upmeyer Music consisted of a vocal solo by Rev. H. E. Harvey of Klemme, and a quartet composed of Mrs. Alton Upmeyer, Mrs. Paul Beckwith, Clair Tompkins and Rev. Fred C. Griewe, with Mrs. Howard Duesnberg as pianist. Burial was in the Liberty township cemetery.

Mrs. Riemer had been in failing health for a number of years She was bedfast at the home of her son Ben the past 10 months.

Mrs. Riemer was the daughter of Carl and Wilhelmina Bredlow. She was born June 9, 1858 in Pommern, Germany. She was christened Augusta and baptized in the christian faith in accordance with the rites of the Lutheran church in Germany.

At the age of 10 years she came with her parents to Elba, Dodge county, Wis. There she grew to womanhood and received such education as was available in those pioneer days.

April 8, 1886 Augusta Bredlow was united in marriage to Albert C. W. Riemer. The couple lived on a small farm in the Elba community for 3 years. In 1889 they came to Hancock county and purchased land in Liberty township, the place now farmed by their son, Ben. Here they went through all the hardships of pioneer life. Six children were born. The first child Emil, died in infancy. The others who survive their mother are Elizabeth, Mrs. E. G. Beier, Klemme; William, who lives north of Garner; Carl of Marshalltown; Ben who lives on the pioneer homestead in Liberty; and Malinda, Mrs. E. J. Blumer of Liberty township. There are four grandchildren and two great grandchildren. A sister, Mrs. Aug. Nuehring of Liberty township, and a brother, Charles Bredlow, of near Swaledale, also survive.

In 1916 Mr. and Mrs. Riemer retired from farming and came to Garner to live. Here they lived together until Mr. Riemer died in 1940.

Mrs. Riemer was a resident of Hancock county for 56 years She was a charter member of the Liberty Methodist Church. She was active in the affairs of the Methodist church, first in Liberty township, then in the Grace Methodist church in Garner, and when the congregation of Grace church merged with the congregation of First Methodist church, she worked faithfully for the church.

Heat and Acid Enemies Of Vegetable Pigment

Green vegetables contain a pigment known as chlorophyll. Heat and acid are its enemies. From the color standpoint, the most satisfactory way to cook a green vegetable is to boil it in an open kettle. While acid destroys green vegetable coloring matter, alkali, or soda, intensifies it but tends to destroy the vitamin content so it should not be used in vegetable cookery. High temperature is also destructive, the higher the temperature and the longer the cooking time the greater the loss of green color.

Therefore, green vegetables should be cooked for as short a time and at as low temperature as possible. They should always be started in boiling water, as this shortens the time. Red vegetables, as beets and red cabbage, contain pigments which are readily soluble in water. This loss of red color we speak of as "bleeding." Acid intensifies the red color. If beets are always canned or cooked in boiling water to which a teaspoon of vinegar to each pint of water has been added, the red color remains. The yellow pigment is called carotinic acid; it is only slightly soluble in water and is not affected by acid or alkali. Because the yellow color is so stable, preserving it does not present a problem.

Make Kiddies' Garments From Adults' Discards

Dad's old undershirts can be made into soft nighties for the young child. The good parts of three undershirts, dyed pink and trimmed with a bit of matching crochet around the neck and arms, will make a nightie to rival those that are available on the ready-to-wear market. Knit slips that are beyond repair for mother's use may contain enough good material to make panties or a union suit for the youngsters.

Slips for the little miss can be made from numerous types of discarded knitwear. With lace edging to decorate and strengthen the neck, armholes, and bottom edge, brother's outgrown T-shirts are excellent for this purpose, says the New York state college of home economics.

Discarded twin-sweater sets can be made into a playsuit. Use the ribbing on the sweater to make tight-fitting wristlets and anklets on the playsuit. Stitch the suit by machine, but blanket-stitch the seams if the knit is loose and likely to ravel. On cold days, follow the example of G.I. Joe who keeps warm by wearing layers of clothing, and have junior wear the playsuit inside another garment of sturdy, washable cotton. In warmer weather, the playsuit alone will be enough to protect him.

Australian Mineral

The Australian council for scientific and industrial research has discovered a commercial use for monazite, a little known Australian mineral found in beach sands. Monazite is now being used successfully in a polishing powder urgently sought for some time for dealing with delicate glass lenses and prisms in the manufacture of optical munitions. Established early in the war the Australian optical munitions industry has had a phenomenal growth and besides fulfilling requirements of the Australian fighting forces is supplying United States and Dutch forces also. Up to the end of 1944 the industry had turned over to the Allies more than $5,000,000 worth of gun sights, periscopes, compasses and telescopes. The industry also sent a quantity of lenses and prisms to the United States in compensation for advice supplied to it during its organizational stages by the National laboratory of the United States. Not all products being turned out by the industry, however, are made to American design. Some British patterns are being followed and in other cases the products have been optically and mechanically designed by Australians.

Here's Key to a Cook-Book Vocabulary

Many expressions in modern cook books have been adopted from other languages. Increase your cook's vocabulary of foreign terms by learning these common French phrases: au gratin: food baked with a topping of bread crumbs, and generally with grated cheese; canape: crackers, potato chips, pastry, toast, or any other firm edible base spread with some highly flavored food and served as an appetizer; croutons: small cubes of fried or toasted bread served with soup; and entree: main dish of the main meal.

Other expressions include julienne: vegetables cut into matchlike strips. Julienne consomme refers to soup that contains such vegetables; puree: strained pulp and juice of vegetables and fruits; ragout: a thick, highly seasoned stew; souffle: baked dish made light and fluffy by the addition of egg whites; may be made of fruit, cheese, flaked fish, minced poultry, meat or vegetables; meringue: whites of eggs whipped to a standing froth with sugar, and macedoine: a mixture, usually vegetables, with or without meat; sometimes applied to fruit mixtures.

Improper Care Takes Heavy Toll of Linoleum

More linoleum is scrubbed and soaked away than worn away. A waxed linoleum floor which does not get too heavy wear can be kept clean by a daily dusting with a dry mop and only occasional washing. Never use an oiled mop or sweeping compounds which contain oil. Much washing can be saved if anything spilled on the floor is wiped up immediately with a damp cloth.

When the floor must be washed, use clear water, or lukewarm mild soapsuds, followed by rinsing with clear soft water. Never use strong soap like laundry soap, because the alkali dries the oil in the linoleum and makes it brittle, or fades and softens the paint on felt base coverings. Avoid gritty cleaners like scouring powder which scratch the surface and open the pores so that dirt and grease can work down into the material.

When washing, have the mop fairly dry. Wash and rinse a small section at a time. Never use enough water so that it can get under the linoleum and loosen the cement, or cause rotting underneath. Soaking softens the material so that walking on it causes damage. When completely dry apply wax lightly. Use self-polishing wax (an emulsion of wax in water) or paste wax.

Jap Coastline Broken

The southern coast line of Japan is exceedingly broken, affording a great number of sheltered anchorages; but much of the east and west coasts of Honshu and Hokushu islands are very little indented, and good harbors in these localities are rare. Nearly all mountains in Japan of more than 6,000 feet in height are of volcanic origin. There are about 200 volcanoes, of which 50 are more or less active, the chief being Fuji San, Chokai San, Ganju San, Iwaki San, and Mioko San. Fuji San, the highest mountain in Japan, rises to an elevation of 12,370 feet, and its appearance is remarkably like that of Mount Etna in Sicily. It has been dormant since 1707.

Roasting Nuts

When you roast nuts in a frying pan, use only low heat and be sure to stir the nuts constantly, until they're hot all the way through. You'll find the nuts, especially pecans, will darken somewhat when they're taken off the fire, and they'll become crisper as they cool. Drain them on a paper towel or other absorbent paper and sprinkle them with salt. In oven roasting, put nuts in a shallow pan, such as a pie pan, and spread them only one layer deep. Heat your oven only moderately hot, about 375 degrees is about right. Stir them frequently, drain them and salt them, just as you would pan-roasted nuts.

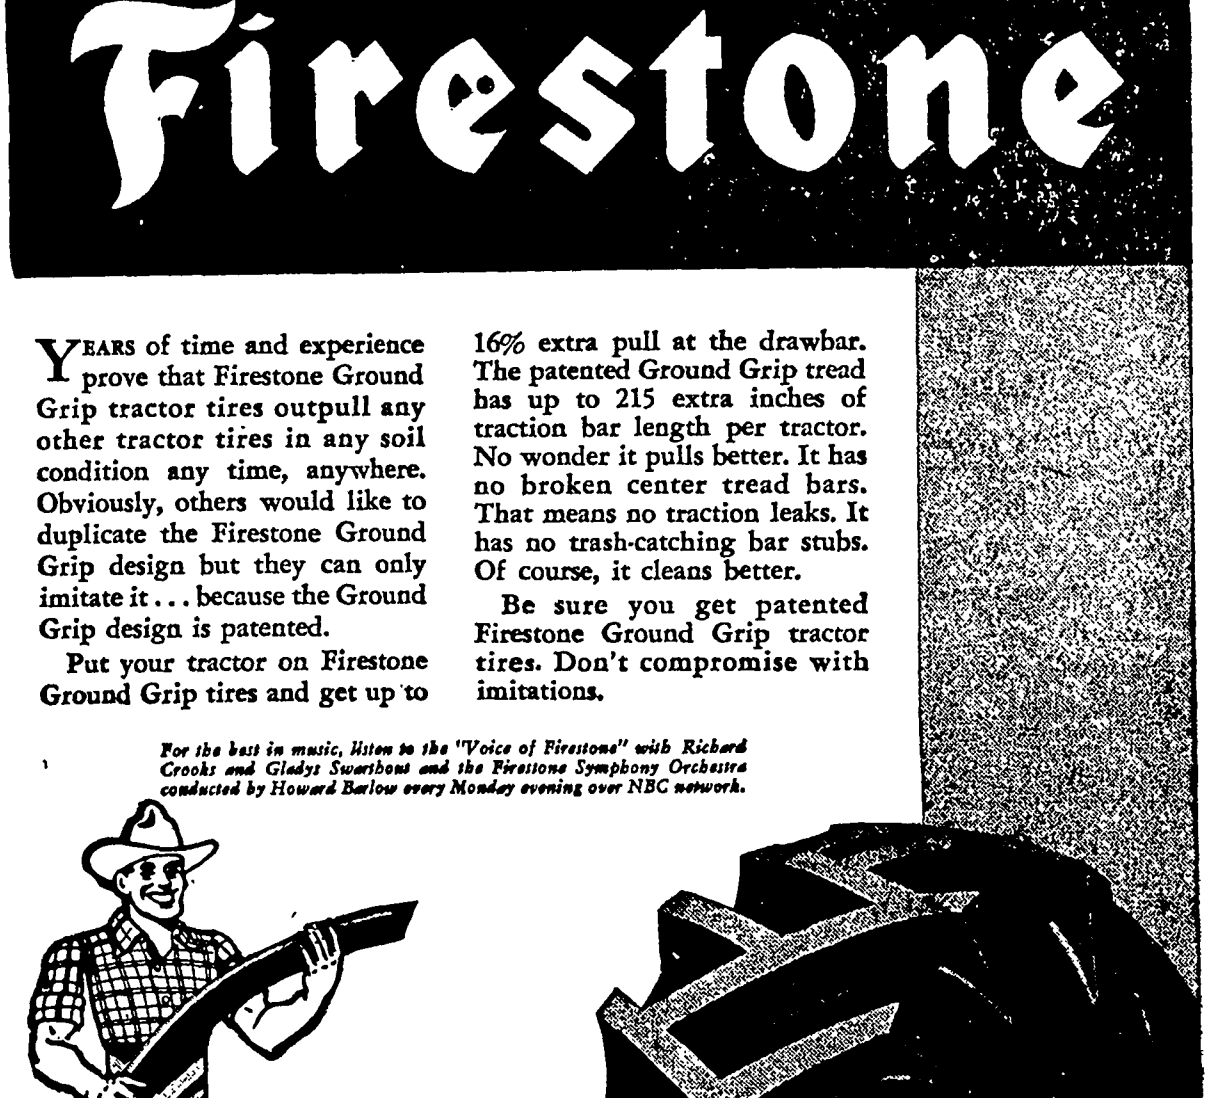
OTHERS IMITATE—
But There's Only ONE
GROUND GRIP TRACTOR TIRE...
Firestone

YEARS of time and experience prove that Firestone Ground Grip tractor tires outpull any other tractor tires in any soil condition any time, anywhere. Obviously, others would like to duplicate the Firestone Ground Grip design but they can only imitate it... because the Ground Grip design is patented.

Put your tractor on Firestone Ground Grip tires and get up to 16% extra pull at the drawbar. The patented Ground Grip tread has up to 215 extra inches of traction bar length per tractor. No wonder it pulls better. It has no broken center tread bars. That means no traction leaks. It has no trash-catching bar stubs. Of course, it cleans better.

Be sure you get patented Firestone Ground Grip tractor tires. Don't compromise with imitations.

For the best in music, listen to the "Voice of Firestone" with Richard Crooks and Gladys Swarthout and the Firestone Symphony Orchestra conducted by Howard Barlow every Monday evening over NBC network.



Mr. Extra Traction represents the Extra Bar Length that gives Superior Pulling Power to FIRESTONE GROUND GRIP TRACTOR TIRES

BOARD PROCEEDINGS

6TH ADJOURNED JANUARY MEETING
Garner, Iowa, March 12, 1945.

The Hancock County, Iowa, Board of Supervisors met in session on above date with F. J. Schoun, Penn Eckels, and John Chambers, present.

The minutes of the last meeting were read and approved as read.

On motion and second the petition of Carl Johnson et al for the inclusion of certain lands in D. D. No. 41, Hancock county, Iowa, is approved. Lands to be included in said district are described as the SE¼ SE¼ of section 12, Township 94, Range 25.

On motion and second the bond of Clarence L. Hartzell as constable in Britt township is approved.

Supervisor Schoun is appointed a committee to investigate and cause repairs to be made in D. D. No. 52, lat. No. 6 V. A. and in D. D. No. 114, lateral 5 30.

On motion and second the receipt of $40.00 from Donald Forshee is hereby accepted and acknowledged in payment of hospitalization advanced by Hancock county.

This being the 12th day of March A. D., 1945, a date heretofore fixed for further hearing on the proposed establishment of D. D. No. 139, Hancock County, Iowa, petitioned for by John H. Lauen et al on August 3, A. D., 1944, said district to be established in sections 22, 23, 26 and 27, all in township 94 North, Range 28, West of the 5th p. m.

WHEREAS the hour for the continuation of a hearing on the proposed establishment of D. D. 139, Hancock County, Iowa, the claims for damages and the report of the Engineer recommending establishment of said District No. 139, having arrived, said hearing was held as scheduled.

WHEREAS, the Board of Supervisors of Hancock County, Iowa, being advised and all objections and claims for damage having been heard and adjusted and it is deemed that the establishment of said proposed district is conducive to public health and welfare and the benefits to be derived will be greater than the cost thereon and it is deemed for the best interests of the public that said district be established in accordance with Iowa law governing such action

BE IT THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, that D. D. No. 139, Hancock County, Iowa, petitioned for by John H. Lauen et al, which district is to be established through the lands listed in the preamble hereof, be and the same is hereby ordered established in accordance with plans, specifications, profile and report of the Engineer as amended, which are on file and the hour of 1 p. m. on the 21st day of May, A. D., 1945, is hereby fixed for a time of letting on the construction thereof Said letting to be held at the court house in Garner, Iowa.

Wm. Henschen is hereby appointed Engineer to supervise the construction thereof and his bond as such Engineer is hereby fixed at $500 00.

The County Auditor is hereby directed to cause notice of said letting to be published in the Klemme Times, a newspaper published at Klemme, Iowa, which notice shall request bids on both labor and material for said construction individually and combined, the time for commencement and completion, the approximate amount of work to be done all in accordance with laws governing such action

The Board reserves the right to waive technicalities and to reject any or all bids.

The foregoing resolution was offered and read by Supervisor Chambers who moved its adoption, was seconded by Supervisor Schoun, whereupon the Chairman placed the motion of its aodption and upon roll call the vote thereon is F. J. Schoun, Penn Eckels and John Chambers, aye. Nays, none.

Whereupon the chairman declared the resolution duly adopted.

On motion and second the inventory and the annual report of the Hancock County Home is approved.

Marihuana Makes Mild People Wild

New York City Found to Be Center of Traffic.

WASHINGTON. — Does smoking marihuana cause crime? Does the weed sometimes cause mild appearing people to become murderous maniacs?

The treasury department gave an emphatic "yes" in reporting that traffic in marihuana became an increasingly serious enforcement problem in 1944, with well financed gangs going into the business as never before. The treasury also pointed to New York City as the center of the traffic and said four major gangs were broken up there last year.

Three weeks ago Mayor Fiorello La Guardia of New York made public a report which declared that smoking marihuana has had no appreciable influence on the crime rate in New York. The "mayor's committee on marihuana," after a four year study, also said marihuana is not habit forming and that there was no evidence of any organized traffic among New York school children.

The treasury did not mention the New York City report. But Commissioner of Narcotics H. J. Anslinger cautioned against what he called "complacency" of the public toward the marihauana problem.

"While not all persons always display violent reactions to marihuana, there are many instances of persons who . . . appear of mild and harmless temperament displaying maniacal characteristics after using the weed," he said.

Marihuana seizures in 1944 totaled 12,117 ounces, compared with 11,961 ounces in 1943. The number of arrests decreased from 900 to 767. A treasury spokesman said this was because the traffic shifted considerably from individual violators to well-financed conspiracies.

White Parka Fools Nazis; 20 Killed, 20 Captured

WITH THE U. S. SEVENTH ARMY, FRANCE. — Sgt. Doff Williams of Beckley, W. Va., wore a white parka coat in the line one day and, as a result, 20 Germans were killed and 20 more were captured.

Williams, a squad leader, was at an outpost when he saw 50 soldiers, also in parkas, walking toward the rear on his right.

"I thought they were G.I.s," he said. "I called and asked why they were leaving the line but got no reply. I went out to investigate. When I caught up with them, a Kraut came up and ordered me in German to set up a machine gun at the corner of a nearby house.

"I realized immediately that the Germans had made the same mistake that I had," he added.

Williams picked up the German machine gun, walked around the house and found some American soldiers who were dug in. He reported to their commanding officer, told them of the oncoming Germans, joined them in the attack and the Yanks took a heavy toll.

Illiterate 4-F Total Is Equal to Russian Army

WASHINGTON, D. C. — Dr. John K. Norton of Columbia university said that illiteracy alone has deprived America of a fighting force equivalent to the Russian army now driving toward Berlin.

Norton testified at a hearing held by the senate committee on education and labor that "we have had to reject at least 2,000,000 4-F's — enough men to equal the army in the current Russian offensive — because they were denied educational opportunity.

He said southern states, with "substandard schools — and sometimes no schools—have thrown up such a large percentage of 4-F's that we have had to turn to other sections to find them.

"More youths from New York, Connecticut, Massachusetts, California and Illinois will be killed in this war than would have been had we had reasonable educational opportunity.

Yank Privates Discover Guest in 'Empty' Cellar

WITH AMERICAN TROOPS IN ALSACE. — Moving into a newly-taken town, Pvts. Zigmund Mankiewicz of Webster, Mass.. Sylvester Dollinar, Salem, Ohio, and Solomon Steelman, of Chicago, jumped into a dark cellar to escape a German artillery barrage.

"For all we know, this house may be full of heinies," Dollinar said.

"Sure," added Mankiewicz. "Anybody got a match?"

And by the light of the match, they saw a German soldier.

After a moment of embarrassed silence, the three Yanks piled on the Jerry.

'Soldiers Prefer Eggs To Beer' Gets a Laugh

LONDON. — American - born Lady Astor, an ardent dry, asked during a discussion on food in the house of commons:

"Is it not true that a great many soldiers would rather have a fresh fried egg than a glass of beer?"

She was answered with roars of laughter.

We Delivery Daily R. L. Medin, M

Dear Customer:

We know we haven't always given the kind of service you are accustomed to receive.

But we haven't put our feet on the desk and in the language of the day said, "what do you expect, there's a war on."

We sincerely feel that there is no priority on consideration, courtesy and cooperation. We value your good will and if you haven't received the kind of service you like, it is not because we haven't tried our very best to serve you well.

If you feel that we have failed to do our best under the circumstances, we will greatly appreciate your letting us know about it.

THANK YOU FARMERS—for coming so promptly and getting your SEED orders off the car. It helped us a lot and we do appreciate your cooperation. Thanks again!

In Bookkeeping, we have finished one set of books in the hardware business. Now we are on Notes and how to journalize Notes Payable and Notes Receivable. It is not at all difficult after you get the "drift."

We have finished our unit on the Civil War in American History. On Thursday and Friday we had a test completing it entirely.

JUNIOR CLASS NEWS
—Jeanne Trumbell.

We read the Reader's Digest this week in English Literature Class, and will have a test over it Monday or Tuesday of next week.

Laurence Polsdofer went to take his physical test for the Army last Sunday and was classified IA.

We have sent for literature and plans for banquets, but as yet we haven't decided on the kind of program we will have.

Friday night we had an all-high school party, refreshments were served and a good time was enjoyed by all.

In Typing Class we are practicing writing business letters.

In American Govenment Class we have been studying about the President's Cabinet, their duties, etc. On Friday we used the class period to discuss current events.

In Business Arithmetic we are tudying Measure of Surfaces, that deals with area, perimeter, and the like.

SOPHOMORE NEWS
—Dorothy Ellingson.

In English we have been studying the conjugation of verbs, and in our Literature Class, which we have one day a week, we are now studying Biographies.

Geometry Class has been pretty difiicult for the most of us, as we are studying Locus.

World History Class has been very interesting as we have been learning about some of the great victories of Napoleon.

We have put our Microbe Hunters away for awhile and are now back in our Biology books studying about the sense organs.

FRESHMAN NEWS
—Helen Pringnitz.

In Algebra we have started a new unit on fractions, having mastered the rules over factoring and special products.

We have started a new unit in Science over "The Work of Plants" This is our first introduction to Biology We have just completed the relationship of the Earth and Sun and their necessity in man's development.

We are continuing with our study of the conjugation of verbs in English Grammar. Each Friday is literature day Other days we study Grammar.

In Home Economics we have started to make yeast breads. Section II starts the yeast rolls and Section I bakes them. The following day Section I starts them and Section II finishes them. We all have the opportunity of tasting the finished product.

JUNIOR HIGH SCHOOL NEWS
Mrs. Clara Smith,
Teacher.

In our Art Class we are beginning work on wood-carving. Some of us started on soap carving Friday instead of wood We expect to make several things such as letters openers, garden markers, carved plaques, etc.

We have been learning facts about Law-making in our Civics Class. We found out how bills may be proposed and the steps needed in passing a bill in Congress. Next week we expect to find out how voting is done and just how a President is elected.

Seventh Arithmetic for the past week has consisted mostly of problems about circles and circle graphs. We are learning how to use a compass and a protractor.

A one-act play entitled "Herbie's First Date," will be given by pupils of the Seventh and Eighth Grades in the all-grade entertainment for March 28. A short skit will also be given by two Seventh Grade boys. Our musical numbers will consist of a chorus singing with the Fifth and Sixth grades, and a baritone, trombone and clarinet trio.

FIFTH AND SIXTH GRADE NEWS
—Mrs. H. G. Voetberg,
Teacher.

The Sixth Grade has a new member. She is Shirley Bisom. Shirley came here from Fort Dodge. We are happy to have her with us.

In Fifth Grade Language we have been giving reports. Sometimes we have been reading them and at other times we have been giving them orally.

In Sixth Grade Arithmetic we have been finding balances for savings accounts. We have found out how very necessary it is to do work accurately. When we first began doing this we made quite a few errors but now we are doing much better.

Who tells Dorothy that her mother wishes for her to return home? Come to our operetta "Midsummer Eve," on March 28 and find out.

Where did the queen elves get their lanterns? Come to Queen Mab's Court March 28 here in the high school auditorium.

THIRD AND FOURTH GRADE NEWS
—Miss M. J. Holmes,
Teacher.

The Third and Fourth Grades have a new boy in their room. He is John Bisom. Before coming to our school he attended a school in Fort Dodge.

The Third Grade has finished their reader "Streets and Roads." We are reading "More Streets and Roads" now. We find that the stories are equally interesting in this book as they were in our other books.

The Fourth Grade Arithmetic class has been studying about fractions. We learned about some fractions that were entirely new to us. We were surprised to find how easy this work is.

We would like to have you come and visit Queen Mab's Court at our operetta March 28.

KINDERGARTEN, FIRST AND SECOND GRADE NEWS
—Miss Arlene Bugh,
Teacher.

This week a little girl came to Kindergarten. She is Connie Jo Bisom. We are glad to welcome her.

First and second grades read about Forest. They learned how animals live in the forest and how rangers take care of the trees and animals in the forest.

Our part in the program March 28 will be: Kindergarten children dressed as birds, bees and flowers. Will sing songs pertaining to the Springtime.

The First and Second Grade costumed as Indians, will sing a group of songs based on the Indian theme and will conclude with an Indian War Dance.

WEEKLY NEWS ANALYSIS

Germans Fight to Hold Vital Industrial Districts in West; F.D.R. Draws Pattern for Peace

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

Able to perform the work of 12 coolies, this elephant loads gas drums on American transport command plane flying supplies to troops in Burma.

EUROPE:
Vital Areas

With Allied armies poised against both the vital Ruhr and Saar valleys, the Germans fought with their backs against the wall in a desperate effort to hold on to these industrial districts so important to their ability to continue the war.

Already heavily battered by aerial bombardment, the Ruhr and Saar faced the prospect of destructive artillery drum-fire, destined to lay their smoke-blackened cities and coal and iron-mining districts in gaunt ruins.

Offering only sporadic resistance to the rolling columns of U. S. and British troops west of the Rhine, the Germans beat a steady retreat back to the river, evidently intending to put up a strong stand behind the 1,300 to 3,270 foot wide waterway rather than in the rolling plains before it, where superior Allied armor could chew up their diminishing strength.

During the Nazis' withdrawal, fleets of Allied bombers roared over rear areas, not only smashing at road and rail lines in an effort to hamper troop movements, but also hitting at armored formations concentrated behind the Rhine for a last ditch defense of the Ruhr. Full extent of the magnitude of the Allied aerial bombardment can be gathered from reports that British-based U. S. planes alone dropped 51,000 tons on Germany in February.

While falling back to the Rhine on the U. S. 9th and 1st and the British 2nd army fronts in the north, the Germans utilized the rugged Eifel and Hunsbruck mountain country at the northern rim of the Saar in an effort to slow up the U. S. 3rd army's smash to the south. In every way, the Germans, familiar from A to Z with the country, were making every attempt to use the terrain to meet the Allied threat with a minimum of manpower.

Slightly larger than the state of Delaware, the besieged Ruhr cradled 75 per cent of the enemy's war industry in 1942, with its great coal deposits, estimated at 90 per cent of Germany's reserves and half of continental Europe's, forming the basis for its manufactories. Besides armaments, the Ruhr's 5,000,000 people produced steel, chemicals, pig iron, textiles, synthetic oil, high octane gas, rayon, drugs, plastics, dyes, bricks, glass and pottery.

Smaller than Rhode Island, the Saar also relied upon massive coal beds and iron deposits for the basis of its thriving industry, which produced steel, machinery, cement, plate glass, shoes, paper and textiles besides war goods.

Pocketed before by the Germans during the latter's great sweeps through Russia earlier in the war, wily Red generals were taking no chances on being nipped off all over again on the eastern front.

Although their forces had reached the Oder and Neisse rivers due east of Berlin on a broad front, the Red generals sought to minimize the possibilities of a German attack on their flanks far to the rear of the forward positions.

Holding up their fire on the central front until securing their flanks, the Reds exerted strong pressure against the Germans strung out along the Baltic coast immediately above the right wing of Zhukov's 1st White Russian army. To the south on the left wing of Konev's 1st Ukrainian army, the Reds guarded against the danger of a Nazi thrust from Upper Silesia, where the latter had set up strong lines to defend the industrial district and approaches to Czechoslovakia's Axis-worked war plants.

PACIFIC:
Share Spotlight

Carrier pilots, marines and army men all shared the spotlight in the developing attacks aimed at smashing Jap outposts of the home islands to smoothen the road to Tokyo.

Unchallenged by the once-vaunted Nipponese imperial fleet, Vice Admiral Marc Mitscher's famed Task Force 58 continued to roam in the enemy's home waters, with his carrier planes, following up daring attacks on Tokyo, smashing at the Ryukyu islands flanking the sea route to the east.

Having overrun the southern half of Iwo Jima, battle-hardened marines pressed the remnants of 20,000

With face deleted according to censorship rules, Jap prisoner receives smoke from U. S. marines on Iwo Jima.

defenders into the northern part of the island, using flame throwers along with light arms to root the enemy from well-designed natural entrenchments.

In the Philippines, army men, having cleared Manila, fanned out to the north, east and south to clear resistance from the rest of Luzon, with heavy fighting still ahead.

WORLD PEACE:
Pattern for U. S.

Once quoted as saying that scholarly Woodrow Wilson failed to secure U. S. entrance into the League of Nations because he was not a politician, Master Politician Franklin D. Roosevelt fired the first gun in the campaign to obtain approval for this country's participation in a postwar organization to preserve peace in an address to the nation and congress on the historic Yalta conference.

To assure the effectiveness of a postwar peace program, the President said U. S. collaboration must be two-fold:

First, this country must join in a world organization to suppress aggression, if necessary, by force.

Second, the U. S. must provide relief to alleviate suffering in the liberated states, and furnish credits for the reconstruction of their economy so that they might be able to resume full production and stand on their own.

"There can be no middle ground," declared the President. "We shall have to take the responsibility for world collaboration or we shall have to bear the responsibility for another world conflict. . . ."

Aid French

In an agreement that might set the pattern for future arrangements, the U. S. granted the French a 2½ billion dollar lend-lease credit to be paid within 30 years.

Under the agreement providing for shipment of over 1½ billion dollars of raw materials, food, petroleum products and light manufacturing equipment, repayment would be in 30 annual installments at 2⅜ per cent interest, while deliveries of almost 1 billion dollars of locomotives, freight cars, machinery for mines, industrial equipment, ships and barges would be made with a 20 per cent down payment and 30-year amortization of the remainder.

To maintain the present French army and double its strength of eight divisions, the U. S. agreed to continue lend-leasing military supplies. In return, the French promised increased reciprocal aid.

MEAT:
Scarcity Felt

Recent tightening up of meat rationing reflected frequent warning of government officials in recent weeks that short supplies could be expected until late summer or fall when livestock marketings should increase.

With the present meat situation aggravated by the sharp drop in hog slaughtering in the face of heavy military requirements, March allocations to civilians will fall about 6 per cent below February and 14 per cent below January.

In an effort to spread the civilian supply of all meat, point values were raised on a wide range of cheaper beef and pork cuts, with reductions for choice beefsteaks and roasts failing to offset the increases because of the relative scarcity of such items. Affected by the latest point revision were a wide variety of sausages and canned meats previously uncontrolled.

COAL MINERS:
Start Bargaining

Having previously filed a 30-day notice of the intent to strike in case of a snag in negotiations for a new contract, United Mine Workers Chieftain John L. Lewis sat down with coal operators to bargain for a new pact as government officials warned of an impending coal shortage even without a walkout.

Although he did not ask for a basic wage increase, Lewis demanded a royalty of 10 cents for every ton of coal to build up a $55,000,000 medical and rehabilitation fund; time and a half beyond a seven-hour day and 35 hours a week, and a 10 cent differential for the second shift and 15 cents for the third.

With requirements continuing at peak levels and the mines' manpower problems becoming more acute with the loss of an estimated 30,000 men from an already shrunken force, a 50,000,000-ton shortage of coal is in prospect unless the European war ends this year, it was said. Industrial reserves were below standard in many regions, with New England electric utilities, for example, possessing only an 89 days' supply compared with 102 last year.

Find Shell in Seaman

Convalescing at the naval hospital in San Francisco, Calif., from a compound fracture of the leg and chest injuries incurred on a battleship off Leyte, Seaman Dewey Dupree, 20, of Poelousas, La., told doctors that he felt there was something inside of him.

Thinking they had missed a piece of shrapnel, doctors ordered an X-ray, found a highly sensitive unexploded *20-mm. shell embedded in Seaman* Dupree's body.

In operating to remove the projectile, the doctors had to exercise the greatest care, since the shell could have exploded on contact even with a surgical instrument.

JET PLANES:
U. S. Development

Using an engine based on the design of Commodore Frank Whittle of the RAF, two American aircraft companies have produced a jet propelled fighter capable of flying over 500 miles per hour.

Called the "Shooting Star," the new plane is supposed to be much more maneuverable than German jets because of the development of special devices for controlling wind resistance. Sleek in appearance, with the cockpit set before the wings, the new jet can carry heavy loads of ammunition, photographic equipment and bombs and fuel.

Principle of the new jet engine is simple: Wing ducts permit passage of air into a combustion chamber, where kerosene flame causes it to expand. Because of this expansion, the gases beat against one side of the chamber, forcing a forward motion.

ALLIED ARSENAL:
U. S. Earns Title

Possessed of almost unlimited resources, a vast pool of skilled and unskilled labor and efficient management, America has well earned the title of the arsenal of democracy during World War II. In supplying U. S. and Allied forces since 1940, U. S. industrial production included:

246,845 airplanes; 56,697 naval vessels; 4,631 merchant ships; 75,204 tanks; 14,767 armored cars; 110,945 trucks over 2½ tons, and 658,523 trucks under 2½ tons.

2,422,099 machine guns; 5,942,385 rifles; 5,163,826 carbines; 130,017 tank and self-propelled guns; 48,952 army and anti-aircraft guns; 55,252 pieces of all types of field artillery; 4,130,000 tons of aircraft bombs; 59,646,000 grenades, and 37,198,000,000 rounds of small arms ammunition.

Because U. S. airmen and ground troops in Europe will have to be completely reequipped for the fight against Japan, war production will have to continue at a high level after Germany's fall, it was said.

OLD WHEAT

If properly stored, wheat may be kept as long as 22 years and still make good bread, scientists of the USDA and the Colorado Experiment station report.

Ordinarily, wheat is stored no longer than two or three years before being milled since it has been thought that the long storage might change the protein of the wheat so that it would lose the elasticity that allows bread to rise and the fat in the grain would become rancid and affect the flavor of bread.

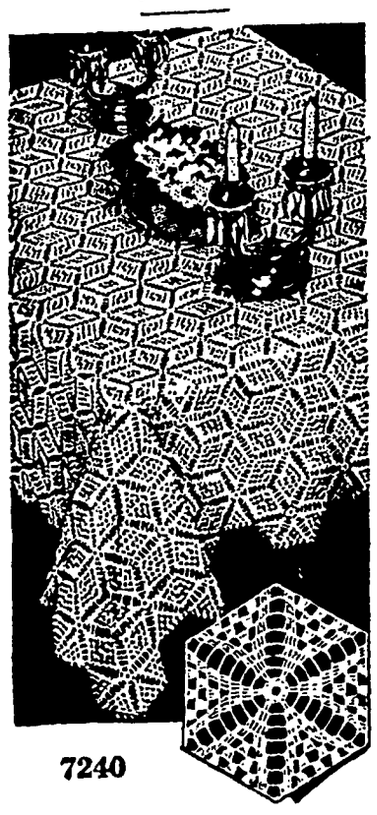
Price Supports Aid British Farmers

Although British farmers now are being paid adequate prices for practically all the main food products to return a profit on the farm by the government, the present British policy is not assured after the war, it was reported.

British farmers enjoyed prosperity during World War I, but the repeal of price and wage guarantees in 1920 left the farmers without protection when prices for their products dropped, driving much land into use as pasture.

In the early 1930s, British agriculture had become so hard pressed that a system of direct subsidization was adopted. The subsidization system was superseded after the outbreak of World War II by a policy of guaranteed prices for essential farm products.

'Star of the East' Easy to Do Cloth



7240

IT'S so quickly memorized, so easy, and so effective in spreads, cloths, scarfs or pillows, this crocheted medallion.

* * *

The beginner's delight, the expert's pride—Star of the East medallion. Pattern 7240 contains directions for medallion; stitches.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Violinist Suffered Pangs Of Torture for the While

During rehearsal, the conductor noticed that one of his first violins was not looking himself. He stopped and asked the man if he felt ill.

"No, sir, thanks; I'm all right," was the reply.

The rehearsal proceeded. Presently the violinist again caught the conductor's eye. "Smith," he said, "are you sure you're all right?"

"Yes, sir, really; I'm all right."

But Smith seemed to grow paler. "Look here," said the conductor, "I really think you ought to go out for some fresh air, you know."

"Don't worry about me, sir," said Smith. "I'm quite all right—only, I simply loathe music."

Better Farm Travel Promised in Huge Federal-State Postwar Road Program

Cooperation of Local Agencies Is Needed to Assure Share in Projects.

By WALTER SHEAD
WNU Washington Correspondent.

WASHINGTON, D. C.—Township trustees and highway supervisors, county highway superintendents, boards of county commissioners and other officials of local governmental units interested in secondary and feeder road construction and improvement have an unprecedented opportunity to take advantage of the largest grant-in-aid of federal funds in the history of the Public Roads administration.

This grant of federal aid for highway and road construction, to be matched by the states on a 50-50 basis, totals $1,500,000,000 and provides for a $500,000,000 expenditure of federal funds annually for the first three postwar fiscal years. That means, if the several states take advantage of all the funds, an expenditure of three billion dollars on highways will be made in the three-year period.

This expenditure is to be divided $225,000,000 annually for the regular federal aid highways; $125,000,000 annually for urban projects on the federal aid highway system and $150,000,000 for secondary and feeder roads.

And it is this latter appropriation with which we are particularly concerned, for if all subdivisions of the state governments take advantage of this congressional appropriation for the three-year period it will mean an expenditure of $900,000,000 on these all-important farm-to-market roads which constitute 88.8 per cent of all our public highway mileage.

The importance of participation by local governmental officials is pointed out for the reason that in most of the states it will be necessary to enact enabling legislation in order that local road officials and state highway departments may get together on a comprehensive plan which will take in these farm-to-market roads.

The federal bureau of public roads deals only with state highway departments, so the cooperation of state and local highway departments is essential if this money is to go to local road construction.

Legislatures Meet.

In every state in the union with the exception of Kentucky, Louisiana, Mississippi and Virginia the state legislatures are, or have been, in session this year. The chances are that where necessary this enabling legislation is already before the state legislatures.

In some states, for instance in North Carolina, West Virginia, Virginia, Delaware and Maryland, all county roads have been taken over by the state highway departments. In other states, such as the New England states, there is a working agreement that the state highway departments build the county roads.

The point is, however, that this is not a paternalistic gift to the local communities; the federal air is extended on the basis of need and the extent of the cooperation between local road officials and their state highway departments.

In a good many states a system of secondary roads has never been designated by the state highway departments, and this designation is one of the requirements so that the money spent can be under the supervision of the highway departments of the states.

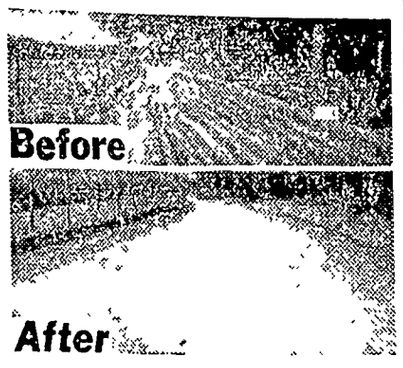
Insofar as the farm-to-market roads are concerned the $450,000,000 of federal funds for the three-year period will be apportioned to the states, one-third on the basis of area, one-third on the basis of rural population and one-third on the basis of rural post road mileage.

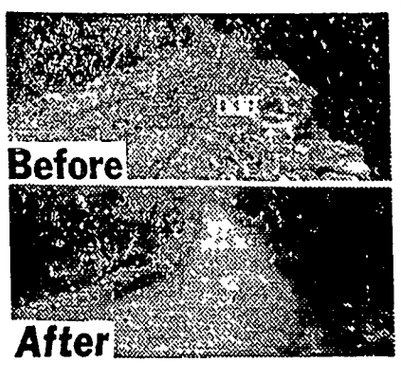
The importance of the development of these secondary and feeder roads to the basic economy of the rural districts of the nation is immediately seen when it is pointed out that there are 2,936,000 miles of these roads and only about 5 per cent of that mileage is paved. About 38 per cent is surfaced with such material as topsoil, shale, untreated gravel and crushed rock and the remaining 57 per cent has no surfacing of any kind. In other words the millions of farmers living on this 57 per cent of the mileage of farm-to-market roads are still in the mud.

Benefits Widespread.

While there are no clearly defined boundaries of the areas of population groups especially served by any one of the three classes of roads, that is federal-aid highways, urban roads and streets and the farm-to-market roads, all areas and all populations derive some benefit from the three groups of highways.

It is apparent, however, that people living outside of any municipality and people living in municipalities of less than 10,000 population are especially interested in these farm-to-market or secondary roads.





Widened, drained and graded, these county feeder roads in Maryland are now providing farmers with faster and smoother service to marketing centers.

And here are some population figures on that basis. There are approximately 21,000,000 people living in towns of less than 10,000 and about 48,000,000 people, mostly farmers, living outside of municipalities or a total of 69,000,000 people. So that 52.4 per cent of the total population of the country are in areas where the secondary and feeder roads are located and would receive a large measure of benefit from their improvement.

But to be more specific, 44,000,000 people live on these secondary roads and they constitute the lifeline for 92 per cent of the 6,100,000 farms in the nation. Travel studies for the year 1941 showed that of the total of 310,800,000,000 vehicle miles traveled in the United States, 107,180,000,000 was on the farm-to-market roads, or 34.5 per cent of the total vehicle miles traveled.

Of course the funds to be available for the improvement of these secondary roads is not expected to improve all of them and it is the responsibility of local road officials and the state highway departments to determine what proportion can best be improved to provide the greatest good for the greatest number of people.

Funds Limited.

According to estimates which have been received from many states it is doubtful that funds provided in the three-year period will provide improvement for as much as one-third of the entire secondary road system. And it is likely that thousands of miles of these secondary roads will never be improved.

For instance, F. R. White, chief engineer of the Iowa State highway system, in testifying before the house of representatives road committee, said that studies in his state indicated that improvement of about 83 per cent of the rural secondary road mileage would provide a surfaced road to each farmhouse in the state.

"A goodly portion of the remaining 17 per cent of the mileage is so little used as to be nothing more than land-use trails, which could well be abandoned as public highways and the land turned back to corn production," Mr. White said.

In some states the need is much greater than in others, as was evidenced in some of the testimony before this committee. In Indiana, for instance, a large per cent of rural roads have some sort of surfacing like bituminous, crushed rock or gravel, while in Alabama the testimony showed that some 60,000 miles of the country road system is largely without permanent surfacing and varies greatly with the different counties.

While cost of these farm-to-market roads vary in different sections of the country, indications are that the county and township officials want as much mileage surfaced as possible from the funds available at costs running from approximately $3,500 to $6,000 per mile. Intermediate types of surfacing would run upward to approximately $12,000 per mile with the higher type pavements costing upwards of $20,000 per mile.

State Funds Available.

Due to the fact that there has been little road building during the war, state highway construction funds have swelled into fantastic proportions despite the fact that revenues from automobile licenses and gasoline taxes have been reduced due to curtailment in auto travel.

The Public Roads administration estimates that unexpended balances in state road funds by the end of this year will total around $418,000,000. To this will be added current receipts from levies upon the auto owner so that the PRA estimates the states will have approximately $475,000,000 to $500,000,000 available for new highway construction. If they match the authorized appropriation as set up in the new federal aid highway act their total must reach at least $500,000,000 annually.

Of the federal funds, $100,000,000 is already available for surveys, Plans and construction, but the remainder of the program must wait until the first postwar fiscal year which ends June 30 following proclamation by the President of the end of the existing emergency, or a concurrent resolution by the Congress that emergency has been sufficiently eased to permit highway work.

It is pointed out that there have been federal aid appropriations for secondary and feeder roads in the past, but unfortunately there has never been full and complete advantage taken of the money appropriated, and, as a result, in a number of states the intent of the appropriation has not been fully realized. For this reason, federal officials along with those interested in road construction, both public and in private industry stress the importance of close cooperation between local and state officials in selecting a secondary road system which will qualify with the PRA, care being exercised not include roads of minor importance.

Some important features of the 1944 act include costs of rights-of-way in construction costs provided the federal share shall not exceed one-third; 10 per cent of total authorization may be used unmatched by the states for elimination of hazards in highway - rail grade crossings with the government paying 90 per cent and the railroads 10 per cent of the cost; 1½ per cent of the total authorization may be used for long-range highway plans.

Federal Share.

According to officials of the American Association of State Highway officials, the states feel that the federal government has an obligation in making these grants for use by the states in highway construction. They also feel that the federal government should pay a higher percentage of the costs than the "50-50" basis which is now and has been in effect.

Samuel C. Hadden of Indiana, president of the American association, pointed this out in his testimony before the house committee. He said that in 1942, for instance, the federal government collected taxes on motor vehicles and parts and on motor fuels in excess of $677,000,000, while in the same year it returned to the states in the form of federal highway aid less than one-fourth of that amount.

"For some years," Mr. Hadden said, "it has been the declared policy of the federal government that the state governments should not practice diversion of motor vehicle tax revenues from highway to other purposes.

"This disparity between precept and example has not escaped the attention of our citizens generally, or of our state and local public officials. Frankly, it is the belief of the great majority of our citizens that the federal government should take its own prescription in this matter, especially since the precept is considered sound and the example unsound."

As a matter of fact, 14 states have within recent years amended their constitutions to prohibit diversion of taxes collected from gasoline and automobile licenses to other than highway construction and maintenance.

At any rate, if local and state officials cooperate properly there is a good chance that during the three years following the war several millions of our farmers will "get out of the mud" through the medium of the availability of these federal funds. These farm-to-market roads are our "bread and butter" roads; they carry our food to market; they carry the country children to school and back home again in the evening; they carry the mail to a third of our population; they carry this third to and from their churches, and they reach into remote corners.

Fifty-seven per cent of America's vast network of rural secondary roads remain unsurfaced, with the result that many farmers still find themselves frequently stuck in the mud as this picture indicates.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

BY HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for March 25

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

THE LAST WEEK

LESSON TEXT—Matthew 21:6-16.

GOLDEN TEXT—Blessed is he that cometh in the name of the Lord; Hosanna in the highest.—Matthew 21:9.

The official presentation of Himself to the Jewish people as their King, their rejection of Him and, what was even more solemnly meaningful, His rejection of the Hebrew nation because of their unbelief—such are the stirring events which face us as we go with our Lord into the last week of His earthly ministry.

The first event in that sequence is the one we study in our lesson for today, namely, the coming of the King to Jerusalem.

I. Preparation and Presentation (vv. 6, 7).

The King comes, but even in His hour of royal triumph He gives to His followers the unexplainable but inestimable joy of meeting His need.

1. "The Disciples Did As Jesus Appointed" (v. 6). He had need of disciples who would do His bidding without question or hesitation. How precious is such obedience! Let us also go and do what He commands.

He needed the colt and the ass. How simple and lowly was that need, and yet how glorious that man was ready to meet it!

God's plans are worked out in the little things as well as the great. Prophecy was being fulfilled here (see v. 5) by a little thing. Is God waiting to carry out some great purpose through some little thing which you are withholding from Him? Why hinder Him any longer?

2. "And He Sat Thereon" (v. 7). Though He did not come with the pomp and trappings of an earthly potentate, the King of Glory came to His people to offer them for the last time the opportunity to receive Him.

He asks you to yield your life to His kingship. What will your answer be?

II. Acceptance and Rejection (vv. 8-11, 15, 16).

1. "The Multitude . . . Cried . . . Hosanna" (vv. 8-11). The fact that before the week was over some of the same voices cried, "Crucify him!" should not obscure the fact that there were childlike believers (v. 16) who really had faith in Christ.

There is something inspiring about that picture of enthusiasm and devotion. Real faith in Christ ought to result in a fervor of spirit which will stir our hearts and our cities. Are we not altogether too dead and formal in much of our worship today? Do we not need more holy enthusiasm for Christ and for His Church?

2. "The Chief Priests and Scribes . . . Were Sore Displeased" (vv. 15, 16). Small wonder, for not only had the children put them to open shame by recognizing the Christ whom they had ignored, but He had also ruined their polite religious "racket" which produced for them such a lovely profit.

Mark this—when anyone is displeased with Jesus or with His children or with His work on earth, you can be sure that there is a reason, and not a holy, upright or good reason either!

III. Judgment and Compassion (vv. 12-14).

What a remarkable picture! In the midst of flaming judgment and destruction we find His loving compassion upon the blind and the lame. Folk who think that Christ has no message but love need to look on Him as He cleanses the temple. On the other hand, those who think that He has no word but judgment need to behold Him as He stands in the midst of the overturned tables and debris and heals the needy.

1. "Jesus Cast Out . . . and Overthrew" (vv. 12, 13). He knew where to begin to cleanse the city. He started in the temple. Absolutely right is the man who suggested that the place to start to clean up a city is not in the slums but in the churches.

You will not be ready to clean out the tavern or that other low place where the gang hangs out in your town until you have cleaned out the church if sin is being harbored there.

The same is true of the individual. A regenerated heart will bring a reformed life, not vice versa. You can live only after you have been born.

2. "He Healed Them" (v. 14). The very hands which had just overthrown the tables and cast out the money-changers now gently touched the lame and the blind with healing. The eyes which had blazed with holy indignation now shone with love and compassion. The scene of judgment and chaos became the house of prayer and of answered prayer. On the very spot where one man had received condemnation, another received healing.

Each one received that which He sought by his own attitude and action. How will you, my dear reader, meet Jesus—as your Judge or as your Saviour? You must make the choice. Choose Christ today.

Local Happenings

Klemme and Vicinity

Mrs. Dick Swalve visited Sunday evening at the Daisy Lemke home.

B. L. Prouty of Garner, was in Klemme on business Saturday.

Have you contributed to the Red Cross? There is still time.

Mr. and Mrs. Will Keraus of Garner were visiting at the Emil Beier home Sunday afternoon.

Mrs. W. F. Missman and Mrs. P. M. Wilson were Mason City visitors Thursday morning.

Mr. Henry Helps returned home Thursday from a nursing home in Mason City.

Mr. and Mrs. Arnett Waddingham and son were calling on patients at the Mercy hospital Sunday.

Mrs. Henry Helps and Mrs. Ernest Pringnitz were at Garner last Thursday afternoon.

Mrs. Don Christiance was at Mason City Saturday visiting with her brother who is ill.

Mr. and Mrs. R. A. Jorgenson visited at the Lyle Liebendorfer home in Forest City, Sunday.

Mr. and Mrs. J. N. Day have written Klemme friends they will leave California on March 29th.

Paul Van Buskirk entered a Mason City hospital Saturday for treatment.

Rev. and Mrs. Will Suckow of Van Meter came Saturday to attend the funeral of Mrs. Augusta Riemer at Garner.

Miss Betty Etchen of Des Moines spent the week end here visiting her parents, Mr. and Mrs. J. A. Etchen.

Mrs. Naska Bock underwent a minor operation at a Mason City hospital Friday. She is making a good recovery at her home here.

Pfc. Elmer "Butch" Jahnke was home last week from Coral Gables, Florida to enjoy a furlough visiting with his father and other relatives.

Mrs. Albert Lange reports she found a violet in bloom outside he house Sunday. Another sign of spring.

Mr. and Mrs. C. G. Waterman and Mrs. Lyle Wilcox drove to Mason City Saturday evening for dinner.

Rev. and Mrs. H. E. Harvey drove to Mt. Vernon Friday afternoon to visit with their son, Elwood, until Saturday afternoon.

Mrs. Martin Karsjens, who underwent a major operation at a Mason City hospital, is expected to return home this week.

Ivadell, daughter of Mr. and Mrs. Jake Blumer, had an appendix operation at a Mason City hospital last week.

Rosemary West of Des Moines, came last week for a visit with her grandparents, Mr. and Mrs. Sumner Trumbell.

Mrs. Fred Musfelt of Clarion and Mrs. Mary Waterman were supper guests at the home of Mrs. Antonio Keraus Monday evening.

Kaye, daughter of Mr. and Mrs. Verle Keraus of Garner, spent all day Saturday in Klemme with her grandparents, Mr. and Mrs. Wm. C. Keraus.

Mrs. John Clements and Jimmie and Mrs. Ben Coobs visited with Mrs. W. F. Pavey at the Mercy hospital in Mason City, Friday afternoon.

Mrs. W. F. Pavey underwent a major operation at the Mercy hospital in Mason City Thursday morning. Reports are that she is making a good recovery.

Mrs. Lyle Burr of Mitchellville, Iowa, came last Thursday and visited in Klemme with her mother, Mrs. Naska Bock, until Monday evening.

Mr. and Mrs. Verner Lewis received a telephone call Thursday morning from Des Moines stating their daughter, Cadet Nurse Luella was seriously ill. Mrs. Lewis left immediately for Des Moines. Mrs. Lewis returned home Sunday as her daughter was much better.

Today. March 21st, is the first day of spring.

Mr. and Mrs. Emil Beier entertained to dinner Sunday the following: Carl Riemer of Marshalltown. Mr. and Mrs. Ben Ridder and Lois, Mr. and Mrs. Emil Blumer, Mr. and Mrs. Merlin Neuberger and Dean, Mrs. Carol Brager and Daryl.

Adolph Schlichting and Fred Schlichting spent Sunday afternoon at the Mercy hospital in Mason City visiting with the brother Will who is a patient there.

Mr. and Mrs. John Chambers were entertained to dinner Thursday evening at the Roy Jacobs' home. The occasion was John's birthday.

Myrna, daughter of Mr. and Mrs Harvey Barz, spent last week in the country visiting with her uncle and aunt, Mr. and Mrs. Ben V. Greiman.

Miss Barbara Johnson, former Klemme girl, daughter of Mr. and Mrs. P. W. Johnson of Dakota City is taking nurses' training at a Des Moines hopsital.

Mr. and Mrs. Wayne Bingham and her father, Mr. Nachazel, of Iowa Falls, were dinner guests on Sunday at the home of Mrs. Antonio Keraus.

Mrs. Mary Waterman entertained to dinner Sunday Mr. and Mrs. Fred Musfelt; Mr. and Mrs. Oscar Musfelt, and Mrs. M. Rice, all of Clarion; and Minnie and Ben Lau of Klemme.

Albert Kraus has moved from his farm southwest of Klemme to his place at the north edge of Klemme Mr. and Mrs. Raymond Bachman moved to the Kraus farm southwest of Klemme

Mrs. Lester Stille and Miss Marie Blank were Mason City visitors Monday afternoon.

Mrs Wes Schuldt, Mrs. Frances Ridder, and Mrs. Fred Musfelt of Clarion, were dinner guests today, Wednesday, at the home of Mrs. Mary Waterman.

Mr. and Mrs. Will Waddingham, accompanied by their grandchildren, Delores, Roland and Jimmie Karsjens, went to Mason City Saturday to visit Mrs. Karsjens at the hospital.

Mrs. Clara Stille entertained to dinner Sunday, the following: Mr. and Mrs. Melvin Schaefer, Mr. and Mrs. Francis Buseman, Mr. and Mrs. Virgil Stille and Mr. and Mrs. Geo. Stille and family.

Mr. and Mrs. Louis V. Perkins drove to Webster City, Sunday March 11th where they celebrated Louis' birthday with a fine dinner. The Perkins' children from Estherville were also there and Mrs. Perkins accompanied them home for a weeks visit. Mr. Perkins drove up there Sunday to bring her home.

SGT. CLIVE RUKA ARRIVED HOME TUESDAY FROM INDIA

Sgt. Clive Ruka, son of Mr. and Mrs. Earl Ruka, arrived in Klemme Tuesday morning from overseas.

Sgt. Ruka has been in India for 30 months and this will be his first furlough since he entered service.

GIRL SCOUT NEWS

The White Rose Patrol held their meeting at Mrs. Trumbell's.

Jo Ann and Irene had the games and played The Organ Grinder Man and I Am Thinking.

We answered Roll Call with the names of our favorite candy.

The Girl Scout Promise and the Laws were given and we gave the Pledge of Allegiance.

CONTRIBUTIONS SWELL RED CROSS ROLL CALL TO OVER EIGHT HUNDRED DOLLARS

Mrs. George Lawhorn, chairman of the annual Red Cross Roll Call for Klemme Monday reported that contributions had now exceeded $800 and prospects for still receiving more contributions.

As of Monday evening, the total had reached $825.40, said Mrs. Lawhorn.

New contributions to be added to the list since the last publication include:

Capt. and Mrs. E. G. Schaeffer	40 00
First National Bank	10.00
Stenus Harms	2.00
Mrs. Carl Heginger	1.00
Harry Smith	1.00
Wm. Velau	5.00
Roy Schaefer	5.00
R. W. Elder	5.00
Total	$865.40

Mrs. Lawhorn, chairman and her workers deserve a bouquet for the fine work they have done in making this the biggest Red Cross Roll Call Klemme has ever had. Mrs. Lawhorns workers are Mrs. Orville Bridges, Mrs. Sumner Trumbell, Mrs. C. G. Waterman, Mrs. Matt Smith and Mrs. R. A. Jorgenson.

Klemme people are to be complimented for being so liberal when the Red Cross needed so much more to carry on their work.

Klemme came through again. Klemme has never yet fallen short on any kind of drive. Klemme has always exceeded the quota.

CLASS OF ELEVEN WILL BE CONFIRMED GOOD FRIDAY

Eleven young people will be confirmed at the Evangelical & Reformed Church at the morning services on Good Friday, March 29.

The members in the class are:

Helen Suckow
Beulah Goll
Esther Mae Hartbeck
Wilma Lauden
Darwin Wille
Carolyn Albers
Elwyn Schaefer
Ardel Rosendahl
Robert Baack
Raymond Christians
Edward Grosshuesch.

An acre of land seeded to sudan grass will provide enough pasture for two milk cows.

Our Men In The Service

P. F. C. CLARENCE KLUCKHOHN WRITES FROM GERMANY

Germany,
March 13, 1945.

Dear Jergie and M. J.:

Really I'm sorry that so many weeks had to get by me before I can finally get around to tell you I received your letter while in England last November. Perhaps my best excuse for not writing to you sooner is because I've been in the combat zone since landing on the Continent last December. As you can perhaps understand, that means continual moving and keeping busy.

I receievd a lot of letters from my friends in Klemme. Those in addition to The Klemme Times keeps me pretty well posted on what is going on around the home town.

One afternoon a few days ago I spent a few hours trying to catch up on my correspondence. I had quite a few letters written and started telling some wild yarn to one of the fellows. When I turned around my candle had them all afire I used a few new words I learned in the Army, mixed with a few old ones but it didn't seem to bring my letters back or the precious time I had spent.

I haven't seen anyone I knew from home since leaving the States. I know that I was very close to Bud Wilcox while in Luxembourg but didn't get the chance to look him up Perhaps I'll be lucky enough to see some of the fellows from Klemme before the war is over here.

I haven't had a pass while here so there isn't much I can tell you about the cities and scenery other than that, that is restricted. I can tell you that I'm in the 11th Armored Division in the 3rd Army. I've been doing my best to learn to speak German, but my best is none too good. I've sort of given up trying the past few weeks except when I have to ask for something.

One thing, the people here have plenty of musical instruments. Almost every house, whether demolished or left standing, has some sort of instrument, from a mouth harp to complete set of drums. Too bad I gave up the piano a few years ago, there are plenty of them.

Well Jergies, I have to cut this short and say "So long." Perhaps I can fill a few more pages next time. I'm always looking for letters, so write again when you can. Tell everybody hello from me. Hoping this finds you both feeling "tip top."

Your friend,
Pfc. Clarence Kluckhohn.

FORMER KLEMME BOY SAVES B-26 BOMBER AND CREW

Mrs. Tom Roths gave the Times the following news clipping which tells of the heroic dead of her nephew, S. Sgt. Dean H. Doyle, former Klemme boy:

An 8th Air Force Fighter Station In England—Being a crew chief on a tow target plane can be exciting at times. S. Sgt. Dean H. Doyle of Charles City, Iowa, can vouch for that.

One of those exciting moments occurred recently when the 2nd tow target on a B-26 Martin bomber, together with 1,500 feet of cable, became fouled in the undercarriage of the plane. The B-26 was piloted by Capt. Frederick B. McIntosh of Oakland, Cal.

"We were in a heck of a spot," said Capt. McIntosh. "If we hadn't got rid of that target and cable, it's mighty doubtful that I could have brought the plane in for a safe landing. I feared I might have to abandon her."

The B-26 was flying at an altitude of 4,000 feet over the North sea, when Sgt. Doyle decided to take matters into his own capable hands. He seized a cable cutter and motioned to the other members of his crew, S. Sgt. James A. Putzlocker of Turtle Creek, Pa., and Sgt. Pasquale A. Fares of Chico Heights, Illinois.

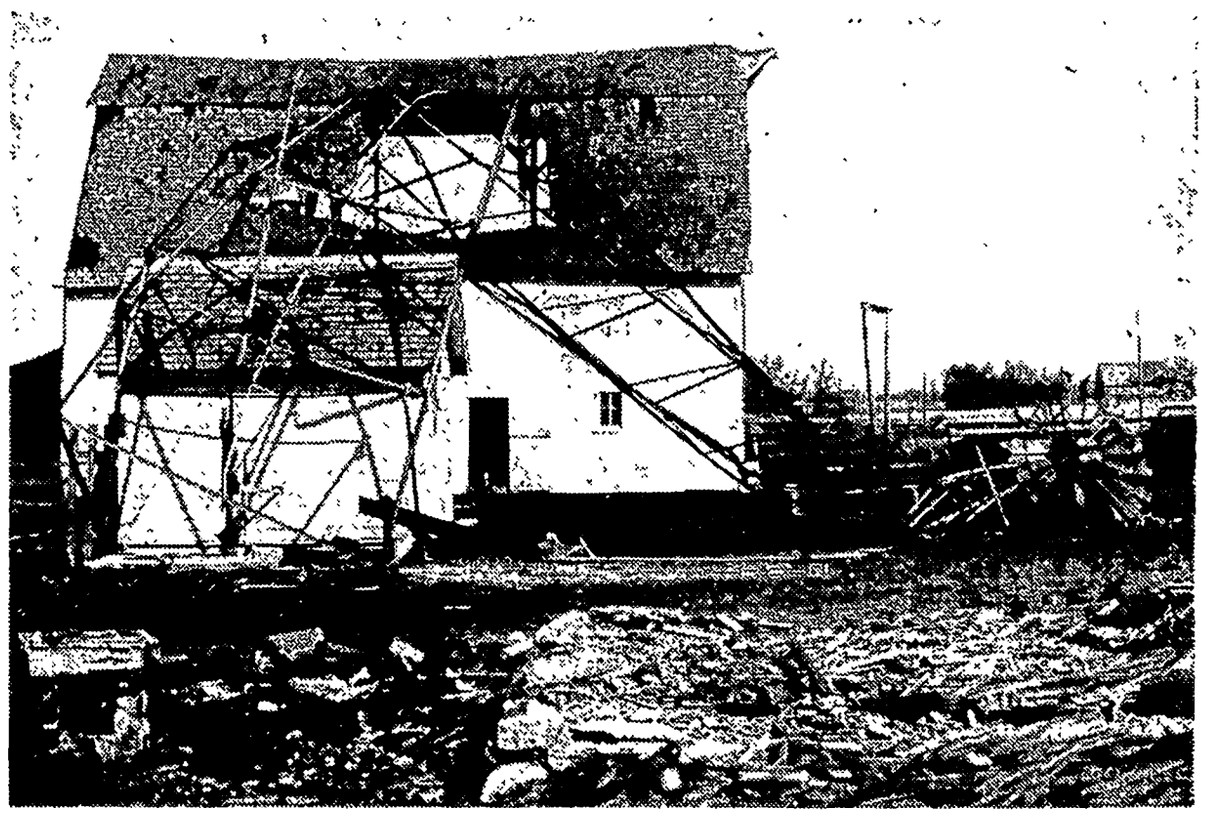
Without informing Capt. McIntosh of his plan, and disregarding his parachute because of its bulk, Sgt. Doyle was lowered through the hatch of the bomber, his legs firmly grasped by his buddies. He cut through the cable, released the target and was hauled back into the plane.

Thereupon, he went forward and reported: "Target's released, sir." The bomber was landed without further incident.

Sgt. Doyle's only comment, "It was pretty windy while I was hanging out there."

Best use of rock phosphate is made by legume crops growing on soils slightly acid. It doesn't work so well on neutral or alkaline soils.

Farm Buildings Damaged By Windstorm March 16th



(Courtesy Des Moines Register)

SERVES IN PACIFIC—Elmer H. Meinders, seaman 1/c, son of Mr. and Mrs. John Meinders of Klemme, left for oversea in August last year and landed in New Guinea. He entered the service March 29, 1944, and got his boot training at Farragut, Idaho. His wife and infant daughter live with her parents at Belmond.

(Courtesy of Mason City Globe-Gazette.)

Storm Damage Near Kanawha

MARCH 16 TORNADO DID A LOT OF DAMAGE NEAR KANAWHA

Last week The Klemme Times told of the storm damage around Garner and northwest Klemme.

A great deal of damage was done around Kanawha, according to the following article in the Kanawha Reporter:

"Following an almost summer-like day a tornado hit the territory a few miles north of Kanawha last Friday night about 10:30 o'clock, causing a heavy loss of property and injuring Louis Steffen.

"The path of the storm was from a point north of Kanawha to Garner, various farm buildings suffering damage.

"At the Raymond Rust farm 1½ miles north, the big barn was wrecked, also a chicken house and other buildings besides the windmill and part of the top of a corn crib. One building was moved quite a ways off its foundation. The farm home was also damaged, mostly in the breaking of windows. The upper portion of many trees were broken off and other trees blown down.

"The barn was totally wrecked, boards and larger sections being scattered about. The Rust farm yard presented a sorry picture the morning after. This place was the hardest hit of any.

Richard Rust, son of Mr. and Mrs. Raymond Rust, had several fingers crushed when caught in a door as it blew shut.

"At the Steffen farm the little house occupied by Louis Steffen and family was wrecked. Mr. Steffen was blown from the house into a strawpile and one arm broken. Had he not been stopped by the strawpile, he might have gone into the fence and been much more seriously injured. Other members of the family were not hurt, but belongings were scattered over the field and across highway 111 and to the field on the east side of the road. The Steffen farm is about 3 miles north of Kanawha."

"The house in which Mr. Steffen and family lived was a new one. He had no insurance at all.

"At the Peter Luppen farm in the same neighborhood, the barn was blown over. One horse was killed but the men were able to get the other horses out alive from the wreckage.

"At the Gerhard Prull place, the side was taken out of a brick garage. Two sides of a brick cattle shed at the Chris Abbas place were taken out. The John Prull silo was wrecked. Chicken and hog houses at the Herb Mewes farm were damaged and the wind blew down trees, broke some windows and damaged three small hog houses at the Lloyd Raber place."

* * *

In addition to the damage we reported in The Times last week we learned that nearly every windmill from the Geo. Schoenwetter farm in Liberty township, north had been blown down. At the Liberty Methodist Church shingles were ripped off and some windows blown out. A number of farms in the storm path had silos damaged, brooder and hog houses damaged.

Clothing Needed For Relief

CLOTHING TO BE COLLECTED TO AID WAR REFUGEES

The United National Clothing collection will be conducted thruout the month of April. The collection is a united effort on the part of the United Nations Relief and Rehabilitation administration and various voluntary war relief agencies of the U. S. The purpose of the collection is to secure the maximum quantity possible of good used clothing for free distribution to needy and destitute men, women and children in war-devastated countries. The goal is 150,000,000 pounds of clothing.

What is needed is good substantial used clothing, for both winter and summer wear. Although clothing need not be in perfect repair, it must be useful to the people who receive it. Underclothing and all types of cotton garments should be washed before they are donated, but need not be ironed.

It is suggested that people begin searching now for clothing which they wish to donate and take it to any one of the following receiving stations in east Hancock county:

Klemme: Thomas Barber Shop.
Goodell: Evenson Grocery.
Garner: City Hall, or
Avery Theatre in evening.

CONCERT SINGERS COMING TO KLEMME CHURCH

The Mission House Troubadours will sing a sacred concert in The Evangelical and Reformed Church in Klemme on Wednesday evening, April 4th

The a capella group is under the direction of Edward Huenemann, a Middler in the Mission House Seminary. Mr. Huenemann has gained much experience in choral work, directing campus choruses, and local church choirs.

This choral organization will present numbers ranging from the early choral work of Palestrina, through the Reformation hymns of Luther, to Bach, Handel and Daniel Protheros. The program presented will be in three parts. Music at the interims will be provided by William Huenemann, baritone soloist; Arthur Von Gruenigen, flutist, and the Troubador Quartette.

The Troubadors are the traditional male chorus of the Mission House and are known throughout the church, since the spring concert tour is an annual event. These tours in the past have taken the Troubadors as far east as West Virginia and into all the midwestern states. Traveling this year will necessarily be by train and the itinerary is therefore more limited.

Serve Novel Foods To Tempt Palate During Rationing

Chicken is precious but a little goes a long way when it's served with glassed mixed vegetables and a border of rice.

The phrase, "there's something new under the sun," can always be applied to cooking, muses many a homemaker. There's never a dull moment in foods, for countless new combinations and methods are constantly being developed.

Today's column is being devoted to those of you who want to accent the "different" in recipes. Some are old recipes with just a touch of newness that spells an entirely different flavor or appearance in the finished food.

Bearing rationing in mind, these recipes will make it easy on those precious points. There's nothing tricky about making them, and they are bound to whip up ration-worn appetites to new and interesting heights.

A few pieces of leftover meat take on new interest when they are dipped in a sauce and bread crumbs, then fried. There's nothing to smack of leftover taste in these:

Barbecued Meat Slices.

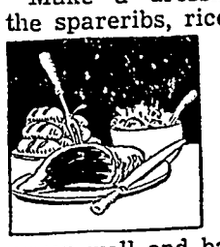
½ cup oil
3 tablespoons mustard
3 tablespoons Worcestershire sauce
½-1 teaspoon salt
Cold meat, sliced
Bread or cracker crumbs
Fat or drippings

Combine oil, mustard, sauce and salt with rotary beater. Dip meat into this mixture, then in bread crumbs and brown in hot fat. Serve garnished with greens and cucumber pickle.

Dressed Spareribs
(Serves 6)

1½ pounds spareribs
¾ teaspoon salt
2 cups mashed sweet potatoes
1 cup cooked rice
2 tablespoons butter or substitute

Make a dressing by combining the spareribs, rice, salt and butter.



Brown the fleshy side of the spareribs. Cover half of spareribs with dressing, then place other half on top of them. Add ½ cup water, cover well and bake in a moderate oven for 1½-2 hours.

Dinner-in-a-Dish.
(Serves 6)

1 pound veal shoulder
¼ cup fat or drippings
1 teaspoon Worcestershire sauce
½ cup celery
2 cups small onions
2 cups broad noodles
1 cup diced carrots
1 green pepper, diced
1 cup green peas
2 cups soup stock

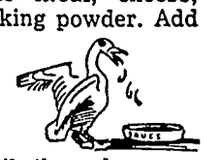
Cut veal into one inch cubes, brown in fat. When brown, add the Worcestershire sauce and soup stock. Add the whole onions, carrots, pepper, celery and peas. While steaming, arrange noodles on top of vegetables, moistening them with the soup stock. Cook for 30-40 minutes over low heat.

Now we have several recipes that fit not only into the "different" flavored foods but also in the point-easy category:

Egg Cakes in Tomato Sauce.
(Serves 4)

¼ cup cracker meal
2 tablespoons grated cheese
½ teaspoon salt
⅛ teaspoon pepper
⅛ teaspoon baking powder
4 well beaten eggs
1 tablespoon milk
6 tablespoons fat or cooking oil

Combine cracker meal, cheese, seasonings and baking powder. Add to eggs, mix well and stir in milk. Heat fat in frying pan and drop in tablespoons of egg mixture. Fry until the edges are brown. Turn and brown on other side. Add more fat as needed. Drop cakes into simmering tomato sauce and cook for 20 minutes.



Tomato Sauce.

2 small cans tomato sauce
2 small cans water
2 teaspoons salad oil
¼ cup sugar
¾ teaspoon salt
⅛ teaspoon pepper
1 teaspoon minced onion

Combine ingredients in order given. Bring to boiling and simmer over low heat 45 minutes, stirring occasionally.

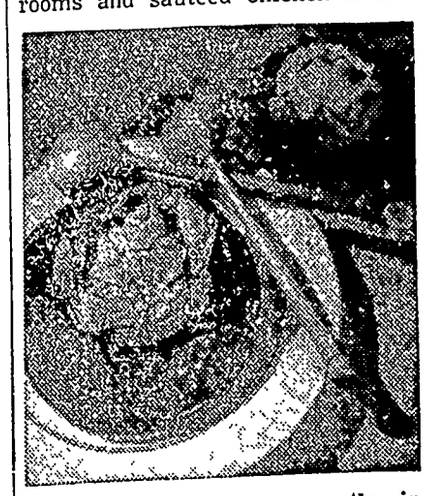
Of course, spaghetti dishes are nothing new to most of you, but when you combine it with the delicious seasonings given in the following recipe, the dish will rate three cheers and a "hurrah." The tomatoes may be home-canned ones from last summer's produce, and the livers may be calves' or lamb if chicken is not available.

To saute the livers, fry them very gently in hot fat with a bit of grated or minced onion for seasoning. It will take only about two or three minutes to brown and cook them. Sprinkle with salt and pepper before serving.

***Spaghetti with Chicken Livers.**
(Serves 6)

½ pound spaghetti
2 tablespoons shortening
1 onion
2 cups canned tomatoes
¼ teaspoon pepper
¼ pound grated cheese
½ pound fresh mushrooms
1 pound chicken livers
1 teaspoon salt

Cook the spaghetti in boiling salted water until tender. Drain and rinse in cold water. Heat the fat and brown the finely cut onion in it. Add the spaghetti and cook gently. Add the tomatoes, cheese, salt and pepper. Cook slowly until well blended. Serve in a casserole or platter garnished with whole mushrooms and sauteed chicken livers.



A crisp head of lettuce nestles in this rosy tomato aspic ring to make a delightful spring salad.

To top off our round-up of deliciously different recipes, there's a salad which you will enjoy having when you want to perk up winter-weary appetites:

Ring Around Rose Salad.
(Serves 6)

¼ cup cold water
2 cups canned tomatoes
1 tablespoon finely grated onion
½ bay leaf, if desired
½ teaspoon salt
⅛ teaspoon celery salt
Few grains cayenne or pepper
1 tablespoon gelatin
1 tablespoon lemon juice

Mix tomatoes, bay leaf, salt, celery, cayenne or pepper in saucepan and boil for 10 minutes. Soak gelatin in cold water 5 minutes, add to hot mixture and stir until dissolved. Add lemon juice and onion. Turn into a ring mold that has been rinsed in cold water and chill. Wash lettuce thoroughly, remove core but do not separate leaves. When firm, unmold tomato ring on chop plate. Place head of lettuce in center of ring and serve with real mayonnaise.

Lynn Says:

Make it Good! When making scalloped tomatoes, add a bit of celery and okra for added flavor.

Sauerkraut is good when served fried in bacon drippings. Add a dusting of pepper before serving.

Green peppers stuffed? Ground ham extended with rice is a natural combination. Bake in tomato sauce for color.

Corn and bits of bacon are good, but will be even better when bits of green pepper are added.

Beets take to orange flavor. After heating add a bit of orange juice and grated rind.

Broccoli is fit for the best when served with bits of chestnuts cooked, peeled and crumbled.

PROMOTION IN BASEBALL

Baseball is declared to need a "promotion man" by Larry MacPhail and others. We second the motion. Many things that would raise baseball to the household esteem enjoyed, say, by movies, radio, etc., are neglected.

—*—

For instance, is baseball far behind the time in putting emphasis on keeping it clean? Isn't baseball losing its appeal by insisting that the athletes conduct themselves with good taste? Isn't scandal essential today to popular appeal?

—*—

A movie star gets into a series of disgraceful episodes and is featured anew in heroic war roles! Another screen hero sounds off publicly in a night club on his private love life and his fan mail doubles! A young lady becomes an overnight rage through a particular catlike personality!

—*—

Isn't it possible that the mob would tear down the baseball park gates to get a look at a southpaw who had just survived three indictments for cradle snatching? Wouldn't the attendance be trebled by the appearance of a shortstop who had divorced two wives and was romping around the gay spots with a new sweety?

—*—

Maybe the falling off in baseball attendance last year was due to the fact no club carried enough gag men to flood the press with wisecracks which the ball players thought up in the swankiest bars in town?

—*—

We pause for a reply. And we're afraid we will get it.

—*—

Another job a promotion man might tackle would be to put more emphasis on food at the ball games. Eating has become the Number One sporting project and athletic feat, anyhow. Why not glamorize the hot dog?

—*—

Thousands would flock to the ball park upon reading a newly contrived advertisement:

FRANKFURTERS AND NINE INNINGS OF BASEBALL AT POLO GROUNDS TODAY 2 P. M.

—*—

And can you imagine how this would raise attendance: "A SANDWICH, A BAG OF PEANUTS AND A DOUBLE HEADER FOR 75 CENTS."

—*—

Promotion. That's the idea! On with it, boys! And how about name orchestras and dancing under the stands when a game goes flat?

* * *

THE KIDS' DEFENSE

(After meditating on recent lapses on the part of the young folks.)

Low moral standards we're above,
Our honesty's true blue,
It comes from observation of
The things our elders do!
The fine example that they set
(We see it everywhere)—
By grabbing every chance to get
It easy here and there!

Our ethics they are kept aloft
By merely looking at
Our elders seeking something soft,
And waxing rather fat.
We see the grownups merely wink
At virtue driven low,
And when we feel our morals sink
This helps us, don't you know!

The lawyers who boast ethics tall
Yet for a fancy fee
Will work for any crook at all,
And strive to set him free. . . .
Those politicians shrewd and deft—
The gimme-gimme crew—
Those fixers to the right and left—
They help the kids, they do!!

Those movies full of grease-ball guys—
The slickers glorified. . . .
The happy ending as it tries
To justify a snide. . . .
The spotlight for the cheap "foul balls,"
The punkeroo and heel. . . .
Oh, how they help the kiddies all
To keep an even keel!!!

* * *

A big New York department store is now specializing in diamond sales. We remember away back when no shoppers ever dreamed of getting up early to get bargains in precious stones.

—*—

And, believe it or not, money is so free today that we saw a group of housewives knocking one another down to get a 20-carat stone marked down to $5,456.89 from $5,457.00.

* * *

Awah-h-h!

"Our last scruples must now be cast aside and we must be cruel and inconsiderable. We must murder and poison."—German radio spokesman.

—*—

The sight of the Nazis casting a scruple at this stage of the game must be one of the great spectacles of all time. We don't see how they can do it in view of the Nazi scruple shortage. There hasn't been a good scruple around Germany in years unless somebody has been hoarding.

SEWING CIRCLE PATTERNS

Sailor Togs for Brother-Sister Wear This for Sports or Street

Jaunty Sailor Suits.

FOR that pair of cherubs, gay little outfits with a nautical air. Brother's outfit is just like a real sailor's, and sister's swinging skirt buttons on the pert middy blouse. The dickey and collar on each can be white or monotone.

* * *

Pattern No. 1305 is designed for sizes 1, 2, 3, 4, 5 and 6 years. Size 2, boy's suit, short sleeves, requires 2¼ yards of 39-inch material; girl's dress, short sleeves, 2¼ yards; ½ yard to face collar and dickey in contrasting material; 4½ yards braid to trim.

For Play or Street

AN IDEAL warm weather ensemble — the sunback dress will help you acquire a nice tan. For street wear, toss on the trim bolero edged in ric rac to match the dress. If you like, make the dress in a bold flower print and have the bolero in a plain harmonizing shade.

* * *

Pattern No. 8764 is designed for sizes 12, 14, 16, 18, 20; 40 and 42. Size 14, dress, requires 3 yards of 39-inch material; bolero, 1 yard; 5 yards ric rac for trimming.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

HOUSEHOLD HINTS

A leftover scrap of linoleum makes a good filler for the desk blotter. It gives a good surface on which to write and also wears well.

—•—

When pails, garbage cans and other household containers begin to rust out at the bottom you can extend their life. Just make a bottom liner of wood or cardboard to fit snugly. Calk against leakage with ordinary calking paste.

—•—

Before wall papering or white washing, cover dark spots on walls with a coat of shellac.

—•—

Small scratches on furniture can be hidden by rubbing them with a pecan nut meat. Deep scratches may be touched lightly with quick-drying varnish, varnish stain, or white shellac. Apply with a finely pointed brush. Heavy scratches may call for refinishing the entire surface.

—•—

To make strong flat seams in a dress you are sewing at home, stitch them twice—once the width you want and again along the edge. This makes seams lie flat, and they seldom pull out.

New Gadgets Aid Rescues at Sea

Life-Saving Contrivances Highly Important War Contribution.

WASHINGTON. — Air-sea rescue is a new war business that promises to carry on in peace for every sort of shipwreck and plane crash.

A vest that weighs a little more than 10 pounds, and with pockets that hold all the things that a man may need to survive for months in the South Pacific, is one of the main contributions to air-sea rescue.

Since Eddie Rickenbacker's experience brought it to public attention, this new business has expanded to bring back safely thousands of flyers downed in the oceans. It now heads up in the new air-sea rescue agency of the army and the navy. The coast guard is acting in a coordinating capacity.

The vest, smaller in bulk than a life preserver, illustrates new art, of using incredibly few things to live. The army uses the vest. The navy uses a pack on which the flyer sits.

Fold Cook Kettle.

In the vest pockets are 28 items, designed for sea and jungle survival. These range from a waterproof booklet of information and instructions, to a hat that looks like a sou'wester. This hat is soft, and can be worn either side out. One side is bright yellow, to reflect some heat and to attract attention. The other is dark green, good camouflage.

There is a compass that also is a magnifying glass capable of starting a fire. A sheet of asbestos unfolds into a good-sized cooking kettle. There is a flashlight without batteries. Squeezing the handle spins a generator that gives a bright electric light in a couple of seconds.

Assorted safety pins, plus 'chute silk and clothing become household mending, tentage or other shelter.

There are gloves, flares, a gaff for fish, matches, ammunition, gun, gun cover, gun oil and water bag. In all, the 28 items break down into several dozen uses.

The navy's sea kit is designed for life on the water. With it a man can live 14 days, with no rain and no fish and remain healthy. He can go far longer by getting busy with his gear.

He makes good paddles by using two broad fins that fasten to his hands with straps. He has a nylon line no bigger than string, but strong as a clothesline.

He has a mirror-size signaling mirror, whose flash in the sun on a clear day at the equator is estimated to be 8 million candlepower. The army vest also contains this mirror, and there are numerous uses for its great signaling power. It can be aimed to hit the eyes of an aviator flying 10 miles away.

The rations, other than water, come in a can which a big fisted man can hide in one hand. These rations are 23 tablets, 2 pieces of chewing gum, 2 multivitamin tablets.

Both army and navy have new motor boats, dropped from planes into the sea. The navy's is like nothing that ever sailed the seas before, but in it a clever crew probably could navigate from Japan to California, with a little luck at fishing.

This navy boat is five canvas wrapped packages, which replace the bombs in a bomber's bay, and contain respectively a ten-man rubber boat, with sails, a nine horsepower engine, fuel, equipment and food. The five packages are roped together, with a chemically treated line that floats, and serves as a net to insure the castaways of getting hold of the gear.

The packages are dropped "in train" from 100 feet. Even swimmers can assemble this sea going motor boat, once they get a hand on the line anywhere. When the cover of the boat package is unfastened, the boat inflates and pops out automatically. It has the lines of an old fashioned bath tub but, with keel and rudder, will sail into the wind.

Yank Dentist Braves Guns to Pull G.I.'s Tooth

WITH THE 43RD INFANTRY DIVISION, ROSARIO, LUZON. — Capt. John S. Egenberger of Omaha, Neb., a regimental dentist, heard a report that a Yank infantryman was suffering a toothache in a foxhole on hotly contested Hill No. 600 near here.

Captain Egenberger crawled and crept half a mile through artillery and sniper fire, found the foxhole and patient, administered novocaine and yanked out the tooth. He offered to evacuate the infantryman, but the latter said, "I'd rather stay here than go back through what you just came through."

Captain Egenberger crawled back alone.

Sub Surcouf Sinking Is Set in Caribbean

PARIS.—The French navy ministry said that the submarine Surcouf —the world's largest—was lost in April, 1942, in the Caribbean sea in "an accident" with an American freighter.

A spokesman said the navy ministry had no details of the sinking. The collision or ramming occurred at night when the craft surfaced near an American convoy. There were no survivors of the submarine crew.

ECKARD ZEIDLER KEEPS UP HIS REPUTATION FOR '45

For several years Eckard Zeidler has been the first fisherman in this community to catch a fish out of the Iowa River.

Eckard came through again this season to claim the "early fish record" by catching a bullhead out of the Iowa River on Friday, Mar. 23. Klemme's number one angler brought the evidence to The Times office Friday afternoon. The bullhead was about8 inches long, not a a big fish, but still the first fish.

Japs Hit Hard By Yank Fleet

Suffer Greatest Losses in Naval History and Lose Control of China Sea.

WITH U. S. FLEET IN PACIFIC.—In five months Admiral Halsey's fleet has inflicted greater destruction upon the Japanese than any other fleet in history has caused to an enemy.

"We began sealing the tomb which the Japanese have created for themselves in their ill gotten, treacherously obtained empire," Halsey said in a press conference summarizing his fleet's accomplishments in the last five months.

The fleet, Halsey said, materially aided reconquest of the Philippines. The admiral paid tribute to General MacArthur and the Filipinos. And he gave part of the credit for Japan's desperate plight to the Jap commanders themselves—"the silly fools."

Lose China Sea.

"We started operations five months ago below the fifth latitude and ended up around the 25th. We moved west from longitude 135 to longitude 110," he related. "We have prevented excessive damage to General MacArthur's forces by destroying air power which might have been available for reinforcements in the Philippines.

"The Japanese have lost control of the South China sea. Forces of the Pacific fleet can go into it any time they want to."

The Third fleet sank 89 enemy warships with an estimated 241,000 tonnage and 563 merchant and support ships estimated at 776,000 tons. A total of 4,370 enemy aircraft were destroyed, of which 1,904 were shot down in aerial combat and 2,466 burned and destroyed on the ground. Numerous enemy naval bases, military installations, and industrial areas were bombed, strafed and rocketed.

'Only a Forerunner.'

Carrier forces in the 12 weeks they have been under command of Vice Admiral McCain, sank or damaged 1,161,000 tons of Japanese shipping and 2,945 enemy aircraft. McCain said, "This is only a forerunner."

The greatest losses to the enemy fleet occurred October 24 to 26 in the second battle of the Philippine sea, the highlight of which was the sinking of the Japanese battleship Musashi.

"The Japanese navy is still licking its wounds from the October beating," Halsey said. "The enemy fleet will make some sort of recovery in time."

Halsey told the Associated Press that it was not in his province to suggest why the Japanese resistance on Luzon has not been greater, but commented: "The silly fools spent all their effort on Leyte, and they have not been able to bring in reinforcements."

In five months, sailing with the fleet aboard his flagship, Halsey has traveled 51,650 miles, the equivalent of two trips around the world.

New orchards should be kept free of weeds—kept clean cultivated—during the first few years.

of Klemme, in the State of Iowa, at the close of business on March 20th, 1945. Published in response to call made by Comptroller of the Currency, under Section 5211, U. S. Revised Statutes.

ASSETS

Loans and discounts (including $1,552.98 overdrafts)	$ 124,235.94
United States Government obligations, direct and guaranteed	931,269.76
Obligations of States and political subdivisions	12,996.34
Corporate stocks (including $1,550.00 stock of Federal Reserve bank)	1,550.00
Cash, balances with other banks, including reserve balance, and cash items in process of collection	632,791.83
Bank premises owned $6,300, furniture and fixtures $2,300	8,600.00
Other assets	3,438.56
TOTAL ASSETS	**$1,714,882.43**

LIABILITIES

Demand deposits of individuals, partnerships, and corp'tions	$1,105.014.83
Time deposits of individuals, partnerships, and corporations	437,593.57
ings)	10,317.86
Deposits of States and political subdivisions	89,821.56
TOTAL DEPOSITS	**$1,642,747.82**
Other Liabilities	149.82
TOTAL LIABILITIES	**$1,642,897.64**

CAPITAL ACCOUNTS

Capital Stock: Common stock, total par $35,000	35,000.00
Surplus	15,700.00
Undivided profits	21,284.79
TOTAL CAPITAL ACCOUNTS	71,984.79
TOTAL LIABILITIES and CAPITAL ACCOUNTS	**$1,714,882.43**

State of Iowa, County of Hancock, ss·
I, C. G. Waterman, cashier of the above named bank, do solemnly swear that the above statement is true to the best of my knowledge and belief.
C. G. WATERMAN Cashier.
Sworn to and subscribed before me this 24th day of March, 1945.
(SEAL) FRED J. ARNOLD Notary Public.

Correct Attest: E. J. Arnold, F. A. Arnold, A. J. Kudje, Directors.

SCHOOL NEWS

SENIOR CLASS NEWS

—Pat Kudje.

When the basketball ball boys were at Des Moines, our class grew drastically small. It was much quieter around school. Harlan and Red weren't here to ask questions!

Since the weather has been so nice, we have had physical training outside.

In English Literature we are now studying the authors of the Victorian Period. Some of these are Charles Dickens. George Eliot, William Thackery, and Thomas Hardy. We have read some selections from some of these authors' writings.

There are a lot more new books in the library. Some of them are the new books, but many of them are mystery stories.

FRESHMAN NEWS

—Helen Pringnitz.

In Algebra we have started to add and subtract fractions. We have just finished multiplying and dividing them.

In General Science we have just finished a unit on the "Working of Plants" which we found very interesting because there were so many drawings.

We observed some roots and leaves of plants under the microscope.

We are ready to start on Environmental Factors.

In English we are learning the transative and intransative forms of verbs.

We have started to make luncheon desserts in Home Economics Class. They are very tasty.

JUNIOR HIGH SCHOOL NEWS

—Isabelle Gibbs.

The 8th grade has been working on the poem, Evangeline, in their Reading work.

The 7th Grade has been working on compound sentences in their English.

We have made a nice border of birds and bird houses over the front blackboard, made of black paper.

In Art several people are carving soap; others are planning to work with wood.

The 8th Grade is planning to put out a class newspaper. So far we have not decided on a name for it. It will be part of their English work.

FIFTH AND SIXTH GRADE NEWS

—Mrs. H. G. Voetberg, Teacher.

In Sixth Grade Arithmetic we are beginning our work on decimals. During the past week we have been doing some addition and subtraction problems.

Shirley Bisom passed out treats this week. It was her birthday. We sang the birthday song for her.

Perimeter is a word the Fifth Grade has added to their vocabulary this week. We've been finding perimeters of rectangles in Arithmetic.

KINDERGARTEN, FIRST AND SECOND GRADE NEWS

—Miss Arlene Bugh,

In Art Class we cut free-hand pictures of tulips, from construction paper. They are very pretty.

As Wednesday was Bird Day, we studied birds. Then we made bird books in which we illustrated different kinds of birds.

The New R-40
HEAT LAMP
IS
Ideal For
PIG
BROODING

● BABY PIGS have a better chance for survival when protected in electrically heated brooders. The glowing warmth from an R-40 Mazda heat lamp is a natural safeguard to their well being—dries them off quickly after they are born, and keeps them comfortable so they do not have to snuggle up against the sow . . . thus, reducing the possibility of death from crushing. Purdue University proved that "An average of 1½ more pigs were saved per litter when electric heat was used. This amounted to 3.5 per cent more pork on the way of weaning time."

You Can Make A Brooder Yourself---It's Easy

First, build the pig brooder solid enough so the sow won't knock it down. Next, place the R-40 Mazda heat lamp where it will do the most good. Bear in mind that these lamps do not necessarily heat the air of the house. They warm the pigs by radiant energy. Protection for the pigs may consist of a simple rail along the side of the pen, some boards nailed across the corner high enough so the pigs can get under easily; or a hover with a top on it built in the corner. The hover gives protection from drafts and helps to save some of the body heat.

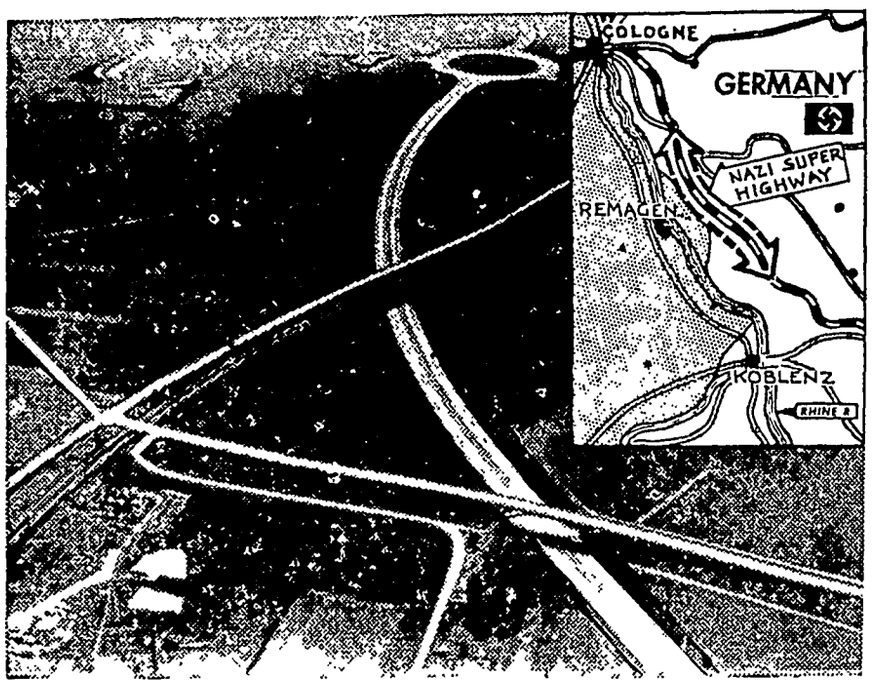
WEEKLY NEWS ANALYSIS

Report German Peace Bids as Allies Press Attacks on Reich; Act to Assure Civilian Supply

Released by Western Newspaper Union.

(EDITOR'S NOTE When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)



Indicating the modern network of roads over which the Germans have been moving military supplies east of the Rhine, this aerial photo shows the Adolf Hitler superhighway near U. S. 1st army bridgehead. Map outlines extensive road system in territory.

EUROPE:
Rebuff Nazis

Amid a flurry of talk that high German groups had sounded the U. S. and Britain out on peace possibilities, Allied armies maintained their heavy pressure against Nazi lines in both the east and west.

According to one report, Gen. Dwight Eisenhower rebuffed Field Marshal von Rundstedt's approach for an armistice, under which the latter offered to pull German armies beyond the Rhine, where they have been forced, and disarm them.

Published in Sweden's Svenska Dagbladet, the other report dealt with German overtures to a British official for an armistice for preserving the Reich as a bulwark against the "Bolshevik menace." To include the retention of the Nazis in office and the evacuation of occupied territory, the offer also was flatly rejected, it was said.

Even as the reports came through, Germany rocked under the tremor of continued heavy aerial assaults, aimed at Nazi industrial installations, communication lines feeding their armies and troop concentrations massed to meet Allied attacks in both east and west.

In the east, Russia grouped the bulk of her manpower for the grand assault on Berlin, heavily defended by an extended network of pillboxes, tank traps and infantry obstacles, which could be flooded.

As the Russians built up their forces beyond the Oder for the smash on the German capital, other Red forces were on the move in both Upper Silesia and Hungary, in an effort to pry open the roads to the rich industrial districts of Czecholovakia and Austria, feeding the Nazi wehrmacht.

In the west, German war production was seriously threatened as U. S. and British armies closed on both the Ruhr and Saar valleys. Not only was the Ruhr menaced by the U. S. 9th and British 2nd armies from the west, but Lt. Gen. Courtney Hodges' U. S. 1st moved up from its Remagen bridgehead to threaten it from the south.

The U. S. 3rd and 7th armies also were applying a vise on the Saar valley, with the 3rd pressing in from the north and east, and the 7th squeezing ahead from the south. Taking full advantage of their extensive road system and short supply lines, the Germans fought viciously to hold both all-important regions.

'Town Buster' Latest Bomb

To Britain's famed "blockbuster" and "earthquake" bombs has been added another, the 11-ton "town buster," developed to penetrate to the underground factories the Germans established to avoid surface bombardment.

Carried by Britain's four-engined Lancasters, the "town buster" measures 25½ feet in length and almost four feet in diameter. Upon releasing the heavy load, the huge planes have bounced up as high as 500 feet from relief of the weight.

Packing a tremendous wallop in itself, the "town buster" supplements the six-ton "earthquake" bomb, which sank the German battleship, Tirpitz, and penetrated 15-foot-thick concrete roofs of U-boat pens.

SERVE G.I.

All over Europe the transportation corps military railway services are hauling 50,000 tons a month of meats, fresh vegtables and dairy products—literally bringing "fillets in his foxhole" to G.I. Joe. Reefer cars make it possible to deliver good food in good condition.

Months before the invasion, at erection depots in different parts of England, men of the railway shop battalions labored to construct the reefer cars from prefabricated sections sent over from the States.

FOOD:
Probe Supply

Following hard upon War Mobilizer Byrnes' formation of a special group to review all demands for non-military exports to protect essential civilian supplies in this country, senate war investigating committee announced the conduct of an inquiry into the food situation currently marked by the growing scarcity of meat.

James F. Byrnes

Revelation of the senate committee's probe followed demands of midwestern senators for rectification of government food policies, which, they declared, discouraged fattening of cattle because of failure to bring prices and feed costs in line with production, and failed to place agriculture on a par with war industry.

Just before the congressional storm broke, Byrnes proclaimed the organization of a special group to determine that Europe's demands for relief and rehabilitation would not interfere with U. S. civilian needs, and even to review past commitments in the same light.

Following Byrnes' action, capital circles buzzed with talk that the War Food administration, for one, had approached him for help in allocating the shrinking food supply during 1945, with prospects of from 20 to 25 per cent less meat, 10 to 15 per cent less vegetable oils and fats, and 10 per cent less sugar.

Meanwhile, it was revealed, lend-lease purchases in recent weeks have been severely reduced because of the growing meat shortage. Although the government has been receiving larger allocations than formerly, it was pointed out, still the drop in slaughtering has reduced the volume available over last year, and practically only military demands are being satisfied.

As a result, lend-lease meat tonnage has been slashed almost 80 per cent in the last two months, with pork purchases in one week down about 84 per cent from last year, canned meats 86 per cent, and other products from 93 to 97 per cent.

PACIFIC:
Air Lashings

With long range U. S. bombers based within flying distance of Japan as a result of the recent conquest of outlying islands in bloody but valuable fighting, the enemy's great industrial cities have more and more been feeling the lash of heavy bombardment.

Carried on even as General MacArthur's forces in the Philippines tightened their grip on the sprawling archipelago guarding the inner China sea lane, and as begrimed marines finished off a stubborn foe on Iwo Jima, the B-29 raids on such Jap centers as Tokyo, Nagoya and Osaka are designed to cut down factory production and impair the flow of supply to the enemy's armies.

Meanwhile, General MacArthur's forces moved toward the climactic battle with the bulk of the enemy cornered on northeastern Luzon, and additional American landings to the south secured the sea passage through the Philippines to Manila.

CRIME

Release of the FBI's annual crime reports bulletin for 1944 reflects a general upward trend in crime during the year, Director J. Edgar Hoover said. He added that arrests of boys and girls 17 years of age totaled more than for any other group.

Arrests of boys under 18 were 18.8 per cent greater in 1944 than in 1941, the last peacetime year, and arrests of girls under 21 showed a 134 per cent gain over the same period.

YALTA:
Test Agreement

First put to the test in Poland, the Big Three's Yalta agreement to act jointly in the settlement of troubled political affairs of countries was tabbed for a second trial in the case of Romania, where the Radescu government reportedly had been forced out by Moscow and replaced by a communist-dominated regime.

At the time the Radescu government left office, with Radescu himself seeking sanctuary in the British embassy in Bucharest because of fear of communist assassination, the Russians contended that the regime had failed to take proper action against pro-fascist elements still present in the country and threatening the Red army's supply lines.

Called at the instance of the U. S., the Big Three parley on Romania could look to its settlement of the Polish problem as a precedent, with democratic elements being brought into a new regime along with the communists to furnish a more representative pattern of government.

FARM LABOR:
At Low

With total farm employment estimated at 8,400,000 persons, farm operators will start the important spring planting season with the lowest seasonal level of workers in 21 years, the U. S. department of agriculture reported.

Of the 8,400,000 persons, USDA reported, 6,894,000 are family members, of whom a great number are women or elder folk. Because of the presence of the latter, it was said, total operating efficiency has been cut somewhat since the advancing years have impaired the efforts of many of the older people.

As the spring planting season approached, with excessive moisture retarding work in many sections, farmers were promised some manpower relief by the employment of 30,000 German war prisoners during the year. Despite the worker shortage, farmers are being asked to match 1944's record production.

Butcher Ol' Dobbin

Already evident before January 3, when race tracks were closed, there has been a decided rise in the sale of dressed horse carcasses as the meat situation grows increasingly critical, packers revealed.

Although sold for human consumption in Milwaukee, Wis.; Boston, Mass.; Cleveland, Ohio; Detroit, Mich., and some New Jersey cities, it is not permissible in Chicago, Ill., where, oddly enough, sales to retailers have doubled since the beef famine.

In explaining the phenomenon of how sales to retailers could double if the latter could not resell the product to consumers, one packers' representative declared that butchers didn't know whether the buyers were going to eat the horse meat themselves or feed it to their pets.

SHOES:
To Cut Output

With most of the cattle hide scheduled to meet greatly increased army demands, allocation of leather for production of civilian shoes during April, May and June may be trimmed down to about 10 to 15 per cent of present allotments, further affecting the future supply of men's and children's footwear.

In an effort to meet the overall civilian requirement of 350,000,000 shoes for the year, it was said, government officials are hoping to increase the production of fabric footwear, despite the tight situation in worsted materials needed. Against the 100,000,000 fabric shoes manufactured last year, 50,000,000 more may be produced in 1945.

Beyond the postponement of the validation of the next shoe stamp until sometime next summer instead of May 1 as originally scheduled, no change in footwear rationing is contemplated as a result of the new cattle hide allocation, OPA said.

HOLLYWOOD STRIKE:
Complex Scenario

Closure of American movie houses was threatened as the International Alliance of Theatrical Stage Employees, AFL, considered exertion of pressure on picture producers in its fight to obtain recognition as bargaining agent for some 70 studio set decorators in Hollywood.

In vying for control of the 70 workers, the IATSE bucked another AFL affiliate, the painters' union, which had been accepted as the employees' bargaining agent by the War Labor board.

Standing in the middle of the entanglement were the picture producers themselves, what with the IATSE not only threatening to pull its workers out of the Hollywood studios but also to stop the showing of movies throughout the country, and the rival painters' union already on strike because of the picture producers' hesitancy in recognizing their group.

With a plot as complex as any movie scenario, the case went up to the National Labor Relations board for settlement.

WORLD AGRICULTURE

Already accepted by 18 countries, adoption of the constitution of the Food and Agriculture organization of the United Nations neared.

The purposes of FAO are to improve agricultural production and distribution, raise the levels of nutrition and standards of living, and better the conditions of rural populations. An important part of the work of FAO will be to aid nations in adapting their agriculture to changing world conditions.

Ernie Pyle With the Navy:

Little Islands in Pacific Prove to Be Pretty Big

Yanks Rarely Make the Rounds; Recreation Relieves Monotony

By Ernie Pyle

IN THE MARIANAS ISLANDS.—One thing that might help you visualize what life is like out here is to realize that even a little island is lots bigger than you think.

There are many, many thousands of Americans scattered in camps and at airfields and in training centers and harbors over the three islands which we occupy here.

Rarely does a man know many people outside his own special unit. Even though the islands are small by our standards, they're big enough that the individual doesn't encompass them by any means. It would be as impossible for one man to see or know everybody on one of these islands as it would be to know everybody in Indianapolis.

Ernie Pyle

You could live and work in your section, and never visit another section for weeks or months at a time. And that's exactly what does happen.

For one thing, transportation is short. We are still building furiously here, such fast and fantastic building as you never dreamed of. Everything that runs is being used, and there's little left over just to run around in for fun.

And anyhow, there's no place to go. What towns there were have been destroyed. There is nothing even resembling a town or city on these islands now. The natives have been set up in improvised camps, but they offer no "city life" attractions.

As we drove around one of the islands on my first day here, we went through one of the Marianas towns that had been destroyed by bombing and shelling. It had been a good-sized place, quite modern too in a tropical way. It had a city plaza and municipal buildings and paved streets, and many of the buildings were of stone or mortar.

In destruction, it looked exactly as destroyed cities all over Europe look. The same jagged half-standing walls, the stacks of rubble, the empty houses you could see through, the roofless homes, the deep craters in the gardens.

There was just one difference. Out here tropical vegetation is lush. And nature thrusts up her greenery so swiftly through rubble and destruction that the ruins now are festooned with vines and green leaves, and it gives them a look of being very old and time-worn ruins, instead of fresh modern ones, which they are.

* * *

Finds Marianas Abound With Movies

An American soldier in Europe, even though the towns may be "off limits" to him or destroyed completely, still has a sense of being near a civilization that is like his own.

But out here there is nothing like that. You are on an island, the natives are strange people, there's no city and no place to go. If you had a three-day pass you'd probably spend it lying on your cot. Eventually, boredom and the "island complex" starts to take hold.

For that reason the diversions supplied by the army are even more important out here than in Europe. Before I left America I heard that one island out here had more than 200 outdoor movies on it. I thought whoever told that must be crazy, for in Europe the average soldier didn't get a chance to see a movie very often.

But the guy wasn't crazy. These three Marianas islands have a total of 233 outdoor movies on them. And they show every night. Even if it isn't a good movie, it kills the time between supper and bedtime.

The theaters are usually on the slope of a hill, forming a natural amphitheater. The men sit on the ground, or bring their own boxes, or in some of them the ends of metal bomb crates are used for chairs.

You can drive along and sometimes you'll pass three movies not more than 300 yards apart. That's mainly because there is not enough transportation to haul the men any distance, so the movie has to come to them.

There is lots of other stuff provided besides movies, too. On one island there are 65 theater stages, where soldiers themselves put on "live" shows, or where USO troupes can perform. Forty pianos have been scattered around at these places.

In Europe it was a lucky bunch of soldiers who got their hands on a radio. Over here in these small islands, the army has distributed 3,500 radios, and they have a regular station broadcasting all the time, with music, news, shows and everything.

The sports program is big. On one island there are 95 softball diamonds, 35 regular diamonds, 225 volleyball courts and 30 basketball courts. Also there are 35 boxing arenas. Boxing is very popular. They've had as high as 18,000 men watching a boxing match.

* * *

Talkative Barber Tells of Woe

On one of these islands the other day, I finally got around to getting a month-overdue haircut.

My barber was a soldier, barbering in a tent, and I sat in an old-fashioned black leather Japanese barber chair he had dug up on the island.

He had been trained in the conversational school of barbering, and as the snipped gray locks fell about my shoulders, there came forth from him such a tale of woe and unkind fate as I have never heard in this world.

This barber was Pfc. Eades Thomas from Richmond, Ky., near Lexington in the horse country. In fact Thomas was a horse-trainer before the war, and was never a barber at all. He just picked that up on the run somewhere.

Well, Thomas has been in the Pacific 33 months. It began to look as though he might as well count on settling down for life, so some months ago he married a Scottish girl in Honolulu. Shortly after that he was shipped on out here, and he hasn't seen her since.

The morning of the day that I sat in Thomas' barber chair, the army was sending a few Japanese prisoners back to Hawaii by airplane. They had to have guards for them. So one of Thomas' officers told him he would put him down for the trip, and thus he could get a couple of days in Hawaii to see his wife.

The officer meant to keep his word, but he had a bad memory for names. So when he went to write down Thomas' name for the trip, he actually wrote another guy's name, thinking it was Thomas. By the time Thomas found it out, it was too late.

"I could have cried," he said. And I could have too. I felt so terrible about it I couldn't get it off my mind, and was telling it to an officer that evening.

"Oh," he said. "I happen to know about that. I'll go and tell Thomas right away and he won't feel so bad. We got orders not to send the prisoners after all, so the whole thing was called off. Nobody went."

Which is the kind of joy you get when you stop hitting yourself on the head with the hammer.

* * *

On that same island I ran onto a couple of old Hoosier boys, who had followed in my inglorious footsteps at Indiana university.

One was Lt. Ed Rose, who was editor of "The Daily Student" in 1938, just as I was for a while in 1922. Apparently it doesn't make any difference what year you were editor of "The Student," you still wind up in the Marianas islands.

The other was Lt. Bill Morris from Anderson, Ind., who graduated from our illustrious alma mater in 1942. Both the boys are mail censors out here. Life is kind enough to them, and they haven't much to kick about.

Just as I was leaving, they came and thrust a package into my hands, and said would I accept a little gift from the two of them? It was a dark poisonous liquid with which you're probably not familiar, but one which is much sought after out here.

A fellow does feel like a heel accepting bountiful gifts from strangers. But I figure I've been a heel for a long time and it's too late to reform now, so I grabbed the gift and fled before they could change their minds. Thanks again, boys.

Fliers in Need of Rest Goal

One of the things most needed for morale among fliers over here is the setting up of some kind of goal for them. The setting of a definite number of combat missions to be flown, whereupon they would automatically go back to a rest camp.

The way it is now, they are just flying in the dark, so to speak. They're just going on and on until Fate overtakes them, with nothing else to shoot for.

Of course it's probably too early yet, and the war on both sides of the world too desperate, to set up a final mission total whereupon a B-29 flier goes home for good.

They're going to have to go to rest camps and then come back for more missions a couple of times before they finally go home. But no rest-camp goal has yet been set.

Borrower Finds Rope Has Many Possibilities

An Oriental story tells of a man who was asked to lend a rope by his neighbor. His reply was that he was in need of the rope himself then.

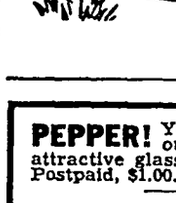
"Shall you need it a long time?" asked the neighbor.

"I think I shall," replied the owner, "as I'm going to fill it with some sand with it."

"Tie up sand!" exclaimed the would-be borrower. "I don't know how you can possibly do that with a rope!"

"Oh, you can do almost anything imaginable with a rope when you don't want to lend it!" was the reply.

SNAPPY FAC
ABOUT
RUBB



There are two big "unknowns" trying to anticipate the ever "balance of power" between natural and synthetic rubber, In the opinion of John L. Collyer, President The B. F. Goodrich Co. These knowns are respective products costs and the relative value of the types of rubber in different kinds of products several years hence.

During the manufacture of one variety of synthetic rubber, materials must be kept at a temperature of 100 degrees below zero.

Use of rayon has improved the performance of synthetic truck tires as much as 375 per cent compared with tires made of cotton cord, say Industry authorities report.

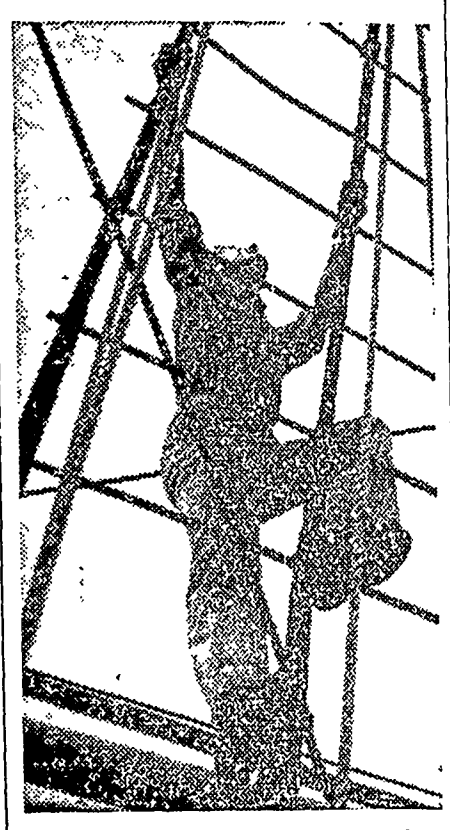
Because of the sea duty requirements, every cadet-midshipman at Kings Point actually is a veteran of sea warfare and many wear war-zone ribbons indicating service around the world.

Among several cadet-midshipmen who participated in the invasion of France were Louie B. Wood Jr., of Atlanta, Ga., and John F. Steedley Jr. of Tallahassee, Fla., who witnessed all the fire and action of American warships and planes and



Cadet-midshipman laying aloft the main mast.

German E-boats and coast artillery during the first three or four days of the historic landings.

"Our ships moved into the English channel on D-Day, carrying trucks, jeeps, small arms and about 400 soldiers, and we, of course, were exposed to the German bombers, E-boats and coast artillery. We didn't worry about the Nazis too much, though, when we looked up and saw our own fliers in action and watched American and British warships taking care of the coast emplacements," Wood relates.

"A day or so after the initial landings, we were ordered to anchor a quarter mile off Normandy and discharge our cargo into LSTs. This job took about 12 hours," he said, "and the ship pulled away and anchored to await formation of a convoy to return to England.

"On D-Day plus four, ME 109s were dropping 500-pound bombs in our vicinity. One had our number on it and struck the ship squarely in No. five hold, killing seven soldiers of the stevedore crew and a merchant seaman."

Steedley was busy helping to man an antiaircraft gun on the bridge, and Wood was assisting to extinguish a fire on deck. When the fire was out, Wood went below to help remove the dead men from the hold.

"The concussion had ripped large holes in both sides and the bottom of the ship, and she settled fast, the stern resting on the bottom in seven fathoms of water," he recounts.

The order to abandon ship was given after as much gear as possible had been removed to nearby vessels.

Next day, it was thought that there might be a chance to save the ship, and an emergency volunteer crew was sought to go aboard. Both Wood and Steedley volunteered, but after a few hours all hope of saving the vessel was abandoned. The two cadet-midshipmen were returned to England and were back in New York on July 7, one month after participating in the greatest invasion in history. Their ship had been lost, but the precious cargo of soldiers, jeeps and guns had been put ashore in France. They're at Kings Point now.

Dudley Example of Sea Heroes.

Almost two years earlier, on the other side of the world, another cadet-midshipman had played a dramatic part in a landing operation. He is Robert H. Dudley of Yonkers, N. Y., who was assigned to a transport in the task force which took the first contingent of U. S. marines to Guadalcanal. Dudley was placed in charge of landing boats from his vessel, and the disembarking was proceeding successfully when 23 Japanese torpedo planes attacked the ships.

Antiaircraft gunners on merchant vessels and warships alike went into action immediately, and skippers of the various vessels ordered maneuvers to dodge the torpedoes from the enemy planes. The accuracy of the fire from American guns excelled that of the Jap aviators, however, and every one of the 23 planes was shot down.

One ship in the landing force was lost—when a flaming Jap plane struck on its deck and set it afire. This was Dudley's vessel from which all marines and cargo had been disembarked.

Dudley was assigned to another ship loaded with provisions bound for Tulagi, and a few days after the Guadalcanal episode, Dudley again heard the order, "Abandon ship!," as this vessel was torpedoed and sunk on August 21.

Dudley and 12 members of the crew spent the ensuing 14 days in a lifeboat with the most meager supplies of food and water.

"On the 14th day, we sighted land, and naturally exerted every ounce of our fast-waning energy to pull ashore," Dudley reported. "We landed on a coral reef, and every man fell face forward, exhausted. The sharp edges of the coral inflicted severe cuts about the body of every one of us, but we just didn't seem to have the strength to move again, so we lay there on the reefs, almost unconscious, for several hours. The natives found us and brought us water."

Dudley spent the next two months in army and navy hospital before returning to Kings Point, where he graduated on February 3, 1943, received his license as third mate, and went back to sea as an officer helping deliver the goods.

Saved Shipmate's Life.

An example of valor and disregard of his own safety was shown by cadet-midshipman William M. Thomas Jr. of Alameda, Calif., who was awarded the Distinguished Service medal by President Roosevelt for his heroism in dramatically saving the life of a shipmate.

Man overboard rescue practice at Pass Christian, Miss.

afford the best possible means arning that multitude of sub- and details embraced in the "seamanship." morning late in the fall of just at dawn, two enemy raiders appeared through mist and started firing on 's ship. The gun crew im- ely responded. The enemy was effective, however, and all the personnel manning one after gun installation were killed or wounded by one explosion.

O'Hara took over this gun by himself, and managed to fire it five times, with every shell striking the enemy vessel at the water line. O'Hara was credited in the D.S.M. citation with single-handedly sinking this raider.

The cadet-midshipman was mortally wounded in the action, however, and went down with his ship.

IMPROVED UNIFORM INTERNATIONAL

SUNDAY SCHOOL Lesson

BY HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for April 8

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

THE BOOK AND THE FAITH

LESSON TEXT—Psalm 145:10-17.
GOLDEN TEXT—The word of the Lord endureth forever.—I Peter 1:25.

Christians are the people of one book—the Bible. They read and use other books, but the book is God's Word, and everything else must be in accord with its teaching.

In this blessed Book they find the only revelation of God's saving grace. Other attributes of God may be found in the book of nature. There we find that God is powerful, orderly, wise, etc., but nowhere in nature is it written that God can save a man from his sin. We find that only in the Bible, God's written Word as it reveals Jesus Christ the Saviour who is the Living Word.

I. The Eternal Glory of God's Kingdom (vv. 10-13).

The kingdom of God refers to His reign over all things and beings, but with special reference to those who are willingly subject to Him and eager to live for His glory.

Everything in God's creation is to be lifted up in praise of that kingdom. All His works shall praise Him. They reveal Him in part, but even that limited revelation is glorious. The man who cannot see God in nature is indeed a dull clod. The heavens declare His glory and the earth shows forth His handiwork (Ps. 19:1).

Greater and more precious in God's sight is the praise of His saints. Dumb adoration is acceptable only from a dumb creation. We, His saints, are to speak His praise, to "bless" Him (v. 10). We are to spread abroad among all men (v. 12) the news of God's greatness and goodness.

"His kingdom is an everlasting kingdom," and thus it at once takes its place as so superior to what men call kingdoms as hardly to be mentioned in the same breath. There is no limit to God's kingdom either in its extent or its duration.

How stupid then that some, yes many, foolish men and women set themselves up in rebellion against God. That is the height of all folly and leads only to disaster. How wise are those who yield their lives to His control that their little span of life may find rich meaning in the One who endures forever.

II. The Abundant Provision of God's Mercy (vv. 14-16).

We are all completely dependent on the mercies of God for everything that we need for life—physical, mental, and spiritual.

Consider the food for the body. God opens His bountiful hand and every living creature is provided with the food necessary for its sustenance. How this is accomplished is a mystery and a marvel to us, but God is able to do it.

Centuries ago men were fearful that the earth could not produce enough food to keep the increasing population of mankind alive, but God sees to that even when He has to do it in spite of man's waste and destruction.

However, life is not just material. There must be a satisfying of man's spiritual nature. He needs someone to save him from his own sinful weakness, to deliver him from his sorrow and affliction. Who can do this but God? And He does it (see v. 14).

How does He do it? Through the ministry of His Holy Word. Therein man finds salvation and satisfaction. The Bible is the light that shines upon his way. It is his comfort in sorrow and his strength in temptation. It exhorts and encourages, convicts and cures.

How endless and how overflowing is the mercy of our God. Let us "wait upon" Him, knowing that He is not only mindful of our need, but eager to do for us more than we can ask or think.

III. The Saving Power of God's Grace (vv. 17-19).

The Lord, who "is nigh unto all them that call upon him" (v. 18), is able to save because He is "righteous in all his ways and holy in all his works" (v. 17). Only a just and holy God can deal with sin, and yet only a merciful God would provide redemption; but in our God mercy and truth meet (Ps. 115: 1; Ps. 103). He is both "just and the justifier of him that believeth in Jesus" (Rom. 3:26).

He it is who is near to all that "call upon him in truth" (v. 18), and surely it is such a calling on the Lord which is in mind in Romans 10:13, where we read that "whosoever shall call upon the name of the Lord shall be saved."

Notice that God's nearness, His salvation, and His fulfillment of the desires of man are for those who call on Him and who "fear Him" (v. 19). This is not a matter of magical use of a name, or an outward profession of faith. It must come from the heart, and when it does, God responds.

So we find God's word to be the source of our instruction concerning those things which can make us wise unto salvation (II Tim. 3:15). It is the Book of our faith!

SEWING CIRCLE NEEDLECRAFT

Charming Garden for Bed Linens

AN OLD-FASHIONED garden, quaint and charming, blooms in natural colors on sheet and pillow cases. Worked mainly in lazy-daisy stitch.

You can have "story book" bed linens. Pattern 7102 has transfer of one 6¾ by 20½, two 5¼ by 15-inch motifs; edging instruction.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

ASK ME ANOTHER?

A General Quiz

The Questions

1. What two brothers signed the Declaration of Independence?
2. How old was Joan of Arc when she led the French army to the relief of Orleans?
3. Who started the construction of the Panama canal in 1879?
4. Who, according to legend, helped the Swiss gain their independence by killing Gessler, the tyrant?
5. How many sins are named as "deadly sins"?
6. What does the abbreviation "ign" mean?

The Answers

1. Richard and Francis Lee of Virginia.
2. Seventeen years.
3. The French started the construction of the canal in 1879.
4. William Tell.
5. Seven — pride, covetousness, lust, anger, gluttony, envy and sloth.
6. Unknown (ignotus).

POST'S *Raisin* BRAN

GOLDEN FLAKES OF WHEAT AND BRAN COMBINED WITH SUGAR-SWEET TENDER RAISINS

delicious *NEW* breakfast idea

● Good? It's delicious! It's a magic combination of nut-brown, crisp-toasted Post's 40% Bran Flakes *plus* lots of seedless raisins...right in the same package. Better ask your grocer for the big blue-and-white package today. Your whole family will go for *Post's* Raisin Bran.

CALLING ALL

EXPERIENCED SEAMEN BACK TO SEA!

"The Need is Urgent," says the High Command!

43,000 experienced seamen now working in shore jobs are vitally needed back on ships — if our fighting men are to get supplies to finish the job!

ADMIRAL LAND: "Ships can't sail without experienced men—and we just don't have enough men for our expanding Merchant Marine. If you have ever been a Mate, Engineer, Radio Officer or "AB," your country needs you now!"

"Up-Grading is Fast," say Men Now at Sea!

What are your chances for advancement in a shore job when the war ends? Read what this seaman says and you'll get a hint of what the Merchant Marine offers!

L. O. WARREN, a Captain at 27, says: "I came up from Third Mate to Ship Master in three years because of the big opportunity now in the Merchant Marine. I know I'd never have made that rate of progress in a shore job."

"The Future is Bright," say Industry Leaders!

Government heads, large shipping companies and union leaders agree that the postwar prospects for the Merchant Marine exceed anything ever before known.

FRANK J. TAYLOR, Pres., American Merchant Marine Institute: "With nearly every country in the world to be rebuilt, there is every reason to believe the Merchant Marine will move into a great era of expansion after the war."

**To sign up with the Merchant Marine, report to your nearest War Shipping Administration Office, your maritime union, U. S. Employment Service, or wire collect to Merchant Marine, Washington, D. C.*

Fred Nagel Died Mon.

FUNERAL SERVICES THURSDAY AT REFORMED CHURCH

Died Early Monday Morning Following Short Illness

Funeral services will be held at the Klemme Evangelical and Reformed Church Thursday afternoon for Frederick F. Nagel, 75, who died early Monday morning at his home in Klemme of a heart attack. Mr. Nagel had been ill for only a few days.

Mr. Nagel was born at Schleswig-Holstein, Germany and at the age of 14 years went to sea and followed seamanship for a number of years when he came to San Francisco where he lived for many years. Later he went to Boise, Idaho where he met and married his wife on September 27, 1926.

Mr. and Mrs. Nagel moved to Klemme in 1931 when they retired from active work.

He leaves of his immediate family his wife Marie L. Nagel; one son Ray Nagel at Berkeley, California whom he recently visited; 4 stepchildren: C A. Bielefeld, Dougherty; Mrs. T. C. Wooten, Des Moines; Mrs Ola Thompson, Grinnell and Mrs. Henry Jost, Klemme. He also leaves two grandchildren and many more distant relatives.

Funeral services will be conducted by Rev. Calvin Grosshuesch and interment will be in the Ell Township Cemetery.

INDUCTED INTO THE ARMY FROM HANCOCK COUNTY

Dewey V. Wilson of Corwith, and Carroll D. Engh of Kanawha, reported at the Legion Hall, Britt on March 26th, to go to Ft. Snelling, Minnesota, to be inducted into the Armed Forces.

MISSING

Mr. and Mrs. Ed. Schoenwetter were notified last week by the War Department that their son, Corporal Lyle Schoenwetter was missing in action in Germany.

Cpl. Schoenwetter has been in the service about three years.

PVT. AARON WILLE, WOUNDED NOW BACK IN STATES

Mr. and Mrs. C. J. Wille received a telegram Monday from their son, Pvt. Aaron Wille, who was recently wounded in action and was being treated in an English hospital stating that he had landed in New Jersey. No other details were given.

CAPT. E. G. SCHAEFFER BACK IN STATES AFTER 3 YEARS

Capt. E. G. Schaeffer landed in New York the first of the week after being overseas for about 3 years. Capt. Schaeffer, who was a dentist in Klemme prior to the war, says he is on his way home.

GRAND JURORS REPORT ON JAILS AND COUNTY HOME

The Hancock county grand jury inspected the jails at Britt, Garner and Forest City, and the Hancock County Home at Duncan. Their report filed with the Board of Supervisors Wednesday stated that conditions were found satisfactory at the jails in Garner and Forest City and recommended that a new sidewalk be built at the Britt jail to run from the jail to the street

Conditions at the Hancock County Home were reported excellent.

More Evidence Of Spring!

Esther Hartbeck and Beulah Goll brought in several pansies to The Times office Friday afternoon. The girls had picked the flowers from their grandmother Mrs. Julius Priebe's garden.

Mrs. Jorgenson picked a couple of crocus from her garden the same day. Which all adds up to " It is spring in North Iowa."

STILLES CELEBRATED 20TH WEDDING ANNIVERSARY

Mr. and Mrs. Quentin Stille and family were entertained to a dinner and party at the John Carothers home in Garner Sunday evening in honor of Mr. and Mrs. Quentin Stille's 20th wedding annniversary.

Klemme guests were Mr. and Mrs. Bert Jones and family. Other relatives were also present.

Mr. and Mrs. Stille were presented with gifts in remembrance of the occasion.

Their anniversary is March 21.

Save those old clothes in seviceable condition for the clothing relief drive.

Miss Anna Lee Brunes of Belmond was visiting in Klemme Saturday.

Mr. and Mrs. Joe Hejlik of Garner visited at the Bert Jones home Monday evening.

Mr. and Mrs. E. J. Arnold were in Mason City on business Monday.

Mr. and Mrs. Albert Priebe and children were Mason City visitors Saturday evening.

B. L. Prouty of Garner was in Klemme on business Saturday evening.

Mrs. Fred J. Arnold was confined to her home over the week end with a case of flu.

Mr. and Mrs. Paul Mueller had their household goods moved by truck to Des Moines Thursday afternoon.

Mr. and Mrs. Lyle Liebendorfer of Forest City spent Sunday visiting at the R. A. Jorgenson home in Klemme.

Lt. William Fort of the Sioux City army air base, visited from Friday until Sunday night at the Art Kudje home.

Ira Overholt went to the Twin Cities Tuesday to purchase merchandise for his new store at Goodell.

Mr. and Mrs. Martin Cosgriff and daughter, Phyllis of Britt, and Mrs. George Cosgriff and son Billy of Klemme were in Des Moines on Saturday.

JoAnna Pavey and Herschel Brooks of Albert Lea, Minn., visited Sunday with Mrs. W. F. Pavey of Klemme, who was a patient at the Mercy hospital in Mason City.

Mr. and Mrs. John Chambers were informed last week that their nephew, Jack Tabb, was slightly wounded March 5th while in action in Europe.

Bobbie, son of Mr. and Mrs. Fred J. Arnold, was confined to his bed several days the past week with the flu. Bobbie was back in school again this week.

Cadet Nurse Luella Lewis, of Des Moines, came Thursday and visited until Sunday with her parents, Mr. and Mrs. Verner Lewis. Cadet Lewis was recently ill, but is now much improved.

Mr. and Mrs. C. G. Waterman. Mrs. Lyle Wilcox, Mrs. Mary Waterman, Mrs. R. A. Jorgenson and Mrs. Antonio Keraus visited with Mrs. W. F. Pavey at the Mercy hospital Saturday evening.

Mrs. Martin Karsjens returned home last week Tuesday from the Mercy hospital where she had undergone a major operation. Mrs. Karsjens is making a good recovery at her home.

Reuben Grosshuesch, who is attending the seminary at Plymouth, Wisconsin, came Monday to spend a few days in Klemme visiting with his parents, Rev. and Mrs. Calvin Grosshuesch and family.

Mr. and Mrs. Levi Klotzbach received a letter from their son Pfc. Louis Klotzbach mailed in France. Louis said he was trying to get in touch with his brother Walter who is also in the European theatre of war.

The career of Charles V. Bob, a fantastic and glamorous promoter in finance, who rose from a pick and shovel beginning to association with the great in sports, aviation, exploration and religion, only to topple into obscurity in the end, is given a graphic presentation in the American Weekly, the magazine distributed with this Sunday's (April 1) Chicago - Herald American. 1tp

Mr. and Mrs. P. M. Wilson drove to Des Moines Sunday for a visit at the Lt. Bob Risser home. Lt. Risser had just returned from several months sea duty and was home on a leave for ten days.

Mrs. Clarence Lemke Entertained The Double Four Club

Mrs. Clarence Lemke was hostess to the Double Four Club at her home Wednesday afternoon.

High score was won by Mrs. H. D. Ramsay and second high score by Mrs. Martin Barz.

EASTERN STAR CELEBRATED FORTIETH ANNIVERSARY

The Garner Chapter of the Eastern Star celebrated it's 40th anniversary Tuesday evening with a 6.30 o'clock dinner, followed by a program and initiation work

Klemme talent appearing on the program were:

Patricia Kudje, saxophone and vocal solos.

Mrs. Cecil Katter and Miss Marcelle Josten, marimba duet.

Rev. H. E. Harvey, vocal solo.

Miss Marcelle Josten, marimba solo.

Four charter members of the chapter were present.

SGT. HOMER SCHOENWETTER ON LARGEST AIRPLANES

Mr. and Mrs. Geo. Schoenwetter have received word from their son, Sgt. Homer Schoenwetter that he is now stationed at a B-29 Bomber Base in the Marianna Islands.

Sgt. Schoenwetter is a Flight Engineer on the mammoth planes and so will probably get a close up view of Japan.

CARD OF THANKS

I wish to thank all my friends and relatives for the nice cards and letters they sent me, and for the personal visits during my stay at the hospital

(1tp) —Mrs. Martin Karsjens.

NORTHERN Lumber Company
Lloyd Sherwood, Manager Klemme,

CONDITION makes CHAMPIONS ... and MILK helps champions to keep in condition

a point to remember these days when it's our duty to keep fit

IN Iowa, Basketball has had a big season. Wiota girls defended their state title. Ames High School captured the boys' crown. Iowa State topped the Big Six. And the Iowa Hawkeyes won their first undisputed championship of the Big Ten.

Today's high-speed basketball demands superb condition—in which Milk plays an important part. In fact, Iowa coaches observe that their players are strong for milk, taking two or three glasses at a meal.

Not just in basketball, but in every wartime activity, Condition is important. So Milk is important, too. As a nation, Americans realize this. Today they are drinking more milk than ever before. Since 1940, the increase is nearly 20 percent.

To see that America's demand for Milk, Butter and other dairy foods is maintained, and is increased as soon as supplies permit —that is one of the vital jobs which Iowa farmers are doing through the Iowa Dairy Industry Commission and the American Dairy Association. Both now and in the post-war era, it is a job of basic value to the welfare of the entire state.

ING NEEDED FOR WAR TATED VICTIMS

All Types Of Useable Cloth- Can Be Used In Drive

e is an urgent need for of various types for war ted victims. Special priori- been given to shipments of even over food because is the greatest need. With ught in mind there has been nization set up headed by J. Kaiser to collect clothing e entire United States of for this purpose.

der to meet this great need, erson will have to donate ds of clothing.

ock county has organized ready to do their share in g their quota of clothing drive.

r the direction of Mr. Chet f Garner for the east half, l Frick of Britt for the west d through the cooperation rles Whitney, the rural have been organized to col- thing in their district and it to the nearest town col- ppoint. In order to contact the rural districts who do e children in school, the rganization has been asked a hand. There will be n each town put on by the service organizations, and d Girl Scouts.

ing is a list of clothing most urgently needed. is over carefully:

e Of Clothing Needed

is needed is good substan- thing, for both winter and wear Although clothing t be in perfect repair. it useful to the people who eive it. Underclothing and of cotton garments should ed before they are donated, d not be ironed.

t Urgently Needed

Garments: All types are t demand, particularly the ts.

and Boys' Garments: Over- coats, suits, coats, jackets, ll types of work clothing, overalls, coveralls, etc., underwear, robes, pajam- d gloves.

's And Girls' Garments: jackets, skirts, sweaters, resses, underwear, aprons, robes, smocks, nightwear, gloves.

And Knitted Headwear: le heavy duty caps and headwear (such as stocking e needed. (Women's hats, ts and derbies cannot be

ng: Blankets, afghans, pil- low-cases, sheets, quilts. These are needed urgently if in serviceable condition.

Shoes: Either oxfords or high shoes, of durable type with low or medium heels are desired. Shoes with high heels, open toes or open backs, evening slippers, and novelty types cannot be used. All shoes collected should be mated and tied securely into pairs.

Useable Remnants, Piece Goods: Cut or uncut materials (cottons, rayons, woolens, etc) one yard or more in length . . . but not rags or badly damaged, dirty or worn out fabrics.

This is about spring housecleaning time. Go through your attic and clothes closet and have your donation of clothing ready when the collector calls. THIS IS URGENT!! All clothing will be distributed free to the needy in war-devastated areas.

Remember the dates . . . April 8th to 14th inclusive

For Klemme and vicinity leave your bundles of clothing at the J. C. Thomas Barber Shop.

For Goodell and vicinity at the Evenson Store, and at Garner at the City Hall or in the evening at the Avery Theatre.

UNITED SERVICE WOMEN WILL MEET APRIL 11

At the March 14th meeting the United Service Women of Klemme held an installation of officers and tied a wool quilt which is being sent to the army hospital at Clinton as they are very much in need of comforters.

We are now making clothing which will be sold at a later date. Nine birthday cards were sent to boys in service.

Our next meeting will be held Wednesday, April 11th at 2:00 p. m. and we cordially invite all mothers, wives, sisters and daughters of men and women in service to attend this meeting.

Mrs. C. J. Wille and Mrs. Calvin Grosshuesch are the hostesses.

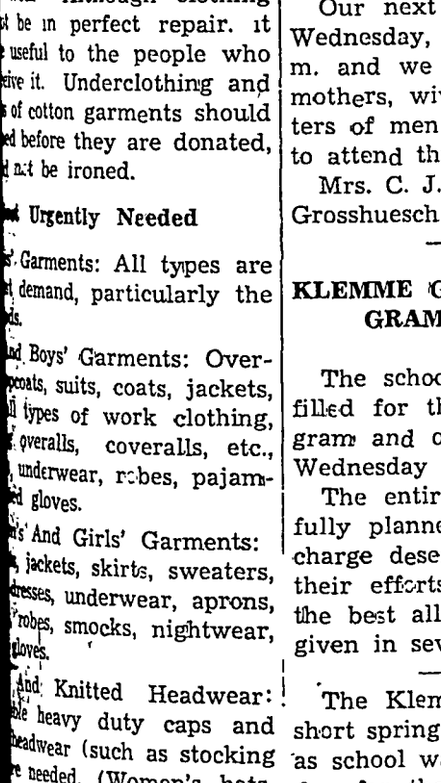
KLEMME GRADE SCHOOL PROGRAM OUTSTANDING

The school auditorium was well filled for the Grade School program and operetta presented last Wednesday evening.

The entire production was carefully planned and the teachers in charge deserve a lot of credit for their efforts in making it one of the best all-grade school programs given in several years.

The Klemme Schools enjoyed a short spring vacation the past week as school was closed for Good Friday for the balance of the week. This gave Klemme teachers an opportunity to be at their own homes for Easter.

OVELING SNOW IN FRANCE



Chipping ice and shoveling snow from around their tent home at 9th Air Force bomber base in France, Pvt. Paul R. Haefner (right), Klemme, and Pfc. Dominic P. Baites, of Kenosha, Wis., discover that the prewar French travel posters that advertised "sunny France" were withholding part of the truth. Both are cooks with the 322nd Bombardment Group.

All Regular Grade And High School Teachers Get Contracts

SCHOOL BOARD MET MONDAY TO HIRE TEACHERS

A. L. Kingery Named To Head Schools For Another Year

The Klemme school board met Monday night to hire teachers for the coming year. A. L. Kingery was rehired and has accepted the superintendency for another year.

All of the regular teachers in the grades and high school were given contracts by the board and most of them will probably return to their posts again next year.

The school has two part time teachers this year: Mrs. H. E. Harvey who teaches typing, and Mr. Sucher who teaches band. Mrs. E. F. Bock of Garner is finishing out the school year as Home Economics teacher in place of Miss Crabtree who resigned some time ago.

Mrs Harvey and Mrs. Bock have done a good job in helping out during the emergency.

The teachers have until April 15 to return their signed contracts to the board.

SCHOOL MEN TO HEAR EXPERT TALK AT GARNER

E. T. Peterson, acting dean of the college of education, University of Iowa, will speak at the Garner high school auditorium on Monday night, April 9th at 8:00 o'clock

All school men, presidents and directors of school boards are urged to hear him as he will speak on post-war school programs. He is an expert on school buildings and school finance and he will tell his audience what can be expected after the war in the way of school equipment and education.

Belmond Man Taking Farm Census In Liberty Township

H. H Larsen of Belmond started work today as a 1945 farm census enumerator for Liberty township.

This is the regular farm census taken every 5 years under the provisions set up by act of congress. Most farmers are well acquainted with the type of information wanted covering acreage, land values, crops, livestock and other general items relating to agriculture.

Special attention is called to some items which will help facilitate the work of the enumerators. Farmers are asked to have estimated before the enumerators call the gallons of milk, dozens of eggs and pounds of butterfat produced in 1944 as well as the total valuation of farm products consumed by the household during the past year.

All farm census information is confidential and will be used only by the Bureau of Census. It will not be available for purpose of taxation or investigation.

No improvement in the supply of cooking fats, oils and butter is in sight for at least 6 months.

BROTHER OF MRS. VERNER STROMER DIED FRIDAY AT IOWA CITY

Funeral services were held at the Congregational Church at Webster City Monday for Maurice Alford, 26, who died Friday at the University hospital at Iowa City following two operations within 10 days. Mr. Alford had been in ill health for several years.

He leaves, besides his parents Mr. and Mrs. A. E. Alford of Webster City, one sister, Mrs. Verner A. Stromer of Klemme, and one brother, Harold of Oakland, Cal.

K. H. S. HAS FIVE ENTRIES IN PRELIMINARY MUSIC CONTEST AT CLEAR LAKE

The Preliminary Music Contest will be held at Clear Lake beginning Friday afternoon, April 6th and running through Saturday morning, afternoon and evening.

Klemme high school has five entries this year as follows:

Band, Mixed Chorus, Saxophone Quartette. Marcelle Josten is the contestant in piano solo and marimba and xylophone solo.

Mrs. Donald Turgasen directed the vocal groups, and Mr. R. C. Sucher has the instrumental.

A mixed quartette from the local high school, directed by Mrs. Donald Turgasen, sang two numbers at the Good Friday evening services at the Methodist Church. The numbers were well presented.

Bonds Over America

CATAMOUNT TAVERN

The Second Continental Congress met at Philadelphia on May 10, 1775. That day Ethan Allen and his Green Mountain boys demanded the surrender of Fort Ticonderoga, N. Y. They were not going to let any overseas dictators tax or rule them, and neither are Americans today. That is one reason why we buy War Bonds. The preparations for that drive against the Lake Champlain stronghold were made secretly at a night meeting at little old Catamount Tavern at Bennington, Vt. The catamount monument shown above now stands on the site.

U. S. Treasury Department

Services Held Saturday For William Schlichting, 75

RETIRED FARMER DIED AT A MASON CITY HOSPITAL

Family Lived On Farm Southwest Of Klemme For Over 30 Years

William Schlichting, 75, a retired farmer, died at 8:00 p. m. in a Mason City hospital last Wednesday evening, following a major operation a coupe of weeks ago.

Funeral services were held Saturday afternoon at 2:00 o'clock at the Klemme Evangelical and Reformed Church, officiated by Rev. Calvin Grosshuesch, assisted by the Rev. Spence of the U. B. Church at Goodell.

Burial was in the Goodell cemetery.

Following is the obituary read at the funeral service:

Wm. Schlichting was born January 11, 1870 at Mecklenburg, Germany. He was baptized and confirmed in the Lutheran Church.

During his childhood days he attended the public schools in his home town and at the age of 14 years he came to America with his parents. The family located at Garner, Iowa, where the father, with the help of his sons, engaged in farming.

In the year 1896 he was united in marriage to Miss Bertha Kemp of Fort Dodge. The young couple spent the first three years of their married life on a farm in Minnesota. Then they moved to a farm near Klemme, and three years later to a farm 4½ miles west of Goodell. Four years ago they retired and bought a home in Goodell. Three children, one son and two daughters were born to Mr. and Mrs. Schlichting.

Mr. Schlichting had many friends and enjoyed the respect of all who knew him. He was a loyal member of the Evangelical and Reformed Church at Klemme, and served his congregation faithfully as an Elder. After a short illness he died at the Mercy hospital at Mason City on Wednesday evening, March 28, 1945. He attained the age of 75 years, 2 months and 17 days.

Surviving him and mourning his death are his widow: Mrs. Bertha Schlichting; his children: Albert of Kanawha, Alice (Mrs. Gilbert Kropp) of Goodell, and Leona, at home.

He also leaves four brothers: Henry of Rockwell, Charles of Lamar, Minnesota; Fred of Klemme, and Adolph of Klemme.

Our Men In The Service

PFC. AARON WILLE IS NOW IN MISSOURI HOSPITAL

Pfc. Aaron Wille, son of Mr. and Mrs. C. J. Wille, who was wounded in the European theatre of war, has been returned to the States and is now being treated in an army hospital at Springfield, Mo. Aaron is anxious to receive letters from his friends and so we are printing his new address:

Pfc. Aaron Wille 37668561,
O'Reilly General Hospital,
Ward D-4,
Springfield, Missouri.

Pvt. Wesley J. Suckow Stationed At Fort Ord, California

Pvt. Wesley J. Suckow, son of Mr. and Mrs. John Suckow, Klemme, is stationed in California. His latest address is:

Pvt. Wesley J. Suckow 37776985, Co. M., 1st Reg. A G F R D No. 2, Fort Ord, California.

Seaman Kenneth Kluckhohn Back In States For Special School

The Times is in receipt of a nice letter from Seaman Kenny Kluckhohn, son of Frank Kluckhohn in which "Kenny" states he is back in the states for special schooling and is stationed at the U. S. Naval Repair Base at San Diego, Cal.

Kenneth was in the naval action when he saw Keith Stille's ship blown up by the Japs but did not get a chance to see Keith until he got to California when they got together with Mr. and Mrs. Don Stille for an out-door picnic and barbeque.

Kenneth says the Red Cross is doing a big job and urges people to contribute their money, labor and donate blood to the Red Cross blood bank.

Kenneth's address now is:
U. S. S. F. C. Adv. Class 1-46,
U. S. Naval Repair Base,
San Diego, 36, California.

LYLE SCHOENWETTER KILLED IN ACTION IN GERMANY

A couple of weeks ago Mr. and Mrs. Ed. Schoenwetter were notified by the War Department that their son, Cpl. Lyle Schoenwetter was reported missing in action in Germany.

They have since received the sad news from the War Department that Lyle was killed March 1st.

Klemme Soldier Awarded Good Conduct Medal

Corporal Armour P. Mullin of Klemme has been awarded the Good Conduct Medal for exemplary behavior, efficiency and fidelity, it was announced here today by headquarters Portland Army Air Base.

The Good Conduct Medal is awarded exclusively to enlisted men who achieve efficiency and character rating of "excellent" for a period of not less than one year while on active duty in the United States Army.

Roger Olson Celebrated Fifth Birthday Sunday, April 1st

Roger Dwaine, son of Mrs. Christina Olson, was five years old Sunday, and in honor of the event his mother prepared a fine dinner and had as guests the Wm. Kurtz family of Ventura.

Roger had a nice decorated cake with five candles on it. He also received some nice gifts.

Garner Eighth Graders Give Declamatory Numbers Here

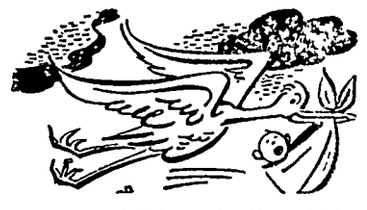
Five Eighth Grade pupils from Garner grade school gave their Declamatory numbers before the Klemme school Monday afternoon. Garner requires an Eighth grade pupil to give a declamatory speech. The five that came to Klemme were:

Oratorical: Janice Paulsen "Foxhole Pillows."

Dramatic: Helen Olson, "Danny's Little Tin Soldier." Vernon Urich, "Scratch, the Newsboy's Dog."

Humorous: Dennis Katter "Biff Perkins Toboggan Slide," and June Sonquist "The Arithmetic Lesson."

HELLO, FOLKS!



A son weighing 6 lbs. 9½ oz. was born to Mr. and Mrs. Emory E. Weaver at the Mercy hospital at Mason City on Tuesday, March 27.

Capt. and Mrs. Victor Greiman of Dayton, Ohio, are the proud parents of a baby daughter born to them on March 23rd at a Dayton hospital.

Swedish Chemist Derives Many Coffee By-Products

A Swedish chemist is said to have developed a method of extracting large quantities of products from coffee — not only caffeine, fat and tannin, but also lubricating oils and different kinds of phenol and hydrogen. After the caffeine has been extracted, the ground coffee is mixed with calcium protoxide and small quantities of two catalysts. The mixture is heated in an oven at about 500 degrees, and the resulting gas passes through a series of condensers, the different materials becoming separated one after another by means of distillation and decantation.

This chemist has found that the following products can be obtained from 5,070 pounds of unroasted coffee: In the first stage of the process —53 pounds of caffeine, 529 pounds of fat, and 88 pounds of tannin; during the second stage—227 pounds of acetone, 97 pounds of methyl alcohol, 53 pounds of phenol, 368 pounds of raw oil, 672 pounds of lubricating oil and ammonia, and 520 to 650 cubic yards of hydrogen gas.

The oil extracts vary from the lightest to the heaviest qualities. They are raw oils which are said to be suitable for use in motor cars or airplanes. Some of them have a fuel value of more than 10,000 calories. Since the hydrogen gas obtained supplies the necessary vapor for the process, the total costs of production are small.

Matrimonial Commission

For several years Adelaide, capital city of South Australia, has had a government-appointed matrimonial conciliation commission, whose job it is to patch up domestic disputes and try to diagnose causes for divorce. In his recent annual report to the government, the commissioner made the following findings:

Most matrimonial strife is caused by mothers-in-law—especially those who live in the same homes as young couples; most puzzling riddle is to discover why men became infatuated with women "less worthy" than their wives; some people more than 60 years of age—who should know better—had appeared before him, and people associated with churches rarely came to court.

The commissioner reserved his strongest condemnation for the "office wife" who stole a husband's affection. Many office wives were the causes for cases with which he had had to deal.

Australian Mineral

The Australian council for scientific and industrial research has discovered a commercial use for monazite, a little known Australian mineral found in beach sands. Monazite is now being used successfully in a polishing powder urgently sought for some time for dealing with delicate glass lenses and prisms in the manufacture of optical munitions. Established early in the war the Australian optical munitions industry has had a phenomenal growth and besides fulfilling requirements of the Australian fighting forces is supplying United States and Dutch forces also. Up to the end of 1944 the industry had turned over to the Allies more than $5,000,000 worth of gun sights, periscopes, compasses and telescopes. The industry also sent a quantity of lenses and prisms to the United States in compensation for advice supplied to it during its organizational stages by the National laboratory of the United States. Not all products being turned out by the industry, however, are made to American design. Some British patterns are being followed and in other cases the products have been optically and mechanically designed by Australians.

See Defoliation as Key to Mechanical Cotton Picking

Chemical defoliation of cotton plants apparently is the key that will help open the door to mechanical cotton picking, according to accumulating reports from practical field trials. Calcium cyanimide is the chemical used. It is dusted on the crop by power dusters or airplanes.

According to the manufacturer's report, "the dust settles on the leaves and dissolves in the dew. The solution interferes with respiration. Within a few days . . . the leaves break off. Defoliation permits the mechanical picker to operate at maximum efficiency with no leaves to interfere with its action. The day's production of handpickers is likewise greatly increased by such defoliation.

"Leaves are not necessary in the last weeks before picking time. Freed from their shadow the lower bolls grow larger and, over the whole plant, the bolls mature more uniformly so that a single picking usually suffices. Hand picking has been handicapped by the presence of thick foliage. . . . The leaves shade the lower bolls so that they rot in wet or humid weather. Also the late bolls ripen slowly so that picking has always required going over the field several times for the maximum yield."

Delicious Scallop

Dabs of vegetables may look like pretty hopeless leftovers, but try combining them with a white sauce, or a tomato sauce and onion, for a delicious vegetable scallop. And how long is it since you've tried a vegetable "pastry"—a big turnover filled with mixed vegetables, and served with gravy or a barbecue sauce. Tag ends of vegetables can also go into soup, salads, or sandwich fillings. If you throw away the hard ends of cheese, you're wasting good proteins and ration points. These hard pieces of cheese, grated, add good flavor to white sauce, casserole dishes and soups. Leftover egg yolks, poached, make a nutritious and eye-catching garnish for creamed dishes, salads and green vegetables. Or, use extra yolks in sandwich fillings.

Wash Day

Soaking, soaping and scrubbing may hinder rather than help on wash day. While the dirt in white cottons and linens is loosened by a two-hour soak in soft, lukewarm, soapy water, longer than overnight soaking may do more harm than good, allowing the soil in the water to be drawn back into the fibers of the cloth. If you are using an electric washing machine, allow seven to ten minutes of machine agitation for badly soiled cottons, five to seven minutes if they are slightly soiled. Three to five minutes are sufficient for rayons and silks. Clean suds are in order if clothes are not clean in ten minutes, though in hand washing a slightly longer time may be necessary. But long, hard rubbing will not get clothes clean if the water needs changing.

See In Our Dreams

We actually "see" what we dream, but paradoxically we don't use our eyes for "seeing" in our dreams. The stuff dreams are made of consists of mental memories. When awake vision is in the brain and not in the eye, which acts as a sort of receiving set for light rays, transforming them into nervous impulses which the brain uses to make its mental pictures. In dreaming the eye is asleep and the brain forms its pictures from its vast storehouse of memory, without the immediate aid of the eye. People who are color blind will have color deficient dreams; if near-sighted, recognition of friends at a distance probably will be as difficult in dreams as in real life.

Noted Painter Didn't Sign Or Remember His Works

The famous Anglo - American painter, John Singer Sargent, who died in 1925, neglected to sign some of his works and even forgot, years later, ever having painted them. But he could easily identify these pictures in a unique way. If a painting was his, a microscope would reveal a fine red or green line painted around the white objects because, owing to an eye defect, he saw them bordered in one of these colors.

EDITORIAL COMMENT

POTATOES BIG AS FOOTBALLS

"Bill" Waddingham may be able to make Burbank look like a piker when it comes to growing big potatoes.

Last fall when Mr Waddingham dug his spuds he decided to replant a number of potatoes about the size of walnuts This spring Mr Waddingham dug them up again and believe it or not, those spuds had grown and were about 10 to 11 inches in circumference.!

Now Bill has a theory that if he plants these again, by next fall they should be twice as big. Then next fall he will dig them and replant them and eventually they will be as big as footballs.

Then when Mr and Mrs. Waddingham have the family in for a Sunday dinner, one potato should be plenty to feed the crowd.

Bill, you've got something there

The Editor has been working on a different idea. We are working out an idea to grow potatoes on vines like tomatoes so we don't have to dig them. And then we will improve that idea by growing them without skins so they don't need to be peeled.

THE KLEMME TIMES DOES "GET AROUND"

P. O. Box 2307,
Akron 11, Ohio

Mr. R A. Jorgenson,
The Klemme Times,
Klemme, Iowa.

Dear Friend:

You might be interested to know that your paper does get aronud as evidenced by the following quotation from a letter I received from my son who is in the Navy:

"Yesterday the ghost of a swell summer we had together turned up out here in the Pacific Winds The station keeps a file of discarded home town papers, assembled in eras of three months and calalogued by states Its really quite a broad coverage of the entire country, and in the middle of the Iowa batch was the proud Masthead of The Klemme Times, edited, published and printed by Mr. Jorgenson. And news of the new high school was routine report in this November issue which mentioned basket ball games and various other civic events scheduled for the gym. Also news were the recent graduates, girls who were making good in the state University, and cating mice in their dormitary with Klemme Trap Co. gadgets, to the delight and wonderment of all the metropolitan girls who unsuccessfully tried the old fashioned spring and cheese method."

Of course it was nice to have Clarence recall the summer when he "helped" me as Eingineer - Inspector on the new school, and I just thought that you and Mr. and Mrs George Lawhorn would be interested in how we still remember those days.

Sincerely,
C. C. Schide.

Editor's Note: Thanks for your letter Mr. Schide. We well remember the night you and your young son came to Klemme, tired from a long drive and no hotel to stay at, but that we found you a nice room at Lawhorn's. We are proud of the fine school you had a part in building.

KEEP KLEMME KLEAN

We have been told that there are folks in this town guilty of dumping trash and rubbish on other people's vacant lots in town, along side streets and roads, and even at the cemetery.

There is only one place to haul trash and rubbish, and that is to the town dump ground.

Help keep Klemme clean and neat by disposing of your trash at the proper place, and not on somebody else's property.

Jail Break In Reverse

Someone from the ration office in Clear Lake apparently threw the night lock on the jail door when leaving. Rationing supplies are kept in the basement of the jail. Chief of Police Buttleman and others were unable to get into the building and called on Welcome Hollister to go in one of the jail windows and release the lock.

New Bouquet

Paul McNulty, Belmond, a patient in a Mason City hospital, received a unique bouquet recently. The bouquet consisted of a large spray of evergreen with 33 one-dollar bills tied on with bright ribbons. The original plan was to collect $5.00 for flowers among his friends, but at the end of 2½ days $35.33 and four packages of cigarettes had been contributed. A list of 122 donors made up the contributors for the "flowers" for Mr. McNulty.

Around Iowa

Formals Out Of Place

Luther College freshman girls were left "high and dry" on the doorstep of their campus home by a truck of the Iowa highway commission after they were stranded at a Decorah hotel following a flood of the Oneota river. The girls, dressed in formals, had attended an all-freshman girl society banquet but stayed longer than intended. Many of the girls spent the night with friends in Decorah, but 80 were left with no place to stay. Police orders had forbidden traffic by private cars or taxis across the last available road to the campus. An Iowa highway commission truck was made available for transportation for the girls. The driver had only telephone posts to guide him but managed the trip safely.

Wild Ride In Reverse

Four-year-old David Swan, of Independence, has found that his daddy's car will run and knows how to start it. One day recently, the little boy turned on the key and stepped on the starter of the car, which also feeds gas to the motor The car was in reverse, and the next thing David knew he was riding backwards down the street at a pace faster than the legal rate of speed A telephone pole a block from the Swan home was a victim of the racing car before the auto was stopped by a hugh tree. David was unhurt but the car received considerable damage.

Cold Fishing

Clyde Sawyer, Rockwell, took an unexpected cold dip while on an excursion to see where some fish had been caught in a small back pool left by an overflowing creek Clyde stepped on a large cake of ice and made just a step or two when the ice broke and he was up to his arm pits in icy water. It was a cold trip to his home for Clyde following the first swim of the season.

Freak Storms

Storms as a rule leave one or two freak incidents in their wake That was the case on the Louis Schleusner farm near Garner A brooder house was demolished Some 600 chicks in another nearby brooder house were unhurt and the water unspilled when the building was moved several feet by the storm.

Sixty Years Wed

Mr. and Mrs David Baldner of Cresco recently celebrated their sixtieth wedding anniversary, and more than one hundred persons, relatives and friends of Mr. and Mrs. Baldner called to offer their best wishes during the reception hours of an "open house" at the home of the happy couple.

STORE IN A GOOD TOWN KLEMME, IOWA

BETTER IOWA GARDENS

The latter part of March saw early bird gardeners hard at work in their plots behind the house. And with weather and soil permitting, this week more and more gardeners will be planting their cool-loving vegetables: lettuce, Alaska peas and radishes.

* * *

It's time to plant rhubarb, asparagus, potatoes, peas, lettuce, radishes, onions, parsnips, beets, carrots, kohlrabi, Swiss chard and spinach Cabbage and broccoli may be planted now too, providing seed is planted directly in the garden, but the started plants should not be set out so early. And no Chinese cabbage this early in the pring; wait until July 1 to plant t.

* * *

More gardeners are dusting their vegetable seed with one of the protectant and disinfectant dusts available Treating seeds in this way helps insure vigorous stands f seedlings and increased production. It is an important disease preventive measure.

* * *

Certified seed potatoes should be planted, if possible, to be sure of healthy stock. The handiest method to treat seed potatoes just before planting is dipping them in a solution of Semesan Bel. Directions are given on the container. The weight of the potato seed piece is more important than the number of "eyes." Best production results from seed pieces weighing 1½ to 2 ounces. Space seed pieces 1 foot apart. Plant 4 inches deep, but cover only 2 inches Fill in with soil to the final 4 inches as the shoots grow.

* * *

Many gardens are too low in humus to produce vegetables at their best. Where dry sheep manure can be purchased in sacks, it would pay to make an application of it before planting the seed A good way is to make about 3-inch deep furrows several inches on either side of the seed and sprinkle the fertilizer in the furrows and cover Victory garden fertilizer may be applied in a similar way. Such placement of fertilizer is better than broadcasting and raking it into the soil.

Ludeke Family Gathering Held Sunday At Schoenwetter's

Relatives of the Ludeke family had a dinner and family gathering at the George Schoenwetter home Sunday with 28 people present.

For supper Mr and Mrs. Schoenwetter entertained Mr. and Mrs. Howard Schoenwetter of Iowa City; Mr and Mrs. Ray Richards of Alexander; Miss Myrtle Schoenwetter of Garner; Mr. and Mrs. Milton Weisbrod and Mr. and Mrs. Elmer Weisbrod of Fenton.

SCHOOL NEWS

FRESHMAN NEWS
—Mary Lou Netland

In Algebra we are doing complex fractions and reviewing for our 6 weeks test.

In English we are still working on different kinds of verbs. We had a test in English today.

We started a new unit called "Foods as Fuel for the Human Engine" in General Science. We are having two interesting experiments today.

In Home Economics Class the girls are studying various Luncheon Desserts. We have made apple crisp and Dutch apple cake.

FIFTH AND SIXTH GRADE NEWS
—Mrs. H. G. Voetberg, Teacher.

We were very happy to have many people present at our operetta, "Midsummer Eve" Wednesday evening.

Thursday afternoon we took a hike with the Third and Fourth Grades. At dismissal time we enjoyed Easter treats.

The following people were absent from our room this psat week: Delores Thiemann, Iris Schaefer, Darlene Bachman, Dolores Karsjens, and Maxine Barz.

We were all happy to have one day's vacation this week. We now only have seven more weeks until the end of this school year.

THIRD AND FOURTH GRADE NEWS
—Miss M. J. Holmes, Teacher.

The Fourth Grade Language class has been learning about business letters. We find they are interesting to write.

In Third Grade Language we have been studying about book reports. We put what we learned to practice by each of us giving a book report to the class.

On Monday of this week Thomas Waddingham brought treats to school for his room. The occasion was birthday.

On Thursday afternoon the Third and Fourth Grades went on a hike with the Fifth and Sixth Grades. Before dismissal we had Easter treats.

KINDERGARTEN, FIRST AND SECOND GRADE NEWS
—Miss Arlene Bugh, Teacher.

On Thursday we had our Easter Party. The Easter Bunny came to visit our room in the afternoon. We enjoyed our treats very much.

CARD OF THANKS

We wish to thank our neighbors, friends and relatives for the many cards, flowers and words of sympathy extended to us during our recent bereavement.

—The Fred Nagel Family.

W. S. C. S. WILL MEET APRIL 5 AT METHODIST CHURCH

The W. S. C. S. will meet Thursday afternoon, April 5th at the Methodist Church with Mrs. Floyd Franklin as leader. The hostesses are Mrs. Emil Beier, Mrs. Clara Stille and Mrs. Frank Schulz.

The ladies will work on a quilt and will sew. Come early.

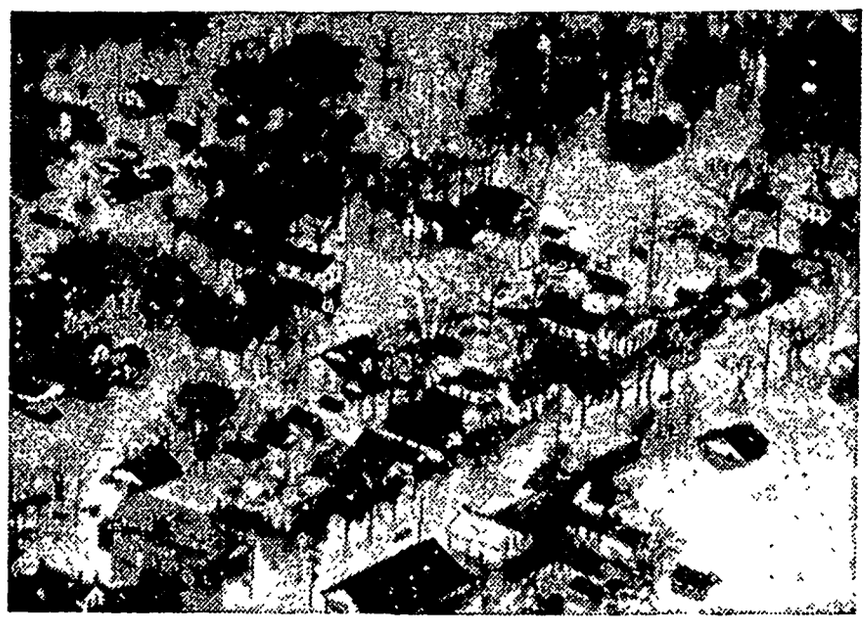
WEEKLY NEWS ANALYSIS

Allies Storm River Barriers To Mount Twin Drives on Reich; Thousands Homeless From Floods

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)



Flood waters spilling over the banks of the Ohio river and its tributaries again made thousands homeless and threatened war production. Aerial view shows Newton, Ohio, with a population of 2,000, isolated by the inundation.

EUROPE:
Span Barriers

From the west and from the east the great battle for Germany was begun, with a sorely pressed Nazi command, which once marshalled its legions in triumph, desperately attempting to stem the Allied tide.

Most significant of the Allied moves was the U. S. crossing of the Rhine in pursuit of a disorganized enemy, who had broken off the battle to the west of the river and attempted to flee to supposed security behind its broad span, previously uncrossed since Napoleon's time.

Smashing quickly through enemy rear-guards, who tried to slow up the U. S. and British advance and give the main body of their troops a chance to escape across the Rhine, Allied spearheads not only reached the historic river in short time but also spanned it with the intention of affording the disorganized enemy no opportunity to reform his ranks for a stiff defense of the waterway.

To Lt. Gen. Courtney Hodges' 1st American army went the honor of being the first Allied unit to jump the Rhine below Cologne. Crossing where the river measured a quarter mile in width and its banks flattened out, Hodges' men steadily expanded their bridgehead for a thrust across the rolling hill country lying just below the vital Ruhr valley.

As Hodges' troops poured across the Rhine in the wake of Germans straggling inland, the enemy tried to chop up the American beachhead with mortar and artillery fire, and armored elements launched limited counterattacks in an attempt to trim the expanding foothold.

While Hodges' famous 1st attained the singular honor of becoming the first military force to cross the Rhine since 1813, the U. S. 9th and British and Canadian armies to the north and the U. S. 3rd army to the south also drew up to the river in record time, poised for the leap after having cleared huge pockets of enemy troops to their rear.

Meanwhile, the Russians launched a broad all-out assault on Berlin, with Red infantrymen, paced by armored columns, smashing deep into the enemy defenses west of the Oder.

Thus did the Allies breach the Germans' two river barriers guarding both ends of the Reich to carry the battle into the flatlands lying beyond, where the comparative levelness afforded their armored columns opportunity to wear down an enemy, whose recent strategy had called for extended use of terrain to economize dwindling forces.

From S/Sgt. Thomas J. Defilbaugh of Cumberland, Md., came the latest story of Lt. Gen. George S. Patton's personal inspiration of his troops under fire. During the Allied comeback against Von Rundstedt's offensive in January, Yanks reached the swift and icy Sure river, and faced the task of crossing it to reach the strategic town of Bettendorf, commanding the countryside. When Patton saw that boats offered a perfect target for German gunners while it would be difficult to draw a bead on a man swimming across, he jumped into the swirling water and swam over to prove to his troops it could be done. Inspired, they followed, capturing Bettendorf.

Gen. Patton

PACIFIC:
Stubborn Foe

Despite the loss of over 225,000 men in the Philippine and Iwo Jima campaigns, the Japs continued to offer stiff resistance to American clean-ups in these sectors.

Indicative of the tenacity of the enemy was his withdrawal to the hulks of battered ships in Manila Bay to continue the fight with small arms fire after having been driven out of Manila itself. Although they already had lost over 212,000 men on both Leyte and Luzon, an estimated 60,000 Japs fought on from natural strongpoints against Yank attempts to compress them in the mountains lying to the east of Manila.

With more than 12,000 Japs already killed on Iwo Jima, marines still were forced to inch forward on the northern part of the tiny island to flush enemy remnants from the rocky hill positions. Because the Japs could retire to underground shelters during heavy aerial or artillery bombardment, the Leathernecks were compelled to root them out in close-in fighting.

FLOODS:
Thousands Homeless

Familiar but tragic scenes were reenacted again as the Ohio river and tributaries rose over their banks to flood surrounding lowlands and send thousands of homeless refugees scurrying to safety.

Operations of war industries in the rivers' paths were seriously affected as the waters rose, and residents of the great cities of Pittsburgh, Cincinnati, Portsmouth and Louisville anxiously viewed the broadening crests, which threatened to spill over and flood their environs.

Of all the big cities, Portsmouth, with its 40,000 people, was most seriously endangered, with rising waters lapping at the 63-foot flood wall while state troopers and volunteers struggled to reinforce it with a sandbag levee.

With rain-swollen rivers flooding acres of low-lying farm land in Tennessee, Arkansas and Mississippi, thousands of residents of these areas also were forced to move to the uplands.

MANPOWER:
Showdown Near

With the senate still strongly opposed to compulsory labor, "work or fight" legislation headed for a showdown in conferences with the house, with sentiment strong for the grant of additional power to the War Manpower commission to continue to exert pressure toward the channeling of workers into needed industry.

At the same time, congress moved to draft unmarried nurses to provide the 20,000 needed to attend the growing battle casualties. Under legislation considered, nurses would be given the right to appeal induction, would be offered commissions even if drafted, and would be eligible for benefits under the G.I. bill of rights.

Vigorously opposed to the house's "work or fight" measure providing for army induction or fine and jail for failure of 18 to 45 year-old men to accept war essential employment, the senate pushed a substitute bill under which the WMC would set the limit on the number of employees any establishment could have, and regulate the hiring of people.

CIVIL AVIATION:
On Upgrade

Reflecting the nation's increasing air-consciousness, and the prospects for greatly expanded civil aviation after the war, no less than 51,000 student pilot certificates were issued during 1944 as compared with 35,000 the year previously, the Civil Aeronautics board revealed.

Interested in aviation because of some relation's service in the air forces or because increased income has permitted training, women represent 15 to 35 per cent of the new students, the CAA said. Most youths from 16 to 21 years of age intend to enter the air forces later while the majority of men over 30 plan to use their planes for business travel.

As a further indication of the future employment of the airplane in American life, CAA said, country doctors and priests have become interested in aviation as a means of serving larger areas and thus overcoming the limits of vehicular travel.

CLOTHING:
More for Kiddies

In addition to cotton fabric previously allotted for low and medium-priced children's clothing, additional yardage has been allocated for the manufacture of about 6½ million more kiddies' garments, the War Production board revealed.

Outing flannel, print cloths, broadcloths, poplins, lawns and chambrays will be among the material allotted for the extra children's dresses, overalls, coveralls, toddlers' dresses, jacket type pajamas, one piece pajamas, two piece button-on pajamas, infants' gertrudes, infants' kimonos, infants' gowns, creepers, rompers and crawlers.

WPB's allocation of the cotton fabric was part of its program to increase the output of cheaper clothing and thus help cut rising apparel costs, which OPAdministrator Chester Bowles called one of the most dangerous wartime inflationary threats.

These Gifts *Are* Different!

With the President himself not permitted to receive gifts from foreigners without congressional approval, Mrs. Roosevelt has been the recipient of a wide variety of such presents.

Already the recipient of a jewel-crusted gold crown and a harem costume, Mrs Roosevelt lately was given an $8,000 mink coat from the Quebec Fur Breeders association—the only one of the presents she planned to use, she told newsmen.

Mrs. Roosevelt

Speaking of the gold crown, which she received from an African potentate following the Casablanca conference, Mrs. Roosevelt declared: "It's the most terrific thing you ever saw. No body could wear it. It's too heavy."

FARM DEBT:
Cut Sharply

At its peak in 1923 when it totaled over 10½ billion dollars, the nation's farm debt dropped to 5¼ billion dollars by January, 1945, with a 20 per cent reduction taking place within the last 5 years.

As a result of the war-stimulated economy, farmers have enjoyed high income, as reflected in the big increase of both realty and plant value. Since 1940, worth of livestock was nearly doubled, machinery and equipment was up one-third, and land values rose about 25 per cent. In addition, farmers' holdings of currency, bank deposits and war bonds increased nearly 8 billion dollars during that time.

In reviewing the farm mortgage picture, the Federal Reserve bank showed that federal land banks and other agencies substantially increased their investments during the 1930s while those of individuals declined. The proportion of farm mortgages held by life insurance companies has risen slightly while commercial banks have experienced only a slight drop.

U. S. INVESTMENTS:
Foreign Holdings

American investments in foreign countries totalled over 13 billion dollars in 1941 while foreign holdings in the U. S. approximated 8½ billion dollars, the National Foreign Trade council reported in an exhaustive analysis based upon treasury department testimony at recent congressional hearings.

Of the American investments, almost two-thirds were divided between Europe and Canada. Of the 4 billion in Europe, 1¼ billion were in Germany, and over 1 billion in Britain.

Besides the 4 billion dollars in Canada and Newfoundland, U. S. investors put more than 1½ billion in South America and more than ½ billion in Asia. Of the amount in Asia, 170 million dollars were in the Philippines, 165 million in China and Manchuria and 90 million in Japan, it was revealed.

NATIONAL FORESTS

An all-time high dividend of $3,894,616, representing 25 per cent of the 1944 cash receipts from national forests, will be shared by 653 counties in 40 states, USDA reported.

The largest U. S. treasury checks ever written in connection with federal timber sales, forage, water power and other uses on national forest lands, are accounted for almost entirely by the unprecedented wartime demands for lumber and by the use of rangelands for food production.

Wounded Pet Revives Stricken Master

This is the story of "Skippy," a Boston terrier that shared in the heroism attending the saving of an American freighter bombed off Leyte.

Though fired amidship by Jap explosives, with 14 members of the armed guard casualties, the vessel was saved by the crew's quick control of the flames and the merchant seamen's manning of the anti-aircraft guns against incoming enemy raiders between unloadings of supplies.

As bombs ripped Capt. Andrew W. Gavin's cabin, "Skippy," wounded by shrapnel, was blown into his master's room, where the officer lay unconscious amid the wreckage. Licking Captain Gavin's forehead despite his own injuries, "Skippy" revived him.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

THE AUTHOR AND PERFECTER OF OUR FAITH

LESSON TEXT—Matthew 27:62-28:9.

GOLDEN TEXT—Let us run with patience the race that is set before us, looking unto Jesus the author and perfecter of our faith.—Hebrews 12:1, 2.

Christianity is a resurrection faith! How good it is to recall that, in this troubled year of 1945, even as we share once more the spiritual inspiration of Easter Sunday.

Today we recall that the loving hands of His friends and followers had given themselves in what they thought was to be their final act of devotion to their Lord. His body had been tenderly laid in Joseph's tomb and the great stone rolled in place at its door.

But even as some were kind and loving, there were others who were so relentless in their hatred that they pursued Christ even beyond the grave.

I. The Hatred of Christ's Enemies (27:62-66).

We sometimes wonder at the bitterness of the enemies of Christianity in our day. Had we given more earnest heed to the Bible story we should have known that it was so from the very beginning.

The wicked men who brought about the crucifixion of Jesus were not content to let Him rest in His grave. They had lusted after His life and they had taken that, but even as He lay silent in the tomb, the priests and the Pharisees came to Pilate and called Him "that deceiver" (v. 63) and demanded a special guard.

They feared that His disciples would perpetrate a fraud, and after stealing the body declare that He was risen. Wicked and deceitful hearts can imagine all sorts of treachery on the part of others.

The hatred of unbelievers toward Christ and toward His followers knows no stopping place. In civilized lands and among cultured people it operates under a cloak of respectability, but it is nonetheless bitter and relentless in its pursuit of Him and of His church.

II. The Victory of Christ (28:1-6).

Victory and praise should be the keynote of Christianity. Why should we be doleful and sad? Our Lord has come back victorious from the grave! We may be glad and sing even in the midst of earth's sorrows and distresses. Let praise be the employ of our lips constantly as we worship Him and work for Him.

The picture that greeted the surprised eyes of the two women as they came to the grave, as it began to dawn on the first day of the week, was one resplendent with the glory and majesty of God. The earth quaked as the lightning flashed. The angel of the Lord broke through the supposedly unbreakable seal of Rome and rolled back the stone which was to have permanently closed the door to the tomb.

This was done, not to release Christ—for He had already gone, no grave could hold Him—but that men might see the empty grave and know that He was risen. Other religions keep the graves of their founders. Christianity points to an empty tomb.

To the foes of Christ represented by the keepers, the coming of the angel and the revelation of the power of God brought absolute discomfiture. That is still true. Men will argue with theology, church methods, even Christian profession, but when they see the power of God revealed, they can only be "as dead men."

To the friends of Christ, the angel brought comfort and assurance. Their fears were assuaged by his word of comfort, and then their faith was revived by the assurance that Christ was risen. The resurrection declares that He is the Son of God with power, the Saviour of the world.

III. The Joy of Christ's Disciples (28:7-9).

The followers of Christ had their share of fear and unbelief, but it was quickly overcome by joy and assurance as they knew that their Lord was risen.

The note of great joy is highly appropriate on Easter Sunday, but just as proper on every Sunday—yes, every day of the Christian's life. He is risen from the dead! That settles all questions about His deity, His power, His salvation. It meets the problems of our lives with an unfailing word of confidence and joy.

Be sure to note that such good news must not be kept to ourselves. We should emulate the zeal of the disciples, who "departed quickly" to make it known to their families and friends. The story of the victorious Saviour is still unknown to many thousands—possibly we should say millions. Let someone depart quickly to tell them of Jesus. And don't forget to ask yourself, "Should that someone be me?"

Jesus met them on the way with a greeting of peace. He loves to fellowship with His people as they go on His errands. You will find Him there awaiting your coming.

Your 1945 Garden

Essential Food Will Come From Home Gardens

APPROXIMATELY 19 million Victory gardeners throughout the nation are again called upon this year to rally behind the call for more food production as essential to the war effort and total Victory.

With increased drain upon manpower and increased production of war supplies demanded by military leaders, the need for increased supplies of food and fresh vegetables to supplement the nation's food supply is urgent and essential.

War Food Administrator Marvin Jones recognizes this fact, and as spring planting time nears, he issued a statement pointing out the importance of the Victory garden in rounding out the nation's war effort.

"Food is just as necessary as guns, tanks and planes. Home gardeners produced over 40 per cent of the fresh vegetables last year and we are asking them to equal this record in 1945."

This 40 per cent of our vegetable production in 1944 equalled almost 8 million tons of vegetables produced in the 19 million Victory gardens of the nation.

The Victory garden program is not only a call to patriotic effort in war time, but it is part of a long range effort on the part of the department of agriculture and the state agricultural extension service to encourage and advocate more and better farm gardens. Objectives of the program not only include the production of food on the farms and in the small towns where space permits larger gardens, but it reaches into the realm of a deep inner satisfaction, healthful out-door work which relaxes, and more plentiful health-giving, vitamin-filled fresh vegetables. The Victory garden is your insurance of attainment of these objectives.

The result of a Victory garden—basket of vegetables, fresh from the garden.

A Victory garden, small or large in city, town, hamlet or on the farm is one of the finest illustrations of how the American people here at home can back up the boys who are fighting. Particularly in the cities and towns an hour or two each day in the garden at the end of a busy day in office, factory, store or other occupation, has provided a wonderful balance wheel to these millions who have worked day-in and day-out at war jobs with little or no vacation or recreation. Contact with the earth and with growing things is good for every one . . . relaxing, a release for tension and pent-up emotions brought about by the war in which we are engaged.

Practical Reasons For Home Gardens

Here, however, are some practical reasons why the growing of a Victory garden should be undertaken wherever sufficient space may be obtained:

1—It will help win the war.

2—You will get more and better vegetables.

3—You will save money.

4—Despite bottlenecks in transportation and distribution, you will have fresh vegetables when you want them.

The department of agriculture has estimated that even a small garden, if well planned and tended, will yield from $25 to $50 worth of vegetables in a season.

Vegetables right out of the garden have more food value, because for most vegetables there is a rapid loss of certain vitamin elements after vegetables are taken from the soil, and the average American needs about 50 per cent more green and yellow vegetables and about 20 per cent more tomatoes and citrus fruits than were available in 1944, according to nutritionists.

Home grown foods are tastier, for they do have a better flavor when they are really fresh, and then, gardening is fun.

Many of the Victory gardens will be operated on farms. These will save millions of dollars for the farmers of the country. A well-cared-for garden will yield a greater return per acre than any similar area on the farm devoted to regular farm crops.

Certain crops may be grown in southern gardens throughout the year; in fact, there are thousands of southern farm gardens that produce at least one or two fresh vegetables every day in the year. The northern gardening season may be extended greatly by use of hotbeds.

Gems of Thought

TO SMILE at the jest which plants a thorn in another's breast is to become a principal in the mischief.—Sheridan.

Alone and yet not lonely. Be true to his own mission, he is in ranks with all that move toward good ends that wait.

Let me not pray to be sheltered from dangers, but to be fearless in facing them.—Tagore.

Every man has enough power left to carry out that of which he is convinced.

How many are the things that are feared that never come to pass!

HEARTBURN

Relieved in 5 minutes or double money back. When excess stomach acid causes painful, sour stomach and heartburn, doctors prescribe the fastest-acting medicines known for symptomatic relief—medicines like those in Bell-ans Tablets. No laxative. Bell-ans brings comfort in a jiffy or double your money back on return of bottle to us. 25c at all druggists.

"HOARSE" SENSE for COUGHS due to COLDS

F&F COUGH LOZENGE

Get below the gargle line with F & F Cough Lozenges. Each F & F Lozenge gives your throat a 2 minute soothing, comforting treatment *all the way down.* Millions use them for coughs, throat irritations or hoarseness resulting from colds or smoking. Box—only 10¢

SNAPPY FACTS ABOUT RUBBER

Overloading has been responsible for much lost tire mileage on commercial and farm motor trucks. Loading of a truck or trailer so the weight is evenly distributed to all load-carrying wheels will prove an important rubber conservation measure. It pays to check loads.

If the average rubber consumption in China, Russia and India were brought up to American rubber consumption standards, they would require 4,500,000 tons of rubber a year, nearly twice as much as the anticipated world supply of natural and synthetic rubber after the war, B. F. Goodrich officials declare.

It may be caused by disorder of kidney function that permits poisonous waste to accumulate. For truly many people feel tired, weak and miserable when the kidneys fail to remove excess acids and other waste matter from the blood.

You may suffer nagging backache, rheumatic pains, headaches, dizziness, getting up nights, leg pains, swelling. Sometimes frequent and scanty urination with smarting and burning is another sign that something is wrong with the kidneys or bladder.

There should be no doubt that prompt treatment is wiser than neglect. Use Doan's Pills. It is better to rely on a medicine that has won countrywide approval than on something less favorably known. Doan's have been tried and tested many years. Are at all drug stores. Get Doan's today.

DOAN'S PILLS

Agricultural Tools Rationing Called Off, But War Demand Will Limit the Supply

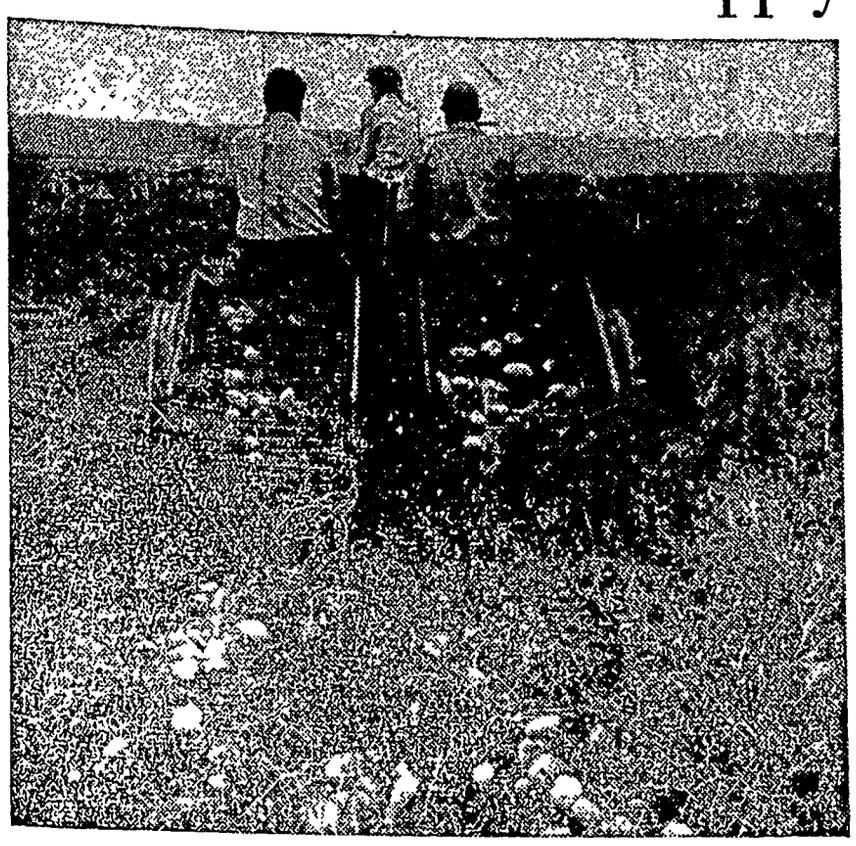
Big Increase in Parts, However, Will Be Available

The farmers of America are continuing, as usual, to do a magnificent job of producing foodstuffs. In 1944, for the eighth successive year, they produced a record food total despite a steadily dwindling manpower supply that reached its lowest point in 35 years.

Agricultural tools are no longer rationed, but that doesn't mean that the farmer, though he has the money, is going to be able to get that new tractor or combine he wishes so he can improve on the production miracle he has already accomplished.

It's the same old trouble we've had since Pearl Harbor. There's a war on! Manufacture of farm machinery, although recognized as an essential civilian "must" program, has to be balanced in relation to direct war production.

Here is the way the government sums up the situation: During the 1945 crop year it is expected that American farmers will obtain approximately the same amount of new farm machinery and attachments as they did in 1944. There will be, however, nearly $20,000,000 more in repair parts.



A Potato Digger That Handles Two Rows at a Time.

ing supplied 20 per cent of the food eaten by American troops stationed there. Australia has supplied nearly all the food for American troops in the South Pacific.

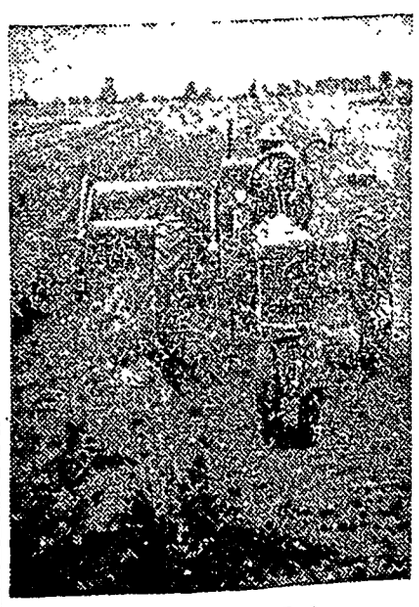
* Includes production carried over from WPB Limitation Order L-170, plus all production from appeals and supplemental authorizations.
① Production through September 30, 1944.

In other words, there is still not enough new farm machinery to go around. Farmers, in many cases, are going to have to conserve and repair and get along the best they can with what they have, rather than buy new replacements.

Approximately 90 per cent of the new farm machines (except tractors) that will be made in the United States during the 1945 production year July 1, 1944, to June 30, 1945, will be available to American farmers. About 10 per cent will go abroad—approximately 7 per cent in commercial exports and 3 per cent through Lend-Lease, according to the Foreign Economic administration.

Lend-leased farm machines (that totaled only 2.5 per cent of the entire production of U. S. farm machinery from the start of the Lend-lease program from March, 1941, to June, 1944), had to be sent abroad to step up food production for our boys fighting overseas. This farm machinery export not only helped to feed our boys, but saved urgently needed shipping space for munitions instead of thousands of tons of food grown on the wrong side of the ocean. The chief recipients of Lend-leased farm machines have been Australia, New Zealand and the British Isles, the latter having supplied 20 per cent of the food eaten by American troops stationed there. Australia has supplied nearly all the food for American troops in the South Pacific.



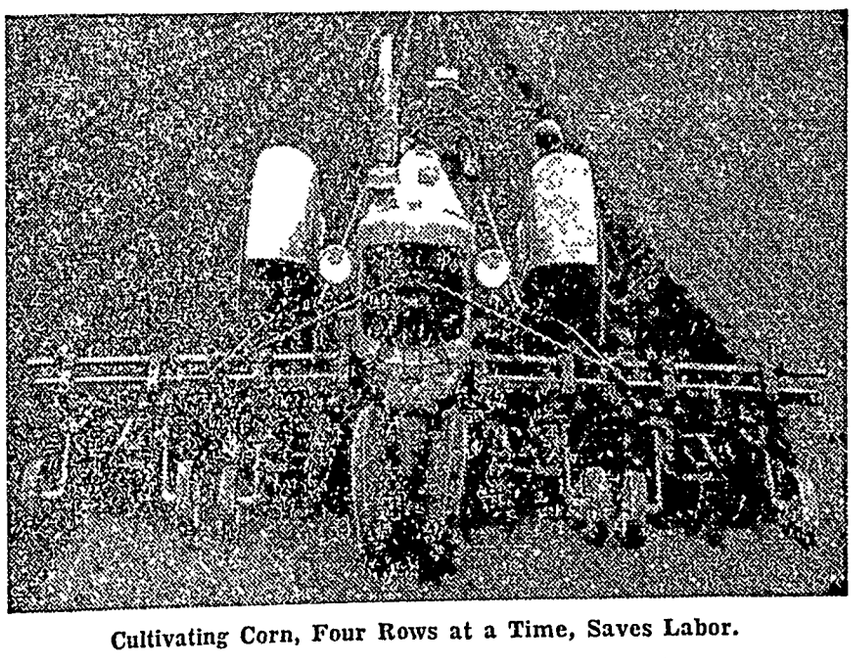
Hay Baler Saves Labor.

American farmers will be able to obtain no more new tractors, side delivery rakes, combines, or other haying and harvesting machinery as cast iron, rubber, zinc, copper, that had gone into farm machines in pre-war days, had to be diverted to make tanks, military trucks, landing craft, guns and other war goods.

In 1939 American farmers were able to buy 161,000 new tractors. But that was a year when this country made only 2,141 planes. In the calendar year of 1943, when American farmers were able to buy a mere 85,000 new tractors, the United States manufactured more than 85,000 planes—mainly for war.

The critical shortage of raw materials that put a ceiling on manufacture of new farm machines in 1942 has been superseded by a shortage of manpower and components. During the first quarter of the 1945 farm machinery production year, manufacture of new machinery—exclusive of wheel tractors, repair parts and attachments—was approximately 25 per cent behind schedule.

This lag in production was caused by manpower shortages and the difficulty in obtaining components, chiefly malleable and gray iron castings. In the Middle West, where most of American farm machinery is made, the labor supply is inadequate, a condition that will not change while war goods are still urgently needed. One concern, that before the war made approximately 35 per cent of American farm ma-



Cultivating Corn, Four Rows at a Time, Saves Labor.

during the 1945 crop year than during the 1944 crop year.

Considering the types of machines in use on American farms, the replacements required and the crop shifts necessitated by war, WFA's current farm machinery program continues to emphasize the manufacture of such labor-saving machinery as corn pickers, side delivery rakes and pickup hay balers. WFA, however, has requested the manufacture for the 1945 crop year of more planting, fertilizing and tillage equipment than for 1944. Included are such items of farm equipment as corn and cotton planters, listers, potato planters, beet and bean drills, endgate seeders, fertilizer distributors, tractor plows and cultivators, disc harrows, walking cultivators and rotary hoes.

During the war, manufacture of farm machinery, although recognized as an essential civilian "must" program, has had to be balanced in relation to direct war production.

When the United States entered the war, production of farm machinery was sharply curtailed because munitions production had become an exacting demand on this country's supply of steel. The steel, as well as other materials, was diverted to the production of weapons of war.

chines, reported in October, 1944, that by March, 1945, it would probably be short 6,000 workers needed to keep production up to schedule.

In effect, during the war this country has asked its farmers to raise more crops with less men to do the work, to keep their farm equipment in working order somehow without counting too heavily on replacements, and to share their machines with other farmers whenever and wherever possible.

To help farmers keep their machines going, manufacture of repair parts and attachments has been increased considerably. In 1944 the scheduled production of repair parts and attachments amounted to approximately 28.3 per cent of the total farm machinery output, as compared with 14 per cent in 1940.

Twenty-one per cent more farm commodities were produced in 1944 than in 1940 with 5 per cent fewer workers.

The annual employment on American farms decreased from 10,585,000 in 1940 to 10,037,000 in 1944. Approximately 4,000,000 workers have left agriculture for war industries or the armed forces.

Approximately 1,700,000 farm men had entered the military service up to January 1, 1945.

American farmers have been getting more use out of individual farm machines during the war. The exchange and cooperative use of some machines, such as tractors and combines, has increased markedly. One corn picker, for example, might be used to harvest as much as 1,200 acres of corn in a year. Combines have been hauled a thousand miles to harvest crops on farms in county after county.

By L. L. STEVENSON

Expert: Horseshoe pitchers gather daily in Central park and give demonstrations of their skill in hot contests. The other afternoon a rather small, brown-eyed, attractive girl appeared and asked permission to take part in the game. After a lot of chuckling, she was allowed to take a place. In no time at all, the winsome miss proved to her competitors that she knew all about ringers, leaners and various other points of the game. In fact, she emerged victor. Then it was learned that she's 20-year-old Dixie Roberts of Kent Cliffs, N. Y. Her father is horseshoe pitching champion up there and he taught her. He also taught her to shoot pool. Miss Roberts, who is currently winning applause with her super tap dancing at the swank Copacabana, is a vegetarian, her diet consisting mostly of green salads and vegetable juices.

• • •

Fuel: During the recent cold spell, New Yorkers with fireplaces put them to good use and were rather inclined to look down on friends who were entirely dependent on radiators. Fireplaces are in great demand in New York but New Yorkers have little if any storage space for fireplace wood, so wood is bought by the stick. Department stores also have been advertising some kind of artificial logs that burn for an hour or more and leave little ash, and few ashes are something to be desired because ashes are not easy to dispose of. Demand for wood is so constant that one firm up in Harlem has been selling it for the last 75 years. The present price is $1.50 for a bag of hardwood, the customer to come and get it and take it home.

• • •

Relief: The head of a concern that traces persons who skip out and leave installments unpaid and which also does a general investigating business, told of a client who had made a cross country trip to marry a man whom she had known so shortly that she wanted his record gone into thoroughly. Two days later, a report was made to her that painted the man in anything but a favorable light. Among other things, he had impersonated an army officer, assumed a professional title and had concealed a former marriage. In addition, he had omitted mention of a prison term he had served. At the conclusion, the redheaded widow smiled sweetly and said, "Oh, is that all? I was afraid he might have been involved in something really bad." And then she went ahead and married him.

• • •

Decision: Reports one of our Hollywood sentinels: Four fans showed up at Danny Kaye's home to ask his permission to picket two of the small Los Angeles theaters that were featuring shorts made eight or nine years ago and which in no way show Kaye's talents. Danny said "no" and explained that the time always comes in a performer's early career when he either must make shorts to pay the rent and grocery bills in order that he may go onward or upward—or he gets along without the shorts and the groceries. "You take your choice and you're stuck with it," continued Danny. "It happened to Joe Penner; it happened to Edgar Bergen. It happened to many others. Now it's happened to me and I'd rather take my medicine than have you youngsters take a chance on getting into trouble."

• • •

Good Example: That special bank which Ellen Ballon has in her New York studio is just beginning to fill again. Miss Ballon keeps the bank solely for the purpose of saving dimes for the March of Dimes. Each year, when the campaign to aid infantile paralysis victims opens, the Canadian pianist opens her bank and her contribution is ready. "It is an inspiration to save for such a purpose," she said. "Whenever I am tempted to spend a dime instead of other change, I think of a child with pleading eyes sitting in a wheeled chair and all my dimes go into a separate compartment in my purse to be dropped into that little bank just as soon as I return to my studio."

• • •

End Piece: Crossing Lexington avenue on 49th street, Igor Gorin, young baritone, narrowly avoided being run over by a truck when his eyes suddenly lighted on the curious electric legend, "She Corner." When he had regained the curb, and his composure, he discovered that some bulbs were missing in the sign, "Shelton Corner Bar."

200 U-Boats Reported Ready for Sea Attack

LONDON. — Information from neutral and underground sources indicates that the Germans are ready to send 200 U-boats out to attack convoys en route to France and Russia, the Daily Telegraph said. The newspaper said the German navy had been reported to have 400 serviceable submarines.

Local Happenings

Klemme and Vicinity

Herman Priebe took advantage of the nice weather last week to have his house re-shingled.

Mr. and Mrs. Verle Keraus and children of Garner, were guests at the parental Ed C. Buntenbach home Easter Sunday.

Mr. and Mrs. Marvin Meintz and son, Roger, have moved into the Lippo Wessels house west of the depot. Mr. Meintz is a trucker.

Miss Stella Thieman of Cedar Rapids spent the week end and Easter visiting with her parents, Mr. and Mrs. Geo. Thieman.

Mr. and Mrs Lyle Liebendorfer of Forest City were supper guests at the R. A. Jorgenson home Sunday evening.

Mr. and Mrs. Harvey Barz are having their kitchen remodeled New cupboards, linoleum, etc are on the improvement plans.

Mr. and Mrs. Russell Medin and children last week moved into the Moberly house in the north part of town. The Medins recently purchased this property.

Mrs. Lena Schroeder, Mrs. Esther Barz, Mrs Martin Barz and Maxine and Mrs Evert Barz were Mason City visitors Thursday

Mrs. Verle Keraus and children Mickey and Kaye of Garner, spent Friday visiting at the parental E. C. Buntenbach home.

BACK THE ATTACK—BUY WAR BONDS

THE KLEMME TIMES

OFFICIAL COUNTY PAPER

VOLUME 50. KLEMME, IOWA, WEDNESDAY, APRIL 11, 1945 NUMBER 21.

U. S. Treasury Wants 14 Billion In 7th War Loan Campaign

EXPECT TWO DRIVES THIS YEAR TO EQUAL THREE DURING 1944

14 billion dollars is the goal of the U. S. Treasury Department in the Seventh War Loan drive. Iowa's quota for individuals will be the largest for any of the War Bond drives, totalling $135,000,000 and including the Series E. Bond quota of ,000,000, the Iowa War Finance committee has announced.

The campaign opened with an advance payroll drive on April 9th to be carried on within plant and organization groups by management and labor. The general bond drive will not open until May 14. It will be backed by the biggest publicity, advertising and radio campaign so far worked out for any of the War Loan efforts.

The quota on individuals and the series E Bond quota is up approximately 40 to 50% over the 6th War bond drive goals. In explaining the increase, V. L. Clark, executive manager of the Iowa War Finance committee, pointed out that in 1944 there were three War Loan drives and that in 1945 there would be but two.

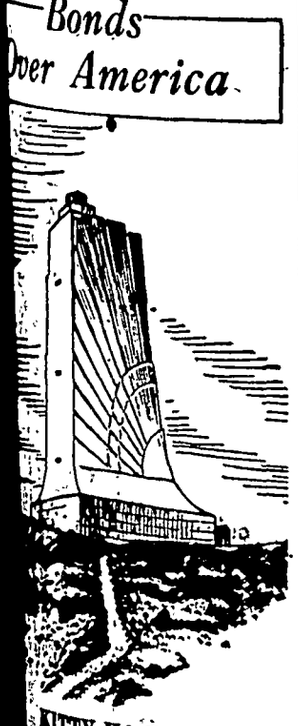
This means that Iowans, as well as people in every other state, are expected to buy as many bonds in two drives as they bought in three drives last year.

Spring Clean The Sewing Machine

At least 200 Hancock housewives will their sewing machines a thorough cleaning last fall. A light goover should be given again this spring, unless it has stsood idle long enough for gummed oil and dirt to accumulate, then a more thorough cleaning should be given. Kerosene should be squirted into the holes and on the bearings. Run the machine a little while doing this. Then wipe carefully with a soft cloth and let the machine stand several hours for the cleaning fluid to evaporate.

After that, oil the machine well and run it to work the oil into the bearings. Wipe any excess oil off carefully so it won't collect dust. Thereafter oilings one drop of oil in each bearing and oil hole is enough. Oil after each day's work or after 8 to 10 hours use. To prevent drying and gumming, oil the machine occasionally, even when in use.

A record crop of turkeys is in the offing for this year.



Bonds
Over America
KITTY HAWK
was annihilated, war revolutionized by three years of glider tests, a 59-second motorized flight by the Wright brothers at Kitty Hawk, N. C. In 1928 the people of Kitty Hawk erected a monument to those historic tests: the Federal Government dedicated the Wright Memorial Monument, a 350-acre park on Kill Devil Hill "in commemoration of the first flight of air by the brothers Wilbur and Orville Wright." Flights of B-29's, fighter planes, and transports prove how valuable those tests and inspire us to buy War Bonds for the future of aviation to win completely.
U. S. Treasury Department

Our Men In The Service

RAYMOND WILLE, A. S., ON NAVY BROADCAST

Raymond Wille, A. S., now in recruit training at the U S. Naval Training Center, Great Lake, Ill., son of Mr. and Mrs. C. J. Wille of Klemme, has been chosen to sing with the "Meet Your Navy" choir heard every Saturday evening over the Blue network.

Music, songs. opinions, news from overseas bases and personal stories of Navy men and women from 48 states are featured on the "Meet Your Navy" broadcast

Seaman Wille is married to Margie Blumer Wille, daughter of Mr and Mrs. Walter Blumer of Klemme.

Before entering the Navy, Seaman Wille was farming for himself. He has a brother, Aaron D Wille, in the Army. His three sisters, Mrs. Harold Rockow, lives at Garner; Mrs. Vernard Rockow of Barron, Wisconsin; and Mrs. Edmond Blanchet of Ventura, Iowa, all are married. He also has a younger brother in high school.

* * *

HOME FROM OVERSEAS

(Forest City Summitt)

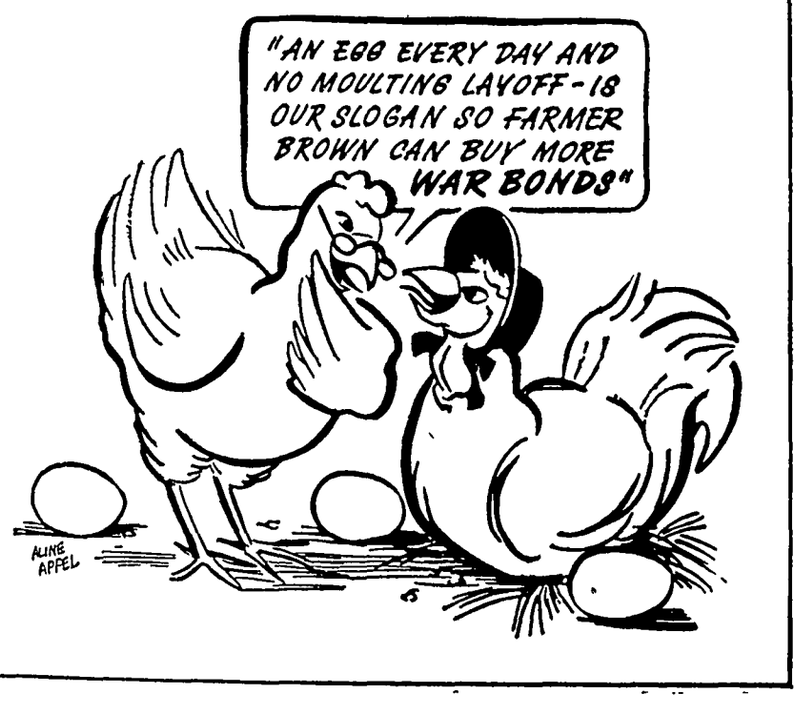
Capt. Earl G. Schaeffer arrived home Saturday after 33 months spent overseas in Iceland, England and France. He flew from Paris to London, came by boat to Boston, and then to Jefferson Barracks, Missouri. where he reported before beginning his terminal leave of a little more than three months at the end of which time he will be automatically released from the army.

Earl was one of two dentists released at Paris at this time, the release being based on the large number of dentists in the service in this country to replace those overseas, on their being in the "over 38" age group, and on their length of service overseas. The other dentist released with Earl was in school with him at Iowa City during his dental training. Earl is eligible for the length of his terminal leave for having been in service the 33 months overseas without a leave. He will spend this time resting and visiting with home folks before again deciding upon a location.

Mrs. Schaeffer went to Des Moines last Wednesday night via train and her husband, coming from St. Louis, met her there on Friday. They remained until the following day visiting in the home of her sister, Mrs. K. H. Kinkade, the former Fannie Wilson, and to Forest City Saturday noon by bus.

How the sad plight of the famous charmers of France, now that they are in the hoosegow to account for their conduct when the Nazi took over Paris! "Monsieur X" has written a fascinating series of stories on the lives and loves of these 'Beauties in the Bastille," and the first, illustrated in color, appears in The American Weekly, the magazine distributed with this Sunday's (April 15) Chicago Herald-American. 1tp

Iowa is far behind on the acreage planned for canning crops, a recent survey showed. Only 15% of the sweet corn acreage goal had been contracted for, and it was estimated that only 55 percent of the needed sweet corn would be planted under present conditions.



Canning Sugar Applications Available Soon

HOME CANNING SUGAR PROGRAM OUTLINED BY KLINE

Housewives May Receive Application Forms From Ration Board Office April 20

Plans for the issuance of canning sugar to housewives in the 64 Iowa counties comprising the Des Moines OPA district, have been completed following a joint meeting of OPA and State Nutrition Council representatives, it was announced today by Walter D Kline, driector of the Des Moines OPA district.

Sugar supplies, Kline pointed out are feeling the pinch of a long war. Nevertheless if only those people who will actually use sugar for home canning apply for it, there will be enough to preserve as much fruit as was prepared in homes the past year, the OPA official said.

The plan to be used, while representing an enormous workload for the War Price & Rationing Boards will be comparatively simple for the housewife. Application forms will be available at board offices April 20. The form contains instructions for figuring the amount of sugar needed for this year's canning as well as a few questions about the amount of canning done last year The housewife should fill out the application completely, attach "Spare Stamp 13" from War Ration Book 4, one stamp for each member of the family covered by the application Then send the application to the Board either by mail or personally. By mail is desirable as the board will not be in position to act immediately on the applications and time will be saved for the applicant as well as the board. The board will mail each applicant coupons for the total amount of sugar to be actually used for home canning, using coupons good for five and one-pound purchases. Kline stated that before a five-pound coupon could be used it must be signed with the name of the person applying for sugar.

Overholt's new store will be located in John Chambers' building across the street east of the State Bank. He will re-decorate the interior and remodel before opening his store to the public. Mr. and Mrs. Overholt expect to move to Goodell soon and will live in the Bachman house there.

Potatoes are a cool crop—it does not pay to plant them late in Iowa.

United National Clothing Collection Now Under Way

WITH PATTON'S ARMY

Pvt. Clarence Kluckhohn

Pvt. Clarence Kluckhohn, son of Mr. and Mrs. C. E. Kluckhohn of Klemme, writes his parents that "we are really on the move." A glance at a war map will show what Clarence means, because he is in General Patton's 3rd Army on the wild dash across Germany. Pvt. Kluckhohn is a graduate of the Klemme High School in the clas of 1933. Before entering the army in July 1943, he was employed at the Ankeny Ordnance Plant. He received the greater part of his training at Fort Bliss, Texas, where he specialized in Anti-Aircraft gunnery. He arrived overseas in 1944 and landed in England. He has seen active service in France, Belgium, Luxembourg and Germany. He is with the fast-moving, high powered 11th Division in Patton's 3rd Army.

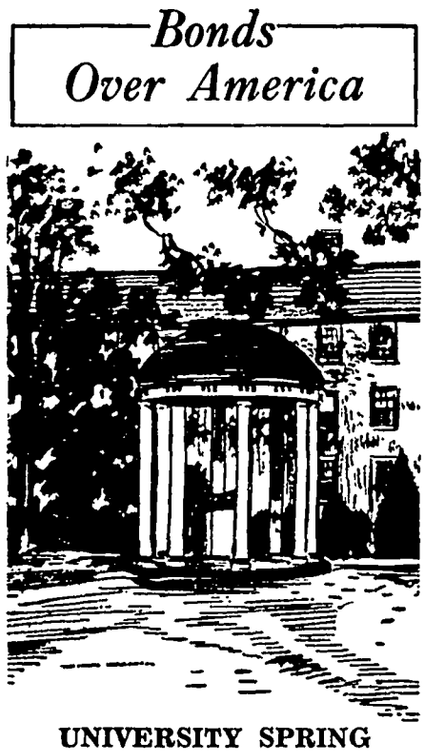
CARD OF THANKS

We wish to thank our relatives and friends for the cards, letters and gifts they sent us during our stay at the hospital, and also for the personal visits. —Mrs. Francis Pearson and son, Jerry Rex. 1tp

Double Four Bridge Club Met With Mrs. John Etchen

The Double Four bridge club met last Wednesday afternoon at the home of Mrs. John Etchen.

Mrs. Martin Barz won the high score, and Mrs. H. D. Ramsay was second high.



UNIVERSITY SPRING

A covered spring at Chapel Hill, N. C., reminds students of the University of North Carolina that General William R. Davie, "father of the university," selected the site of the first state university in America at that spot in 1792. Close by on October 12, 1793, Gen. Davie laid the cornerstone of Old East, the first university building. The first student walked 170 miles through bitter winter weather to enroll at the opening January 16, 1795. Similar determination dominates every Allied fighting man in the war today. The tradition of America's first state university and its first student should inspire the purchase of War Bonds for the protection of the Nation's educational freedom.

U. S. Treasury Department

NEED IS GREAT TO SUPPLY CLOTHING TO WAR VICTIMS

Every Town In County Has Place To Leave Clothing

The various service organizations, Boy and Girl Scouts, rural school teachers, ministers and city officials all over the county are aiding the successful collection of clothing for shipment to the war areas. The various towns in the county are being canvassed. In the rural areas the school teachers are doing a marvelous job. Each rural school is a collection depot for its district and those farmers living in that district are asked to take their donation of clothing there or if more convenient to any of the town collection points:

Klemme, Thomas Barber Shop
Goodell, Evenson Grocery
Garner, City Hall
Hayfield, School
Miller, Church, Rev. Olson
St. John, Church, Rev. Wolfram
Britt, City Hall
Kanawha, City Hall
Woden, City Hall
Corwith, City Hall
Crystal Lake, Legion Hall.

If you have not already done so turn in any of the items of clothing listed in The Times last week.

What is needed is good, substantial used clothing, for both winter and summer. Although the clothing need not be in perfect repair, it must be useful to the people who receive it. Underclothing and all types of cotton garments should be washed before they are donated, but need not be ironed.

Your donation of discarded and used clothing to this cause will help some unfortunate individual. It will help alleviate his suffering and might even save the life of some war victim.

Thank you for your cooperation. —United National Clothing Collection Committee.

Hancock Cattlemen Should Check For Cattle Grubs

Hancock county cattlemen should make a final check on their cattle, both dairy and beef, for cattle grubs. Treat at once. The infected ones will produce more milk and meat than if not treated.

Save valuable hides. Treat with the approved Grub Dust.

Farmer Buys Land In Liberty

Henry A. Greiman, farmer living northwest of Klemme, recently purchased a 240-acre tract in Liberty, section 10, from Mrs. Louise Rosendahl of Klemme. The farm is well improved.

GIRL SCOUT NEWS

—By Marjorie Lau.

The Girl Scouts held their meeting at Mrs. Trumbell's. We played the games: "I Am Thinking," and 'Story Telling."

We worked on our badges after answering roll call with our favorite movie rast.

We gave the Scout Promise, Laws, and Pledge of Allegiance to the Flag.

Bought Sow, Seven Delivered

A Mankato, Minn., express office was turned into a maternity ward for a sow enroute from Brookings, S. D. to a Worth county Iowa farmer, Jay Iverson. Mankatao is a transfer point for express, and the express agent there called a veterinarian when he saw that a blessed event was impending. It turned out that the crate in which the sow was shipped was too small to house a family, so Iverson was sent for and he took his purchase home from Mankato in his own car.

Mother says:
PAZO for Simple PILES
Relieves pain and sore
There's good reason why PAZO ointment has been used by so many millions of sufferers from simple Piles. First, PAZO ointment soothes inflamed tissues—relieves pain and itching. Second, PAZO ointment lubricates hard, dried parts—helps prevent cracking and soreness. Third, PAZO ointment tends to reduce swelling and check bleeding. Fourth, it's easy to use. PAZO ointment's perforated Pile Pipe makes application simple, thorough. Your doctor can tell you about PAZO ointment.

Kidneys Must Work Well
For You To Feel Well
24 hours every day, 7 days a week, never stopping, the kidneys filter waste matter from the blood.
If more people were aware of how kidneys must constantly remove excess fluid, excess acids and other waste matter that cannot stay in the blood without injury to health, there would be better understanding of how the whole system is upset when kidneys fail to function properly.
Burning, scanty or too frequent urination sometimes warns that something is wrong. You may suffer nagging backache, headaches, dizziness, rheumatic pains, getting up at nights, swelling.
Why not try Doan's Pills! You may be using a medicine recommended the country over. Doan's stimulate the action of the kidneys and help them flush out poisonous waste from the blood. They contain nothing harsh. Get Doan's today. Use with confidence. At all drug stores.

Morale Builder . . . Juicy, Colorful Pie
(See Recipes Below)

Dessert Appeal

There are some foods that just naturally make for a good, homey feeling. There's pie for one. The family likes to see the preparation and then smell the good and finally, taste the juicy sweetness of berries or fruit nestling against a tender, flaky crust.

Fondness for pie goes back a long way and has not abated even during rationing and shortages of sugar and fruit. It's a good dessert with which to top off the meal which has been light or a little shy of appetite appeal.

Then, too, there are cakes that fill the need for sweetness and cater a bit to the appetite. Fortunately there have been developed recipes which are low in sugar and easy to make.

A good pie or cake, baked once a week, will give the family a sense of well being and hominess that is so important in these days of rush and activity. Select one of the following recipes especially designed for wartime eating:

***Cherry-Rhubarb Pie.**

1 package frozen red tart cherries or 1 cup canned
1 package frozen rhubarb or 2 cups canned or fresh
1 cup juice
1 cup sugar
3 tablespoons quick-cooking tapioca

Combine all ingredients and place in an unbaked pie shell. Top with full crust, crisscross or cutout crust. Bake at 400 degrees F. for 15 minutes, then reduce heat to moderate (350 degrees) and bake 30 to 40 minutes. Meringue topping may be used on the pie if desired. It should be piled on after the pie has baked, then baked for 15 minutes longer in a moderate oven.

Chiffon Pie.

1¼ cups sugar
½ cup flour
½ teaspoon salt
1¼ cups boiling water
1 lemon
1 orange
3 eggs
1 unbaked pie shell

Mix the flour and sugar together in a saucepan. Stir in boiling water and cook, stirring constantly until thickened. Add slightly beaten egg yolks, the juice and grated rinds of both lemon and orange. Cook until thick, then cool. Pour filling into the crust and pile high with meringue made by beating the egg whites with ½ cup granulated sugar and 1 teaspoon lemon juice. Bake in a slow oven for 15 minutes.

Pecan pie adds a rich, hearty finishing note to the meal. Part of its sweetening is corn syrup, so little sugar is required. To prevent crust from becoming soggy, let the unbaked crust chill thoroughly in refrigerator before baking.

Pecan Pie.

¼ cup butter or substitute
½ cup sugar
1 cup light corn syrup
3 eggs
1 cup shelled pecans
1 teaspoon vanilla

Cream butter, add sugar, syrup and beaten eggs. Mix well, add pecans and vanilla and pour into an unbaked pie shell. Bake 45 minutes in a moderate oven.

A pie that is becoming increasingly popular is this cottage cheese pie because it uses inexpensive ingredients for both crust and filling. The spicy, lemony flavor is delicious and the texture of the cheese filling is light and fine-grained:

Cheese Pie.

Crust:
12 to 15 vanilla wafers, rolled fine
¼ cup sugar
3 tablespoons butter or substitute
Filling:
1 cup cottage cheese, sieved
1 tablespoon butter
1 tablespoon cornstarch
¾ cup milk
2 eggs
½ cup sugar
Rind of ½ lemon
1 tablespoon lemon juice
⅛ teaspoon salt
Cinnamon

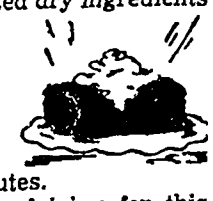
Press the cheese dry and put through a sieve. Add the melted butter to it. Dissolve cornstarch in milk. Beat eggs, add sugar. Combine the mixtures, then add rind and juice, salt and dash of cinnamon. To make crust mix crumbs, butter and sugar. Press on bottom and sides of pie plate or spring form, keeping ½ cup mixture for the top.

Bake the pie in a moderate oven for 35 to 40 minutes.

Honey Nut Cake.

½ cup butter or substitute
¾ cup sugar
¾ cup honey
¾ cup water
2¼ cups sifted cake flour
4 teaspoons baking powder
¼ teaspoon salt
1 cup chopped nuts
4 egg whites

Cream butter, sugar, honey. Add alternately the sifted dry ingredients and water. Fold in stiffly beaten egg whites last. Bake in two nine-inch layer pans in a moderate oven for 30 to 35 minutes.



The nicest kind of icing for this cake combines the texture of creamed sugar and butter (or substitute) and the flavor of mocha, which may be left over cold coffee:

Mocha Icing.

6 tablespoons butter or substitute
1 egg yolk
2 cups powdered sugar
2 tablespoons left over coffee
1½ tablespoons cocoa
1 teaspoon vanilla

Cream butter thoroughly, add egg yolk. Sift sugar and cocoa together and add alternately with coffee. Spread between layers and on top of cake.

Cakes made with honey taste better if they are allowed to mellow for several days before serving. Store, covered with waxed paper, under a cake cover, or in a large sized cookie tin so that it does not dry out.

When baking honey cakes, it is best to grease the pan, cover with waxed paper which is greased before pouring in the batter.

Lynn Says:

Sugar-Easy Sweets: When you want a good icing for a cake, sprinkle chocolate bits over top of warm cake and allow to melt in broiler and run over the sides.

Beat two egg whites until stiff and fluffy and whip in 1 cup of jelly. Colorful icing.

Powdered sugar can't be beat for angel food or sponge cakes. Sift it on the cake through a cut-out doily to get a pretty pattern.

Beat egg whites stiff and add honey gradually to them. One-half cup of honey for 1 egg white is the correct proportion.

For plain yellow cakes there's little better than creaming 2 tablespoons of butter with 6 tablespoons of brown sugar and ½ cup of chopped nuts. Spread on warm cake and broil for 5 minutes.

Your 1945 Garden

Gardeners Urged To Purchase Needs Without Delay

WITH certain exceptions, the outlook for Victory garden supplies this year is good, according to a recent survey.

With the bumper crop last year, seeds will be especially plentiful, but due to manpower shortages, gardeners are advised to get their seed orders in immediately. The help shortage will make it impossible to fill orders on time if all wait until just before planting time to place orders for seed.

GARDEN FOR VICTORY IN 1945

As a matter of fact, most gardeners buy their seed supply from their local stores, so this warning will apply only to those who send in to the various seed houses for their seed needs. It is advisable, however, for all gardeners to lay in their seed supplies early. This can be done immediately after the garden has been mapped out and planned, or just as soon as local stores receive their spring shipments of seeds. In many sections of the country these supplies are already on display.

Farm gardeners and experienced growers in the smaller towns know pretty well their needs in the way of garden tools. But for the small backyard or vacant lot garden very few tools are actually necessary. It is better to buy a few simple, high-grade, substantial tools that will serve well for many years, than equipment which is poorly designed or made of cheap or low-grade materials that will not last. In most instances a good spade or spading fork, a steel bow rake, a 7-inch common hoe, a strong cord for laying off rows and enough garden hose to reach all parts of the garden with water are all that is essential. A trowel is useful in transplanting, but is not essential. If the soil is properly prepared, plants can be set more easily with the hands than with a trowel.

The fertilizer situation generally is not as good, due to nitrogen shortage, as it was a year ago, but Victory gardeners are not expected to have much trouble in obtaining sufficient to supply their needs.

The same Victory garden grades used in 1944 will be in effect this year. This means that for the Atlantic seaboard, the formula will be 5-10-5; for the central part of the country, including the corn belt, it will be 4-12-4, and for the western states it will be 6-10-4.

(U.S.D.A. Photo.)

Implements are important. These are the essential ones.

The Victory gardener who wisely supplied himself with a compost pile last fall or who was able to obtain manure, is not wholly dependent upon commercial fertilizers, but for the most part Victory gardens will rely upon commercial fertilizers to provide the necessary soil chemicals for a successful crop.

Buy Early to Secure the Best

The latest word on insecticides is that supplies will be about the same as last year. Rotenone, one of the most popular garden insecticide ingredients, will be available in approximately the same quantities as last year. Rotenone may be purchased separately, in powder form, or as part of a prepared insecticide suitable for the particular vegetable or insect with which the gardener must deal.

The ingenuity of the American people generally, is manifest in some of the homemade practices which Victory gardeners have developed. For instance, when there was a shortage in insecticide dusters, a homely but effective method was developed by using a common cloth bag for dusting plants. Other equally effective devices have been used although there does not appear to be any apparent shortage this year in the commercial small dusters and sprayers.

Extreme care should be used in handling poisons so that they will not be mistaken for flour, or for food for livestock, or left where children or pets can be injured by coming in contact with them.

When using materials which are known to be lethal to bees, livestock or other property, one should exercise every precaution to protect all property from damage and, as a means thereto, use only such methods of application and under such climatic conditions as to prevent damage to bees, animals or other property.

SEWING CIRCLE NEEDLEWORK

Crocheted Hats Smart for Spring Potholders Welcome Shower Gifts

White Ruffled Hat

FRESH as a breath of spring—a ruffled hat of white all done in crochet. Interesting navy blue trim provides a smart contrast color. A clever hat to wear now with suits—later with linen suits and dresses.

* * *

To obtain complete crocheting directions for the white suit hat (Pattern No. 5712) send 16 cents in coin, your name, address and the pattern number.

Hat in Bright Jewel Colors

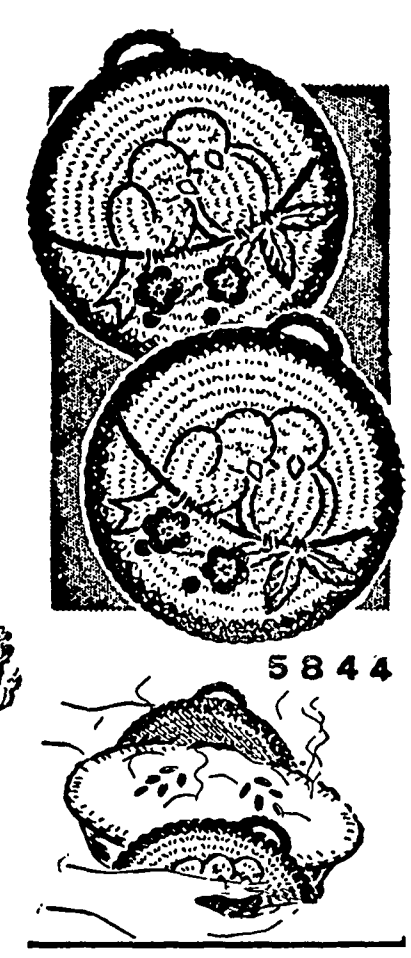
AS PRETTY a crocheted hat as you'll see! Inexpensively and quickly made—you'll want several to wear with your new spring suit. Choose bright jewel color velvet chenilles—and for a dash of spice get some gay gloves to match.

* * *

To obtain complete crocheting instructions for the ruffled hat (Pattern No. 5551) send 16 cents in coin, your name, address and the pattern number.

Potholders for Shower Gifts

THESE cheery potholders are almost too pretty to use! They're 6½ inches, have two bluebirds swaying on a cherry tree bough with two cherry blossoms in shaded pink. A pair of these will make a most welcome gift.



* * *

To obtain complete crocheting instructions for the two bluebird potholders (Pattern No. 5844) and color chart for embroidering, send 16 cents in coin, your name, address and the pattern number.

EDITORIAL COMMENT

DON'T USE HOME-MADE ELECTTIC FENCE DEVICE

Home-made electric fence devices are death traps! That may not be a nice way to put it, but that's the way it is.

County Extension Director Paul Henderson says that Iowa State College farm engineers have warned repeatedly against the use of any home-made electric fence equipment There just isn't any safe way to do it Every year reports come in from all parts of the country on how children have met with death through contact with an electric fence rigged up on the farm. That should be warning enough, even without counting the death loss to farm animals.

The farm engineers say that the biggest trouble is that most of us don't understand how small a current can be and still kill. It is the current that kills and not the voltage. The ordinary 115-volt lighting circuit can be as dangerous as 40 000 volts.

The number one item on the list of electric fence safety rules is never to use a home-made electric controller. And with the correct controller for the fence, always use the correct electrical source. All electric fences on the farm should be plainly marked, and children should be instructed to stay away from them

Hancock county has had horses and hogs killed by home-made electric fences

MORE BOYS INDUCTED INTO ARMED SERVICE

The following boys reported at the Legion Hall, Britt, Iowa, April 9th, to go to Ft Snelling, Minnesota to be inducted into the armed forces:

John Barracks, Corwith
Chester C. Butler, Britt
DeWayne K. Tannahill, Forest City, Iowa.

Daniel R. Harrington was transferred into this county for induction from Seattle, Washington.

Warba is the earliest variety of potato. Irish Cobbler is several weeks later and is still the best adapted variety for Iowa. Sebago is a late variety resistant to blight and somewhat to scab disease.

BETTER IOWA GARDENS

Although April got a little mixed up and tumbled in with weather which resembles the traditional roar of the March lion, gardeners should "hew to the line" and keep gardening ahead.

Some lucky Iowans got their gardens in ahead of the unruly weather. The rest of the victory gardeners should do so as soon as possible. One of the planting bottlenecks this year is garden plowing. That only emphasizes the advisability of fall plowing. For fall plowing means that soil usually can be worked and planted earlier.

* * *

Here's a bit of advice for the gardeners who still have to plant. Don't sow your garden seeds carelessly if you want strong productive plants. Rake each row where the seed is to go in until the soil is fine. Remove lumps and trash Then firm the soil after the seed goes into the earth.

* * *

Some garden crops thrive on companionship" That's where you mix seed—as raddish with carrot—and grow the two crops in one row to save space. Use less radish than carrot seed The radishes will grow fast and mark the row That's helpful when it comes to cultivating Remove the radishes by the time the garden needs thinning. Another possible mixture is radish and lettuce seeds mixed with parsnip seed. There the parsnip will be ready for proper spacing by thinning surplus plants when the lettuce is gone.

* * *

We hear a lot about inoculating legumes on the farms. Those who wonder if that applies to garden legumes, too, should know that experiments comparing inoculation showed no difference in production. Some soils may warrant inoculating the seed But, in general, dusting seed with a protectant and disinfectant dust seems more important than inoculation.

* * *

Today's labor saver in the garden is the wheel hoe with the knife blade attachment. With that hoe, you can cultivate your garden speedily. Spend a little time each week cultivating with this hoe. That way much hard work is avoided and less time is required.

* * *

The garden plays an important part in providing the food a family needs.

* * *

Detroit Dark Red is a good standby in table beets. Four plants per person of the Italian Green Sprouting broccoli should be sufficient. Chantenay and Danver's Half Long carrots are grown in many garden and are adapted to heavy soils. Touchon and Tendersweet are newer varieties.

* * *

Although gardening takes work, if recommended practices are followed, the rewards are well worth the effort.

EIGHTEEN YEAR-OLDS UP FOR SELECTIVE SERVICE

The following Hancock county boys having reached their 18th birthday, registered for Selective Service:

Wayne E. Taylor, Garner

France Is Buying Heavily From U. S.

Goods Worth Millions Are Ready for Shipment.

WASHINGTON. — France is buying 700 locomotives, 9,000 trucks, and many millions of dollars worth of other goods here for shipment as rapidly as cargo space becomes available.

The figures are contained in a summary released by the office of war information of economic and military assistance to France.

The release emphasizes anew that French transportation suffered severely at the hands of the Germans. It says that about half of the present French industrial labor force of more than 5,000,000 persons is threatened with unemployment because of fuel and raw material shortages due principally to lack of transportation.

Release of the figures followed a speech made by Acting Secretary of State Joseph C. Grew in Philadelphia to focus attention on what the United States is doing for France. Mr. Grew emphasized throughout that until Germany was defeated there could be no really substantial delivery of supplies to France because of the necessity for maintaining the armies on the front. But we will share what we can, he said.

The release is concerned chiefly with what has been done already for France, including the arming of eight French divisions and the promise to arm eight more, the delivery of more than 200 naval craft (including harbor boats, etc.), the assignment of space equivalent to 26 ships for civilian goods shipments in the first quarter of 1945, and the promise to help rebuild the French merchant marine.

The buildup of the French merchant marine is being achieved partly by the allocation of United States ships for operation under the French flag by French crews—the United States having an urgent need for crews at this time—and partly by turning back French ships which have been operated by the Allies.

Medic Aids Dying Nazi Who Spat in His Face

WITH THE ALLIED EXPEDITIONARY FORCE ON THE WESTERN FRONT. — Sgt. Ernest Kennedy of Kearney, Neb., airman of the 110th medical battalion, had one of the most arrogant Nazi prisoners his outfit had ever handled and, although the man was dying, he was doing everything possible to ease his pain and save him. Suddenly the German sat up on his litter and spat directly in Kennedy's face. As if nothing had happened, Ernest pushed him gently down and continued treating his wounds.

Later, when Kennedy's angry buddie asked him why he continued to treat the fellow, Ernest gave an answer which is typical among the medics regardless of whether you ask them how they dare move unarmed in the midst of the hottest battle or why they constantly risk their lives to save the wounded—comrades and enemies alike.

"I have a job to do," Ernest said.

Match Industry Leaders Say There Is No Shortage

NEW YORK. — Military demands have sharply curtailed the home front's stocks of matches but the country is facing no real shortage, industry leaders assert.

Because they're smaller and occupy less cargo space, 100 per cent of the penny size safeties and 35 per cent of the folder type paper book matches have been requisitioned for war service. This leaves 120 billion paper book matches and 200 billion kitchen matches out of 1945's manufactures for civilian consumption.

The industry points out that of America's 100 million adults of match-using age about 30 million are equipped with lighters or do not use matches at all. As a result the available 1945 supply means 4,571 matches per capita for the year, ample for all needs if there is no hoarding the industry feels.

Oldest Private Soldier, 66, Returns to His Home

AUCKLAND, N. Z. — Pvt. Tom Mockford, one of the oldest army privates in the world, is home again —his gay '90s mustache intact despite action in Greece, Crete and Libya before he fell into German hands.

The 66-year-old New Zealander, a veteran of the South African and the First World war, left for Dunedine, where three wounded sons who enlisted with him await his arrival.

Captured by the Germans in the second Libyan campaign, Private Mockford escaped three times, but each time Nazi patrols recaptured him. He finally was repatriated.

Gag With Some Fags Leaves Smokers Agog

JOHNSTOWN, PA.—Passersby stared open-mouthed at a parking meter in front of a downtown bank.

A pack of popular brand cigarettes was fastened to the meter with a sign: "Free—take one."

It must have looked like a booby trap, because no one was seen accepting the offer.

Around Iowa

Trailer Jars Building

Ice and a short turn on the road combined to cause a freak accident at Shell Rock recently when a semi-trailer truck, loaded with steel, failed to make the curve and plunged into the side of the building housing the Iowa Public Service Co. Though several hundred dollars damage was done to the building, only slight damage resulted to the truck.

Advertising Did It

Lost articles are not always returned to their owners but ration books proved an exception when Mrs Harry Pendel of LeMars advertised her loss of 14 such books contained in a holder, and the finder returned them through a local drug store.

Old Homestead Sold

A 40-acre farm near Palmyra owned by some member of the James family for 93 years, was sold recently to an outsider. The land was entered and later purchased by Henry James of Mayflower stock, in 1851. The price paid the government for the land was $1 25 an acre. Mrs Henry James was the first white woman to settle in Warren county. She was a native Ohioan while her husband came originally from New York. The last vendor of the land is Mrs Ermil Caldwell, the former Ermil James.

Jobs Re-Classiifcation

At LeMars, high school pupils have a novel educational project in which the boys of the manual training classes and the girls of the homemaking classes for three weeks each year exchange courses The boys delve into the mysteries of cooking and care and repair of clothing, while the girls learn about wood working and how to use a lathe and other devices for turning out things to help make the home more beautiful.

Welcome Gifts

The Pfeiffer family of New York City has been a principal benefactor of Upper Iowa University at Fayette Mrs Henry Pfeiffer recently sent the college officials a check for $25,000 to complete the second $100,000 she and her husband have given to help endow the college The endowment is on a matching basis with similar contributed amounts by other friends of the institution The first $100,000 was received from the Pfeiffers in 1928.

SCHOOL NEWS

MUSIC NEWS

—Ruth Bell

This past week on Friday and Saturday the Music Department of our school took part in the annual Pre-State Contest.

The Saxophone Quartet took part on Friday evening and came home with a Division One Rating.

Saturday the Mixed Chorus and the Band took part. The Mixed Chorus took a Second Place Rating, and the Band came home with a Division One Rating.

Although we were disappointed in our Mixed Chorus, an enjoyable day was had by all.

SENIOR CLASS NEWS

This last week was six weeks tests; our next to last tests that we will take in high school. We are coming close to the end of school; it really doesn't seem at all possible.

Last Monday we started on our play. We have had practice about every other night so far and intend to have it every night this week. We have been working on the first act and most of us have it learned.

In bookkeeping we are studying how to use checks, bank balances, invoices and other instruments used in business. Soon we will start on Set II; the radio business. These sets are always interesting because they have everything pertaining to our past lessons in them.

FRESHMAN NEWS

—Helen Pringnitz.

Home Economics Class has been studying dinner menus in Theory class. In the Labratory they are finishing luncheon desserts by making various kinds of cakes.

Freshman English Class is finishing the study of verbs.

There are only six weeks of school left and we have a lot to do before that time comes.

In Science Class we finished the unit on Foods as Fuel for the Human Engine We have finished our six weeks test and are ready to start on The Use of Fuels by the Human Engine.

Algebra Class is solving fractional equation We will have to work hard before the end of the school year in order to pass our semester tests.

JUNIOR HIGH NEWS

—Norma Early.

We started our six weeks tests the first of the week but the snowstorm closed school on Wednesday so we had most of our tests at the end of this week.

Several band members in our room went to the Music Contest on Saturday

Jerry Finders, Alice Meyer and Marjorie Lau have been neither absent nor tardy all year.

FIFTH AND SIXTH GRADE NEWS

—Mrs. H. G. Voetberg, Teacher.

We were sorry to have the following people absent from our room during the past week: Norene Pearson, Harley Barz, and Dolores Karsjens.

Monday afternoon we were very happy to be guests at an assembly program. We were entertained by five Eighth Graders from Garner who were winners in their home declamatory contest. We enjoyed the readings very much.

Saturday was the Music Contest at Clear Lake. We are very proud to have four members of our room in our school band. Those going to the contest from our room :La Nelle Harvey, Maxine Barz, and Jo Ann Carpenter. Harley Barz was unable to attend because of illness.

Friday ended the six weeks period. We have only six more weeks of school remaining in this year.

THIRD AND FOURTH GRADE NEWS

—Miss M. J. Holmes, Teacher.

On Monday afternoon Virginia Bock of Garner visited in our room.

During recess on Monday the Third and Fourth Graders enjoyed the eating of peanuts. The peanuts came from a peanut shower that the boys and girls planned.

Friday was the last day of the fifth six weeks period. During this period the following Third and Fourth Graders have been neither absent nor tardy:

Honor Roll

Richard Baack
Milbourne Trampel
Thomas Waddingham
Lu Verne Heginger
Billy Waddingham.

The following people have had perfect scores in Spelling during the past six weeks:

Dennis Ridder
Roger Terhufen
Billy Waddingham.

On Monday afternoon the Third and Fourth Graders enjoyed the assembly program to which we were invited. The declamatory contestants from Garner were our speakers.

KINDERGARTEN, FIRST AND SECOND GRADE NEWS

—Miss Arlene Bugh, Teacher.

In Reading Class, the First grade is enjoying stories about "Our Animal Friends."

The Second Grade finished their unit on "New Animal Friends" in their Readers. These stories told about the smart tricks some animals can do.

Honor Roll

The following children had a perfect record of attendance during the last six weeks:

Berleen Bridges
Marlene Drake
Janice Stokesbary
Ronald Trampel
Connie Jo Bisom
David Waddingham
Merlyn Olson.

NOTICE

In order to fill vacancy for Town Marshall and Commissioner position in the Town of Klemme, the Town Council will meet in special session April 20th at 8:00 p. m. to consider applicants, or application may be made by sealed bids addressed to the Town Clerk, Klemme, Iowa. stating salary per month.

(2t) A. J. Kudje, Clerk.

KLEMME NEWS ITEMS

Mrs. Russel Medin left last week for Savanna, Illinois to help care for her mother who is seriously ill. The Medin children are staying with their grandparents at Algona.

Mr. and Mrs. Harvey Barz took their son, Graydon to the hopsital at Mason City Tuesday for examination. Graydon has been ill for several days.

The 1945 crop season is starting off with prospects better than average in most states. Only limited areas are seriously handicapped by weather.

Up to March 1, the damage to fruit during the winter in the principal fruit belts had been unusually light. Prospects are for a citrus crop about equal to the record crop of last year.

NOTICE TO BIDDERS

Sealed bids will be received at the office of the County Auditor, Garner, Iowa, until 2.00 P. M April 23, 1945 for constructing the following wooden bridges at the various locations in Hancock County specified below.

Bridge No.	Location	No. of Piling	Spans
8469	13-24 Madison	8	2-22'
6792	11-12 Concord	8	1-26'
4844	35 Britt-2 Erin	20	3-22'
4067	11-14 Liberty	20	4-22'
3859	16 Liberty	16	3-18'
3560	21-22 Liberty	12	2-20'
4458	4-9 Liberty	8	1-28'
1257	16-21 Twin Lake	22	4-22'
1480	16-17 Avery	24	5-20'

Material will be furnished at bridge site by the County.

In case that plain stringers are furnished they shall be painted with creosote oil on top and at ends.

Standard Iowa Highway Commission plans for timber trestle bridges of 1919 with variations made necessary by available material will be used.

A certified check or cashiers check in the amount of $160 00 made payable to the County Auditor shall be filed with each bid which in the case of the bidder receiving the award should he fail to execute a contract and file a bond within ten (10) days after acceptance of his bid shall be retained by the county as liquidated damages.

The successful bidder will be required to file a bond for seventy-five per cent of the contract sum as security for the construction and completion of the work awarded in accordance with the plans, specifications and contract. Said bond to be purchased from some Hancock County agent.

Plans and specifications may be seen and may be secured at the above office or at the office of the County Engineer, Garner, Iowa The County reserves the right to waive technicalities and to reject any or all bids.

Work must be commenced by May 15, 1945, and must be completed by October 1, 1945.

Published by order of the Board of Supervisors.

Dated at Garner, Iowa, this 9th day of April, A. D., 1945.

FRED C. MISSAL,
County Auditor
(Publish April 11, 1945.)

Drouth in the southern hemisphere has cut the production of meat in the Argentine, Mexico. Brazil and Australia. They will export very little.

WEEKLY NEWS ANALYSIS

Allies Close on Ruhr Valley; Japs Gird for U. S. Invasion; Forecast Cut in Grain Acreage

Released by Western Newspaper Union

(EDITOR'S NOTE: When opinions are expressed in these columns they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)

Indicative of high cost of taking Iwo Jima is this marine graveyard on the island, with row upon row of little white crosses. Approximately 4,000 Americans were killed in the struggle.

EUROPE:
Ruhr Target

To 60-year-old Field Marshal Albert Kesselring went the hapless job of assuming supreme command of German armies in the west as U. S. and British forces closed on the vital Ruhr valley after having conquered the coal and iron rich Saar basin to the southwest.

Kesselring

In picking Kesselring to try to hold the sagging German front in the west, Hitler chose an ardent Nazi, who gained notice through his development of strong defensive lines in Italy. Trusted by the Nazis to stand fast in the face of the overwhelming Allied onslaught, Kesselring succeeded Field Marshal Von Rundstedt, who was relieved of his command following reports that he had failed to negotiate an armistice with General Eisenhower.

As Kesselring took over the German command, his hard-pressed forces faced the Canadian 1st, British 2nd and U. S. 9th armies on the western border of the Ruhr, while the U. S. 1st army built up strength for a drive to the south of the vital industrial valley from its Remagen bridgehead.

Following a tremendous concerted aerial bombardment aimed at softening up the enemy's rear areas, these four Allied armies stood ready to strike to the east of the Rhine and break into the open German plains on the high road to Berlin. Farther to the south, the U. S. 3rd and 7th armies, having cleaned out the Saar, drew up against the forested mountain country to the east of the Rhine in this sector.

Double Trouble

Thus, while Kesselring had his hands full trying to hold the Allied armies off from the open northern plains, German commanders in the east experienced equal difficulty meeting the Russian onslaught over the other end of the level northern country in the east. From Stettin southward, the Reds menaced the serried defenses of Berlin while the Nazis still talked about a last ditch fight behind concrete pillboxes, bunkers. tank traps and irrigated flat land.

Though massed in the greatest strength before Berlin, the Reds also exerted considerable pressure to the south, seeking to batter their way through the mountain masses in Upper Silesia to enter Czechoslovakia, and smashing at German defenses in western Hungary in an effort to reach Austria.

U. S. SAVINGS:
In Billions

With a wartime economy restricting the supply of civilian goods, and income at peak levels, Americans continued to pour billions of dollars into savings, the Securities and Exchange commission reported.

With Americans putting away nearly 25 per cent of their incomes in cash, bank deposits and government securities within the last two and one-half years, total holdings of these assets reached 148 billion dollars at the end of 1944.

In saving 40 billion dollars last year, 10 times as much as in 1940, Americans amassed an additional 17 billions in cash and bank deposits; 15 billions in government bonds; 3⅓ billions in insurance, and 900 millions in savings and loans associations.

CITY EMPLOYEES

The 852,000 employees of the nation's cities and towns draw a monthly payroll of $122,000,000, the International City Managers association reported Despite the decline in number of employees, however, the total payroll has shown a steady advance during the last two years.

Accompanying the general decline in number of municipal employees was a general increase in length of the regular, or normal work-week city hall personnel, though much occurred in the smaller cities.

PACIFIC:
Fear Invasion

Making no bones about their fear of an invasion of their homeland, the Japanese government moved feverishly to prepare the country for the eventuality, while at the same time pushing efforts to organize occupied China against a thrust from U. S. forces.

Her predicament underlined by the U. S.'s gradual advance toward the homeland, and the destructive aerial raids on her great urban centers, Japan's leaders called for the establishment of virtual martial law in the country, permitting expropriation of land and demolition of buildings for defense purposes.

Though high military authorities believe that Japan, like Germany, will not be bombed out of the war because of the decentralization of her industry, U. S. attacks have cut into some of the enemy's productive capacity, besides causing serious civilian dislocations. Already, almost half of Tokyo's civilian population has been evacuated, it was said.

Besides impairing the home effort, such raids as the recent carrier plane attacks on the Japs' great inner naval base in the Inland sea bounded by the home islands of Honshu, Kyushu and Shikoku serve not only to cripple the enemy fleet but also damage important repair and anchorage facilities.

Although the Japs feel that any direct assault on the homeland would give them the advantage of short supply lines and land bases from which to develop counter-measures, they are looking worriedly to the Chinese coast, where they believe the U. S. might drive ashore to set up invasion bases.

Thus, high military authorities presume, the enemy will continue to play for time in such outlying battle zones as the Philippines and Burma to permit further development of Chinese resources and troops reportedly fighting for them so as to be better able to meet an invasion of that country.

CROP ACREAGE:
To Drop

Because of a decrease in hog numbers in their own lots, an expected drop in demand for feed grains and a switchover to crops with lower labor requirements, farmers will put fewer acres to important grain in 1945, the U. S. department of agriculture reported.

Basing its report on farmers' declarations of intentions, the USDA said that corn acreage would be down 3 per cent under 1944, barley 14 per cent, and soybeans 2½ per cent. As exceptions, wheat acreage was expected to increase 4½ per cent and oats 8 per cent.

In addition, the USDA's reports on acreages for other crops showed general decreases from last year, with increases forecast only for sugar beets, flaxseed, tobacco and rice.

With the weather generally favorable, finances ample and seed and feed plentiful, chief obstacles to 1945 production lie in manpower and machinery shortages, the USDA declared. Indicated acreages in declarations of intentions might be notably changed through the year, the USDA said, in accordance with influences in weather, price fluctuations, manpower, finances and the effect of the report itself on farmers' plans.

Staples Output....

Wool production declined along with sheep numbers in the United States in 1944 with production, both shorn and pulled, estimated at 418,094,000 pounds compared with 449,578,000 pounds produced in 1943. Average local market prices in 1944 were 42.4 cents per pound, however, compared with 41.6 cents per pound in 1943. Number of sheep shorn is estimated at 9 per cent less than 1943 or 44,324,000 head.

FOOD:
Overseas Demands

The food situation continued to occupy the country's attention, with the conviction growing that Americans will have to give their belts a long pull inward to help feed distressed civilians in liberated countries.

But if the food situation took the spotlight in the U. S., it also aroused interest in Britain, where Prime Minister Churchill told the house of commons that the country only had less than 6 million tons of food in reserve instead of the 700 million suggested by some quarters in America. Some of it was being used to feed needy Europeans, he said.

Following President Roosevelt's statement that it was only decent for Americans to share some of their food supplies with hungry Europeans, and reports that the army's share of meat would be increased 4 per cent during the next three months to help feed people in the war zones while U. S. civilians' would be slashed 12 per cent, it was announced that the United Nations Relief and Rehabilitation administration (UNRRA) would require about 800 million pounds of food from this country during April, May and June.

Food other than meat composes UNRRA's largest claim on U. S. stocks, with calls for meat amounting to 1 out of every 350 pounds of the nation's civilian supply, it was said. Deliveries of grain, flour and other cereal products top the list, with meat and fat and then beans and peas, milk and sugar in order.

Of UNRRA's total requirements of 1,876,000,000 pounds of food for the next three months, the U. S. is expected to furnish 42 per cent, with Canada supplying 38 per cent and other United Nations the rest.

May Cut Draft Calls

With the services expected to be built up to full strength by July, 1945, monthly draft calls thereafter may be cut from the present 135,000 to 93,000 to furnish replacements, President Roosevelt revealed.

At the same time, a congressional committee was told that although draft calls would be reduced after Germany's defeat, young men will continue to be inducted during the Japanese war to replace discharged vets.

Previously, selective service announced that some 145,000 men from 18 to 29 years of age in the steel, transportation, mining and synthetic rubber industry would be deferred as essential workers, breaking the former policy of exempting only about 30 per cent in any field. As a result, older men in the 30 to 37 age group will have to be inducted to make up the difference, it was said.

POLIO:
Kenny's Problem

Unable to enlist the support of the nation's medical leaders for her treatment of infantile paralysis, Australia's Sister Elizabeth Kenny announced her decision to leave this country if congress failed to look into the difficulties that have beset her since her arrival here.

Although Sister Kenny's decision to leave the country came upon the heels of the National Foundation for Infantile Paralysis' refusal of a request for $804,000 for the Kenny institute in Minneapolis, Minn., she said that money was no object, since the people of the latter city already had raised $400,000 for her work and undoubtedly could double the figure.

Rather, she said, her decision to leave was prompted by the medical profession's failure to provide assistance for further research into her theory of treatment. Without such research, she declared, her presence here was no longer necessary since others have been trained in her present methods.

MIDNIGHT CURFEW:
New York in Line

Having enjoyed an extra hour of night frolicking for a few days, New York's milling merrymakers found themselves out on the streets at midnight again, following the amusement owners' decision not to take advantage of Mayor La Guardia's one hour extension of the government's 12 a. m. curfew, imposed to conserve fuel and manpower.

First accepting La Guardia's one hour reprieve in the face of widespread criticism, the amusement owners' own hands were forced when both the army and navy ordered their personnel to leave the nighteries at midnight in obedience to the government regulation.

Before the New Yorkers decided to close their doors, War Mobilization Director Byrnes said it was impossible for the government to enforce the midnight curfew, since it lacked the police necessary.

SHIP EGGS BY AIR

More than 5,000 hatching eggs have been shipped successfully by airplane from the United States to tropical American countries to develop poultry industries as part of an inter-American food-growing program.

The University of Maryland previously had demonstrated the practicability of shipping eggs by plane within the United States and its aid and that of the U. S. department of agriculture was enlisted for the experiment.

Ernie Pyle With the Navy:

Lots of Men Needed to Keep Aircraft Carriers Going

Life Aboard Ship Monotonous, But Preferable to Foxhole

By Ernie Pyle

IN THE WESTERN PACIFIC.—The men aboard an aircraft carrier could be divided, for purposes of clarity, into three groups.

There are the fliers, both officer-pilots and enlisted radiomen and gunners, who actually fly in combat. They do nothing but fly, and study, and prepare to fly.

Then there are the men who maintain the fliers. The air officers, the mechanics, and myriads of plane handlers who shift and push and manhandle the planes a dozen times a day around the deck.

Ernie Pyle

These men are ordinarily known as "Airedales," but the term isn't much used on our ship Usually they just call themselves "plane-pushers."

And third is the ship's crew—the deck hands, engineers, signalmen, cooks, plumbers and barbers. They run the ship, just as though it were any ship in the navy.

* * *

The fliers aren't looked upon as Gods by the rest of the crew, but they are respected. Hardly a man on the crew would trade places with them. They've seen enough crash-landings on deck to know what the fliers go through.

But there is a feeling—a slight one — between the ship's regular crew and the air maintenance crew. The feeling is on the part of the ship's crew. They feel that the plane-handlers think they're prima donnas.

They say to you "Them Airedales is the ones that gets all the glory. Nobody ever hears about us. All we do is keep the damn ship going."

* * *

It is these "plane-pushers" who make the flight deck of an aircraft carrier look as gay and wildly colorful as a Walt Disney cartoon. For they dress in bright colors.

They wear cloth helmets and sweaters that are blue, green, red, yellow, white or brown. They make the flight deck look like a flower garden in June.

This colorful gear isn't just a whim. Each color identifies a special type of workman, so they can be picked out quickly and sent on hurried tasks.

Red is the gasoline and fire-fighting detail Blue is for the guys who just push the planes around. Brown is for plane captains and mechanics. White stands for radiomen and the engineering bosses. Yellow is for the plane directors.

Yellow is what a pilot looks for the moment he gets on deck. For the plane directors guide him as though they were leading a blind man. They use a sign language with their hands that is the same all over the navy, and by obeying their signs explicitly, the pilot can taxi his plane within two inches of another one without ever looking at it.

* * *

Comfortable Quarters Enjoyed by Crew

All the pilots and ship's officers live in "officers' country" in the forward part of the ship. They live in comfortable cabins, housing from one to four men.

The crew lives in compartments. They are of all shapes and sizes. Some hold as little as half a dozen men. Others are big and house a hundred men.

The navy doesn't use hammocks anymore. Every man has a bed. It is called a "rack." It's merely a tubular framework, with wire springs stretched across it. It is attached to the wall by hinges, and is folded up against the wall in the daytime.

The "racks" aren't let down till about seven in the evening (except for men standing regular watch who must sleep in the daytime).

* * *

A light carrier, such as mine, has only about a third as many planes as the big carriers, and less than half the crew, but it does exactly the same kind of work.

Of the three types of carriers in the navy, ours has the narrowest flight deck of all. It's so narrow that when planes take off they use the left side of the deck, in order that their right wingtip won't come too close to the "island" as they pass.

Our pilots and crew are quite proud that we have the narrowest flight deck in existence. They're proud they can even hit the damn thing.

* * *

It's easy to get acquainted aboard a naval vessel.

The sailors are just as friendly as the soldiers I'd known on the other side. Furthermore, they're so delighted to see a stranger and have somebody new to talk to, that they aren't a bit standoffish.

They're all sick to death of the isolation and monotony of the vast Pacific. I believe they talk more about wanting to go home than even the soldiers in Europe.

Their lives really are empty lives. They have their work, and their movies, and their mail, and that's just about all they do have. And nothing to look forward to.

They never see anybody but themselves, and that gets mighty old. They sail and sail, and never arrive anywhere. They've not even seen a native village for a year.

Three times they've been to remote, lifeless sandbars in the Pacific, and have been allowed to go ashore for a few hours and sit under palm trees and drink three cans of beer. That's all.

* * *

Finds Eats Aboard Best of the War

Yet they do live well. Their food is the best I've run onto in this war. They have steaks and ice cream—they probably eat better than they would at home.

They take baths daily, and the laundry washes their clothes. Their quarters are crowded, but each man has a bunk with mattress and sheets, and a private locker to keep his stuff in. They work hard, but their hours are regular.

The boys ask you a thousand times how this compares with the other side. I can only answer that this is much better. They seem to expect you to say that, but they are a little disappointed too.

They say "But it's tough to be away from home for more than a year, and never see anything but water and an occasional atoll." And I say yes I know it is, but there are boys who have been in Europe more than three years, and have slept on the ground a good part of that time. And they say yes, they guess in contrast their lives are pretty good.

Seaman Paul Begley looks at his wartime life philosophically. He is a farm boy from Rogersville, Tenn. He talks a lot in a soft voice that is southern clear through. He's one of the plane-pushers on the flight deck.

"I can stand this monotony all right," he says. "The point with us is that we've got a pretty good chance of living through this. Think of the marines who have to take the beaches, and the infantry in Germany. I can stand a lot of monotony if I know my chances are pretty good for coming out of it alive."

But others yell their heads off about their lot, and feel they're being persecuted by being kept out of America a year. I've heard some boys say "I'd trade this for a foxhole any day." You just have to keep your mouth shut to a remark like that.

At least 50 per cent of the sailors' conversation, when talking to a newcomer like myself, is about three things:

The terrible typhoon they went through off the Philippines; the times they were hit by Jap bombs; and their desire to get back to America.

The typhoon was awful. Many thought they would go the same way as the three destroyers that capsized. This ship is inclined to roll badly anyhow. Today she still has immense dents in her smokestacks where they smacked the water when she rolled that far over. A lot of experienced people were seasick during that storm.

Very few of the boys have developed any real love for the sea—the kind that will draw them back to it for a lifetime. Some of course will come back if things get tough after the war. But mostly they are temporary sailors, and the sea is not in their blood.

Carriers Belie Their Clumsy Appearance

An aircraft carrier is a noble thing. It lacks almost everything that seems to denote nobility, yet deep nobility is there.

A carrier has no poise. It has no grace. It is top-heavy and lop-sided. It has the lines of a well-fed cow.

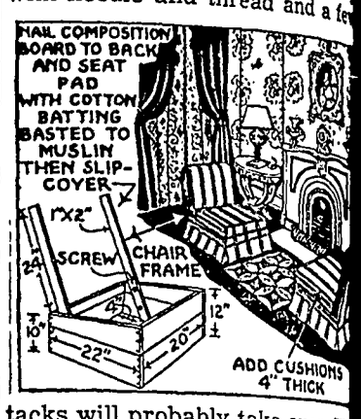
It doesn't cut through the water like a cruiser, knifing romantically along. It doesn't dance and cavort like a destroyer. It just plows. You feel it should be carrying a hod, rather than wearing a red sash.

Yet a carrier is a ferocious thing, and out of its heritage of action has grown its nobility. I believe that today every navy in the world has as its No. 1 priority, the destruction of enemy carriers. That's a precarious honor indeed, but it's a mighty proud one.

Easy to Make Your Upholstered Chair

THIS pair of chairs, so much at home in a Victorian setting, would be just as appropriate in a modern room. They are comfortable too, and anyone who can nail together a box can make the wooden frame.

With the frame finished, the lady with needle and thread and a few



tacks will probably take over. The padding is easy—just cotton batting basted to muslin over the seat and back. The cushion may have a cotton filling or may be filled with feathers or kapoc. The rest is a simple covering job.

* * *

NOTE—Pattern No. 250 gives large diagrams for all parts of the chair frame with construction steps, padding and covering clearly illustrated. A bill of materials giving lumber estimate, amount of padding and covering materials is included. To get Pattern No. 250 enclose 15 cents with name and address directly to:

American Life Insurance Celebrates Its 100th Anniversary by Adopting a New Actuarial Table Which Reflects Longer Life of Modern Citizen

By ELMO SCOTT WATSON
Released by Western Newspaper Union.

NINETEEN forty-five finds American life insurance serving its 100th anniversary d by way of celebration it's ginning to operate under a t of actuarial tables. Until this ar insurance companies have en "booking" life and death ances on the same basis as ey were figured when the first erican "life" policies were itten away back in 1845. But is year they are discarding the "odds table" and putting into fect a new one and that's a atter of prime importance to ore than 70,000,000 Americans o own more than 125 billion llars worth of life insurance.

As a matter of fact, the adoption the new actuarial tables in erican life insurance's centennial r is accidental and coincidental, her than purposely planned. Nine rs ago state insurance commisners and mathematical wizards of insurance companies recognized fact that the tremendous imovements in medical science had de the old "odds table" obsolete. the light of modern methods of longing human existence, a new of life expectancy standards was ded.

But figuring out these standards fitting them to rates—or fitrates to them—wasn't a simple tter. For instance, they knew that —if you are 30 years old—have a better chance of living beyond t age than you did two decades . It was only a few decades ago t eight out of every thousand ple died at that age. Today, nks to more public enlightenment medical matters and improveents in diet (including more wledge of vitamin requirements) two or three persons per thoud are dead at the age of 30.

Rates About the Same.

But even though the improvent in our life chances seemed to icate much reduced rates, this s offset over the years by the deoration of our interest rates and increased cost of doing business.

he problem of adjustment was efold: (1) rates according to roved life probability; (2) comy income according to lowered rn on investments; and (3) comy expenses as compared to "the d old days" when breakfast cost ckel and the company president a salary of $30 per week.

he insurance commissioners had ajor mathematical problem be them. For the latter two points wered earnings on invested ds and sharply rising costs of g business — more than covd the slight break they showed their books because the doctors e keeping us alive longer.

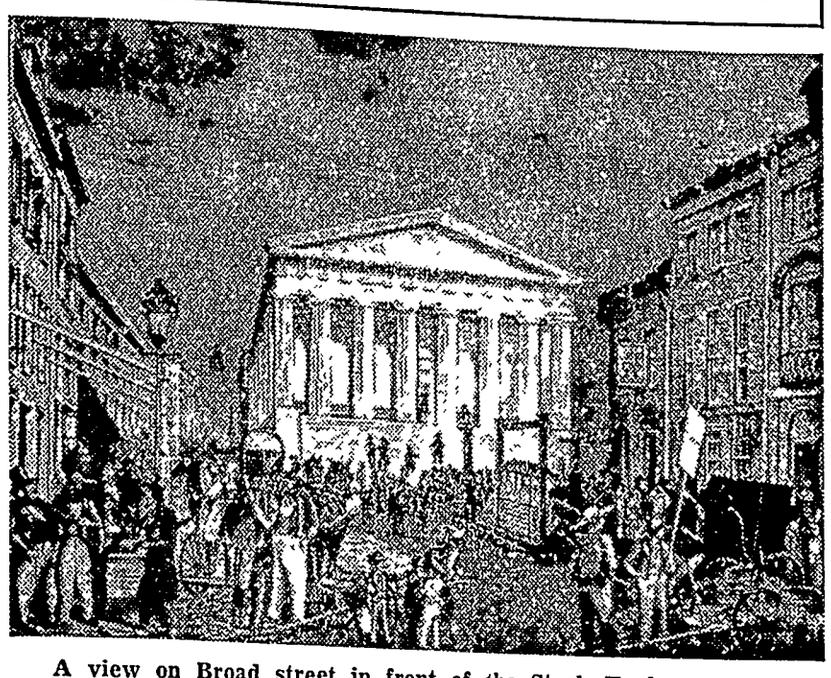
evertheless they went ahead. Al N. Guertin of New Jersey, was de chairman of a commissiongroup to recommend the new e" tables. Five other state comsioners sat with him. John S. mpson, mathematician and vice sident of the Mutual Benefit Life rance company of Newark, N.J. a committee member represent the Actuarial Society of erica.

rteen states enacted the sod "Guertin law," which means the insurance companies doing ness in those states can in 1945 t the recommendation of the rtin committee into their future cies. The law became effective ary 1 of this year on an optional but it becomes mandatory three years, in December, 1948.

How It All Began.

nturies before Messrs. Guertin associates took on their her an job, a Roman named Ulpis devised an "odds table" for a of his friends. Ulpianus was a er with a flair for figures. As a ter of fact, his life expectancy rts were so good that they reed unchallenged from 220 A. D. almost 15 centuries. Even as is 1814, the Tuscan government his figures.

t content with Lawyer Ulpianus' ngs, however, Edmund Halley, n as the English astronomer discovered the famous Halley's et, undertook the job of computmodern" mortality tables in His method was the basis for ent-day computations; namely of using accurate vital statis Halley selected the city of Bres (you've been reading about it in war-news from Silesia) for his pig from 1687-92—observing



A view on Broad street in front of the Stock Exchange and Sub-Treasury (then the Customs House) in New York City in 1845 when life insurance had its beginnings.

births and deaths for a five-year period.

His tables were the precursor for many others—such as the English tables of 1762. But all such improved tables over the last two centuries failed to keep pace with medical science.

Our first actuarial brainchild was called the American Experience table, which was brought into usage right after the Civil war. With minor changes it has continued to be the accepted base for computing life and death chances up the present time.

Meanwhile the M. D.s were busily engaged in making our American Experience figures look sick. Their success in keeping the lower age groups alive longer is directly responsible for this major effort to reframe the basic structure of all life insurance in the United States. Just by way of proving the point, in 1900 the U. S. average age was 49.24. A couple of years ago it stood at 64.82.

When it all began back in 1845, this was a husky young nation. But many of its huskiest young citizens fell victims to one disease or another, diptheria and tuberculosis being the most active.

Many Hazards.

Even as late as 1900, more than 40 out of every 100,000 people succumbed to diptheria. Today it's only one per 100,000. Europe's black plague of the early 17th century wasn't much worse a scourge than the horrors of pulmonary tuberculosis over the last century. Statistics for 1900 show that this killer took 173 out of every 100,000. Today less than 40 per 100,000 die of the disease each year.

For these reasons, coupled with all the other hazards of living a century ago, the old boys scratched their heads twice before insuring their fellow men promiscuously.

When Ben Miller bought the first life policy issued by Mutual Benefit Life Insurance in Newark in 1845, there were many "don'ts" tied to the policy. Ben bought $1,500 worth of insurance on his life at a premium of $51 a year with the provision that: (1.) He didn't die on the seas; (2.) he didn't leave the country; (3.) he didn't go south in the summertime; (4.) he didn't (without consent) join the army; (5.) he didn't cut his own throat to improve his wife's finances; (6.) he didn't expose his insured and valuable carcass by duelling; (7.) he religiously avoided the gallows or guillotine. . . . and so on for quite some distance in slightly more technical verbiage.

Ben, it might be remarked, was one of the hardier sort, for he lived to collect his own insurance at the age of 96!

While the early directors of insurance companies had no worries about clients being killed in an automobile or airplane, the 1845 citizens of Pres. James Polk's nation of 27 states were liable to find themselves without a scalp if they took the "covered-wagon" trail west.

Life insurance companies also could discount the probability of the "insured" dying from heart failure because of the then modest 15 million dollar public debt. Perhaps it is worth noting that over the years the increase in heart disease (and it has increased considerably) is in ratio to the government's debt to the people — now at the quite immodest figure of almost 300 billion, a very large hunk of which is held by the same insurance companies.

If as you read this, you've been hoping to find that now insurance rates will be lower because the doctors are keeping us alive longer, you'd better read on.

At first glance it would seem that under the new mortality table, life insurance rates will be cheaper, but that is not true. John S. Thompson, vice president and mathematician (actuary) of the Mutual Benefit Life Insurance company, speaking for all life insurance companies, tells why. He says:

"Policies now in force will not be affected, nor is it expected that policies sold in the future will be. That is because the amount of interest life insurance companies can earn on their invested funds has dropped sharply in the last few years, and their operating expenses, wages and taxes, have increased.

Fewer Investment Chances.

"The cost of life insurance depends upon three points: (1) the number of claims paid on policyholders who die in a given year; (2) the yield or earnings from investments of reserve funds; and (3) the cost of operating the company.

The war has sharply decreased the field for profitable investments, he points out. War industries are financed by the government; and the building industry, once a big field for loans, is now dormant. Thus insurance companies which formerly earned from 4 to 6 per cent on their funds, now earn only slightly more than 3 per cent. From 40 to 50 per cent of insurance company funds are invested in war bonds at an average yield of about 2½ per cent. And many companies have guaranteed a 3 per cent return to their policyholders. That is why insurance rates cannot be reduced.

It was a dead cinch to earn the good old 6 per cent back in 1845 and a lot more, too, even though Mutual Benefit's records show that Robert L. Patterson, founder and first president, and his directors, scorned the possibility of paying big dividends by "grubstaking" a few of the gold-seeking '49ers. Sound, conservative investments were made to protect widows and orphans. But, conservative as the investments were then, they paid handsomely as compared with today.

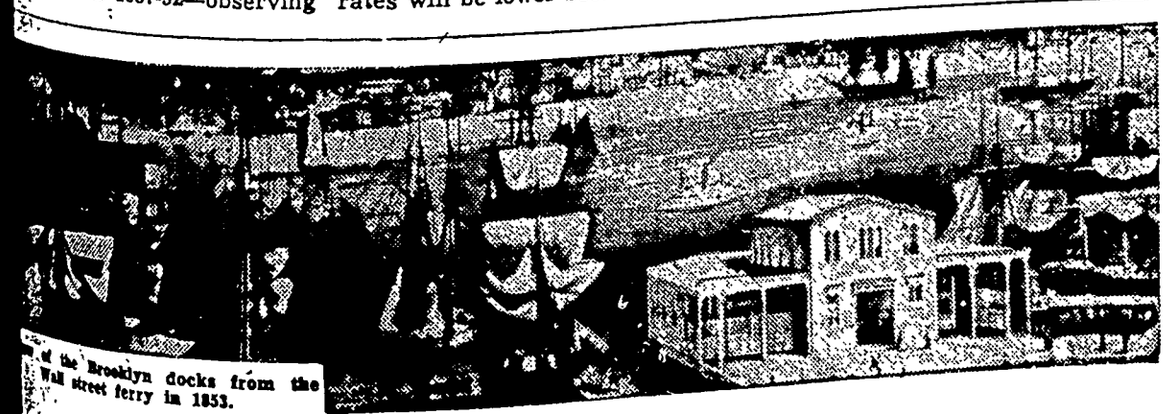
Money Earns Less Than 2%.

Shortly after the turn of the century, returns on invested money tightened up considerably. All this is readily reflected in overall returns to policyholders. Between 1914-1928 Mutual Benefit policyholders were getting about 2 1 per cent on their dollars paid in. The 1929-1943 picture was still trending downward to about 1.7 per cent per annum.

It was vastly different in 1845. In those days the company president drew $1,500 per year—just about the price of a fair cook or housekeeper on today's market. The top insurance salesman wasn't allowed to earn more than $3,000, all other earnings going back to the company till. The rent bill was $25 per month. One of the ranking "assistants" drew the good (in those days) salary of $300 per year.

Today the taxes, alone, on a building occupied by one large insurance company exceeds 10 million dollars per annum. And the charwomen on the 31st floor would laugh at an offer of $300 a year. Even the elevator boy would sneer at the same salary Robert Patterson was paid in 1845.

Now you know why insurance is going to continue to cost just about the same as it has in the past. As a group, we're living a lot longer and there is less risk in insuring us. But, as a group we cost a whale of a lot to handle and the days of fancy interest returns are over.



of the Brooklyn docks from the Wall street ferry in 1853.

IMPROVED UNIFORM INTERNATIONAL

SUNDAY SCHOOL Lesson

BY HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for April 15

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

PIONEERS OF FAITH

LESSON TEXT—Genesis 12:1, 2; Acts 7: 4-7, 12-17.

GOLDEN TEXT—By faith Abraham, when he was called, obeyed . . . and he went out, not knowing whither he went.—Hebrews 11:8

Bible history is a story of men of faith called and used of God to carry out His purpose in the world. These thrilling accounts of worthwhile lives are to be our special concern during the three months we study the history of Israel and of the Church.

I. A Call and a Covenant (Gen. 12:1, 2).

God was now ready to make known His choice of a man to be the father of His chosen people. He went down into Ur of the Chaldees in the midst of heathen worship, and called out a man who had faith in the true God.

Abram, "when he was called to go out into a place which he should after receive for an inheritance, obeyed; and he went out, not knowing whither he went" (Heb. 11:8).

The Lord called him out from his own land and kindred, to get him away from his heathen forebears and their worship. God wants separated believers in our day, too (read and ponder II Cor. 6:17, 18). That call comes to every believer. To those who are to serve Him, there is a definite call much like Abram's (see Matt. 10:37-39).

With the call came a great covenant, a seven-fold promise given in Genesis 12:2, 3. That covenant God repeatedly renewed with Abraham and his descendants. It has been partially fulfilled, and God has put Himself on record that every bit of it shall be completed. He keeps His promises.

Why did God choose Israel? It was an act of His sovereign grace, not based on their merit or goodness. He had a threefold purpose: (1) That they should be the repository for His truth (the Old Testament) in the earth; (2) that they should be the channel for the coming of the personal Redeemer to the earth; (3) that they should be a national witness to the one true God amid the nations of the earth.

They accomplished two of these, but failed in the last, and are now under God's judgment for that sin and failure.

II. Obedience and Opportunity (Acts 7:4-7).

Abram went out at God's command, even though he knew that it meant suffering and trial, being obedient without question or hesitation. Bible history reveals that God delights to do mighty things for those who give Him unquestioning obedience.

God did great things for Abraham, and yet he did not live to see the fulfillment of the promise. He knew it was to be so, realizing that God's plan was to be carried out in the children which he did not yet have (see Heb. 11:9-11)

Here is a lesson for us. Our faith today, and the measure in which we apprehend the grace of God for life and service, will bless not only us, but our children (Ps. 103:17). For their sakes we ought to seek to increase the spiritual heritage of our families. Certainly we should do nothing to blight their lives (Exod. 34:7).

One may not be able to boast of the greatness and fineness of one's ancestors, but one can be determined by the grace of God to be a good ancestor.

Observe that Abraham's obedience opened up the whole history of blessing and usefulness to the entire nation of Israel, a history not yet concluded by any means. Think what opportunity he might have destroyed by disobedience.

III. A Family and Its Faith (Acts 7:12-17).

Stephen, a portion of whose address of defense before the council is here before us, reviews the history of God's dealings with Israel. Tracing the line down through Abraham, Isaac, Jacob and Joseph, he recalls how God provided a haven of plenty for them in Egypt until they were ready to be brought up into the possession of their inheritance—the land of Palestine.

Lack of space forbids the review of the lives of these pioneers of faith. The study would be most illuminating, for it repeatedly throws into sharp contrast the awful failures of these men when they forgot God, and the mighty victories they gained when they believed Him.

In spite of their failures they were essentially men of faith, for God has counted them worthy of a place in that remarkable list of heroes of faith found in Hebrews 11 (see vv. 17-22).

The days in which we live are not pioneer days in the usual sense, but they are days when God is calling for new pioneers of faith to serve Him in a befuddled and bruised world. There are stirring days ahead for the Church of Christ if we as Christians will, like Abraham, hear the call of God and go out in loving obedience to Him.

SEWING CIRCLE PATTERNS

Start Day Right in This Frock Matching Dress and Hat for Tot

Pretty House Frock

YOU'll look pretty and very efficient in this smoothly fitting house frock with scalloped front closing. Use gay floral prints, pink and white or blue and white checked ginghams, or crisp polka dots. Trim with bright jumbo ric rac.

* * *

Pattern No. 8763 is designed for sizes 36, 38, 40, 42, 44, 46, 48, 50 and 52. Size 38 requires 4¼ yards of 35 or 39-inch material; 3 yards ric rac for trimming.

Dress and Hat for Tot

AN ADORABLE warm weather ensemble for a sweet young miss. She'll be sure to like the swinging skirt and the bodice lacing on the dress. The little hat is easy to make—it opens out flat to launder.

* * *

Pattern No. 8766 is designed for sizes 2, 3, 4, 5 and 6 years. Size 3 dress requires 1½ yards of 35 or 39-inch material; panties, ¾ yard; bonnet, including self lining, ⅜ yard.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Who Won the War?

The arrogance that has always permeated the German army was typically expressed in the fall of 1918, says Collier's. Before the armistice, its general staff had already started the lie that it had not been defeated by the Allies, but by the German people at home.

The troops that later returned to Berlin marched through the Brandenburg victory gate and down the Siegesallee, or Avenue of Victory, as though they had conquered the world.

HINTS FOR HOME BAKERS

Easy Raised Muffins a Welcome Change

Make them with Fleischmann's yellow-label Yeast—the only fresh yeast with more EXTRA vitamins.

RAISED CORN MUFFINS

1¾ cups corn meal
1½ cups milk, scalded
2 teaspoons salt
3 tablespoons brown sugar
4 tablespoons melted butter or margarine
1 cake Fleischmann's Yeast
½ cup lukewarm water
2 eggs, well beaten
3 cups sifted flour

Stir the corn meal very slowly into the scalded milk. Mix in salt, brown sugar and melted butter or margarine. Cool to lukewarm. Dissolve Fleischmann's Yeast in lukewarm water and add to lukewarm corn-meal mixture. Add eggs and flour; beat well. Fill well-greased muffin pans half full. Cover and let rise in warm place, free from draft, until light, about 1 hour. Bake in moderate oven at 375°F. about 30 minutes. Makes 20.

New-Revised Wartime Edition of Fleischmann's Famous Recipe Book!

Clip and paste on a penny post card for your free copy of Fleischmann's newly revised "The Bread Basket." Dozens of easy recipes for breads, rolls, desserts. Address Standard Brands Incorporated, Grand Central Annex, Box 477, New York 17, N. Y.

Local Happenings

Klemme and Vicinity

G. B. Kirchner, proprietor of the Avery theatre, was a business caller in Klemme Saturday morning.

Mr. and Mrs. John Day were Sunday dinner guests at the Kubicek home in Mason City.

Mr. and Mrs. Harry Kahler were Mason City visitors Thursday afternoon.

Mr. and Mrs. Howard Spitler were Garner visitors Friday afternoon.

Mrs. Norman Lau is now employed as bookkeeper at Swanson's Hatchery.

Mr. and Mrs. Lloyd Sherwood and childres, and Peggy Coobs visited in Mason City Sunday.

Save your waste paper for the Boy Scouts who will gather it again April 16th.

Mr. and Mrs. Arthur Knoke and Arthur, Jr., were dinner guests Sunday at the Emil Beier home.

Mrs. Quentin Stille visited at the Fred Meckstroth home in Garner Sunday.

Mrs. Vivian Mace and children were visiting in Fort Dodge Saturday.

Mr. and Mrs. Ned Howard were at Garner on business Friday afternoon.

Wayne Klinge returned to camp at Fort Meade, Md., last Wednesday after enjoying a 15 day furlough at home.

The Lewis Radio Shop has gone in for spring housecleaning by refinishing the floors in the store and doing some painting.

Miss Mildred Busse of Mason City spent the week end visiting with her parents, Mr. and Mrs. Henry Busse.

Miss Marie Blank's beauty shop was re-decorated the past week. Miss Blank had the shop closed all week.

Miss Gladys Schlichting of Mason City spent the week end here visiting with her parents, Mr. and Mrs. Fred Schlichting.

Mrs. Naska Bock is visiting at the home of her son-in-law and daughter, Mr. and Mrs. Lyle Burr and family at Mitchellville.

Miss Thelma Chambers, teacher in the Britt high school, spent the wek end in Minneapolis, taking in the annual Ice Follies show

Mr. and Mrs. George Schoenwetter visited Sunday afternoon at the Emil Patet home. Mrs. Patet served home-made ice cream and cake.

Mr. and Mrs. Lester Stille and Lois drove to Des Moines Saturday and their daughter and sister, Ruth returned home with them to spend the week end.

Pvt. Junior Roths of Camp Robinson, Arkansas, came home last week to spend a furlough visiting with his parents, Mr. and Mrs. Tom Roths.

Mrs. Norma Smith and daughter Mary, of Sheffield, spent the week end in Klemme visiting with Mrs. Peter Merkel and other relatives in this community.

Mrs. Marvin Lakin, of Mason City, spent a few days the past week visiting at the Henry Jost home. The Lakins are moving to San Francisco, California soon.

Mrs. Otto Schlawin and Grandma Schlawin of Garner were callers at the W. F. Pavey home Monday to see Mrs. Pavey, who is recovering from a major operation.

Seaman Keith Stille arrived last week from sea duty to spend a furlough visiting Klemme relatives. He will report back for duty on the west coast April 21st.

Hancock County officials are to be praised for the fine job of snow removal they did last week. The writer had to drive to Mason City Thursday, and in some places the paved road was nearly impassible, and many places there would be a half mile stretch of one-way traffic. The roads in Hancock county were all cleared.

Rev. and Mrs. Calvin Grosshuesch, and Mr. and Mrs. Menno Albers were visitors at the Howard Baack home Sunday evening.

Mr. and Mrs. Fred Pringnitz entertained to dinner Sunday Mr. and Mrs. George Albers and children of Clear Lake; Mr. and Mrs. Lubbe Albers and Phyllis of Garner; and Mr. and Mrs. Menno Albers.

The office at the Klemme Cooperative Grain Company has been enlarged and remodeled. The improvement will give the company a nice, comfortable office with a lot of extra needed room.

Sunday dinner guests at the Sumner Trumbell home were Mr. and Mrs. Clair West and children, Rosemary, Peter and Julie Ann of Des Moines; and Mr. and Mrs. Wally Smith of Mason City.

Mrs. Edna Thada, accompanied by Mrs. O. C. Evenson of Goodell, were in Cedar Rapids last week buying merchandise for their stores. They returned home Wednesday.

Mr. and Mrs. Ole Thompson of Grinnell arrived Saturday by ambulance and are now nicely settled in Mrs. Fred Nagel's home. Mr. Thompson has been ill and will remain here for care.

The Klemme American Legion Auxiliary Unit has been invited to attend the Pan American program at Garner April 14th. Those wishing to go meet at Thada's store not later than 1:30 p m.

Mr. and Mrs LeRoy Johnson entertained to dinner Sunday the following: Mrs. Gretchen Schlawin, Mr. and Mrs. Carl Wille; Miss Esther Alverson and Elizabeth Goll. Goll.

Mrs. Kenneth Johnson, Dean and Donald of Goodell; Mrs. Fred Etchen of Klemme; and the former's mother, Mrs Hull of Garner, went to Waterloo Saturday for a weekend visit at the Leo Schleusner home.

S. B. Durant, farmer in the north part of the county, and former Representative in the Iowa legislature, is retiring from his farm and is holding a closing out sale. Maybe "Benny" will have time to come down and see us once in awhile.

Mrs. Art Wellemeyer, Mrs. W. H. Greiman and Mrs. Albert Kehl left Saturday for Dayton, Ohio, to visit with Capt. Victor Greiman and family, and Mr. and Mrs. Dick Moehler. The ladies had expected to leave on Wednesday, but the big snow storm prevented them from leaving then.

The big snow last week tied up all traffic and Wednesday there was no mail either in or out of Klemme. The only mail Postmaster Day and "Tiny" Kluckhohn had that day was The Klemme Times.

R. A. Jorgenson was at Mason City Thursday having X-Rays taken by a specialist.

Mr. and Mrs. Lester Stille entertained to dinner Sunday in honor of Seaman Keith Stille, who is home on a furlough his mother, Mrs. Blanche Fredrick, Miss Ruth Stille of Des Moines; Mr. and Mrs. Lee Anderson and daughter Linda, of Charles City; Mrs. C. A. Arnold and Miss Minnie Lenz.

Mr. and Mrs. Arthur Conners returned home Friday evening from Fort Smith, Arkansas, where they spent a week visiting with Pfc. and Mrs. Harmen Trampel and son Larry. Pfc. Trampel is stationed at Camp Chaffee near Fort Smith. The Conners also enjoyed a number of side trips out of Fort Smith, including Hot Springs and other places of interest. They also visited Bob Burns' home at Van Buren.

Worship Hour at 11:15 a. m.

Car Repair Boom

Considerable excitement was caused in Rock Rapids one day recently when a large truck owned by a Sioux City Produce Company skidded down a slippery Main street and caromed into five passenger cars, damaging all of them and toppling street electroliers along the way. One person was slightly injured but the truck sustained only slight damage.

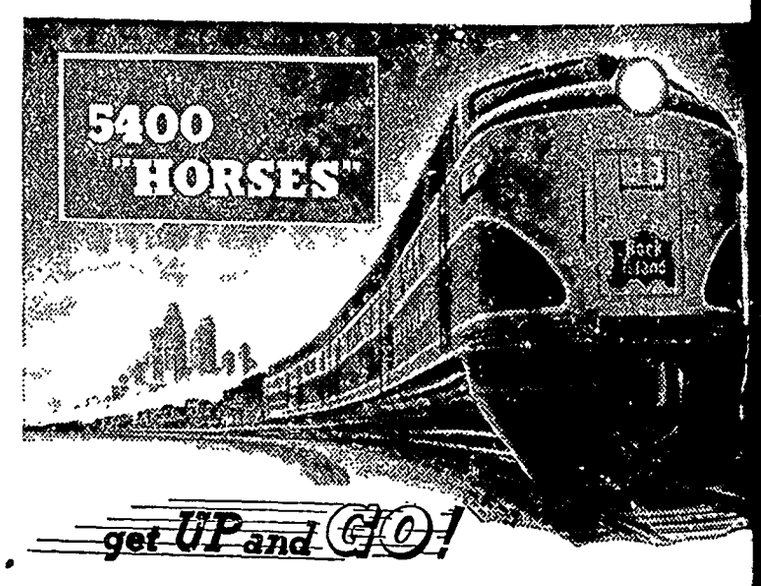
ONE EGG EACH DAY

GARNER CHAPTER AMERICAN RED CROSS



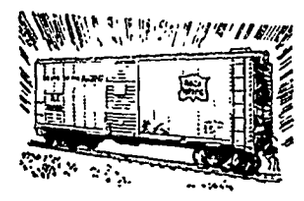
The 5,400-horsepower Diesel freight locomotives of the ROCK ISLAND LINES pull 125 loaded freight cars—approximately 6,400 tons—at a speed of 70 miles per hour!

This is but one example of what ROCK ISLAND, one of America's railroads, is doing to establish outstanding performance records in the handling of war traffic . . . records never dreamed of, let alone approached, in the past.

We are proud that the progress we planned yesterday made us ready for today's big job . . . ready to perform a vital service in this war emergency. The Program of Planned Progress of the ROCK ISLAND LINES has been, and is, a continuing effort. It has held the railroad in a position of leadership and promises even greater development in future years.

As yesterday—and today—so tomorrow, ROCK ISLAND'S sole purpose is to provide the finest in transportation.

WORLD'S FIRST ALUMINUM BOX CARS!



Aluminum box cars are now in service on the ROCK ISLAND LINES. They are made of the same specialhigh-tensile aluminum alloy used in B-29 Bombers! "Dead weight" is reduced as much as 4½ tons per car. A train of 125 aluminum cars would reduce the weight of the train 562½ tons, with no reduction in the load carried. Another step in better railroading!

Our Men In The Service

Pvt. John Schwichtenberg Completes Course In Army

Amarillo Army Air Field, Amarillo, Texas.—Pvt. John Schwichtenberg, son of Mr. and Mrs. David Schwichtenberg of near Klemme, has completed his course of studies as an aviation mechanic in this Army Air Forces Technical Training School.

His graduation from this technical school now fits him for airplane maintenance. He will be sent to an air base where he will assist in keeping America's B-24 bombers and B-29 Super-Fortresses in the air for Allied victory.

In addition to completion of the schedule of academic and practical studies as an aviation mechanic, he has been thoroughly drilled in military tactics and defense and a course of physical training that has conditioned him to meet all requirements of an American soldier.

Royal Air Force Flyers Visited In Klemme Home Friday Eve

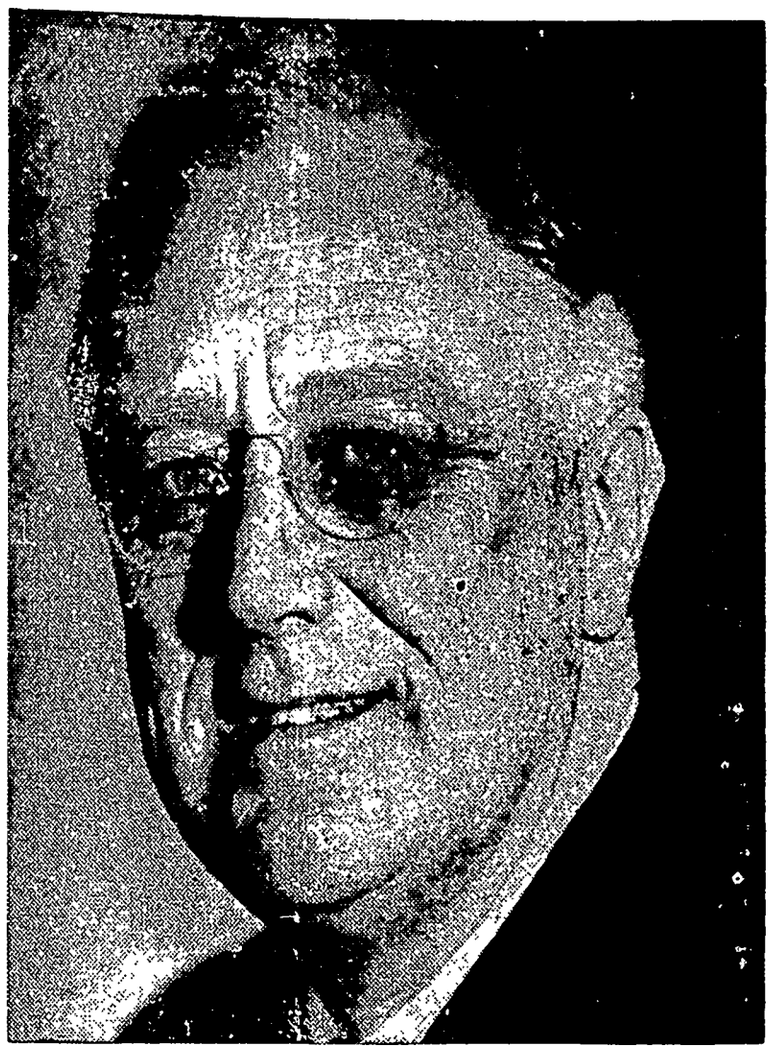
Sgt. Alan King and Sgt. John Neale of Birmingham, England, visited for a couple of hours Friday evening at the C. G. Waterman home.

The young men, who were pilots on a bomber, were enroute from Kansas City to Winnipeg, Canada to assemble new crews to join the R. A. F. in Burma.

Both flyers had seen considerable combat flying over Germany. Both boys were about 22 years old and had been in the army for five years. They had taken quite an extensive tour through the United States and liked our country but were anxious to get "the job done" and return to England.

"I have a dog that growls, a parrot that swears, a fireplace that smokes and a cat that stays out all night. Why should I want a husband?" the old maid says.

Entire Nation Mourns Death Of Franklin D. Roosevelt; Vast Tasks Face Truman



FRANKLIN DELANO ROOSEVELT
JANUARY 30, 1882—APRIL 12, 1945.

AS THE guns of America's fighting forces sounded ever closer the doom of Nazi Germany and Imperial Japan, Franklin Delano Roosevelt died in Warm Springs, Georgia, where he had been resting for 10 days.

Death resulted from a cerebral hemorrhage at 4:35 p. m. on April 12. Mr. Roosevelt was 63. He had been President for 12 years, one month and nine days. The White House was announced as the site of the funeral, with interment at the family estate at Hyde Park, N. Y.

Less than four months had elapsed since he had taken his historic oath of office for a fourth term. Only a few weeks before he had returned from the Yalta conference where in company with Marshal Stalin of Russia and Prime Minister Churchill of Great Britain he had labored to built an enduring peace.

Fate denied Franklin Roosevelt the chance to enjoy the fruits of victory over the Axis. Yet history seemed destined to enshrine him as one of the immortal American Presidents. And every citizen who mourned the untimely passing of the Commander-in-Chief felt that he was a casualty of the war just as every G.I., Marine and Sailor who had fallen in battle.

PRECEDENTS OUT:

Throughout his career as President, Franklin D. Roosevelt was known as the "precedent breaker." That title was first conferred in 1932 when he flew out to Chicago from Albany, N. Y., to address the Democratic convention that had nominated him. It continued after his election as a result of his informal methods of transacting business. But it reached a climax in his decision to seek a third term in 1940 and a fourth term in 1944.

KLEMME GIRL GRADUATES WITH HIGHEST HONORS

Ardella Nelson Graduated April 15 From Hamilton's School

Ardella Nelson, daughter of Mr. and Mrs. Verner Nelson, Klemme, was among the 73 members of the class of 1945 which was graduated by the Hamilton School of Commerce, Mason City, Sunday, April 15

Miss Nelson placed on the Super-Honor Roll being the 5th highest in the entire class. She earned special honors in the fields of typing, shorthand, dictaphone, filing, and English. Miss Nelson, who is a graduate of the Junior Secretarial Course, has been employed by the Central Auto Electric Company, Mason City.

The graduation exercises were held at the First Christian Church at Adams Avenue and Fourth St., Northwest. Miss Jessie M. Parker, State Superintendent of Public Instruction, Des Moines, was the speaker. The graduation reception and tea for graduates and their families and friends was held in the church parlors immediately after the graduation ceremony. The annual graduation formal was held in the Wedgewood Room, Hotel Hanford, Monday evening, April 16.

SEWING MACHINE CLINIC IN KLEMME APRIL 28TH

A sewing machine clinic for Klemme and vicinity will be held at the school house on Saturday, April 28th beginning at 1:30 o'clock.

All women who own sewing machines are invited to attend and learn how to clean, oil and care for a sewing machine.

A similar meeting will be held at Goodell at Mrs .A. G. Mullin's home on April 19th, beginning at 1:30 p m.

Miss Hazel Grimes, County Extension Home Economist will be in charge and asks the ladies to bring their own machines if they desire to work on them. The machine can easily be carried in the car trunk.

Bring your own instruction book, oil can, screw driver and a small cardboard box for holding any parts to be removed, and a small can for kerosene.

Also bring a sample of your own machine stitching, and some soft, lintless cloth for cleaning.

It pays to keep your machine in perfect condition. This clinic will teach you how. All women are invited to come whether or not they bring their machine.

United Service Women Held Meeting Wednesday P. M.

The United Service Women met in the rooms at the rear of the Post Office Wednesday afternoon and worked on sewing for a bazaar which they have planned.

Mrs. August Josten and Mrs. H. F. Jost served lunch after the meeting.

Next Term Of District Court Will Begin Monday, May 15

HARRY S. TRUMAN
33rd PRESIDENT OF U. S.

The new President faces the immediate task of directing American participation in the United Nations' blueprints for a permanent world organization. He likewise faces the responsibility of establishing working relations with other members of the Big Three, so that the personal cooperation which existed between Franklin D. Roosevelt, Josef Stalin and Winston Churchill in leading the Allies toward victory may be maintained in helping win the peace. He faces the long-range job of guiding the nation to postwar economic prosperity once Nazi Germany and Japan are finally defeated.

Known as a plain, modest man who has not dramatized himself personally, President Truman nevertheless has demonstrated on many occasions that he can be a leader of force and determination. His work as chairman of the Truman committee in the U. S. senate investigating the conduct of the war is cited as an example of this. And his conduct of the Vice Presidency has shown that he can work successfully with political leaders of both parties in getting needed measures passed and in reconciling opposing points of view.

The 33rd President was born in Lamar, Mo., May 8, 1884, although the home of the family for four generations had been on a farm near Independence, Mo.

Served in World War I.

When World War I broke out, Truman became captain of Battery D in the field artillery of the 35th Division and saw action at St. Mihiel and in the Meuse-Argonne offensive.

Back in Independence, Truman and a war buddy opened a haberdashery business. He married his boyhood sweetheart, Bess Wallace, and they have one daughter, Mary Margaret.

Truman later turned to politics for a career, which started with his election as County Judge of Jackson county, Mo. In 1926 he became the presiding judge of Jackson county, with the endorsement of Tom Pendergast, political boss of Kansas City. He studied law at night and supervised the construction of a great highway system.

Never before had an American President died in wartime. Abraham Lincoln fell under Assassin Booth's bullet just five days after the surrender of General Lee's army at Appomattox in 1865. Woodrow Wilson lived to see victory over Germany in World War I, but he fought a losing battle for the League of Nations and died early in 1924, a defeated leader. Many historians believe Lincoln's greatness might have been dimmed in the conflicts over reconstruction that followed the War Between the States, just as Wilson's prestige was lost in the conflict over the league that followed World War I. Thus Franklin Roosevelt, dying at the height of his career just as victory was to be achieved over Germany, seemed likely to live in history as a great man.

As the American people from Main Street to Riverside Drive mourned the death of Franklin Roosevelt, their prayers went up for his successor, Harry S. Truman. For on the shoulders of this slight, gray, 60-year-old Missourian had been laid a responsibility such as no American President had ever borne.

What the consequences of the President's death would be to the United States and the world, time alone would tell. But as Americans recovered from their first shock at the news, they quickly determined two things. The war must be prosecuted to as speedy and victorious a finish as possible. Lasting peace must be established.

And so, regardless of party or of past political differences, the people have rallied behind Mr. Truman.

PETIT JURORS TO REPORT FOR DUTY MAY 15 COURT

The following Petit Jurors are to report for duty on May 15, 1945 at 10:00 o'clock a. m. for the May Term. Honorable T. A. Beardmore is the Presiding Judge.

CLOSING DATE FOR 1945 CORN PURCHASE PROGRAM

Inasmuch as the Commodity Credit Corporation's offer to purchase 1944 corn has been in effect approximately six weeks, it has been determined to terminate the program and withdraw the Corporation's offer to purchase on May 1, 1945.

As of April 14th, 75,995 bushels of corn have been contracted. The Hancock county purchase goal is 180,000 bushels.

The maximum moisture requirements has been reduced to 17½ percent on April 1st, for a seven foot crib, to conform with regulations with respect to moisture for both the loan and purchase program.

If you have extra corn on your farm, contract it. Let's try and meet Hancock County's goal if we possibly can on this corn purchase program which is essential to the war effort.

—Hancock County AAA.

BEIER TRIPLETS WERE THREE YEARS OLD FRIDAY

Friday the 13th was not an unlucky day at the home of Mr. and Mrs. Elmer Beier of Liberty township for that was the third birthday anniversary of their triplets: Janice, Joan and James.

In honor of the event Mr. and Mrs. Beier entertained the following to dinner on Sunday: Orville Bridges and family; Mrs. Walter Drake and children; Glen Bridges and family; Grandma Bridges; Wilbur Haefner and family; and Mr. and Mrs. Wm. H. Lemke and son Laurice.

The triplets received many nice birthday gifts.

The Beier triplets have the honor of being the first triplets born in Hancock county, and the few to be born in the state of Iowa.

FORTY RURAL COUPLES ENJOYED DANCE AT KLEMME

Forty couples of the Rural Young Married Group enjoyed an evening of dancing at the Klemme Hall last Tuesday evening, April 10th. The next meeting will probably be a picnic at Eagle Lake in June.

WEEKLY NEWS ANALYSIS

Allies in "Big Heave" Seal Off Ruhr Valley Production Center; Clay to Rule Occupied Reich

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

German dead litter road as British Tommies drive toward Berlin in rout of enemy forces on 21st army front.

EUROPE:
Last Great Arsenal

The last great source of Germany's supply of war materiel had been sealed off as tanks of Lieutenant General Hodges' U. S. 1st army swept before them all resistance in their spectacular dash towards Berlin. The British 2nd army, pounding across the north German plain, had steadily drawn closer and closer to the 1st army. Ruhr valley war production centers had been effectively sealed off.

Typical of the magnitude of the American forces was the one-day bag of 14,000 Nazi prisoners taken by General Patton's 3rd army in its sensational drive eastward.

City after city had fallen into Allied hands under Eisenhower's steam roller. Among the rich prizes were Frankfurt - on - the - Main (546,000), ranking ninth in the German Reich, Mannheim (283,000) which fell to Lieutenant General Patch's 7th army, and Essen which led all Europe in the production of munitions.

Clearly the final doom of Nazi power was sounding. Prime Minister Churchill of Great Britain declared he believed the "hour of success" was at hand. Still some military authorities pointed out that a final Nazi stand might be made in mountainous southern Germany buttressed by defenses in northern Italy and the industrial resources of Czechoslovakia.

Spring rains and fog had kept the Italian front quiet, but observers had expected Gen. Mark Clark's armies to begin massive smashes northward.

Relentless Reds

In the East, Russian armies had kept up their relentless pressure on Berlin and elsewhere with armored divisions sweeping over the Austrian border from western Hungary and closing ever closer on Vienna.

Marshall Rokossovsky's 2nd White Russian army battered deeper into Danzig.

Once unconditional surrender was achieved, civil affairs in Germany would be under direction of Maj. Gen. Lucius D. Clay, who had had charge of materiel procurement for the army service forces when War Mobilization Director Byrnes borrowed him last December as his deputy in charge of the war program. The appointment, the White House said, was made by Gen. George Marshall, army chief of staff. Clay was appointed deputy to General Eisenhower.

PACIFIC:
Worst to Come

Already feeling the sting of heavy U. S. aerial bombardment, Japanese found no comfort in Gen. H. H. ("Hap") Arnold's announcement that America would bring the full weight of its tremendous air power to bear upon the Nipponese once the war in Europe ended.

As Arnold spoke, the strategic Ryukyu islands stretching between the Jap homeland and Formosa became the latest target for American assaults, with carrier planes teaming with warships in blasting the 500-mile-long chain preparatory to ground attack.

In declaring that the U. S. planned to use every plane against the Japanese after Germany's fall to hasten their defeat, General Arnold said that not only would American air power smash the enemy's industry, but it would also shatter his communication lines to bring about his collapse.

DEMOBILIZATION:
Small Scale

Though some combat troops in the European theater of war will be demobilized after Germany's fall, all service, air force and naval personnel will be retained to continue the fight against the Japanese, officials indicated.

Demobilization of some combat troops will result from inability to make full use of them in the Pacific for geographic reasons, it was said, but the exact extent of release will depend upon conditions in Europe. All members of the service branches will be needed for the construction of staging areas and bases in the Pacific, and the air force intends to bring its full weight to bear against the Japanese.

Because all approaches to the Pacific theater of war are over water, and because ships will have to bear the bulk of supplies, all naval personnel will be required to bring about the Japanese's fall as quickly as possible, Fleet Admiral King declared.

MANPOWER:
Buck Controls

Though the President made a strong appeal for passage of the compromise manpower control bill, under which plants would be limited in the number of persons they could employ and workers and farmers alike would be frozen to present jobs, the measure encountered rough going in the senate.

Despite the fact that the legislation fell short of military leaders' demands for a labor draft, the President said, its terms assured continued high production for the knockout blow against Germany, and provided for keeping workers on the job after the Nazis' fall.

Senators pointed up the great wartime production record of the U. S. in opposing legislation tightening control over both employers and employees, and O'Mahoney (Wyo.) hit arguments that passage of the bill would convince G.I.s that the home front was behind them. Rather, he said, defeat of the measure would assure them of retention at home of the freedoms for which they are fighting.

TARIFF:
Fight Renewed

Calling for authority to slash tariffs 50 per cent under January, 1945, levels in an extension of the reciprocal trade agreements act for three years, President Roosevelt touched off a renewal of the historic tariff fight in congress.

While the President said that further tariff cuts would offer other countries the opportunity to obtain funds for purchases here, the Republicans argued that a flow of cheap goods into this country would threaten American producers. And while the President declared that increased imports would add to employment in the processing and distributing businesses here, the Republicans predicted the program would defeat the announced goal of 60,000,000 postwar jobs.

Passage of the President's proposals would allow as much as a 75 per cent tariff reduction under the Smoot-Hawley rates of 1930 on some items, it was pointed out. Under the original reciprocal trade act of 1934, reductions of 50 per cent were permitted, and since these cuts already have been made on some items, another 50 per cent decrease would amount to 75 per cent in all.

RATIONING:
Smaller Supplies

Already warned of a 12 per cent reduction in meat for the next three months, civilians took the first big hitch in their belts for the current quarter with the announcement of an increase in the point values of pork, sausages and canned meat products.

While news of the tightening of these and other controls over fats and oils occupied the home front, it was announced that all babies' leather shoes would be rationed after April.

In raising the point values on pork, sausages and canned meat products, OPA said that there would be 5 per cent less meat available during April, but the decrease in supplies would hit civilians harder in May and June. Coincident with the new controls over the aforementioned meats, it was announced that point values also would be boosted on lard, along with shortening, margarine, and salad and cooking oils.

Hit Shortages

Discussing the meat shortage, the national livestock committee of the American Farm bureau charged that low price ceilings retarded increased production of beef, and said assurances of minimum returns would lead to greater pork output.

The committee's report came even as congress conducted hearings on the tight meat situation, with representatives of all branches of the industry calling for an upward revision in ceiling prices.

In establishing ceilings on grade AA and A beef, the committee said, OPA assumed that the last 200 or 300 pounds a steer gained in the feedlot was mostly fat later wasted in the kitchen. On the other hand, the committee declared, fat of a steer is distributed through its meat. Speaking of pork, the committee stated that farmers cut hog production at the government's request, and would raise it again if guarantees were forwarded against market breaks.

ARGENTINA:
On Band-Wagon

With Germany's collapse imminent, Argentina was quick to jump on the Allied bandwagon with a declaration of war against the Axis, but in so doing, she carefully pointed out that her policy was governed by the desire to cooperate with other inter-American countries and participate in the United Nations' peace parley in San Francisco.

By taking this action, Argentina ended six years of hemispheric isolation, during which time the country professed a willingness to cooperate in inter-American affairs, but maintained an independent course in foreign relations.

Rising in Britain's house of commons, Laborite Ivor Thomas asked Foreign Secretary Anthony Eden: "Would it be the duty of a British soldier who seeks Hitler to shoot him or try to bring him back alive?"

Replied Eden: "I am content to leave that to the judgment of any British soldier."

Final determination to play a full and important part befitting her position in inter-American affairs led to the decision to declare hostilities against the Axis, with ardent nationalists and some army leaders, however, resisting the move to the last.

LABOR-MANAGEMENT:
Postwar Charter

Recognizing management's control over its own business and labor's right to organize and bargain, Presidents Eric Johnston of the U. S. Chamber of Commerce, William Green of the AFL, and Philip Murray of the CIO signed an agreement looking toward good relations between employer and employee in the postwar world when lower production might lead to unrest.

In effect, the agreement proposes the establishment of voluntary machinery for the peaceful settlement of disputes and continuance of production in the postwar period, to take the place of present wartime government controls regulating relations. Toward this end, creation of a special arbitration board appeared likely.

William Green (left), Eric Johnston (center) and Philip Murray confer on labor-management charter.

In reaching the agreement, the parties tended to relieve management's fear that an oversupply of workers might be led into a violent left-wing movement after the war, and labor's apprehension that companies might deliberately hire surplus help to break unions.

LAND REFORM

Significant changes are taking place in land tenure of eastern Europe, according to the Alexander Hamilton institute. In Poland, Romania and Hungary, the big estates are being broken up and the land divided among the peasantry. This development is likely to lead to lower production and declines in exports.

Reduction in outputs is partly due to the fact that cultivation on small plots is not as economical as on large estates.

Italian Prisoners Save U. S. Manpower

'Million Man-Days'

Italian service units in the U. S., helping to relieve the manpower shortage by contributing one million man-days per month of essential skilled and unskilled labor at military installations, total approximately 35,000 men, the war department reported.

The members of the Italian Service Units wear Class B army clothing from which all army buttons and insignia have been removed and on which have been sewn distinctive sleeve and hat patches bearing the word "Italy." They are paid $24 monthly, which approximates the 80 cents per work day paid ordinary prisoners of war engaged in labor. The government receives the regular wage scale for their work.

Ernie Pyle With the Navy:

Pilots Coached Before Attacks on Tokyo Area

Japs Jabber at Sight of Yanks; Rescue Airman Off Enemy Shore

By Ernie Pyle

IN THE WESTERN PACIFIC.—We were up an hour and a half before daylight, for our planes had to be in the air at the first hint of dawn.

The first patrol was always launched by catapult, because in the wind-swept semi-darkness, it was too dangerous for them to make the run down the rolling deck.

After seeing the flights launched the first few days, it became old stuff, and I would have stayed in bed and ignored it, but that was impossible. The catapult's huge launching machinery was directly above my cabin, and every time it shot a plane off it was just as though the Washington monument had fallen on the ship. Rip Van Winkle himself couldn't have slept through it. So I just got up.

Ernie Pyle

* * *

The fighter pilots were given their last briefing. In the "ready room" the squadron commander and intelligence officer showed them on maps and by drawings on the blackboard, just where they would strike.

The squadron commander asked how many of the pilots had no wrist watches. Six held up their hands. The funny part was that the ship had no extra wrist watches, so I don't know why he asked the question in the first place.

Then he told what our approximate total of planes over Japan would be, and how many it was probable the Japs would put up against us. And then he said:

"So you see, each one of us will only have to take care of three Jap planes!"

The pilots all laughed and looked at each other sheepishly. (Days later, when the final scores were in, we found our force had destroyed Japs at nine-to-one.)

And at the end of his briefing, the squadron commander gave strict orders for the pilots not to shoot at Japs coming down in parachutes.

"They're supposed to do it to us," he said, "but it isn't the thing for us to do."

* * *

The bomber pilots and their enlisted gunners and radiomen were briefed the same way. After the intelligence officer had finished, the squadron commander said:

"We're going to dive low on the target before releasing our bombs. Since we're risking our necks anyhow, there's no point in going at all unless we can do some damage, so go down low."

* * *

All through the various strikes on Japan, our task force kept enough planes back to fly a constant blanket of protection in the sky above us.

I remember the funny sign chalked on the blackboard of the "ready room" first day, urging our patrol pilots to extra vigilance for Jap planes that might sneak out from the mainland to attack us. The sign said:

"Keep alert—remember your poor scared pals on the ship!"

* * *

Foe Surprised By Strike

We didn't know whether our first planes over the mainland would surprise the Japs or not. It didn't seem possible, yet there were no indications that they knew.

For two days on our approach we had been knocking off Jap reconnaissance planes and picket boats. We hoped we had got these scattered planes and boats before they had time to radio back home the news of our presence. One of our destroyers had even sat all day on top of a Jap submarine to keep him from coming to the top and sending a warning.

But still we didn't know for sure, so there was tenseness that first morning. We knew almost exactly what time our first planes would be over the Tokyo area.

We went to the radio room to listen. The usual Japanese programs were on the air. We watched the clock. Suddenly—at just the right time—the Jap stations all went off the air.

There was silence for a few minutes. And then the most Donald Duck-like screaming and jabbering you ever heard. The announcer was so excited you had to laugh.

We knew our boys were there. After that, for us on the ship, it was just a matter of waiting, and hoping. And as the blackboard sign said, of being poor scared pals.

Finally all but six of our planes were back from their strike on Tokyo and safely landed.

The six formed a separate flight, and we couldn't believe that all of them had been lost, and for that reason our officers didn't feel too concerned.

And then came a radio message from the flight leader. It said that one of the six was down in the ocean, and that the other five were hanging around to try to direct some surface vessel to his rescue. That's all we knew for hours. When we finally got the story, this was it:

Ens. Robert Buchanan of Clementon, N. J., was hit by flak as they were diving on their target some 20 miles west of Tokyo. Buchanan himself was not hurt.

He kept his plane up till he got over water, but it was still very much Japanese water. In fact, it was in Tokyo's outer bay—the bigger one of the two bays you see on the map leading in to Tokyo.

Ensign Buchanan is an ace, with five Jap planes to his credit. He ditched his plane successfully, and got out in his rubber boat. He was only eight miles from shore, and five miles from the big island that stands at the bay entrance.

Then the flight leader took charge. He is Lieut. John Fecke of Duxberry, Mass. He is also an ace, and an old hand at the game. He has downed seven Jap planes.

Fecke took the remaining four of the flight, and started out looking for an American rescue ship. They found one about 30 miles off the bay entrance.

They talked to him on the radio, told him the circumstances, and he sent back word he was willing to try. But he asked them to stick with him and give air support.

So Lieutenant Fecke ordered the other four to stay and circle above the ship, while he went back to pick up Buchanan's location and guard him.

But when he got there, he couldn't find Buchanan. He flew for 25 minutes around Tokyo bay and was about to despair, when he began getting sun flashes in his eyes.

He flew over about three miles and there was Buchanan. He had used his signal mirror, just like it says in the book.

Snatched From Lion's Mouth

In the meantime, the ship's progress was slow. It took almost two hours to get there. And one by one the aerial escort began getting trouble, and one by one Fecke ordered them home to our ship, which was getting farther away all the time.

Lt. Irl Sonner of Petaluma, Calif., lost the use of his radio, and had to leave.

Lt. Max Barnes of Olympia, Wash., got dangerously low on gas, and Fecke sent him home. Gas shortage also sent back Lt. Bob Murray of Muncie, Ind.

That left only Lieutenant Fecke circling above the man in the boat, and Lt. Arnold Berner of Springdale, Ark., flying lone aerial escort for the rescue ship.

Finally the ship was past the bay entrance. The skipper began to have his doubts. He had to go within three miles of the gun-dotted island. He was within five minutes flying distance of land, and Jap planes could butcher him.

Furthermore he looked at his chart, and saw that he was in "restricted waters," meaning they were probably mined. It was certainly no place for a ship to be.

The skipper radioed Fecke and said he couldn't go any farther.

Fecke radioed back and said, "It's only two miles more. Please try."

The skipper answered and said, "Okay, we'll try."

And they pulled it off. They went right into the lion's mouth, pulled out our pilot, and got safely away. Then, and then only, did Fecke and Berner start home.

They came back to us three hours after all the rest had returned. They had flown six hours on a three-hour mission. But they helped save an American life by doing so.

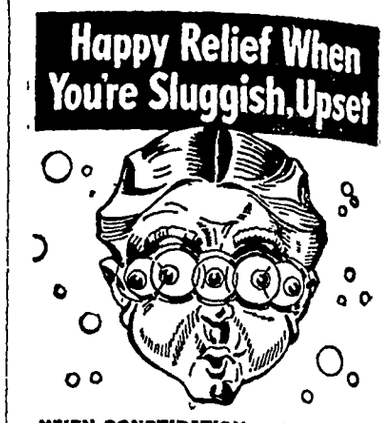
Carrier Pilots Land Almost on Dime

The first time you see a plane land on a carrier you almost die. At the end of the first day my muscles were sore just from being all tensed up while watching the planes come in.

It is all so fast, timing is so split-second, space is so small — well, carrier pilots just have to be tops.

Planes don't approach a carrier as they would on land—from way back and in a long glide. Instead, they almost seem to be sneaking up as if to surprise it. They're in such an awkward position and flying at such a crazy angle you don't see how they can ever land on anything.

But it's been worked out by years of experience, and it's the best way. Everything is straightened out in the last few seconds of flying. That is—if it works.



WHEN CONSTIPATION makes you feel punk as the dickens, brings on stomach upset, sour taste, gassy discomfort, take Dr. Caldwell's famous medicine to quickly pull the trigger on lazy "innards" and help you feel bright and chipper again.

DR. CALDWELL'S is the wonderful senna laxative contained in good old Syrup Pepsin to make it so easy to take.

MANY DOCTORS use pepsin preparations in prescriptions to make the medicine more palatable and agreeable to take. So be sure your laxative is contained in Syrup Pepsin.

INSIST ON DR. CALDWELL'S—the favorite of millions for 50 years, and feel that wholesome relief from constipation. Even finicky children love it.

CAUTION: Use only as directed.

Household Hints

Machine stitch the drawstring on pop's and junior's pajamas firmly at center back. Then it's less likely to become detached and get caught in the washer.

—•—

When convalescent children are able to sit up in bed they need a place upon which to draw or color. By opening only two legs of a folding card table, it may be placed over the side of the bed and will take the place of a bed tray.

—•—

If you thumb-tack waxed paper to the pastry board before rolling out the pastry, the dough won't stick.

—•—

To curl a feather that has been damaged by water, sprinkle it liberally with salt and shake before a fire or over a hot radiator until dry.

—•—

Clothes need a rest too. Don't wear the same thing day after day if you can avoid it.

—•—

Reinforce your heavy bath towels along each side with a binding of one-inch tape. Strengthens them for the hard pulling men and boys give them rubbing hard after shower baths.

SNAPPY FACTS ABOUT RUBBER

Proper inflation is a must for maximum tire service; and now we have reports of an ingenious post-war device which, through a series of lights on the car or truck dashboard, will warn the operator when the pressure in any tire is under what it should be.

"Ducks," the amphibious 2½-ton trucks now used by the Army, have tires that originally were designed by B. F. Goodrich for desert use. The tires have broad tread and are exceptionally flexible and light in weight. These desert tires which went to sea are rendering heroic service in the South Pacific and on the European battlefronts.

ONE WORD SUGGESTION FOR ACID INDIGESTION— "TUMS"

Bretton Woods Conference Laid Groundwork For a Stable International Monetary System

U. S. Postwar Exports Depend on Soundness Of Foreign Finances

By WALTER A. SHEAD
WNU Staff Correspondent.

Stripped of all technical verbiage, the proposals agreed upon by 44 United Nations at the Bretton Woods conference and which are considered an essential part of the world peace plan to be approved at San Francisco April 25, are designed to—

1.—Set up an international monetary fund with a working capital subscribed by 44 nations in gold and member currencies totaling 8.8 billion dollars of which the United States is to subscribe 2.75 billions. This fund is expected to stabilize and safeguard the value of foreign currencies in terms of gold, remove trade barriers in favor of open or reciprocal trade agreements to provide free and open trade among member nations.

2.—Organize an international bank for reconstruction and development with a subscribed capital of 9.1 billions of dollars of which the United States is to furnish 3.175 billions. Purpose of the bank is primarily to facilitate flotation of foreign loans in private capital markets by providing international guarantees and to make long-term capital loans direct to member nations for specific projects of reconstruction and development.

Why the need for these safeguards? Following World War I American investors took a beating, and in the late 1920s were caught in an epidemic of defaults by foreign debtors. Under the Bretton Woods proposals, these foreign loans would be investigated by the bank and then guaranteed as to principal and interest by the foreign government and the bank. Risks then, of international loans, would not fall on investors themselves, nor even on any one country, but upon all of the 44 member countries. Obviously the objective of this guarantee of loans is to encourage a substantial volume of private international investment which is essential to our own economic well being.

Great Need for Rebuilding.

France, Italy, Norway, Poland, Finland, Czechoslovakia, a large area of Russia, the Balkan nations, large sections of England, China, much of India and Burma, plus the Axis nations of Germany and Japan, have been laid waste by the war, their productive facilities prostrate, their currencies depreciated, and many years will be required for them to rebuild their export industries. They will require foreign capital to get under way.

In our own country we have a tremendously enlarged productive industrial plant. Our agricultural production has reached a new high of efficiency. After the war our economic policy will be aimed at full employment and full utilization of our agricultural and industrial facilities. To realize these aims new outlets for the products of farm and factory must be found and these prostrate foreign countries provide a ready market providing that American exports take the form of American investments abroad—good American dollars—for if these nations are to buy a large volume of our productive machinery, our industrial and agricultural products in the immediate postwar period, American investors will have to lend part of the purchase money. Under the functions of the international bank, these investors will have the assurance that these investments are sound and remunerative.

Under the operation of the monetary fund, as distinguished from the bank, for the protection of our investors, currencies in all these countries must be stabilized in terms of gold and at equitable rates of exchange. The United States holds 60 per cent of the world's gold supply. Economists point out there must be elimination of exchange fluctuations, of discriminatory exchange practices, of competitive currency depreciations, if the American dollar is to be protected.

For instance, how can the American farmer be protected in the world market if a sizable wheat producing country such as Russia and Argentina can resort to monetary action which places the wheat producers of those countries in a preferred position with respect to American wheat exporters? If the American farmer is to continue to export wheat or any other commodity, and to receive a fair price in good American dollars for the product he sells at home, he must know that the world price of wheat or other commodity in terms of our own dollars, will not be seriously disturbed by large fluctuations in the principal exporting and importing countries.

During a lull in the proceedings of the Bretton Woods conference, U. S. Secretary of the Treasury Henry Morgenthau (center) got into informal conversation with the Hon. J. L. Ilsey, minister of finance for Canada and chairman of that nation's delegation (left), and M. S. Stepanov, chairman of the Russian delegation. These chats helped to iron out many of the smaller problems.

Stabilized Currencies.

So the purpose of the international monetary fund is to stabilize and promote a balanced growth of international trade by stabilizing the value of all currencies in terms of each other; progressively remove barriers against making payments across boundary lines, such as high tariffs or other trade restrictions; and to provide a supplementary source of foreign exchange to which a member country may apply for the assistance necessary to enable it to maintain stable and unrestricted exchange relationships with other member countries.

For instance, in some countries importers are not permitted to purchase dollars required to buy goods in the United States. In other countries, of which Germany was an example before the war, foreign trade was disrupted by use of so-called multiple currencies, or barter arrangements, and during the war many new restrictions have been devised because of military necessity.

The operation of the monetary fund is intended to remove all these restrictions and set up a standard and uniform practice, currency value and exchange rates so that American business may have the greatest possible freedom in international trade in the postwar era. The same freedom is intended to be provided for business in the other countries, for freedom of business would be meaningless unless these other countries accorded an equal measure of freedom to their own people.

There has been criticism aimed at these proposals from some bankers on the grounds that they are contrary to sound and established banking practices. There has been praise and approval from other bankers.

As a matter of record, criticism from bankers, at least some banking groups, has been directed at any departure from established custom, that is, custom and practice established by the bankers themselves. For instance, some banking groups criticized bank deposit insurance. Criticism was aimed at government guaranteed loans on homes and farms; at 20-year loans on homes when the custom had been 3 to 5 years; at 4 and 5 per cent interest rates, when the practice had been 6 to 8 per cent and higher. These practices today, however, are an accepted part of our domestic economy.

Criticism from the larger international bankers has been directed at the Bretton Woods proposals, no doubt because governments will control fiscal and monetary policies on an international scale, and also because interest rates under these proposals will be lower.

U. S. Benefits Most.

Another criticism has been directed at the bank and the fund because the United States is the largest subscriber. It is argued here, however, that from any fair standard, this country should be the largest subscriber because we have more to gain than any other country. We have the money to lend, we have a large part of the world's gold and we have the facilities no other nation has to provide export goods in the immediate postwar period. Lastly, we have been untouched by the ravages of war insofar as our material wealth is concerned.

One of the most important groups to give approval to Bretton Woods proposals is the Committee for Economic Development, headed by Paul G. Hoffman, president of the Studebaker corporation. This group, made up of bankers, economists and business leaders would even give the international bank further power to make loans for long-term and short-term stabilization purposes, claiming that under the present regulations, the bank does not have that clear-cut power.

There have been some suggestions favoring the establishment of the bank, but suggesting that setting up and operation of the monetary fund be delayed until conditions abroad settle down to normality. It is pointed out, however, that the bank and the fund are closely related, both in concept and organization and that membership in the bank is open only to those who are members of the fund. It is also pointed out that the bank is, to a considerable extent, dependent upon the fund for the reason that the fund must first establish values of the moneys to be loaned by the bank if there is to be a smooth long-range planning and investment program.

While most sound economists agree there must be some system of international control or agreement after the war, the only alternative offered has been a system of bloc agreements. These are regarded by many as dangerous, since such bloc agreements likely would lead to a world divided politically and economically. Eventual conflict between these groups would be likely.

Chance for Leadership.

Pointing to the leadership the United States has maintained during the war, fiscal experts here declare that never before has this nation occupied such a key position or had such an opportunity to take over world leadership in the economic field. Governmental leaders, including Secretary of the Treasury Henry Morgenthau, look upon the Bretton Woods agreements as just as essential to world peace and security as the Dumbarton Oaks agreements. Secretary Morgenthau maintains they are inseparable. Hence his urgent appeal to the congress for legislation which will insure this nation's participation prior to the world parley at San Francisco April 25.

Acceptance by the congress of these agreements before convening of the delegates of United Nations at San Francisco, these leaders say, would be taken as a happy augury of this nation's sincerity. It would give notice to all that the United States, instead of choosing economic isolation, which would inevitably lead to political isolation, is already on record with a determination to do our part toward the attainment of world peace and security.

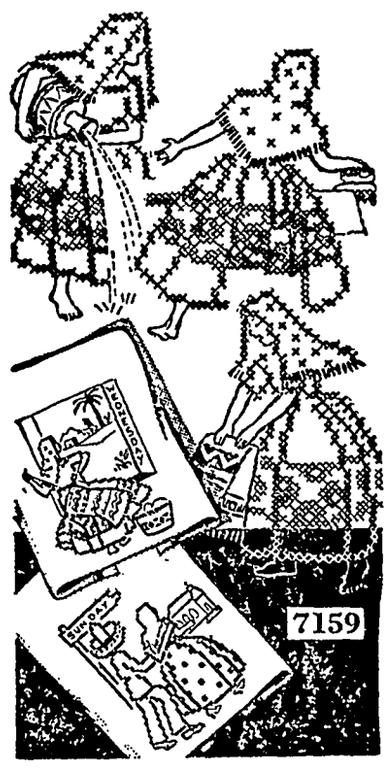
In a special message to the congress February 20, President Roosevelt, referring to the Bretton Woods proposals, said: "It is time for the United States to take the lead in establishing the principle of economic cooperation as the foundation for expanded world trade. We propose to do this, not by setting up a supergovernment, but by international negotiation and agreement, directed to the improvement of the monetary institutions of the world and the laws that govern trade . . . the international fund and bank together represent one of the most sound and useful proposals for international collaboration now before us."

And that is what the Bretton Woods proposals are designed to do . . . a product of the best minds of the 44 United Nations of the world.

Dr. H. H. Kung, minister of finance for China and chairman of the Chinese delegation, talks over international finance with Lord Keynes of England, famed economist and monetary authority, who heads the British group of delegates. Chinese currency has been devalued by inflation, a result of the long war with Japan. British bankers are concerned about Chinese financial stability, not only as part of the world monetary situation, but because of the extensive British business interests in China.

SEWING CIRCLE NEEDLECRAFT

'South of Border' Tea Towels



INDULGE in a riot of color in these "South of the Border" tea towels. Make gay caballeros and senoritas in cross-stitch.

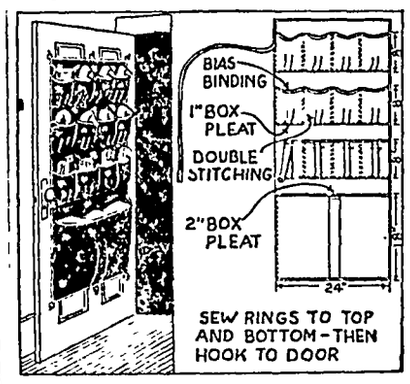
How to Cut and Make Door Pocket

HERE is extra closet space—a place for shoes, whisk broom, hat brush and other odds and ends including laundry. All you need to make this door pocket is 2½ yards of 36-inch-wide chintz, 8



yards of bias binding, 6 bone or plastic rings and 6 cup hooks.

First, cut a strip 8 inches wide from one side of the entire length of fabric; then cut this crosswise in three equal parts to make the shoe pockets. Now, cut the foundation piece 24 inches wide and 54 inches long. Cut the laundry pocket 18 inches deep, 28 inches wide.

* * *

NOTE—The door pocket shown here is from Book 4 of the series offered with these articles. This book contains more than 30 other ideas for things to make for your house and for gifts and bazaars. To get a copy of Book 4, enclose 15 cents with name and address direct to:

SCHOOL NEWS

FRESHMAN NEWS

—Mary Lou Netland

We wrote our last six weeks test and are getting ready for our semester test at the end of the year.

The girls baked angel food cake and sponge cake this week in the Home Economics class.

In Algebra we started working on fractions.

We started a new unit called "How The Human Engine Prepares Its Fuel," in General Science There will be some very interesting drawings in this chapter.

In English Class we are still working on subjunctive mood verbs.

JUNIOR HIGH NEWS

We are learning how to measure lumber in our Seventh Grade Arithmetic We have also drawn floor plans to scale this week

Eighth Grade Arithmetic this week has been chiefly about the measurement of the surface of cylinders and how to find the volume of prisms and cylinders.

In Civics we made a map of Hancock County, Friday. We are studying about county officers and their duties.

In Seventh English we have learned about the tenses of verbs while the Eighth Grade has been working on subordinate clauses.

FIFTH AND SIXTH GRADE NEWS

—Mrs. H. G. Voetberg, Teacher.

Richard Tiggerman was the only person in the Fifth Grade who was neither absent or tardy the past six weeks.

Charlotte Nuehring and Beverly Pringnitz were neither absent or tardy in the Sixth Grade this past six weeks.

In Fifth Grade Geography we are studying about Labrador and Newfoundland.

Adjectives seem to be the main topic of conversation in the Sixth Grade Language Class the past few days.

Thursday afternoon La Nelle Harvey brought the painting "The Last Supper," by Leonardo da Vinci to school. We learned many interesting things about the picture and the life of the artist.

In Sixth Grade History we have been studying the period of the Renaissance and this is one of the paintings of that period. We thank La Nelle very much for bringing the picture.

THIRD AND FOURTH GRADE NEWS

—Miss M. J. Holmes, Teacher.

The Fourth Grade reading class has finished their reading book, "Times and Places." We are now reading the book, "On The Trail of Adventure" We are finding the stories equally as interesting as the stories in our other book.

The Third Grade Science Class has been studying about things which make work easier. We have discussed the wheel, lever, pulley, and inclined plane.

Larry Stille has been absent most of the week because of illness.

KINDERGARTEN, FIRST AND SECOND GRADE NEWS

—Miss Arlene Bugh, Teacher.

The zinnia and radish seeds which we planted recently, have come up and are growing fast. It is fun to watch them.

In Number Class, the First grade has been reading "Counting Stories About Tubby Bear and Frisky Bear."

The Second grade children have been learning their number combinations and learning to analyze problems.

ELL TOWNSHIP FARM BUREAU MEETING HELD APRIL 12

The Ell Township Farm Bureau met at school number 3 on Thursday evening, April 12. for their regular meeting.

Attendance was not as large as usual due to the stormy weather. In the absence of the Chairman, Edwin Thieman, the Vice-Chairman, and Mrs. L. F. Weaver, presided. Following a short business meeting, Verner Stromer showed moving pictures of local and home events. Lunch was served by the Committee: Mrs. Clarence Greiman, Mrs. Roy Quintus and Mrs. Harvey Goll.

Mrs. Fred J. Arnold Hostess at To Bridge Club

The U-Delt-Em bridge club met Thursday afternoon at the home of Mrs. Fred J. Arnold.

High score in contract bridge was won by Mrs. A. J. Kudje; second high by Mrs. P. M. Wilson and third high by Mrs. Edna Thada Mrs. H. D. Ramsay was a guest

Fellowship Of Prayer

A Fellowship of Prayer Meeting is being held this Wednesday evening at the Henry Busse home at 8:00 o'clock, with Mrs. Elmer Arnold as leader. Bishop Brashares has requested that Methodists offer a prayer for the Conference at San Francisco.

Graydon Barz Patient At The Garner Nursing Home

Graydon, young son of Mr. and Mrs Harvey Barz, who received medical treatment at the Mercy Hospital at Mason City the past week, Sunday was removed to the Garner Nursing Home for care.

Graydon is ill with rheumatic fever.

Work Circle Of Methodist Church Will Meet

The Work Circle of the Methodist Church will meet at the church Thursday afternoon of this week. The ladies will work on a quilt and other sewing.

The hostesses are Mrs. Frances Ridder and Mrs Gerald Koerner.

SNAIL BUSINESS

Mrs. Sylvia Harrigan of Ida Grove has made profitable the hobby of raising snails Starting five years ago after receiving a four-gallon acquarium as a prize, Mrs. Harrigan purchased 2 goldfish, 3 snails and a few ecquatic plants. This year she expects to double sales over last year when she sold 750 of the snails. Mrs Harrigan's specialty is the Red Ramshorn variety. The four-gallon acquarium has been replaced by larger ones while in the summer the snails are placed in the out-of-doors fish pools and large water tank.

NO EXTRACTIONS

Ex-Senator J. E. Doze of Humeston recently celebrated his 91st birthday. Mr. Doze still has his complete set of natural teeth, with only one gold crown on a front tooth. The former Senator drives his car to and from the office each day and continues to keep many of his firm's records.

TWO TRIALS

....For the first time, at least for the first time in anyone's memory in Waverly, two cases were being tried before two judges in different rooms of the Bremer county courthouse at the same time. The two trials required a little extra work on the part of some for carrying law books up and down the stairs but otherwise went "off like a top."

NOTICE

In order to fill vacancy for Town Marshall and Commissioner position in the Town of Klemme, the Town Council will meet in special session April 20th at 8:00 p. m. to consider applicants, or application may be made by sealed bids addressed to the Town Clerk, Klemme. Iowa, stating salary per month. (2tc) A. J. Kudje, Clerk.

NO DEER!

Neal Boerman, Inwood, wasn't out after a deer but he got one anyway in a round-about way. A deer came in contact with the car driven by Boersma on the highway near Canton, South Dakota, and came out the loser. Mr. and Mrs. Boersma escaped injury in the accident. A game warden called from Sioux Falls handled the details of disposing of the dead deer. A man from Minnesota topped Boersma's bid for the animal so the Boersma's hadn't much evidence to show that they had really "gotten" a deer.

MASCOT

"Pepper" is taking a long plane ride on a B-24. "Pepper" was given by Emil F Runft, breeder of several kinds of dogs at Reinbeck, to Cpl. John Blohm. Blohm advised Mr Runft that the group of men he was with at Topeka, Kansas, were going overseas soon and wished to buy a dog to take with them as their mascot. "Pepper," so named by the fliers, is a Fox Terrier and is now probably somewhere overseas doing his bit in the war effort.

LIBERTY 4-H BOYS ENTERTAIN TOWNSHIP FARM BUREAU

The Liberty Boys 4-H Club put on a very good minstrel show at the Liberty Farm Bureau meeting. Vocal solos were given by LeRoy Bredlow, Leon Griffen and Donald Schaefer. Donald Schaefer and LeRoy Bredlow also gave a duet.

LeRoy Bredlow acted as interlocutor and the endmen were Albert Kern, Joey Kern, Leon Griffen, Donald Schaefer, Ronald Bredlow and Derwood Helmke.

Ronald Bredlow whistled one number. Marjorie Greiman accompanied the boys on the piano.

The whole club presented group vocal numbers.

Everyone enjoyed the special County Store setting of the first act.

PAUL MUELLER WIN

Paul Mueller, former buttermaker, now employed Beatrice Creamery Co., se, recently entered a c tween the employees of on suggestions for imp and efficiency and econo eration. Mr. Mueller's for him 4 prizes amount in cash. Over 4,000 em the company in Iowa e contest.

Mr. Mueller was for ployed by the Klemme tive Creamery Co. and the firm 22 years, the which he was manager

The Muellers have p home in Des Moines at Street, where they will ter their son, Herbert, in the Klemme High S of 1945.

Notice To Coal Consume

FIRST—we want to thank you for the coal and other business you gave us in the past year. Also, we want you to know that we are thinking again about your coal needs for the 1945-1946 season.

AS YOU KNOW—Coal will be RATIONED from April 1, 1945 through March, 1946. The rationing is to be done by the retail dealer and the consumer. When placing an order with the dealer, the consumer is to make his declaration to show the amount of coal he burned the previous year. From these figures he will be entitled to 80% of the amount he used during the past season. Of this 80% he is entitled to 50 per cent between April 1st and September 1st, and the balance of the coal to be delivered during the remainder of the season.

WE APPRECIATE—that it will take patience on everybody's part to handle this coal situation, but with your cooperation it can be done, and we believe it will work out.

WE URGE YOU to come in and out your "Consumer Declaration" as possible and get your order early so the allowable portion can livered during the coming month whenever the mines can ship.

WE URGE YOU to come in at on make out your "Consumer Declar When you fill out this form also your order for your year's quota which will be 80% of what you or ly use. The Consumer Declaration be filed before May 15, 1945. On dealers have these forms.

PENALTY for making false sta or representation as to the amo coal used as basis for quota is fine or 10 years' imprisonment or

AGAIN we want to thank you f coal business given us. We wa to know that we are thinking abo and, as always, your business is appreciated.

On motion and second the Board adjourned to April 9th at 9 o'clock a.m.

PENN ECKELS, Chairman

ATTEST: FRED C. MISSAL,
County Auditor.

1ST. ADJOURNED APRIL MEETING

Garner, Iowa, April 9, 1945

The Hancock County, Iowa, Board of Supervisors met in session on above date with F J Schoun, Penn Eckels and John Chambers present

The minutes of the last meeting were read and approved as read.

On motion and second Workmens' Compensation Policy No W. C. No. 231724 is approved

On motion and second the bond of Arthur Chelsvig, Township Clerk, is approved.

On motion and second the bond of Contractors Needles and Cummins on the construction of D D No. 138 is approved.

Supervisor Schoun is appointed a committee to investigate and cause repairs to be made in D D No 102, lateral No. 150.

Supervisor Eckels is appointed a committee to investigate and cause repairs to be made in D D No. 46-3 No. 24 Main.

WHEREAS, C F. Merten has filed reports recommending the construction of nine wooden bridges and the surfacing and resurfacing of certain Hancock County, Iowa, roads with gravel and it is deemed necessary to carry out the recommendation of the Engineer.

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, that the report of the Engineer be approved and that lettings be held on the construction of 9 wooden bridges at the Courthouse in Garner, Iowa, at 2 P. M, on the 23rd day of April, A. D., 1945. The County Auditor be and he is hereby directed to cause notice of said letting to be published in the Klemme Times setting out the type and kind of bridges to be built, that material will be furnished by the County, the time of commencement and completion. A bond will be required by the successful bidder as provided by Iowa law.

IT IS FURTHER RESOLVED that a letting be held on the surfacing and resurfacing of certain Hancock County roads with gravel, letting to be at the Courthouse in Garner, Iowa, on April 23, A. D., 1945, at 1:30 P M.

The County Auditor be and he is hereby directed to cause notice of said letting to be published in the Britt News Tribune setting out the time and place of letting, the amount and kind of work to be performed, the time for commencement and completion and that the successful bidder will be required to file a surety bond as by law directed. The Board reserves the right to waive technicalities and to reject any or all bids at both lettings.

This being the 9th day of April a date heretofore set for a letting on labor and material for the construction of D. D. No. 138, the hour for said letting having arrived, the proof of publication being on file and the Board being fully advised, said letting was held as scheduled. The chairman proceeded to open all bids on file and after duly considering all bids on file the bid of Needles and Cummins of Greenfield, Iowa, was found to be the lowest and best bid for the construction of Sec. A 1, D. D. No. 1 and 2, Lat. No. 4 open ditch cleanout and Sec. 1 subsection and section 2, subsections 1 and 2 of D. D. No. 138 open ditch excavation.

On motion by Schoun and seconded by Chambers the bid of Needles and Cummins for said construction.

Chairman Penn Eckels is hereby authorized to execute said contract in behalf of Hancock County, Iowa. All other bids are hereby rejected.

In the matter of bids for material, there was one bid on file and letting on material is being held pending the successful negotiation for labor to construct tile mains and laterals.

On motion and second Needles and Cummins of Greenfield, Iowa, are hereby awarded a contract for extra work on Section A 2 and Section 1, subsection 2, 3 and 4 of D. D. No. 138, Hancock County, Iowa, and Chairman Penn Eckels is hereby authorized to execute said contract in behalf of Hancock County, Iowa.

The foregoing resolution was offered and read by Supervisor Schoun who moved its adoption, seconded by Supervisor Chambers, whereupon the Chairman placed the motion of its adoption and upon roll call the vote thereon is F. J. Schoun, Penn Eckels and John Chambers, aye. Nays none.

This being the 9th day of April A. D., 1945, a date heretofore set for a hearing on the proposed establishment of D .D. No. 139, a sub district of Drainage District No. 1 and 2, Hancock County, Iowa, petitioned for by Abe Mezvinsky, and the report of the Engineer, recommending said establishment the hour for said hearing having arrived, the Proof of Publication being on file and the Board being fully advised, said hearing was held as scheduled.

The objections to said establishment were read by the County Auditor and objectors were heard by the Board and after due consideration given, the Board finds that the petitioner did not comply with section 7490, Code of Iowa, 1939, in filing his petition and does have access to the main open ditch without crossing the lands of others, and is afforded an outlet as intended in the drainage laws of Iowa, and the Board further finds that the construction of D. D. No. 139, a sub-district of D. D. No. 1 and 2, Hancock County, Iowa, will not be conducive to public health, benefit and convenience and if said district be established and constructed, same may prove to be confiscatory to some lands through which said proposed district is to be established.

THEREFORE, the Hancock County, Iowa, Board of Supervisors hereby resolve to deny and reject the petition of A. Mezvinsky for the establishment of Drainage District No. 139, a sub-district of D. D. No. 1 and 2, Hancock County, Iowa, and the report of the Engineer, recommending such establishment is also rejected and denied.

The foregoing resolution was offered and read by Supervisor Frank Schoun, who moved its adoption, was seconded by Supervisor John Chambers, whereupon the Chairman, Penn Eckels, placed the motion for adoption and upon roll call the vote thereon is F. J. Schoun, Penn Eckels and John Chambers, aye. Nays none.

On motion and second the Board adjourned to April 23, A. D., 1945, at 9 o'clock A. M.

PENN ECKELS, Chairman.

ATTEST: FRED C. MISSAL,
County Auditor.

Evangelical & Reformed Guild Meets April 25th

The Womens Guild of the Evangelical & Reformed Church will meet at the church on Wednesday afternoon, April 25th at 2:00 o'clock.

The hostesses are Mrs. Naska Bock and Mrs. C. J. Wille.

Your 1945 Garden

Good Practices Produce Better Paying Yields

EVERY Victory garden should be tailored individually to the family it is expected to feed and to the space available for gardening.

In planning the 1945 garden every gardener will do well if he looks over the experience of the past year or two and tries to meet more nearly the appetites and food preferences of his own family. If any crop went to waste because the family did not care for the product, it is good gardening to omit it entirely in this year's planting or to cut it down to what the family will use. Use the space saved to grow something that is in demand.

GARDEN IN 1945 FOR VICTORY

First of all in planning the garden, a plot of land suitable for a town, or even a country garden, must be in the open where it can get direct sunlight at least six hours a day with no obstructing trees or buildings.

The plot must be well drained. A rich, deep sandy loam free from debris is the best all-purpose garden soil, but such an ideal is rarely found. Unless a soil is of such character that it can be spaded in the spring into a loose crumbly condition, it will be difficult to work, if not definitely unsuited, to vegetable growing. Land that is nearly level is best because it is easier to work and is less likely to be damaged through washing by heavy rains.

Convenience of the garden location is more important than might

It is first important that definite plans be laid out for the garden.

be supposed. It should be as close to the home as a suitable place can be found because the garden needs some attention almost every day. Even when it is too wet to plant or cultivate, the gardener should see it every day or two so as to follow all developments and know in advance what work needs to be done. Timeliness is a surprisingly large element in a successful garden.

There is no one "right" way to arrange or plan a home garden. The gardener is urged to consider his own needs, the climate of his locality and his own particular garden spot in planning and arranging his garden. Conditions and details of methods of growing plants differ so widely over the country that it is impossible to give a uniform plan of growing vegetables that would fit all sections of the country.

A garden much longer than it is wide is generally more convenient to work. It matters little whether the rows run north or south, east or west, but on a sloping area it is important that the rows run across the slope, not up and down, so that rainfall may be held on or in the soil, instead of running down the sloping rows, carrying away the soil.

Plan Garden To Suit Needs

The most successful gardener plans his garden well in advance. A good sized sketch or map of the plot should be drawn, preferably to scale, so that the time and space each crop will occupy can be set down. Particular attention should be made to replanting. For instance after harvesting beans, turnips, beets, carrots should be sown. The idea is to keep the ground constantly producing until frost.

Most gardeners are prone to plant too much of early crops with the result that some are wasted. A succession of varieties or of plantings will give a much longer period of harvest from the same total amount planted.

Particular care should be taken that tall growing crops like corn or tomatoes will not shade the smaller crops, such as beets or radishes. Then perennial plants, such as asparagus, rhubarb and various savory herbs, should be kept together at one side of the garden where they can be conveniently handled without interfering with the portion to be plowed or spaded each year.

Where there is any great variation in the composition of the soil in different parts of the garden, it will be advisable to take this into consideration.

If a part of the land is low and moist, such crops as celery, onions, and late cucumbers should be placed there. If part of the soil is high, warm and dry, there is the proper location for early crops and those that need quick, warm soil. Permanent crops, such as asparagus, should be located where they would not interfere with regular cultivation.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for April 22

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

THE FOUNDING OF THE NATION

LESSON TEXT—Exodus 18:19-24; 19:3-8.
GOLDEN TEXT—Righteousness exalteth a nation; but sin is a reproach to any people. —Proverbs 14.34.

God has a purpose for the lives of men and of nations. Happy are those who seek His guidance so that their lives may be directed in right and useful channels.

God's threefold purpose for Israel, which we noted in our lesson of last week, could only be worked out in a nation which was separated unto Him, following holiness in its life and service

Moses, one of the greatest and most able figures of all history, was God's appointed leader. His success is explained by his willingness to follow God's leading. He sought:

I. God's Counsel (18:19).

Jethro, the father-in-law of Moses, having observed how he was burdened constantly by the affairs of the people, came to offer him advice. He started in the right place, by urging Moses to continue to seek God, yes, to spend even more time in the Lord's presence, asking His wisdom and guidance.

No man can lead a people in the right way if he does not have his own life in constant touch with the throne of God Much of the failure of our day centers right there. We talk much to other men about our national and international problems. There are multiplied meetings and conferences. They do have value, but very little, unless there is a seeking of God's will.

A day of national repentance and prayer would do more for us than many weeks of discussion and debate. We need to seek God's counsel.

Note that the coming of Moses to God concerned the daily affairs of his people. That reminds us that not only the life of our nation, but that of our own homes—and our personal beings—all need God's counsel.

To aid Moses in administering the affairs of the nation, Jethro recommended the appointment of men who were to serve as:

II. God's Counselors (18:20-24).

There has been not a little criticism of Moses for accepting this advice. It is pointed out that when God puts heavy burdens on us, the way out is not to shift the load on someone else, but to seek God's special grace to bear it and to do it acceptably.

There is value in such an interpretation; but when one considers the devout and careful approach of Jethro to the matter (vv. 9-12) and his evident desire to glorify God in it all, there is ground for believing that he was giving Moses good advice.

The great unorganized host of possibly two million people were going through a very difficult experience. The result was dissension and strife, often over trivial things, which needed to be settled. For all this to come to Moses seemed undesirable; therefore other men were chosen to be counselors to the people, interpreting for them the law and the will of God.

While each of us should carry every God-given responsibility with gladness, that does not mean that we are to assume that only we are able to do things. There is no more tragic figure than the pastor or church officer who tries to do everything. Why not put others to work?

How can our young people and new converts ever find a place of service if older Christians hold on to every job in the church? Let us train them; then trust them with real responsibility. Counsel, encourage, pray, direct if need be, but do not try to do it all yourself!

Now we come to the solemn and crucial moment when God was ready to establish His people and they were ready to accept:

III. God's Covenant (19:3-8).

In the sacred and awe-inspiring meeting place before Mount Sinai, where the Lord was to give them His law (Exod. 20), they made a solemn covenant with God.

In preparation for it He reminded them of what He had done for them in the past. God is the unchanging One. If He was tender and gracious toward them in the past, they could enter the future confident of His blessing. And so may we!

Note verses 5 and 6, for they give us God's great purpose for Israel. All they had to do was to obey His voice by keeping His covenant. This they, in solemn assembly, agreed to do (v. 8). How different their history—and that of the world—would have been had they kept their promise.

We lament their failure, but what about us who are so highly favored that we have Christ in our midst? Are we obedient?

Following the making of the covenant (which God will one day fulfill in spite of their failure), we have the giving of the Ten Commandments, and the establishment of Israel's center of worship in the tabernacle. It was the dwelling place of God among His people. How precious!

SEWING CIRCLE PATTERNS

Jumper-Jacket for Sports, Street

Jumper-Jacket

VERSATILE and a well-loved style is the jumper-jacket. For sun-tanning, gardening and sports, wear the slim princess dress—the jaunty jacket makes an attractive outfit for street wear.

Pattern No. 1306 is designed for sizes 12, 14, 16, 18, 20; 40 and 42. Size 14, dress, requires 2⅞ yards of 39-inch fabric; jacket, short sleeves, 1¾ yards; 3½ yards ric rac to trim.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Send your order to:

Partners Couldn't Tolerate Each Other, Yet Succeeded

One of the strangest partnerships was that of Gilbert and Sullivan who, between 1871 and 1896, collaborated as librettist and composer respectively in producing 14 of the most popular and profitable operas in musical history. Owing to their low regard and intense dislike for each other, these men rarely met, preferring to "work together" through the mail.

Three times, in fits of anger, they broke off their partnership and tried collaborating with new associates, only to find that neither could produce a successful work without the other.

ASK ME ANOTHER?
A General Quiz

The Questions

1. Why are dykes used in Holland?
2. From what tribe of Indians did the Dutch purchase the site of New York City?
3. What is a poltroon?
4. Were the army and navy the first to have lieutenants?
5. Military training in peacetime is compulsory in how many major countries?
6. In what country is Sanskrit the language?

The Answers

1. The land is below sea level.
2. The Manhattans.
3. A coward.
4. No. Lieutenant means anyone who has authority in place of a superior and was used first to mean those serving the government or the church.
5. In 45 major countries, while it is voluntary in only 10, including Australia, Canada, Great Britain and the United States.
6. Sanskrit is the principal literary language of India.
